CONTENTS

PREFACE vii

CONTRIBUTORS xiii

I. APPLICATIONS

Water-Soluble Polymers as Flocculants in Papermaking 3

William A. Foster

Application of Polyelectrolytes in Municipal Waste Treatment 21

Howard G. Flock and Emerson G. Rausch

Flocculation of Chrome-Plating Wastes with Polyelectrolytes 75

Donald L. Sussman and Edward Chun-Chin Wang

Particle Size Versus Molecular Weight Relationships in Cationic Flocculation 93

Monica A. Yorke

Water-Soluble Polymers in Petroleum Recovery

D. C. MacWilliams, J. H. Rogers, and T. J. West

Reversible Crosslinking of Polymers in Oil Recovery

Robert H. Friedman

Turbulent Friction Reduction by Polymer Solutions 137

J. W. Hoyt and Robert H. Wade

Drag-Reduction Properties of Ultra-High-Molecular-Weight Polyacrylamide and Related Polymers 151

Robert Y. Ting and Oh-Kil Kim

The Biologic Activity of Water-Soluble Polymers

William Regelson

New Developments in Water-Soluble Polysaccharides

Roy L. Whistler

Water-Based Finishes in Response to Environmental Constraints

Thomas J. Miranda

Electrodeposition of Water-Dispersible Polymers

George E. F. Brewer

II. SYNTHESIS

Preparation of Acrylamide Polymers 213

Norbert M. Bikales

Extracellular Microbial Polysaccharides: New Hydrocolloids Having Both Fundamental and Practical Import

Allene Jeanes

Some Properties of Carbamoylated Polyethylenimine and Its Hydrolysis Product

Norio Ise and Tsuneo Okubo

Water-Soluble Polyisothiocyanates

G. D. Jones, Carole Kleeman, and Doreen Villani-Price

'reparation of Cationic Polyelectrolytes by
›pontaneous Polymerization

'. C. Salamone and E. J. Ellis

✓ Graft Copolymers of Starch and Poly(2-Hydroxy-3-Meth-
acryloyloxypropyltrimethylammonium Chloride).
Dependence of Graft Copolymer Structure on Method
of Initiation 275

George F. Fanta, Robert C. Burr, W. M. Doane,
and C. R. Russell

'he Polymerization of 3-Dimethylamino-n-Propyl
'hloride and the Formation of Star-Shaped and
3ranched Polyelectrolytes 291

S. P. . Yen, D. Casson, and A. Rembaum

III. CHARACTERIZATION

›lecular-Weight Distribution of Water-Soluble Polymers
· Exclusion Chromatography

G. . Beyer, A. L. Spatorico, and J. L. Bronson

'edimentation Equilibrium of High Charge Density
'ationic Polyelectrolytes 327

Maurice Schmir and Alan Rembaum

/iscoelasticity of Highly Concentrated Solutions of
'oly(Acrylic Acid) Salts 349

A. Eisenberg, M. King, and T Yokoyama

Some Gel Permeation Chromatographic Studies on
Cyclocopolymers of Maleic Anhydride 369

George B. Butler and Chester Wu

Conformational Studies of Poly(Ethyl
Acrylate-co-Acrylic Acid) 387

'usan P. Gasper and Julia S. Tan

Studies on the Distribution of Substituents in Hydroxyethylcellulose 401

E. D. Klug, D. P. Winquist, and C. A. Lewis

Index 417
