

CONTENTS

CHAPTER 1	THE BASIC PRINCIPLES OF FOURIER TRANSFORM SPECTROMETRY	1
1.1.	Electromagnetic Waves	1
1.2.	The Principle of Superposition	2
1.3.	Units	3
1.3.1.	Spectrometric Units	4
1.3.2.	The Units of Atmospheric Chemistry and Physics	4
1.4.	Two-Beam Interference	5
1.5.	The Michelson Interferometer	6
1.5.1.	Basic Implementation as a Spectrometer	7
1.5.2.	Finite Field of View	8
1.5.3.	Finite Spectral Bandwidth	10
1.6.	The Integral Fourier Transform	10
1.7.	Convolution	12
1.7.1.	Physical Interpretation	13
1.8.	The Discrete Fourier Transform	14
CHAPTER 2	THE IDEAL FOURIER TRANSFORM SPECTROMETER	15
2.1.	Étendue	15
2.1.1.	Beam Area	16
2.1.2.	Solid Angle	17
2.1.3.	Comparison to Dispersive Systems	18
2.2.	Multiplexing	19
2.2.1.	Implementation	19

2.2.2. A Warning	20
2.2.3. Terminology	20
2.3. Spectral Resolution and Instrumental Line Shape	20
2.3.1. Spectral Resolution	20
2.3.2. Instrumental Line Shape	22
2.3.3. Consequences	22
2.4. Frequency Accuracy	22
2.4.1. Fourier Transform Spectrometers	23
2.4.2. Dispersive Spectrometers	23
2.5. Modulation Efficiency	24
2.5.1. The Impact of Impaired Modulation	25
2.6. Imaging Modes	25
2.6.1. FTS Implementation	25
2.6.2. Another Warning	28
2.6.3. Dispersive Spectrometer Implementation	28
2.6.4. Discussion	29
CHAPTER 3 THE PHYSICS AND CHEMISTRY OF REMOTE SENSING	31
3.1. The Physics of Atmospheres	31
3.1.1. The Atmospheric Temperature Profile	31
3.1.2. The Atmospheric Pressure and Density Profile	33
3.1.3. Model Atmospheres	34
3.2. The Chemistry of Atmospheres	34
3.2.1. Atmospheric Composition	35
3.2.2. Compositional Profiles	35
3.3. Radiative Transfer	36
3.3.1. Radiative Transfer in a Clear Atmosphere	39
3.3.2. Discussion	42
3.4. Remote Sensing Spectrometry	44
3.4.1. The Mechanistic Molecular Model	44
3.4.2. Intensities	46
3.4.3. Terminology	47

3.4.4. Line Shapes	47
3.4.5. Quantitative Atmospheric Spectral Analysis	51
3.4.6. The Spectra of Solids and Liquids	52
3.4.7. Discussion	54

CHAPTER 4 REAL FOURIER TRANSFORM SPECTROMETERS	55
4.1. The Estimation of Signal-to-Noise Ratio	55
4.1.1. Sources and Backgrounds	55
4.1.2. Detectors	58
4.1.3. Radiometric Models	60
4.1.4. Fourier Transform Spectrometer	62
4.1.5. Dispersive Spectrometer	66
4.1.6. The Calculation of D^* and Background Flux Density	67
4.1.7. The Impact of Pointing Jitter	68
4.1.8. Discussion	69
4.2. Interferogram Sampling	69
4.2.1. Sampling Theory	70
4.2.2. A Brief Digression	74
4.2.3. Sampling Position Accuracy	75
4.2.4. Sampling Strategy	76
4.2.5. Sampling Methodology	77
4.2.6. Symmetric and Asymmetric Scanning	82
4.3. Optical Configurations	83
4.3.1. The Michelson FTS	83
4.3.2. Retroreflectors	83
4.3.3. The Connes-Type FTS	85
4.3.4. The Compensated FTS	87
4.3.5. Discussion	89
4.4. Potential Problem Areas	89
4.4.1. Phase Errors	89
4.4.2. Channeling	91

4.4.3. Vibration	91
4.4.4. Electromagnetic Interference	93
4.4.5. Signal Dynamic Range	94
4.4.6. Signal Chain Linearity	97
4.4.7. Data Errors	98
4.4.8. Data Rates and Volumes	99
CHAPTER 5 CASE STUDIES OF REMOTE SENSING FOURIER TRANSFORM SPECTROMETERS	101
5.1. The <i>Voyager</i> IRIS FTS	101
5.1.1. Purpose	101
5.1.2. Specifications	102
5.1.3. Optical Layout	102
5.1.4. Discussion	104
5.2. The Canada-France-Hawaii Telescope FTS	104
5.2.1. Purpose	107
5.2.2. Specifications	107
5.2.3. Optical Layout	107
5.2.4. Discussion	108
5.3. The <i>Spacelab 3</i> ATMOS FTS	109
5.3.1. Purpose	113
5.3.2. Specifications	113
5.3.3. Optical Layout	114
5.3.4. Discussion	114
5.4. The Mark IV Balloon/Aircraft FTS	114
5.4.1. Purpose	116
5.4.2. Specifications	117
5.4.3. Optical Layout	117
5.4.4. Discussion	117
5.5. The <i>EOS</i> TES FTS	121
5.5.1. Purpose	123
5.5.2. Specifications	124
5.5.3. Optical Layout	124
5.5.4. Discussion	124

CHAPTER 6	REMOTE SENSING ENVIRONMENTS	129
	6.1. Telescope-Based Systems	129
	6.2. Aircraft-Based Systems	131
	6.3. Balloon-Borne Systems	132
	6.4. Spacecraft Systems	133
CHAPTER 7	GENERAL OBSERVATIONS AND CONCLUSIONS	135
APPENDIX	OPTIMUM FILTERS	137
	A.1. The Optimum Filter Theorem	137
	A.2. Implementation	140
	A.3. An Alternative Approach	142
	BIBLIOGRAPHY AND REFERENCES	145
	INDEX	149
