

CONTENTS

Preface.

xxvii

PANEL—Tunable Solid State Lasers (organized by D. F. Heller, Light Age, Inc., Mt. Bethel, NJ). Participants: R. L. Byer (Stanford University), L. Chase (Lawrence Livermore National Laboratory), R. C. Powell (Oklahoma State University), and J. C. Walling (Light Age, Inc., Mt. Bethel, NJ)..... **1**

LASERS AND COHERENT SOURCES

I. A. New Developments in Solid State Sources (organized by C. R. Pollock, Cornell University)

| | |
|--|-----------|
| Laser and Spectroscopic Properties of Chromium-Activated Fosterite (<i>invited</i>)..... | 33 |
| V. Petčević, S. K. Gayen, and R. R. Alfano | |
| Laser Diode Pumped 1μ Nd:YAG and Nd:BEL Lasers | 39 |
| R. Scheps, P. Poirier, J. F. Myers, and D. F. Heller | |
| Laser Performance and Tuning Characteristics of a Diode Pumped Nd:YAIO₃ Laser at 1083 nm | 42 |
| L. D. Schearer and P. Tin | |
| Tunable CW Laser Action of Er³⁺ in Double Sensitized Fluoroaluminate Glass at Room Temperature | 45 |
| E. Heumann, M. Ledig, D. Ehrt, W. Seeber, E. W. Duczynski, H. J. v. d. Heide, and G. Huber | |
| A Comparative Study of Nd:YLF and Nd:YAG Crystals for Solar-Pumped Laser Application | 50 |
| K. H. Kim and J. H. Lee | |
| Parametric Conversion and Index of Refraction Measurements in Hydrothermally Grown in KTiOPO₄ | 54 |
| H. Vanherzeele, J. D. Bierlein, and F. C. Zumsteg | |

I. B. Novel Laser Systems—Modifications to Visible, Ultraviolet, and X-Ray Lasers (organized by R. A. Sauerbrey, Rice University)

| | |
|--|-----------|
| Two-Laser Approach to X-Ray Lasers (<i>invited</i>)..... | 57 |
| W. Tighe, L. Meixler, C. H. Nam, and S. Suckewer | |
| Superfluorescent Chemically Driven Visible Laser Transitions Using Fast Near Resonant Energy Transfer | 63 |
| J. R. Woodward, S. H. Cobb, and J. L. Gole | |
| Continuous Chemical Laser Amplifiers in the Visible Region | 68 |
| S. H. Cobb, J. R. Woodward, and J. L. Gole | |
| Ionic Alkali Halide Excimers Excited by a Laser-Produced Plasma | 74 |
| S. Kubodera, P. J. Wisoff, and R. Sauerbrey | |

| | |
|--|------------|
| Quantum Initiation Effects on the Asymptotic Coherent On-Resonance Propagation of Two Different-Wavelength Probe and Pump Beams in a Three-Level System | 131 |
| F. P. Mattar, Y. Claude, and M. Burgess | |
| Diffraction and Phase Effects on the Evolution of Raman Solitons | 137 |
| F. P. Mattar, Y. Claude, M. Burgess, and J. Teichmann | |
| Diffraction, Phase and Quantum Fluctuation Effects in the Evolution of Raman Solitons | 164 |
| F. P. Mattar, Y. Claude, M. Burgess, and J. Teichmann | |
| Cross-Phase Modulation and Cross-Focusing Effects in Optical Fibers | 198 |
| R. Du and F. P. Mattar | |

II. NONLINEAR OPTICAL PHENOMENA AND APPLICATIONS

II. A. Squeezed States and Quantum Optics (organized by H. Pilloff, Office of Naval Research)

| | |
|---|------------|
| Prospects for Practical Use of Squeezed Light and Back Action Evasion (<i>invited</i>) | 207 |
| M. D. Levenson and R. M. Shelby | |
| Quantum Nondemolition Detection of Optical Quadrature Amplitudes (<i>invited</i>) | 210 |
| R. M. Shelby | |
| Photon Statistics of Multimode Squeezed Light | |
| J. M. Huang and P. Kumar | |
| Forward Hyper-Transient Stimulated Raman Scattering Including Laser Pump Depletion | 219 |
| F. P. Mattar, C. M. Burgess, Y. Claude, and J. Teichmann | |
| Transverse Effects in Transient Stimulated Raman Scattering in Pump Laser Depletion | 241 |
| J. Teichmann, Y. Claude, M. Burgess, and F. P. Mattar | |
| Quantum and Nonlinear Theory of Stimulated Raman Scattering (SRS) .. | 249 |
| F. P. Mattar, Y. Claude, M. Burgess, and J. Teichmann | |
| Nonlinear Gaussian Expansions of Stochastic Processes: Non-Gaussian Effects in Coherent Anti-Stokes Raman Spectroscopy | 262 |
| A. M. F. Lau and R. L. Farrow | |
| Second Stokes Generation in Deuterium | |
| M. D. Duncan, R. Mahon, L. L. Tankersley, and J. Reintjes | |

II. B. Nonlinear Optical Phenomena in Atomic Vapors (organized by C. R. Stroud, Jr., University of Rochester)

| | |
|---|------------|
| Influence of A. C. Stark Effect on Stimulated Hyper-Raman Profiles in Sodium Vapor | 268 |
| M. A. Moore, W. R. Garrett, and M. G. Payne | |
| Attosecond Beats in Sodium Vapor | 271 |
| D. DeBeer, E. Usadi, and S. R. Hartmann | |

| | |
|---|-----|
| Suppression of Two-Photon Resonantly Enhanced Nonlinear Processes in Extended Media | 272 |
| W. R. Garrett, M. A. Moore, M. G. Payne, and R. K. Wunderlich | |
| Experimental Studies of Self-Suppression of Vacuum Ultraviolet Generation in Xe | 276 |
| J. P. Judish, S. L. Allman, W. R. Garrett, and M. G. Payne | |
| New Coherent Cancellation Effect Involving Four-Photon Excitation and the Related Ionization | 279 |
| M. G. Payne, W. R. Garrett, J. P. Judish, and M. P. McCann | |
| Effect of the Coherent Cancellation of the Two-Photon Resonance on the Generation of Vacuum Ultraviolet Light by Two-Photon Resonantly Enhanced Four-Wave Mixing | 282 |
| M. G. Payne, W. R. Garrett, J. P. Judish, and R. Wunderlich | |
| K $4^2S_{1/2} \rightarrow 8^2S_{1/2}$ Two-Photon Absorption by Near-Resonant Pumping of $6^2P_{1/2,3/2}$ State | 285 |
| Y. Z. Sun, X. H. Li, Q. Wang, and Y. K. Cheng | |
| Diode Laser-Initiated, Two-Color Resonance Ionization Mass Spectrometry of Lanthanum | 288 |
| R. W. Shaw, J. P. Young, and D. H. Smith | |
| Vacuum Enhanced Atomic Excitation | 291 |
| Y. Zhu, A. Lezama, and T. W. Mossberg | |
| Two-Photon Resonant, Stimulated Processes in Krypton and Xenon | 294 |
| J. C. Miller | |
| Dynamic Frequency Shift Effects on Coherent Propagation in Two-Level Systems | 297 |
| J. Manassah and F. P. Mattar | |
| Self- and Cross-Phase Modulation, Pulse Compression Induced Chirping, Spectral Broadening and Focusing Effects in Co-Propagation of Coherent Pulses in Three-Level Atoms | 303 |
| F. P. Mattar, J. Delettrez, and J. P. Babuel-Peyrissac | |
| II. C. Nonlinear Optics in Semiconductors | |
| (organized by A. L. Smirl, North Texas State University and R. B. James, Sandia National Laboratories, Livermore) | |
| Saturation of Inter-Subband Transition in <i>p</i>-Type Semiconductor Quantum Wells | 318 |
| Y.-C. Chang and R. B. James | |
| Optically Saturable Absorbing Centers Versus Deep-Level Traps in Semiconductor Lasers | 324 |
| X. Y. Liu and E. Bourkoff | |
| Pulsed Laser Induced Photoconductivity in ZnS: Part II | 327 |
| R. D. Singh, A. Gaur, and A. K. Sharma | |

II. D. Short Pulse Lasers and Applications
(organized by D. F. Heller, Light Age, Inc., Mt. Bethel, NJ)

| | |
|---|-----|
| Intermolecular Vibration Observed in Liquid CS₂ at High Pressure | 330 |
| B. Kohler and K. A. Nelson | |
| Femtosecond Time Resolved Absorption Spectroscopy of Cr(CO)₆ and Mn₂(CO)₁₀: Observation of Elementary Bond Breakage and Formation | 333 |
| A. G. Joly and K. A. Nelson | |
| Picosecond Pulse Amplification in a Single Mode Neodymium Doped Fibre | 336 |
| A. S. Gouveia-Neto, A. S. B. Sombra, P. G. J. Wigley, and J. R. Taylor | |
| Measurement of UV Femtosecond Light Pulses using Two-Photon Luminescence in CsI Crystals Doped with Na | 339 |
| F. Noack, W. Rudolph, R. Deijch, and W. E. Postovalos | |

III. CONDENSED MATTER, SURFACE, AND PARTICLE SPECTROSCOPY
WITH EMPHASIS ON LASER-SURFACE INTERACTIONS
(organized by A. C. Tam, IBM Almaden Research Center)

III. A. Laser-Condensed Matter Interactions
(organized by E. E. Marinero, IBM Almaden Research Center)

| | |
|--|-----|
| Surface-Plasmons Enhanced Nonequilibrium Electronic and Lattice Heating in Thin Silver Films | 345 |
| T. Tsang and D. D. Smith | |
| Transient Grating Probe of Recombination Dynamics in Cadmium Sulfide Colloids | 348 |
| L. V. Natarajan and J. R. Morgan | |
| Time Resolved Measurements of Inelastic Scattering Processes from Micron Sized Droplets | 351 |
| A. Biswas, H. Latifi, R. L. Armstrong, and R. G. Pinnick | |
| Two-Photon Induced Chemical Reactions in Liquids | 354 |
| C. H. Chen and M. P. McCann | |
| Laser-Induced Reaction and Polymerization of Formaldehyde in Low Temperature Amorphous Solids | 357 |
| C. A. Wright, T. W. Tang, and E. S. Mansueto | |
| Nonlinear Absorption in Liquids Studied by Laser-Induced Anharmonic Thermal Gratings | 360 |
| X. R. Zhu and J. M. Harris | |
| Adsorption of Oxygen on a Polycrystalline Ag Surface: A Second-Harmonic Generation Study | 363 |
| L. Li, Y. H. Liu, G. D. Yu, W. C. Wang, and Z. M. Zhang | |
| Visualization of Photogenerated Carrier Profiles at a Silicon Surface | 366 |
| K. Wan, R. Normandin, and P. Van der Meer | |
| Optical Computing with Thin Films | 369 |
| R. Cuykendall and K. H. Strobl | |

III. B. Applications of Laser/Surface Interactions

| | |
|--|------------|
| Laser Induced Refractive Index Change in Polymers | 375 |
| D. S. Dunn and A. J. Ouderkirk | |
| Photochemistry of Ga(CH₃)₃ at a Low Temperature Surface | 370 |
| E. Villa, J. A. Dagata, and M. C. Lin | |

III. C. Laser Modification of Surfaces

| | |
|---|------------|
| Excimer Laser-Controlled Photochemical Deposition of Thin Films and Artificially Structured Materials (<i>invited</i>) | 382 |
| D. H. Lowndes, D. Eres, D. B. Geohegan, J. Z. Tischler, D. N. Mashburn, and S. J. Pennycook | |
| Laser Processed Zirconium: Study of Corrosion and Microstructure..... | 391 |
| W. Reitz and J. Rawers | |
| Investigation of Surface Damage Thresholds by Photoacoustic Deflection | 394 |
| S. Petzoldt, A. P. Elg, J. Reif, and E. Matthias | |
| Rotational Energy Accommodation of OH Produced in the Catalytic Reaction of NO₂ + H₂ over Pt(111)..... | 397 |
| L. V. Novakoski, D. S. Y. Hsu, and M. C. Lin | |
| ArF Excimer Laser Processing of PECVD and LECVD Silicon Oxynitride Thin Films: Local Changes in DUV Transparency and Composition | 400 |
| J. N. Cox, L. Friedrich, L. L. Heath, B. L. Sun, and R. Kolenkow | |
| Laser Ablation/Fourier Transform Mass Spectrometry of Polymers..... | 403 |
| W. R. Creasv and J. T. Brenna | |

III. D. Surface Nonlinear Optics

| | |
|---|------------|
| Time-Resolved Laser Probes of Surfaces (<i>invited</i>) | 406 |
| H. W. K. Tom | |
| Optical Second Harmonic Generation in Metal Monolayers and Metal Surfaces .. | 412 |
| T. E. Furtak and J. Miragliotta | |
| Reflection at a Nonlinear Interface..... | 415 |
| K. H. Strobl, R. R. Cuykendall, B. Bockhop, and D. Megli | |

III. E. Laser Ionization, Ablation and Deposition

| | |
|--|------------|
| Studies of the Pulsed Laser Deposition Process for the Preparation of High Temperature Superconducting Films (<i>invited</i>) | 420 |
| T. Venkatesan, X. D. Wu, A. Inam, B. Dutta, M. S. Hedge, and C. C. Chang | |
| Utilization of 1 + 1 REMPI as a Probe of Rotational Dynamics in Gas-Surface Scattering | 426 |
| D. C. Jacobs, K. W. Kolasinski, and R. N. Zare | |
| Spectral Analysis of Fluorescence of Excited Species from 193 nm Photoablation of Polycarbonate and the High T_c Superconductors Bi₂CaSr₂Cu₂O₇ and YBa₂Cu₃O_{7-d} | |
| S. Deshmukh, E. W. Rothe, and G. P. Reck | |

| | |
|---|------------|
| Ion Acceleration in Threshold Level Photoablation of Metals | 433 |
| R. Welle and H. Helvajian | |
| Laser Damage Studies of ZnS via Neutral Particle Emission | 436 |
| H. F. Arlinghaus, W. F. Calaway, C. E. Young, M. J. Pellin, D. M. Gruen, and L. L. Chase | |
| Platinum Spots on Silicon Deposited by Photon Induced Chemical Vapor Deposition | 439 |
| C. Garrido, B. Leon, M. Perez-Amor, D. Braichotte, and H. van den Bergh | |
| Laser Enhanced Selective Epitaxy of III-V Compounds | 442 |
| N. H. Karam, H. Liu, I. Yoshida, and S. M. Bedair | |
| Rotational Temperature of SiF₂ Radicals Produced in the Thermal Etching of Silicon by Fluorine Containing Compounds | 445 |
| J. S. Horwitz, J. A. Dagata, D. W. Shinn, and M. C. Lin | |

IV. ATOMIC, MOLECULAR, AND IONIC SPECTROSCOPY

IV. A. Energy Resolved Ionization and Fragmentation Processes in Atoms and Small Molecules (organized by J. E. Wessel, Aerospace Corporation)

| | |
|---|------------|
| Two-Color Studies of Autoionizing States in Small Molecules (<i>invited</i>) | 451 |
| S. T. Pratt, M. A. O'Halloran, F. S. Tomkins, J. L. Dehmer, and P. M. Dehmer | |
| Multiphoton Ionization (MPI) of Vibrationally Excited NO ($v''=0-9$) in a Pulsed Molecular Beam | 457 |
| C. S. Feigerle and J. C. Miller | |
| Molecular Two-Photon Spectroscopy | 460 |
| M. P. McCann, C. H. Chen, and M. G. Payne | |
| Theory of Molecular Transition Moment Determination by Autler-Townes Spectroscopy: $D^1\Pi_u-E,F^1\Sigma_g^+$ Bands of H₂ | 463 |
| A. M. F. Lau and W. M. Huo | |
| Multiphoton Ionization Photoelectron Spectroscopy of Xenon: Experiment and Theory | 466 |
| S. J. Bajic, R. N. Compton, X. Tang, A. L'Huillier, and P. Lambropoulos | |
| Observations of Excited State Photoionization of Xenon | 469 |
| J. Lahiri and S. T. Manson | |
| A Spectroscopic Study of the $\tilde{X}^4\Sigma_g^-$ ($v=4-7$) Levels of C₂⁺ Using the Stimulated Emission Pumping Technique | 472 |
| F. G. Celii and J. P. Maier | |
| Two Photon Resonance Enhanced Multiphoton Ionization Detection and Spectroscopy of Gas Phase Germyl (GeH₃) Radicals | 475 |
| J. W. Hudgens, R. D. Johnson III, and B. P. Tsai | |
| Raman-Induced Kerr Effect Spectroscopy of Rare Gas Dimers and Molecular Ions | 478 |
| R. H. Taylor, J. Borysow, and J. W. Keto | |
| Single-Photon VUV Laser-Induced Fluorescence Spectrum of HCl | 481 |
| S. Arepalli, Y.-L. Huang, R. Callaghan, and R. J. Gordon | |

IV. B. Ionization Processes and Ion Spectroscopy of Polyatomic Species
(organized by J. E. Wessel, Aerospace Corporation)

| | |
|---|------------|
| Resonant Two-Photon Ionization Electronic Spectroscopy of the Silver Trimer | 485 |
| P. Y. Cheng and M. A. Duncan | |
| Resonant Enhanced Multiphoton Dissociation Spectroscopy of Molecular Ions: Technique and Applications of CH₃I⁺/CD₃I⁺ | 488 |
| U. Boesl, R. Weinkauff, and K. Walter | |
| Characterization of the Gas Phase Bromocyanogen Cation with Laser-Excited Fluorescence Spectroscopy | 494 |
| M. A. Hanratty, M. Roesslein, F. G. Celi, T. Wytenbach, and J. P. Maier | |
| Spectrum (310 to 360 nm) and Ionization Potential of the Silyl Radical | 497 |
| R. D. Johnson III, B. P. Tsai, and J. W. Hudgens | |
| Aromatic Molecular Clusters and Their Predissociation Dynamics Studied by Picosecond Time-Resolved Fluorescence Spectroscopy | 500 |
| A. I. Kaziska, S. A. Wittmeyer, M. I. Shchuka, A. L. Motyka, and M. R. Topp | |

IV. C. Interaction of Strong Optical Fields with Matter
(organized by T. J. McIlrath, University of Maryland)

| | |
|--|------------|
| High-Order Harmonic Generation by Hydrogenic Ions (<i>invited</i>) | 503 |
| C. W. Clark, L. Pan, and K. T. Taylor | |
| Dynamics of Coupled Single Particle Electron and Collective Nuclear Motion in a Laser Field | 509 |
| F. X. Hartmann, D. W. Noid, and Y. Y. Sharon | |
| Self-Focusing of Very Intense CW Laser Beams in Saturable Absorbers | 515 |
| J. Teichmann, Y. Claude, M. Burgess, F. P. Mattar, J. P. Babuel-Peyrissac, J. P. Marinier, and C. Bardin | |
| The Moment Theory for Cross-Coupling of Two Intense Fields through a Kerr Medium | 529 |
| I. Teichmann and F. P. Mattar | |

IV. D. Experiments with Laser Cooled and Trapped Atoms
(organized by J. E. Bjorkholm, AT&T Bell Laboratories, Holmdel)

| | |
|--|------------|
| Laser Cooling of Mg and Ca Atomic Beams | 533 |
| N. Reverini, E. Maccioni, D. Pereira, F. Strumia, and G. Vissani | |

IV. E. High Resolution Spectroscopy—From Atoms to Polyatomic Molecules
(organized by W. D. Phillips, NIST and M. C. Heaven, Emory University)

| | |
|---|------------|
| Bound-Continuum Transitions in Diatomic Molecules (<i>plenary</i>) | 536 |
| W. C. Stwalley | |
| Precise Laser Wavelength Measurements: What Can we Learn from Classical Spectroscopy? (<i>invited</i>) | 548 |
| C. I. Sansonetti | |

| | |
|---|-----|
| Measurement of the Rydberg Constant by Doppler-Free Spectroscopy of Atomic Hydrogen | |
| M. Allegrini, F. Biraben, B. Cagnac, J. C. Garreau, and L. Julien | |
| State Mixing in Rydberg Atom–Noble Gas Collisions | |
| K.-D. Heber, P. J. West, and E. Matthias | |
| Line Shape Variations of Spin-Forbidden Two-Photon Transitions | |
| H. R. Xia, J. W. Xu, and I. S. Cheng | |
| High Resolution Resonance-Enhanced Dissociation Spectroscopy of Chlorobenzene Cation Prepared by MPI | 563 |
| X. Ripoche, F. Morlet-Savary, I. Dimicoli, F. Piuze, J. Le Calve, and R. Botter | |
| The Absolute Vibrational Numbering and Molecular Constants of the Na_2 $2^3\Pi_g$ and $1^3\Delta_g$ States | 569 |
| X. Xie, R. W. Field, L. Li, A. M. Lyyra, J. T. Bahns, and W. C. Stwalley | |
| OODR Fluorescence and Polarization Spectroscopy of K_2: Rydberg States and the $A^2\Sigma_u^+$ State (invited) | |
| A. M. Lyyra, H. Wang, L. Li, W. T. Luh, V. Zafropulos, and W. C. Stwalley | |
| Na_2 $1^3\Sigma_g^+ \rightarrow 1^3\Sigma_d^+$ Lasing with Peak around 892.0 nm | |
| Q. Wang, Z. W. Lu, W. Liu, T. Wu, D. Xing, and Z. G. Ma | |
| Study of the New 600.0 nm Diffuse Band | 581 |
| Y. Z. Sun, X. H. Li, Q. Wang, and Y. K. Cheng | |

V. STATE-SPECIFIC PHOTOPHYSICS AND PHOTOCHEMISTRY

(organized by D. R. Crosley, SRI International and J. McDonald,
Naval Research Laboratory)

| | |
|--|-----|
| Semiquantitative Laser-Induced Fluorescence Flame Measurements (plenary) | 587 |
| D. R. Crosley | |
| State-Selective Photodissociation Dynamics of NOCl: Scalar and Vector Properties (invited) | 593 |
| A. Ogai, C. X. W. Qian, L. Iwata, and H. Reiser | |
| Laser Induced Shifts in Chemical Equilibria | |
| R. A. Bernheim, C. He, and G. Alzetta | |
| Polarization Studies as a Probe of Photodissociation Dynamics | 602 |
| V. Zafropulos, P. D. Kleiber, K. M. Sando, X. Zeng, A. M. Lyyra, and W. C. Stwalley | |
| Self-Induced Polarization Effects in Gases | 607 |
| S. A. Bakhranov, A. T. Berdikulov, A. M. Kokharov, P. K. Khabibullaev, and V. V. Tikhonenko | |
| Vibrational Predissociation Dynamics of Overtone-Excited HN_3 | 612 |
| B. R. Foy, M. P. Casassa, J. C. Stephenson, and D. S. King | |
| Vibrational and Rotational Energy Transfer in $X^2\Pi$, OH (invited) | 615 |
| D. R. Crosley, K. J. Rensberger, and J. B. Jeffries | |
| Energy Transfer Collisions in Laser Excited Mixtures of Alkali Vapors (invited) | 621 |
| M. Allegrini, S. Gozzini, G. Squadrito, C. Gabbanini, and L. Moi | |
| Photochemical Production of XeCl(B) Initiated by Two-Photon Excitation of Xe and Xe_2 | 627 |
| M. R. Berman | |

| | |
|---|-----|
| Alignment Effects in Ca-He (5^1P_1-5^3P_J) Energy Transfer Half-Collisions K. C. Lin, S. Ananthamurthy, P. D. Kleiber, J. X. Wang, W. C. Stwalley, and S. R. Leone | 630 |
| Spectroscopic Mapping of the OH-Ar Stretching Potential M. T. Berry, M. R. Brustein, and M. I. Lester | 634 |
| Photodissociation Studies of Borane Carbonyl (<i>invited</i>) H. H. Nelson | 637 |
| Photodissociation Dynamics of Ferrocene at 193 nm U. Ray, M. Vernon, H.-Q. Ho, and Z. J. Zhang | 642 |
| Laser-Induced Fluorescence in the $B^2\Sigma^+ - X^2\Pi$ System of OH A. D. Sappey, D. R. Crosley, and R. A. Copeland | 645 |
| Photochemistry of Formyl Fluoride B. R. Weiner and R. N. Rosenfeld | 648 |
| Energetics and Spin Selectivity in the Infrared Multiphoton Dissociation $\text{HN}_3 (\tilde{X}^1A') \rightarrow \text{N}_2(X^1\Sigma_g^+) + \text{NH}(X^3\Sigma^-, a^1\Delta)$ (<i>invited</i>) | 651 |
| M. H. Alexander and P. J. Dagdigan | |
| Study of Hydrogen Abstraction Reactions by Negative Ion Photoelectron Spectroscopy (<i>invited</i>) S. E. Bradforth, A. Weaver, R. B. Metz, and D. M. Neumark | |
| Double Resonance Studies of Rotational Energy Transfer in the $\text{N}_2 B^2\Pi_g$ State (<i>invited</i>) | 664 |
| P. J. Dagdigan and A. Ali | |
| Collisional Quenching and Energy Transfer in $\text{NS } B^2\Pi$ | 670 |
| I. J. Wysong, J. B. Jeffries, and D. R. Crosley | |
| Statistical Spectroscopy: Insight or Nonsense? (<i>invited</i>) | 673 |
| J.-P. Pique, Y. Q. Chen, D. M. Jonas, J. K. Lundberg, C. E. Hamilton, G. W. Adamson, R. J. Silbey, and R. W. Field | |
| Gas Phase Transition Metal Species: Electronic Structure and Reactivity (<i>invited</i>) | 683 |
| G. Eiden, S. Hanton, J. Harrington, D. Ritter, L. Sanders, and J. C. Weisshaar | |
| Stability and Oxidation of Metal Based CO and CO_2 Complexes | 687 |
| M. J. McQuaid and J. L. Gole | |
| Mode-Selective Intramolecular Vibrational Redistribution (IVR) to the van der Waals' Modes in <i>trans</i>-Stilbene van der Waals Complexes T. S. Zwier | |
| Dynamics of NCS Formation from Photolysis of RNCS | 695 |
| F. J. Northrup and T. J. Sears | |
| The Resolution and Characterization of Distinct <i>ortho</i>- and <i>para</i>-D_2 Complexes with <i>trans</i>-Stilbene in a Supersonic Jet | 698 |
| D. O. DeHaan and T. S. Zwier | |
| Application of Excitation Transfer to Studies of Collisional Deactivation of Vibrationally Excited Isotopically Labelled Nitrous Oxide by Sulfur Hexafluoride | 701 |
| M. C. Longuemare, R. Morrison, and R. D. Bates, Jr. | |

VI. DIAGNOSTIC AND ANALYTICAL APPLICATIONS OF LASERS
 (organized by A. W. Miziolek, U. S. Army Ballistic Research Laboratory
 and D. M. Lubman, University of Michigan)

VI. A. Advances in Raman Spectroscopy
 (organized by T. Vo-Dinh, Oak Ridge National Laboratory)

| | |
|---|-----|
| Surface Enhanced Raman Spectroscopy of Neurotransmitters (<i>invited</i>) M. L. McGlashen, K. L. Davis, and M. D. Morris | 707 |
| Observation of the SRS Spectrum of Secondary Vibrational Fundamental Frequency ν_2 in CH₄ Y. Z. Wang, Q. Wang, D. Y. Lin, Y. K. Cheng, and Z. G. Ma | 713 |

VI. B. Lasers and Chromatography
 (organized by T. G. Nolan, Oak Ridge National Laboratory)

| | |
|--|-----|
| Novel Approaches in Detector Instrumentation for Process Liquid Chromatography (<i>invited</i>)..... R. E. Synovec | 716 |
| ArF Laser-Generated Microplasmas for Chemical Analysis J. B. Morris, A. W. Miziolek, R. C. Sausa, and B. E. Forch | 722 |

VI. C. Advances in Photothermal Spectroscopy
 (organized by M. D. Morris, University of Michigan)

| | |
|--|-----|
| Hadamard Transform Techniques in Photothermal Spectroscopy (<i>invited</i>) P. J. Treado and M. D. Morris | 725 |
| Intensity of the Spectral Lines in the Optogalvanic Effect B. R. Reddy, P. Venkateswarlu, and M. C. George | 731 |
| The OLD Technique Applied to Diagnostics of the Atmospheric Simulation Chamber R. Anderson | 734 |

VI. D. Lasers in Trace Analysis
 (organized by T. J. Whittaker, Battelle Northwest)

| | |
|--|-----|
| Quantum-Limited FM Spectroscopy with a Lead-Salt Diode Laser C. B. Carlisle and D. E. Cooper | 737 |
| Real-Time High Resolution Monitor for Ambient Methane Based on a Zeeman-Split HeNe Laser P. L. Kebabian and J. B. McManus | 741 |
| Imaging of Supersonic Flow Using Planar Laser-Induced Fluorescence . P. H. Paul, J. Seitzman, M. P. Lee, B. McMillin, and R. K. Hanson | 744 |

VI. E. Lasers in Combustion Analysis
(organized by B. E. Forch, Ballistic Research Laboratory)

| | |
|---|-----|
| <i>In-Situ</i> Detection of Gas Phase Species in the Filament-Assisted Diamond Growth Environment | 747 |
| F. G. Celii, P. E. Pehrsson, H.-T. Wang, H. H. Nelson, and J. E. Butler | |
| Simultaneous Determination of Temperature and Species Concentrations of High Temperature Gases using Tunable Laser Absorption Spectroscopy | 750 |
| X. Ouyang, P. L. Varghese, and D. S. Cline | |
| Simultaneous Concentration Measurement of CO₂ and H₂ with Multiplex CARS in Combustion Environments | 754 |
| J. P. Singh and F. Y. Yueh | |
| Laser-Induced Fluorescence and Dissociation of Acetylene in Flames | 758 |
| G. A. Raiche, D. R. Crosley, and R. A. Copeland | |

VI. F. Advances in Plasma Diagnostics

| | |
|---|-----|
| Laser-Induced Fluorescence Measurement of Plasma Ion Distribution Functions: Errors Due to Spatially Inhomogeneous Laser Intensities | 761 |
| M. J. Goeckner, J. A. Goree, and T. E. Sheridan | |
| Measurement of H and H₂ Populations in a Low Temperature Plasma by Vacuum Ultraviolet Laser Absorption Spectroscopy | 767 |
