

## CONTENTS

	Page
<b>CHAPTER I INTRODUCTION</b>	<b>1</b>
Background	1
Objectives and Approach	3
<b>CHAPTER II LITERATURE REVIEW</b>	<b>6</b>
General	6
Characteristics of Laterites	8
Formation of Laterites	10
Classification of Laterites	14
Engineering Properties of Laterites	15
Stabilization of Lateritic Soils	22
Performance Studies	25
<b>CHAPTER III GEOLOGIC AND PEDOLOGIC STUDY OF LATERITE</b>	<b>27</b>
Introduction	27
Physiography and Geology of Thailand	27
Definition of Laterite and Lateritic Soils	30
Geographic Distribution of Laterite in Southeast Asia	33
Other Factors Effecting Laterite Formation	34
General Engineering Properties Associated With Lateritic Soils Formed in the Various Great Soil Groups	36 39
<b>CHAPTER IV DEVELOPMENT OF A CLASSIFICATION SYSTEM</b>	<b>45</b>
<b>CHAPTER V PAVEMENT EVALUATION STUDIES</b>	<b>49</b>
Introduction	49
General Description of Pavement Evaluation Procedure	52
Pavement Condition Surveys	53
Field Sampling and Testing	53
Laboratory Testing	55
Analysis of Data	58
Summary of Pavement Evaluation	81
<b>CHAPTER VI DURABILITY STUDIES</b>	<b>82</b>
Selection of Test Materials	82
Evaluation of Test Methods	83
Effects of Wetting and Drying on Engineering Properties	94
General Conclusions Regarding the Durability of Lateritic Soils	107
<b>CHAPTER VII STABILIZATION STUDIES</b>	<b>109</b>
Background	109
Experiment Design	110
Testing	110
Summary and Conclusions	114
<b>CHAPTER VIII DYNAMIC STUDIES</b>	<b>124</b>
Test Objectives	124
Naturally Graded Test Series	125
Artificially Graded Series	126
Summary of Principal Conclusions on Dynamic Behavior of Lateritic Soils	131

<b>CHAPTER IX PREPARATION OF DESIGN STANDARDS</b>	<b>134</b>
Pavement Design Methods and Criteria	134
Standard Specifications	141
Outline of Usage Manual	147
<b>CHAPTER X FINDINGS, CONCLUSIONS AND RECOMMENDATIONS</b>	<b>155</b>
Summary of Findings	155
Conclusions	161
Recommendations	164
