670.4272 ROB

Contents

Preface *iii*

1 Types of Robots and Their Integration into Computer-Integrated Manufacturing Systems *1*
Rüdiger Dillmann

2 Planning of a Robot Integrated Manufacturing Process *63*
Ulrich Rembold

3 Knowledge-Based Modeling for Computer-Integrated Manufacturing *153*
Paul Levi

4 Simulation: Layout of a Robot Cell *207*
Jim Browne and Subhash Wadhwa

5 Sensors and Grippers in Robot Work Cells *277*
Theo Doll

6 Programming of the Robot Cell *339*
Klaus Hörmann

7 Path-Planning Methods for Robot Motion *395*
C. Buckley

8 Automatic Error Detection and Recovery *445*
Maria Gini

9 Databases for Planning and Manufacturing 485
Klaus Dittrich, Alfons Kemper, and Peter Lockemann

10 Development Toward Autonomous Systems 553
Volker Turau

11 Some Examples of Advanced Robot Systems 605
Compiled and Translated by Ulrich Rembold

11.1 Introduction 605
Ulrich Rembold

11.2 The Automatic Assembly of Hoses Using Industrial Robots 606
Hans-Jürgen Warnecke and Bruno Frankenhauser

11.3 A Dual-Armed Robot System for Assembly Tasks 626
Klaus Feldmann and Detlef Classe

11.4 Vision-Guided Robot Applications 640
Ulrich Rembold

11.5 Mobile Autonomous Robot IPAMAR Performs Free-Ranging AGV Operations 651
Hans-Jürgen Warnecke and Gerhard Drunk

Index 669
