

APPROVED METHODS OF THE AACC

CONTENTS

(including the 2002 supplement)

- 02 Acidity**
02-01A Fat Acidity—General Method
02-02A Fat Acidity—Rapid Method, for Small Grains
02-03A Fat Acidity—Rapid Method, for Corn
02-04A Fat Acidity—Colorimetric Method
02-31 Titratable Acidity
02-32A Neutralizing Value of Acid-Reacting Materials
02-52 Hydrogen-Ion Activity (pH)—Electrometric Method
- 04 Acids**
04-10 Phosphoric Acid—Qualitative Method
04-11 Phosphoric Acid—Quantitative Method
04-14 Sulfuric Acid—Quantitative Method
04-20 Acetic, Butyric, and Lactic Acids in Rye Flour
04-21 Benzoic Acid
04-22 Citric and Isocitric Acids
04-27 Tartaric Acid—Quantitative Method
04-28 Free or Combined Tartaric Acid—Qualitative Method
- 06 Admixture of Flours**
06-10 Admixture of Rye and Wheat Flours
06-11 Soy Flour
- 07 Amino Acids**
07-01 Measurement of Acid-Stable Amino Acids
07-11 Measurement of Sulfur Amino Acids
07-20 Measurement of Tryptophan—Alkaline Hydrolysis
- 08 Total Ash**
08-01 Ash—Basic Method
08-02 Ash—Rapid (Magnesium Acetate) Method
08-03 Ash—Rapid (2-Hour, 600°) Method
08-10 Ash in Cacao Products
08-11 Ash in Dry Milk Products
08-12 Ash in Farina and Semolina
08-14 Ash in Molasses, Sugars, and Syrups
08-16 Ash in Soy Flour
08-17 Ash in Starch
08-18 Ash in Yeast Foods
08-21 Prediction of Ash Content in Wheat Flour—Near-Infrared Method
- 10 Baking Quality**
10-05 Guidelines for Measurement of Volume by Rapeseed Displacement

- 10-09 Basic Straight-Dough Bread-Baking Method—Long Fermentation
- 10-10B Optimized Straight-Dough Bread-Baking Method
- 10-11 Baking Quality of Bread Flour—Sponge-Dough, Pound-Loaf Method
- 10-13 Guidelines for Testing a Variety of Products
- 10-15 Baking Quality of Angel-Cake Flour
- 10-31B Baking Quality of Biscuit Flour
- 10-50D Baking Quality of Cookie Flour
- 10-52 Baking Quality of Cookie Flour—Micro Method
- 10-53 Baking Quality of Cookie Flour—Macro Wire-Cut Formulation
- 10-54 Baking Quality of Cookie Flour—Micro Wire-Cut Formulation
- 10-90 Baking Quality of Cake Flour
- 10-91 Use of Layer Cake Measuring Template

- 11 **Biotechnology**
- 11-10 *Bt* Cry1Ab-Modified Corn in Corn Flour—ELISA Method
- 11-20 StarLink Corn in Corn Flour and Corn Meal—ELISA Method
- 11-21 ELISA Method for StarLink Corn in Corn Flour and Corn Meal

- 12 **Carbon Dioxide**
- 12-10 Residual Carbon Dioxide in Baking Powder
- 12-20 Total (Gasometric) Carbon Dioxide in Baking Powder
- 12-21 Total Carbon Dioxide in Prepared Mixes and Self-Rising Flours
- 12-29 Table: Correction Factors for Gasometric Determination of Carbon Dioxide

- 14 **Color and Pigments**
- 14-10 Pekar Color Test (Slick Test)
- 14-22 Color of Pasta—Reflectance Colorimeter Method
- 14-30 Agron Color Test for Flour
- 14-50 Determination of Pigments

- 20 **Ingredients**
- 20-01 Egg Solids—Digitonin Cholesterol Method
- 20-10 Egg Solids in Pasta Products
- 20-20 Determination of Isoflavones in Soy and Selected Foods Containing Soy by Extraction, Saponification, and Liquid Chromatography

- 22 **Enzymes**
- 22-02 Measurement of α -Amylase in Plant and Microbial Materials Using the Ceralpha Method
- 22-05 Measurement of α -Amylase in Cereal Grains and Flours—Amylzyme Method
- 22-08 Measurement of α -Amylase Activity with the Rapid Visco Analyser
- 22-10 Measurement of α -Amylase Activity with the Amylograph
- 22-11 Measurement of Gassing Power by the Pressuremeter Method
- 22-12 Measurement of α -Amylase Activity in Flour Supplemented with Fungal α -Amylase—Modified Amylograph Method
- 22-14 Measurement of Gassing Power by Volumetric Method
- 22-15 Measurement of Diastatic Activity of Flour or Semolina

- 22-40** Measurement of Trypsin Inhibitor Activity of Soy Products—Spectrophotometric Method
- 22-62** Measurement of Proteolytic Activity—Spectrophotometric Method
- 22-80** Qualitative Test for Peroxidase in Oat Products
- 22-90** Measurement of Urease Activity
- 26** **Experimental Milling**
- 26-10A** Experimental Milling: Introduction, Equipment, Sample Preparation, and Tempering
- 26-21A** Experimental Milling—Bühler Method for Hard Wheat
- 26-22** Experimental Milling—Batch Method for Hard Wheat
- 26-30A** Experimental Milling—Bühler Method for Soft Wheat Short-Extraction Flour
- 26-31** Experimental Milling—Bühler Method for Soft Wheat Straight-Grade Flour
- 26-32** Experimental Milling—Batch Method for Soft Wheat
- 26-41** Experimental Milling—Bühler Method for Durum Wheat
- 26-42** Experimental Milling—Batch Method for Durum Wheat
- 26-50** Brabender Quadrumat Jr. (Quadruplex) Method
- 26-95** Experimental Milling: Temper Table
- 28** **Extraneous Matter**
- 28-01** Apparatus or Materials for Extraneous Matter Methods
- 28-02** Reagents for Extraneous Matter Methods
- 28-03A** Special Techniques for Extraneous Matter Methods
- 28-06** Cinder and Sand Particles in Farina—Counting Method
- 28-07** Cinder and Sand Particles in Farina—Gravimetric Method
- 28-10A** Macroscopic Examination of External Contamination in Whole Grains
- 28-19** External Filth and Internal Insect Infestation in Whole Corn
- 28-20A** Microscopic Examination of External Contamination in Whole Grains
- 28-21A** X-Ray Examination for Internal Insect Infestation
- 28-22A** Cracking-Flotation Test for Internal Insects in Whole Grains
- 28-30A** Macroscopic Examination of Materials Hard to Hydrate
- 28-31A** Pancreatin Sieving Method, for Insect and Rodent Filth in Materials Hard to Hydrate
- 28-32A** Sieving Method, for Materials Hard to Hydrate
- 28-33A** Pancreatin Nonsieving Method for Insect and Rodent Filth in Materials Easy to Hydrate
- 28-40** Acid Hydrolysis Method for Insect Fragments and Rodent Hairs—Wheat-Soy Blend
- 28-41B** Acid Hydrolysis Method for Extracting Insect Fragments and Rodent Hairs—Light Filth in White Flour
- 28-43** Glass Plate Method, for Insect Excreta
- 28-44** Iodine Method, for Insect Eggs in Flour
- 28-50** Decantation Method, for Rodent Excreta
- 28-51A** Flotation Method, for Insect and Rodent Filth
- 28-60A** Tween-Versene Method, for Insect Fragments and Rodent Hairs in Rye Flour
- 28-70** Defatting-Digestion Method, for Insect Fragments and Rodent Hairs
- 28-75A** Sieving Method, for Light Filth in Starch
- 28-80** Flotation Method, for Insect and Rodent Filth in Popped Popcorn

- 28-85** Ultraviolet Light Examination, for Rodent Urine
28-86 Xanthidrol Test, for Urea
28-87 Urease-Bromthymol Blue Test Paper, for Urea
28-93 Direction of Insect Penetration into Food Packaging
28-95 Insect, Rodent Hair, and Radiographic Illustrations
- 30** **Crude Fat**
30-10 Crude Fat in Flour, Bread, and Baked Cereal Products Not Containing Fruit
30-12A Crude Fat in Cocoa
30-14 Crude Fat in Baked Pet Food
30-16 Crude Fat in Dry Milk Products
30-18 Crude Fat in Egg Yolk by Acid Hydrolysis
30-20 Crude Fat in Grain and Stock Feeds
30-25 Crude Fat in Wheat, Corn, and Soy Flour, Feeds, and Mixed Feeds
30-40 Unsaponifiable Matter
- 32** **Fiber**
32-05 Total Dietary Fiber
32-06 Total Dietary Fiber—Rapid Gravimetric Method
32-07 Soluble, Insoluble, and Total Dietary Fiber in Foods and Food Products
32-10 Crude Fiber in Flours, Feeds, and Feedstuffs
32-20 Insoluble Dietary Fiber
32-21 Insoluble and Soluble Dietary Fiber in Oat Products—Enzymatic-Gravimetric Method
32-22 β -Glucan in Oat Fractions and Unsweetened Oat Cereals
32-23 β -Glucan Content of Barley and Oats —Rapid Enzymatic Procedure
32-25 Total Dietary Fiber—Determined as Neutral Sugar Residues, Uronic Acid Residues, and Klason Lignin (Uppsala Method)
32-28 Polydextrose in Foods by Ion Chromatography
32-31 Fructans in Foods and Food Products—Ion Exchange Chromatographic Method
32-32 Measurement of Total Fructan in Foods by an Enzymatic/Spectrophotometric Method
32-33 Determination of *trans*-Galactooligosaccharides in Selected Food Products by Ion-Exchange Chromatographic Method
32-40 Resistant Starch in Starch Samples and Plant Materials
32-41 Total Dietary Fiber in Foods Containing Resistant Maltodextrin—Enzymatic-Gravimetric Method and Liquid Chromatography Determination
- 33** **Sensory Analysis**
33-50A Sensory Evaluation—Triangle Difference Test
- 38** **Gluten**
38-10 Gluten—Hand Washing Method
38-12A Wet Gluten, Dry Gluten, Water-Binding Capacity, and Gluten Index
38-20 Farinograph Test for Vital Wheat Gluten
- 39** **Infrared Analysis**
39-00 Near-Infrared Methods—Guidelines for Model Development and Maintenance

- 39-10 Near-Infrared Reflectance Method for Protein Determination in Small Grains
- 39-11 Near-Infrared Reflectance Method for Protein Determination in Wheat Flour
- 39-20 Near-Infrared Reflectance Method for Protein and Oil Determination in Soybeans
- 39-21 Near-Infrared Reflectance Method for Whole-Grain Analysis in Soybeans
- 39-25 Near-Infrared Reflectance Method for Protein Content in Whole-Grain Wheat
- 39-70A Near-Infrared Reflectance Method for Hardness Determination in Wheat

40 Inorganic Constituents

- 40-10 Aluminum—Qualitative Method
- 40-15 Ammonia—Quantitative Method
- 40-16 Ammonium Salts—Qualitative Method
- 40-18 Ammonium Salts—Quantitative Method
- 40-20 Calcium in Bread and Flour
- 40-21 Calcium in Feedstuffs
- 40-26 Calcium in Mineral Feeds
- 40-30 Chlorides in Ash as Sodium Chloride—Gravimetric Method
- 40-31 Chlorides in Ash as Sodium Chloride—Volumetric Method
- 40-33 Chlorides in Yeast Foods—Quantitative Method
- 40-35 Iodine Determination
- 40-40 Iron—Qualitative Method
- 40-41B Iron—Spectrophotometric Method
- 40-45 Acid-Soluble Manganese
- 40-50A Sample Preparation for Phosphate Determination in Flour Improvers
- 40-56 Phosphorus—Modified Fiske-Subbarow Colorimetric Method
- 40-57 Phosphorus—Gravimetric Method
- 40-58 Phosphorus—Volumetric Method
- 40-61A Salt, Calculated from Soluble Chlorides
- 40-66 Sulfates—Gravimetric Method
- 40-70 Elements by Atomic Absorption Spectrophotometry
- 40-71 Sodium and Potassium by Atomic Absorption Spectrophotometry
- 40-75 Determination of Minerals by Inductively Coupled Plasma Spectroscopy

42 Microorganisms

- 42-10 Microorganisms—Sampling Procedure
- 42-11 Aerobic Plate Count
- 42-15 Coliform—*E. coli*
- 42-17A *Clostridium perfringens* Enumeration
- 42-20 Rope Spore Count
- 42-25B *Salmonella* Bacteria
- 42-30B Enumeration of *Staphylococcus aureus*
- 42-35 Enterococci
- 42-40 Thermophilic Spore Counts (Total Aerobic, Flat-Sour, H₂S, Non-H₂S Anaerobic)
- 42-45 Thermophilic and Psychrotrophic Bacteria

- 42-50** Mold and Yeasts Counts
42-56 Ergot—Ether-Bicarbonate Method
42-70 Smut—Microscopic Method
42-71 Smut—Sedimentation Method
- 44** **Moisture**
44-01 Calculation of Percent Moisture
44-11 Moisture—Dielectric Meter Method
44-15A Moisture—Air-Oven Methods
44-16 Moisture—Air-Oven (Aluminum-Plate) Method
44-19 Moisture—Air-Oven Method, Drying at 135°
44-20 Moisture—ASBC Air-Oven Method
44-30 Moisture and Volatile Matter in Fats and Shortenings
44-31 Moisture and Volatile Matter in Soy Flours
44-40 Moisture—Modified Vacuum-Oven Method
44-51 Moisture—By Distillation with Toluene, for Fats and Shortenings
44-60 Moisture—Drying on Quartz Sand
- 45** **Mycotoxins**
45-01 Sampling Grain for Mycotoxins
45-05 Aflatoxin—Thin-Layer Chromatography Method
45-14 Aflatoxin—Rapid Screening Method
45-15 Aflatoxin—Presumptive Test
45-16 Aflatoxin—Liquid Chromatography Method
45-20 Zearalenone—Thin-Layer Chromatography Method
45-21 Zearalenone and α -Zearalenol in Corn—HPLC Method
45-25 Identification of Aflatoxin on TLC Plates
45-41 Deoxynivalenol in Wheat—TLC Method
45-51 Fumonisin B₁, B₂, and B₃ in Corn—Liquid Chromatographic Method
- 46** **Nitrogen**
46-09 Crude Protein—Automated Colorimetric Method
46-10 Crude Protein—Improved Kjeldahl Method
46-11A Crude Protein—Improved Kjeldahl Method, Copper Catalyst Modification
46-12 Crude Protein—Kjeldahl Method, Boric Acid Modification
46-13 Crude Protein—Micro-Kjeldahl Method
46-14B Crude Protein—Udy Dye Method
46-15 Crude Protein—5-Minute Biuret Method for Wheat and Other Grains
46-16 Crude Protein—Improved Kjeldahl Method, Copper-Titanium Dioxide Catalyst Modification
46-18 Crude Protein, Calculated from Percentage of Total Nitrogen, in Feeds and Feedstuffs
46-19 Crude Protein, Calculated from Percentage of Total Nitrogen, in Wheat and Flour
46-23 Nitrogen Solubility Index
46-24 Protein Dispersibility Index
46-30 Crude Protein—Combustion Method
46-50 Urea and Ammoniacal Nitrogen

- 48 Oxidizing, Bleaching, and Maturing Agents**
48-08 Benzoyl Peroxide—Quantitative Method
48-42 Quantitative Method for Bromates
48-62 Ammonium Persulfate—Quantitative Method
48-71A Azodicarbonamide in Premix
- 54 Physical Dough Tests**
54-10 Extensigraph Method, General
54-21 Farinograph Method for Flour
54-28A Farinograph Table for Constant Dough Weight Method Only
54-29 Approximate Corrections for Changing As-Is Farinograph Absorption to 14.0% Moisture Basis, for Constant Dough Weight Method Only
54-30A Alveograph Method for Soft and Hard Wheat Flour
54-40A Mixograph Method
54-50 Determination of the Water Absorption Capacity of Flours and of Physical Properties of Wheat Flour Doughs, Using the Consistograph
- 55 Physical Tests**
55-10 Test Weight per Bushel
55-20 Corn Breakage Susceptibility
55-30 Particle Size Index for Wheat Hardness
55-31 Single-Kernel Characterization System for Wheat Kernel Texture
55-40 Particle Size of Wheat Flour by Laser Instrument
55-50 Specific Volume
55-99 Glossary—Barley
- 56 Physicochemical Tests**
56-10 Alkaline Water Retention Capacity
56-11 Solvent Retention Capacity Profile
56-20 Hydration Capacity of Pregelatinized Cereal Products
56-21 Flour Swelling Volume
56-30 Water Hydration Capacity of Protein Materials
56-40 Water Hydration (Absorption) of Rolled Oats
56-50 Pelshenke Test (Wheat-Meal Fermentation Time Test)
56-60 Sedimentation Test for Flour
56-61A Sedimentation Test for Wheat
56-62 Modified Sedimentation Test for Wheat
56-63 Micro Sedimentation Test for Wheat
56-70 Sodium Dodecyl Sulfate Sedimentation Test for Durum Wheat
56-81B Determination of Falling Number
56-99 Glossary—Grain and Flour
- 58 Special Properties of Fats, Oils, and Shortenings**
58-10 Cloud Point
58-11 Cold Test
58-12 Determination of Oil Color
58-13 Determination of Congeal Point
58-14 Consistency—Penetration Method
58-15 Determination of Free Fatty Acids
58-16 Determination of Peroxide Value—Acetic Acid-Chloroform Method

- 58-17** Preparation of Methyl Esters of Long-Chain Fatty Acids
58-18 Fatty Acid Composition by Gas Chromatography
58-19 Total, Saturated, Unsaturated, and Monounsaturated Fats in Cereal Products by Acid Hydrolysis and Capillary Gas Chromatography
58-20A Refractive Index
58-25 Solid Fat Index—Dilatometric Method
58-30A Iodine Value of Fats and Oils—Cyclohexane-Acetic Acid Method
58-35 Acetone-Insoluble Lecithin
58-39 Dropping Point—Automatic Determination of Melting Point in Fats
58-40 Melting Point—Capillary Method
58-45 Monoglycerides and Free Glycerol
58-50 Saponification Value
58-53 Slip Melting Point
58-54A Oil Stability Index
58-82 Smoke, Flash, and Fire Points
58-99 Glossary—Lipids
- 61** **Rice**
61-01 Amylograph Method for Milled Rice
61-02 Determination of the Pasting Properties of Rice with the Rapid Visco Analyser
61-03 Amylose Content of Milled Rice
61-99 Glossary—Rice
- 62** **Preparation of Sample**
62-05 Preparation of Sample: Bread
62-20A Preparation of Sample: Semolina and Feedstuffs
62-25 Preparation of Sample: Fruit and Fruit Products
62-40 Preparation of Sample: Dried Pasta and Noodle Products
62-50 Preparation of Sample: Malt
- 64** **Sampling**
64-40 Sampling of Fats and Shortenings
64-50 Sampling of Feeds and Feedstuffs
64-60 Sampling of Flour, Grain Products, and Feed Products in Sacks
64-70A Manual Sampling of Wheat and Other Whole Grains
64-71 Mechanical Sampling of Dry, Free-Flowing Granular Material
- 66** **Semolina, Pasta, and Noodle Quality**
66-20 Determination of Granularity of Semolina and Farina: Sieving Method
66-41 Macro Scale Pasta Processing
66-42 Micro Scale Pasta Processing
66-50 Pasta and Noodle Cooking Quality—Firmness
- 70** **Solutions**
70-15 Preparation of Buffer Solutions
70-20A Preparation and Standardization of Hydrochloric Acid Solution
70-25 Preparation of Indicator Solutions
70-40 Preparation and Standardization of Ammonium and Potassium Thiocyanate Solutions

- 70-50A Preparation and Standardization of Potassium Permanganate Solution
- 70-60 Preparation and Standardization of Silver Nitrate Solution
- 70-70 Preparation and Standardization of Sodium or Potassium Hydroxide Solution
- 70-75 Preparation and Standardization of Sodium Thiosulfate Solution
- 70-80 Preparation and Standardization of Sulfuric Acid Solution

74 Staleness/Texture

- 74-09 Measurement of Bread Firmness by Universal Testing Machine
- 74-10A Measurement of Bread Firmness—Compression Test
- 74-30 Staleness of Bread—Sensory Perception Test

76 Starch

- 76-11 Starch—Glucoamylase Method with Subsequent Measurement of Glucose with Glucose Oxidase
- 76-13 Total Starch Assay Procedure (Megazyme Amyloglucosidase/ α -Amylase Method)
- 76-21 General Pasting Method for Wheat or Rye Flour of Starch Using the Rapid Visco Analyser
- 76-30A Determination of Damaged Starch
- 76-31 Determination of Damaged Starch—Spectrophotometric Method

78 Statistical Principles

- 78-40 Definitions of Statistical Terms
- 78-60 Statistical Evaluation of Test Methods—Estimation of Variance in Analytical Tests

80 Sugars

- 80-04 Determination of Simple Sugars in Cereal Products—HPLC Method
- 80-05 Determination of Saccharides by Liquid Chromatography
- 80-10 Determination of Glucose in Sugar Mixtures—Glucose Oxidase Method
- 80-50 Determination of Sucrose
- 80-51 Solids in Syrups—Refractometer Method
- 80-53 Solids in Syrups—Spindle Method
- 80-60 Determination of Reducing and Nonreducing Sugars
- 80-68 Determination of Reducing Sugars—Schoorl Method

82 Tables

- 82-20 Notes on Use of Tables 82-21, 82-22, 82-23, and 82-24
- 82-21 Table: Conversion of Farinograph Absorption to 14.0% Moisture Basis (Constant Weight Method Only)
- 82-22 Table: Correction of Analytical Values to 14.0% Moisture Basis
- 82-23 Table: Flour Weight to Give 100 g at 14.0% Moisture Content
- 82-24 Table: Multiplication Factors to Correct Weights to 14.0% Moisture Basis

86 Vitamins

- 86-01A Vitamin A—Ultraviolet Absorption Method
- 86-02 Vitamin A—Carr-Price Method

- 86-03** Vitamin A in Enriched Flour
86-05 Vitamin A and Carotene
86-06 Analysis of Vitamin A and E by High-Performance Liquid Chromatography
86-10 Ascorbic Acid—Indophenol-Xylene Extraction Method
86-31 Vitamin B₆ Complex—Microbiological Method
86-40 Vitamin B₁₂—Microbiological Method
86-45 Choline
86-47 Total Folate in Cereal Products—Microbiological Assay Using Trienzyme Extraction
86-49 Niacin in Enrichment Concentrates
86-50A Niacin and Niacinamide in Cereal Products
86-51 Niacin—Microbiological Method
86-70 Riboflavin—Fluorometric Method
86-72 Riboflavin—Microbiological Method
86-80 Thiamine—Thiochrome Method
86-90 B-Vitamins in Vitamin Concentrates by HPLC
- 89** **Yeast**
89-01 Yeast Activity, Gas Production
- Methods Deleted Since 1983**
Supplier Index (in each volume for the methods in that volume)
Index (in both volumes)
