Ref. 016.54492 DEY 1971-1973

CONTENTS

Introduction 1

GENERAL PART 7
General reviews and books 9
Books on column chromatography (1–38) 9
Reviews on column chromatography (39–172) 11
Reviews on the application to various fields of applied science and technology (173–215) 18
Teaching of column chromatography (216–222) 20
Principles, theory and information of general interest in column chromatography 21
History and nomenclature (223–236) 21
Theory of column separation (237–315) 21
Mechanisms of separation and development phenomena 26
Extent of separations, peak capacity, conditions for optimum resolution (316–358) 26
Liquid–solid and liquid–liquid partition (359–389) 29
Ion-exchange chromatography (390–400) 31
Molecular sieving and gel permeation chromatography (401–440) 32
Relation between molecular properties and chromatographic behaviour 35
Subjects of general interest, low-molecular-weight compounds (441–458) . . . 35
Molecular-weight determination of macromolecular compounds, calibration procedures (459–476) 36
Molecular-weight determination of macromolecular compounds, applications (477–490) 37
Techniques of column chromatography 39
Laboratory devices for column chromatography 39
General topics (491–497) 39
Columns and colum accessories (fittings, tubings, devices for column packing, pumps, devices for flow measurement) (498–539) 39
Gradient forming devices and devices for stepwise elution (540–549) 42
Sampling devices and sample application (550–556) 42
Fraction collectors (557–565) 43
Devices for recording and detection (566–626) 43
Unusual and new arrangements in column chromatography (627–666) 47
Devices and procedures for large scale operations (667–682) 49
Supporting materials and ion exchangers 50
Silica gel, alumina and other inorganic supporting materials (683–728) 50
Inorganic ion exchangers (729–751) 53
Controlled porosity supports, glass beads (752–766) 55
Organic gels and organic supporting materials (767–842) 56
Ion exchangers of organic nature (843–864) 61

Affinity chromatography, steric chromatography, on column reactions (865–921) . . . 63
Other sorbents and supporting materials, resin fractionation (922–929) . . . 67
Elution . . . 67
Gradients and solvent systems. Choice and calculation (930–946) . . . 67
Tandem arrangement and recycling (947–950) . . . 68
Detection procedures (951–956) . . . 69
Automated separation and automated analyzers (957–978) . . . 69
Continuous column chromatography (979–983) . . . 71
Comparison of column chromatography with other separation techniques (984–999) . . . 71
Influence of physical parameters on separation (column dimensions, pH, temperature, degree of bed compression) (1000–1023) . . . 72
Quantitative analysis and data treatment in column chromatography (1024–1054) . . . 74

SPECIAL PART, APPLICATIONS . . . 77
Hydrocarbons . . . 79
General techniques (1055–1060) . . . 79
Aliphatic hydrocarbons (1061–1068) . . . 79
Cyclic hydrocarbons (1069–1163) . . . 80
Applications. Hydrocarbons in crude oils, coal tar, cigarette smoke and other complex mixtures (1164–1198) . . . 87
Halogen derivatives of hydrocarbons (1199–1233) . . . 90
Boranes (1234–1246) . . . 93
Silanes (1247–1251) . . . 94
Alcohols . . . 95
Aliphatic alcohols (1252–1261) . . . 95
Glycols (including polyglycols) (1262–1271) . . . 96
Cyclic alcohols (1272–1287) . . . 96
Phenols . . . 98
Synthetic applications (1288–1317) . . . 98
Biological applications (1318–1329) . . . 100
Ethers (1330–1342) . . . 102
Organic peroxides and ozonides (1343–1350) . . . 104
Oxo compounds . . . 105
Aliphatic aldehydes and ketones (1351–1370) . . . 105
Cyclic aldehydes and ketones (1371–1447) . . . 106
Lignin chemistry (1448–1471) . . . 111
Quinones (1472–1486) . . . 113
Ubiquinones, coenzyme Q, plastoquinones (1487–1496) . . . 114
Anthraquinones and anthrones (1497–1508) . . . 115
Carbohydrates . . . 117
Reviews (1509–1510) . . . 117
Techniques and automated analysis . . . 117
General techniques of carbohydrate chromatography (1511–1541) . . . 117
Automated analysis of sugar mixtures (1542–1544) . . . 119
Applications . . . 119
Synthetic applications (1545–1552) . . . 119
Carbohydrates and polysaccharides in microorganisms (1553–1576) . . . 120
Carbohydrates and polysaccharides in plants, food and vegetable products (1577–1602) . . . 122
Carbohydrates in animal material (1603–1615) . . . 124
Carbohydrate derivatives . . . 125
Sugar alcohols (1616–1626) . . . 125

Acids and lactones of the carbohydrate series . . . 126
Automated analysis (1627–1629) . . . 126
Applications (1630–1655) . . . 126
Deoxy sugars (1656–1692) . . . 128
Methylated sugars, alkyl and acyl sugar derivatives, sugar esters and methyl glycosides (1693–1724) . . . 130
Amino sugars . . . 133
Techniques and automated procedures (1725–1729) . . . 133
Synthetic applications (1730–1756) . . . 133
Amino sugars in biological material (1757–1766) . . . 135
Sulphur-containing carbohydrates excluding glycosaminoglycans (1767–1780) . . . 136
Sugar phosphates (1781–1788) . . . 137
Glycosaminoglycans (1789–1833) . . . 137
Glycoproteins and glycopeptides . . . 140
General techniques (1834–1835) . . . 140
Glycoproteins and glycopeptides in microorganisms and plants (1836–1859) . . . 140
Glycoproteins and glycopeptides in blood, plasma, serum and blood cells (1860–1881) . . . 142
Glycoproteins and glycopeptides of saliva and the gastrointestinal tract (1882–1899) . . . 144
Glycoproteins and glycopeptides from aorta, glomerular basement membrane and connective tissue (1900–1926) . . . 145
Glycoproteins and glycopeptides in other biological material (1927–1965) . . . 147
Structure investigation of oligo- and polysaccharides . . . 150
Structure of microbial, vegetable and invertebrate polysaccharides (including cellulose) (1966–1984) . . . 150
Hemagglutinins, blood group determining substances and related compounds (1985–2011) . . . 152
Other derivatives of carbohydrate nature (2012–2024) . . . 154
Carboxylic acids . . . 155
Techniques and automated analysis . . . 155
Reviews (2025–2028) . . . 155
General techniques and automated analysis of carboxylic acid chromatography (2029–2041) . . . 155
Lower carboxylic acids . . . 156
Review (2042) . . . 156
Applications (2043–2050) . . . 156
Derivatives of lower carboxylic acids (2051–2058) . . . 157
Higher carboxylic acids (2059–2068) . . . 158
Derivatives of higher carboxylic acids (2069–2081) . . . 158
Aliphatic hydroxy acids, di- and tricarboxylic acids . . . 159
Techniques and automated analysis . . . 159
General techniques (2082–2085) . . . 159
Automated analysis (2086–2087) . . . 160
Applications . . . 160
Synthetic applications (2088–2093) . . . 160
Aliphatic hydroxy, di- and tricarboxylic acids in biological material (2094–2110) . . . 160
Derivatives of aliphatic hydroxy acids, di- and tricarboxylic acids (2111–2126) . . . 162
Keto acids (2127–2141) . . . 163
Cyclic acids . . . 164

Techniques (2142–2151) . . . 164
Applications (2152–2157) . . . 165
Derivatives of cyclic acids (2158–2198) . . . 166
Prostaglandins (2199–2217) . . . 168
Gibberellins (2218–2231) . . . 170
Lipids . . . 171
Reviews (2232–2236) . . . 171
Techniques and automated analysis (2237–2252) . . . 171
Applications . . . 172
Synthetic applications including oxidation products of lipids (2253–2261) . . . 172
Lipids in biological material (2262–2289) . . . 173
Glycolipids (2290–2305) . . . 175
Lipopolysaccharides (2306–2319) . . . 176
Cerebrosides and gangliosides (2320–2329) . . . 177
Phospholipids (2330–2376) . . . 178
Lipoproteins and proteolipids (2377–2410) . . . 181
Waxes (2411–2414) . . . 184
Compounds containing heterocyclic oxygen . . . 185
Epoxides (2415–2418) . . . 185
Furans (2419–2446) . . . 185
Coumarins and isocoumarins (2447–2459) . . . 187
Derivatives of γ-pyrone . . . 188
Chromones (2460–2481) . . . 188
Flavonoids . . . 189
Techniques and automated analysis (2482–2486) . . . 189
Synthetic applications (2487–2499) . . . 190
Flavonoids in plants (2500–2531) . . . 191
Xanthones (2532–2538) . . . 193
Anthocyanes (2539–2543) . . . 193
Iridoides (2544–2549) . . . 194
Aflatoxins and mycotoxins (2550–2566) . . . 194
Cannabis constituents (2567–2580) . . . 195
Various oxygen-containing heterocycles (2581–2631) . . . 196
Steroids . . . 201
Reviews and general techniques (2632–2656) . . . 201
Estrogens . . . 203
General techniques (2657–2665) . . . 203
Applications . . . 203
Synthetic applications (2666–2685) . . . 203
Estrogens in biological material (including enzymic transformations) (2686–2709) . . . 205
Androstanes . . . 206
General techniques (2710–2712) . . . 206
Applications . . . 207
Synthetic applications (2713–2738) . . . 207
Enzymic transformations of androstanes (2739–2743) . . . 208
Androstanes in biological material (2744–2757) . . . 209
Pregnanes . . . 210
General techniques and automated analysis (2758–2770) . . . 210
Applications . . . 211
Synthetic applications (2771–2802) . . . 211
Pregnanes in biological material (2803–2813) . . . 213
Bile acids and other acids of steroid nature . . . 214
General technique (2814) . . . 214

Applications 214
Synthetic applications (2815–2817) 214
Bile acids and other acids of steroid nature in biological material (2818–2826) 215
Sterols 215
General techniques (2827–2829) 215
Applications 216
Synthetic applications (2830–2863) 216
Enzymic transformations of sterols (2864–2872) 218
Sterols in biological material (2873–2888) 219
Ecdysones and other insect steroid hormones (2889–2891) 220
Steroid glycosides and related compounds 221
Cardiac and other plant glycosides and their genins 221
Applications 221
Synthetic applications (2892–2900) 221
Cardiac and other plant glycosides in biological material (2901–2911) 221
Saponins and sapogenins 222
Applications 222
Synthetic applications (2912–2913) 222
Saponins and sapogenins in biological material (2914–2928) 222
Animal venoms of steroid nature (2929–2931) 224
Other steroid glycosides (2932–2936) 224
Terpenes 225
Monoterpenes 225
Applications 225
Synthetic applications (2937–2952) 225
Monoterpenes in biological material (2953–2959) 226
Sesquiterpenes 227
Applications 227
Synthetic applications (2960–2981) 227
Sesquiterpenes in biological material (2982–3026) 228
Lac acids and sesquiterpenic constituents of lac resins (3027–3033) 231
Diterpenes 232
Applications 232
Synthetic applications (3034–3052) 232
Diterpenes in biological material (3053–3067) 233
Triterpenes 234
General techniques (3068–3070) 234
Applications 234
Synthetic applications (3071–3092) 234
Triterpenes in biological material (3093–3126) 236
Natural acetylenic compounds (3127–3142) 239
Pheromones and other compounds with insect hormone activity (3143–3145) . . . 241
Amines 242
Techniques and automated analysis (3146–3162) 242
Applications 243
Synthetic applications (3163–3190) 243
Amines in biological material (3191–3196) 245
Aliphatic polyamines and their derivatives (3197–3205) 246
Aliphatic amino alcohols, choline, sphingosine, sphingolipids and related compounds 246
General techniques (3206–3210) 246
Applications 247
Synthetic applications (3211–3214) 247

Aliphatic amino alcohols, choline, sphingosine and sphingolipids in biological material (3215–3230) . . . 247
Tryptophan metabolites (3231–3235) . . . 248
Sympathomimetic amines and related compounds . . . 249
Techniques and automated analysis (3236–3243) . . . 249
Applications (3244–3249) . . . 250
Other non-heterocyclic nitrogen compounds . . . 251
Urea, thiourea and guanidine derivatives (3250–3264) . . . 251
Hydrazones, oximes and related compounds (3265–3273) . . . 252
Nitrosamines and N-halogenamines (3274–3279) . . . 253
Azides and diazo compounds (3280–3287) . . . 253
Aromatic hydrazo, azo and azoxy compounds (excluding dyes) (3288–3299) . . . 254
Nitro compounds . . . 255
Aliphatic and alicyclic nitro compounds (3300–3305) . . . 255
Aromatic nitro compounds (3306–3321) . . . 255
Amino acids . . . 257
Reviews (3322–3324) . . . 257
General techniques of amino acid chromatography (3325–3380) . . . 257
Automated analysis of amino acid mixtures (3381–3418) . . . 261
Identification of unusual amino acids in automated chromatography (3419–3436) . . . 264
Applications (3437–3476) . . . 265
Amino acid derivatives . . . 269
Amino group derivatives of amino acids (3477–3505) . . . 269
O-Substituted hydroxy amino acids (3506–3508) . . . 271
Amino acid derivatives with a modified sulfur function (3509–3514) . . . 271
Iodinated amino acids (3515–3536) . . . 272
Metal complexes of amino acids (including EDTA) (3537–3571) . . . 273
Other amino acid derivatives and unusual amino acids . . . 276
Synthetic applications (3572–3607) . . . 276
Other amino acid derivatives and unusual amino acids in biological material (3608–3657) . . . 278
Peptides . . . 283
Review (3658) . . . 283
General techniques (3659–3683) . . . 283
Automated analysis (3684–3689) . . . 285
Applications . . . 285
Synthetic applications (3690–3762) . . . 285
Peptides in microorganisms, plants and food products (3763–3769) . . . 291
Peptides in animal material (3770–3782) . . . 292
Elucidation of the primary structure of peptides and proteins . . . 293
Reviews (3783–3785) . . . 293
Structural studies on bacterial and plant proteins (including cytochromes and ferredoxin) (3786–3811) . . . 293
Structural studies on invertebrate proteins (3812–3819) . . . 295
Structural studies on vertebrate proteins . . . 296
Structural studies on proteins of blood, plasma, serum and blood cells (except hemoglobins) . . . 296
Structure of immunoglobulins (3820–3881) . . . 296
Fibrinopeptides and structure of clotting related proteins (3882–3892) . . . 301
Structure of other proteins of blood (3893–3903) . . . 302
Structural studies on structural proteins except contractile elements (3904–3953) . . . 303

Structural studies on protamines, histones and other nuclear proteins (3954–3966) . . . 306
Structural studies on chromoproteins and metalloproteins (3967–3994) . . . 307
Structural studies on proteins of brain, cerebrospinal fluid and eyes (3995–4003) . . . 310
Structural studies on proteins of muscle and meat products (4004–4027) . . . 310
Structural studies on proteins in gland secrets (including proteinous hormones) (4028–4079) . . . 312
Structural studies on milk proteins (4080–4087) . . . 316
Structural studies on other proteins of animal origin (4088–4094) . . . 317
Structural studies on enzymes . . . 317
Structural studies on oxidoreductases (4095–4114) . . . 317
Structural studies on transferases (4115–4135) . . . 319
Structural studies on hydrolases (4136–4180) . . . 321
Structural studies on lyases (4181–4201) . . . 324
Structural studies on isomerases and ligases (4202–4204) . . . 326
Proteins . . . 327
Reviews (4205–4209) . . . 327
Techniques and automated analysis (4210–4236) . . . 327
Applications . . . 329
Proteins of subcellular particles (plastides, mitochondria and proteins of cell membranes except blood cells and platelets) (4237–4261) . . . 329
Bacterial and plant proteins . . . 331
Wheat proteins (4262–4278) . . . 331
Enzymic inhibitors and related proteins of bacterial and plant origin (4279–4295) . . . 332
Bacterial and plant toxins (including proteins of pathogenic micro-organisms) (4296–4332) . . . 333
Metalloproteins and cytochromes of bacterial and plant origin (4333–4378) . . . 336
Other proteins of bacterial and plant origin (including specific binding proteins and plasmodial contractile proteins) (4379–4447) . . . 339
Invertebrate proteins . . . 344
Invertebrate hemoglobins, hemocyanins and other metalloproteins (4448–4460). . . . 344
Other proteins of invertebrates (4461–4484) . . . 345
Vertebrate proteins . . . 346
Proteins of blood, plasma, serum and blood cells (except hemoglobins) . . . 346
Immunoglobulins (4485–4547) . . . 346
Fibrinogen, fibrin, thrombin and clotting related proteins (4548–4604) . . . 351
Specific binding proteins (4605–4645) . . . 355
Proteins of erythrocytes and blood platelets (4646–4670) . . . 357
Other proteins of blood and complex mixtures of blood proteins (4671–4723) . . . 359
Structural proteins (except contractile elements) (4724–4771) . . . 363
Protamines, histones and other nuclear proteins (4772–4811) . . . 366
Chromoproteins and metalloproteins . . . 369
Hemoglobin (4812–4852) . . . 369
Transferrin and ferritin (4853–4868) . . . 372
Myoglobin (4869–4873) . . . 373
Cytochromes in vertebrates (4874–4885) . . . 373
Ceruloplasmin (4886–4888) . . . 374

Proteins of brain, cerebrospinal fluid and eyes (4889–4929) 374
Proteins of muscle and meat products (4930–4973) 377
Proteins of glands and gland products (except mammary gland) 380
Pepsinogen, trypsinogen, chymotrypsinogen, other zymogens and related inhibitors (4974–4998) 380
Snake venoms (4999–5035) 382
Other proteins of gland origin (5036–5045) 385
Milk proteins (including lactoferrin) (5046–5087) 385
Peptidic and proteinous hormones 388
Pituitary hormones (5088–5143) 388
Thyroglobulins (5144–5150) 392
Other proteinous and peptidic hormones (including insulin, glucagon, angiotensin and calcitonins) (5151–5208) 393
Other proteins of animal origin (including specific binding proteins form different tissues except blood) (5209–5298) 397
Enzymes 404
Reviews (5299–5303) 404
General techniques (5304–5316) 404
Oxidoreductases 405
Acting on the C–OH group of donors (E.C. 1.1.-.-.) from microbial and plant material (5317–5349) 405
Acting on the C–OH group of donors (E.C. 1.1.-.-.) from animal material (5350–5393) 408
Acting on the aldehyde or keto group of donors (E.C. 1.2.-.-.) (5394–5429) 411
Acting on the CH–OH group of donors (E.C. 1.3.-.-.) (5430–5435) 413
Acting on the CH–NH_2 group of donors (E.C. 1.4.-.-.) (5436–5458) 414
Acting on the C–NH group of donors (E.C. 1.5.-.-.) (5459–5474) 415
Acting on reduced NAD or NADP as donor (E.C. 1.6.-.-.) (5475–5503) . . . 417
Acting on sulfur groups of donors (E.C. 1.8.-.-.) (5504–5511) 419
Acting on haem groups of donors (E.C. 1.9.-.-.) (5512–5521) 419
Acting on diphenols and related substances as donors (E.C. 1.10.-.-.) (5522–5525) 420
Acting on H_2O_2 as acceptor (E.C. 1.11.-.-.) (5526–5542) 420
Acting on single donors with incorporation of oxygen (oxygenases) (E.C. 1.13.-.-.) (5543–5565) 421
Acting on paired donors with incorporation of oxygen into one donor (hydroxylases) (E.C. 1.14.-.-.) (5566–5589) 423
Other and incompletely specified oxidoreductases (5590–5617) 424
Transferases 426
Transferring one-carbon groups (methyl-, hydroxymethyl-, formyl-, carbonyl-, carbamoyl-, amidino- and related transferases) (E.C. 2.1.-.-.) (5618–5653) 426
Transferring aldehydic or ketonic groups (E.C. 2.2.-.-.) (5654–5655) 429
Acyltransferases (acyl- and aminoacyltransferases) (E.C. 2.3.-.-.) (5656–5678) 429
Glycosyltransferases (hexosyl- and pentosyltransferases) (E.C. 2.4.-.-.) (5679–5748) 431
Transferring nitrogenous groups (aminotransferases, oximinotransferases) (E.C. 2.6.-.-.) (5749–5779) 436
Transferring phosphorus-containing groups (E.C. 2.7.-.-.) from microbial and plant material (except ribonucleases) (5780–5879) 438
Ribonucleases from microbial and plant material (5880–5902) 445
Transferring phosphorus-containing groups (E.C. 2.7.-.-.) from animal material (except ribonucleases) (5903–6033) 446

Ribonucleases from animal material (6034–6052) 455
Transferring sulfur-containing groups (E.C. 2.8.-.-.) (6053–6064) 457
Other and incompletely specified transferases (6065–6075) 458
Hydrolases 458
Acting on ester bonds (E.C. 3.1.-.-.) from microbial and plant material (6076–6128) 458
Acting on ester bonds (E.C. 3.1.-.-.) from animal material (6129–6263) 462
Acting on glycosyl compounds (E.C. 3.2.-.-.) from microbial and plant material (6264–6351) 472
Acting on glycosyl compounds (E.C. 3.2.-.-.) from animal material (6352–6439) 478
Acting on peptide bonds (E.C. 3.4.-.-.) from microbial and plant sources (6440–6498) 484
Acting on peptide bonds (E.C. 3.4.-.-.) from gastrointestinal tract (6499–6538) 488
Acting on peptide bonds (E.C. 3.4.-.-.) from various animal tissues (6539–6620) 491
Acting on C–N bonds other than peptide bonds (E.C. 3.5.-.-.) (6621–6673) 496
Acting on acid anhydride bonds (E.C. 3.6.-.-.) (6674–6713) 500
Acting on C–C bonds (E.C. 3.7.-.-.) and halide bonds (E.C. 3.8.-.-.) and other hydrolases (6714–6720) 503
Lyases 504
Carbon–carbon lyases (E.C. 4.1.-.-.) (6721–6790) 504
Carbon–oxygen lyases (E.C. 4.2.-.-.) (6791–6845) 509
Carbon–nitrogen lyases (E.C. 4.3.-.-.) (6846–6848) 512
Other lyases (E.C. 4.4.-.-., E.C. 4.5.-.-. and E.C. 4.99.-.-.) and incompletely identified lyases (6849–6853) 513
Isomerases (E.C. 5.-.-.-.) (6854–6876) 513
Ligases 515
Forming C–O bonds (E.C. 6.1.-.-.) (6877–6922) 515
Forming C–S bonds (E.C. 6.2.-.-.) (6923–6931) 518
Forming C–N bonds (E.C. 6.3.-.-.) (6932–6943) 519
Forming C–C bonds (E.C. 6.4.-.-.) (6944–6954) 520
Incompletely identified ligases (including E.C. 6.5.-.-.) (6955–6978) 521
Enzyme mixtures, materials with complex enzymic activity and enzyme complexes (6979–7047) 523
Incompletely specified enzymes (7048–7108) 528
Chemically modified proteins and enzymes (7109–7138) 533
Pyrimidines, purines and their analogues related to the chemistry of nucleic acids 536
General techniques (7139–7143) 536
Applications 536
Synthetic applications (7144–7189) 536
Pyrimidines and purines in biological material (7190–7200) 540
Nucleotides and nucleosides 542
Reviews (7201–7202) 542
General techniques and automated analysis (7203–7245) 542
Applications 545
Synthetic applications (7246–7260) 545
Pyrimidine nucleotides and nucleosides (7261–7287) 546
Purine nucleotides and nucleosides (7288–7316) 548
Nucleotides and nucleosides containing other than pyrimidine and purine bases (7317–7341) 551

Products of chemical modification of purine and pyrimidine bases (7342–7395) . . . 552
Amino acid-nucleotide and peptide-nucleotide conjugates (7396–7406) . . . 556
Nucleotides, nucleosides and nitrogenous constituents of nucleic acids in enzymic reactions (7407–7419) . . . 557
Nucleotides and nucleosides in microorganisms and plants (7420–7429) . . . 558
Nucleotides and nucleosides in animal material (7430–7448) . . . 559
Nucleotides and nucleosides in food products (7449–7450) . . . 560
Nucleotide polyphosphates . . . 561
Techniques (7451–7453) . . . 561
Applications (7454–7463) . . . 561
Oligonucleotides and their derivatives (7464–7503) . . . 562
Polynucleotides (7504–7528) . . . 565
Nucleic acids . . . 567
Reviews and books (7529–7534) . . . 567
General techniques (7535–7561) . . . 567
Isolation of nucleic acids from natural sources (7562–7569) . . . 569
RNA . . . 570
Techniques (7570–7608) . . . 570
RNA in microorganisms (7609–7672) . . . 573
RNA in plants (7673–7687) . . . 578
RNA in animal material (7688–7751) . . . 579
Structural studies on RNA (including total hydrolysates) (7752–7806) . . . 584
DNA . . . 588
Techniques (7807–7826) . . . 588
DNA in microorganisms (7827–7842) . . . 589
DNA in plants and animal material (7843–7864) . . . 591
Structural studies on DNA (including total hydrolysates) (7865–7884) . . . 592
Chemically modified nucleic acids (7885–7900) . . . 594
Nucleoproteins, viruses and bacteriophages (7901–7946) . . . 596
Alkaloids . . . 600
General techniques (7947–7948) . . . 600
Alkaloids without heterocyclic nitrogen (aliphatic alkaloids, colchicine group) (7949–7952) . . . 600
Pyridine alkaloids (7953–7957) . . . 600
Quinoline and acridine alkaloids (7958–7959) . . . 601
Isoquinoline alkaloids . . . 601
Applications . . . 601
Synthetic applications (7960–7969) . . . 601
Isoquinoline alkaloids in biological material (7970–7979) . . . 602
Alkaloids of Papaveraceae . . . 603
General techniques (7980–7986) . . . 603
Applications . . . 603
Synthetic applications (7987–7992) . . . 603
Papaveraceae alkaloids in biological material (7993–8000) . . . 604
Indole alkaloids (including harmane alkaloids) . . . 604
Applications . . . 604
Synthetic applications (8001–8008) . . . 604
Indole alkaloids in biological material (8009–8017) . . . 605
Strychnine alkaloids (8018–8021) . . . 606
Ergot alkaloids (8022–8028) . . . 606
Pyrrolizidine alkaloids (8029–8035) . . . 606
Quinolizidine alkaloids (8036–8045) . . . 607

Steroidal alkaloids (8046–8057) . . . 608
Other alkaloid groups (8058–8095) . . . 609
Compounds with heterocyclic nitrogen . . . 612
Pyrroles . . . 612
Porphyrines and metalloporphyrines . . . 612
General techniques (8096–8098) . . . 612
Applications (8099–8122) . . . 612
Other pyrrole derivatives (8123–8140) . . . 614
Pyrazoles (8141–8148) . . . 615
Imidazoles (8149–8160) . . . 616
Indoles (including isoindoles and carbazoles) . . . 617
General techniques (8161–8162) . . . 617
Applications . . . 617
Synthetic applications (8163–8191) . . . 617
Indoles in biological material (8192–8196) . . . 619
Pyridines . . . 619
General techniques (8197–8199) . . . 619
Applications . . . 620
Synthetic applications (8200–8235) . . . 620
Other applications (8236–8239) . . . 622
Quinolines and isoquinolines . . . 622
General techniques (8240–8242) . . . 622
Applications . . . 623
Synthetic applications (8243–8270) . . . 623
Other applications (8271–8275) . . . 625
Pyrrolizidines, indolizidines and quinolizidines (8276–8282) . . . 625
Triazoles and tetrazoles (8283–8293) . . . 626
Acridines and phenanthridines (8294–8302) . . . 627
Other nitrogen-containing heterocyclic compounds (8303–8440) . . . 627
Organic sulfur compounds (including selenium compounds) . . . 637
Sulfides, sulfoxides, sulfones, sulfonium salts (8441–8464) . . . 637
Sulfonic and sulfinic acids (8465–8484) . . . 638
Sulfur-containing heterocyclic compounds (8485–8514) . . . 640
Various sulfur compounds and complex mixtures (8515–8521) . . . 642
Selenium compounds (8522–8524) . . . 643
Heterocyclic compounds containing various heteroatoms . . . 644
Heterocyclic compounds containing nitrogen and oxygen as heteroatoms (8525–8565) . . . 644
Heterocyclic compounds containing nitrogen and sulfur as heteroatoms (8566–8598) . . . 647
Heterocyclic compounds containing other combinations of heteroatoms (8599–8602) . . . 649
Organic phosphorus compounds . . . 650
General techniques (8603–8604) . . . 650
Applications . . . 650
Synthetic applications (8605–8645) . . . 650
Organic phosphorus compounds in biological material (8646–8655) . . . 653
Organometallic and coordination compounds . . . 655
Reviews (8656–8657) . . . 655
Organometallic compounds (8658–8662) . . . 655
Metallocenes (excluding ferrocenes) (8663–8669) . . . 655
Ferrocenes (8670–8685) . . . 656
Metal carbonyls (8686–8711) . . . 657
Coordination compounds (8712–8761) . . . 659

Vitamins . . . 664
Fat-soluble vitamins . . . 664
Vitamin A group . . . 664
General techniques (8762–8769) . . . 664
Applications (8770–8780) . . . 665
Calciferols . . . 665
General techniques (8781–8784) . . . 665
Applications (8785–8802) . . . 666
Tocopherol group (8803–8815) . . . 667
Water-soluble vitamins . . . 668
General techniques (8816) . . . 668
Thiamine (8817–8821) . . . 668
Riboflavin and other flavins (8822–8830) . . . 669
Nicotinic acid and its derivatives (8831–8833) . . . 669
Pyridoxine group (8834–8841) . . . 670
Biotin group (8842–8845) . . . 670
Panthothenic acid and coenzyme A (8846–8854) . . . 671
Folic acid and other pteridine derivatives (8855–8892) . . . 671
Cobalamin group (8893–8906) . . . 674
Complex mixtures of vitamins (8907–8908) . . . 675
Antibiotics . . . 676
General techniques (8909–8910) . . . 676
Penicillins and cephalosporins (8911–8924) . . . 676
Carbohydrate antibiotics (8925–8955) . . . 677
Macrocyclic antibiotics (including erythromycin and macrolide antibiotics) (8956–8969) . . . 679
Tetracyclines (8970–8972) . . . 680
Nucleotide and nucleoside antibiotics (including polyoxins) (8973–8976) . . . 681
Peptide and amino acid antibiotics (including actinomycins) (8977–9018) . . . 681
Other antibiotics (9019–9046) . . . 684
Pesticides . . . 687
Reviews (9047–9052) . . . 687
General techniques (9053–9064) . . . 687
Natural insecticides (9065–9070) . . . 688
Chlorinated pesticides (9071–9098) . . . 689
Phosphorus pesticides (9099–9115) . . . 691
Carbamate pesticides (9116–9126) . . . 692
Herbicides (9127–9131) . . . 693
Dyes and pigments . . . 694
Reviews and general techniques (9132–9135) . . . 694
Applications . . . 694
Synthetic applications (9136–9143) . . . 694
Food dyes (9144–9151) . . . 695
Plant pigments (chloroplast pigments etc.) (9152–9169) . . . 696
Dyes and pigments in other biological material (9170–9184) . . . 697
Fluorescent and coloured materials from various sources (9185–9192) . . . 698
Plastics . . . 699
Reviews (9193–9200) . . . 699
General techniques (9201–9231) . . . 699
Polyethylene and related plastics (9232–9256) . . . 702
Polystyrene, polyisoprene, polybutadiene and related compounds (9257–9290) . . . 704
Polyoxymethylenes, polyoxyethylenes and related compounds (including formaldehyde condensation products) (9291–9301) . . . 706
Polyesters and polyamides (9302–9318) . . . 707

Polyvinylchloride, polyacrylonitrile and related polymers (9319–9331) 708
Various plastic materials (9332–9348) 709
Applications in pharmacology and toxicology 711
Reviews (9349–9357) 711
Synthetic applications in drug chemistry (9358–9372) 711
Drug analysis and drug mixtures (9373–9412) 713
Metabolism of drugs (9413–9447) 716
Profiling of biological fluids (9448–9457) 718
Plant extracts and their application in pharmacology (9458–9464) 719
Inorganic compounds 720
Reviews (9465–9485) 720
Cations 721
Sorption and ion-exchange behaviour of cations (9486–9523) 721
General techniques (9524–9537) 724
Analytical groups I and IIa (Ag, Bi, Cd, Cu, Hg, Pb, Pd, Tl) (9538–9555) . . . 725
Analytical group IIb (As, Mo, Sb, Se, Sn, Tc, Te, V, W) (9556–9568) 726
Platinum metals and gold (9569–9581) 727
Analytical group III (Al, Be, Co, Cr, Fe, Ga, Mn, Nb, Ni, Ta, Th, Ti, Zn, Zr) 728
General techniques (9582–9609) 728
Various applications of chromatography of the third analytical group elements (9610–9636) 731
Uranium, transuranium elements, protactinium and actinides (9637–9676) 732
Rare earths (9677–9718) 736
Analytical group IV (alkaline earths) (9719–9727) 739
Analytical group V (alkali metals) (9728–9744) 739
Mixtures of cations of different groups (9745–9792) 741
Systematic analysis of cations (9793–9795) 745
Anions 745
Halides (9796–9798) 745
Inorganic phosphorus compounds (9799–9808) 745
Other anions and mixtures of anions of various groups (9809–9816) 746
Radioactive substances 748
Reviews (9817–9818) 748
General techniques and automated analysis (9819–9824) 748
Applications 749
Activation analysis (9825–9830) 749
Biological applications (9831–9839) 749
Applications to inorganic chemistry (9840–9872) 750
Miscellaneous compounds and complex mixtures 753
Surfactants and detergents (9873–9890) 753
Antioxidants and preservatives (9891–9895) 754
Cells and subcellular particles (9896–9921) 754
Complex mixtures and unidentified compounds (9922–9976) 756

AUTHOR INDEX 761

LIST OF COMPOUNDS CHROMATOGRAPHED 929
