

Contents

Preface		viii
Unit 1	PURPOSE OF TOOL DESIGN	1
	Tool design	
	Tool design objectives	
	Tool design in manufacturing	
	Planning the design	2
	Challenges to the tool designer	4
	Requirements to become a tool designer	5
Unit 2	TYPES AND FUNCTIONS OF JIGS AND FIXTURES	7
	Jigs and fixtures	7
	Types of jigs	8
	Types of fixtures	14
	Classification of fixtures	18
Unit 3	SUPPORTING AND LOCATING PRINCIPLES	22
	Referencing	22
	Basic rules for locating	22
	Planes of movement	26
	Locating the work	27
Unit 4	CLAMPING AND WORKHOLDING PRINCIPLES	40
	Workholders	40
	Basic rules of clamping	40
	Types of clamps	42
	Special clamping operations	52
	Clamping accessories	57
Unit 5	BASIC CONSTRUCTION PRINCIPLES	59
	Tool bodies	59
	Preformed materials	60
	Drill bushings	62
	Set blocks	67
	Fastening devices	68

Unit 6	DESIGN ECONOMICS	77
	Design economy	77
	Economic analysis	78
	Comparative analysis	83
Unit 7	DEVELOPING THE INITIAL DESIGN	87
	Pre-design analysis	87
	Designing around the human element	93
	Previous machining operations	93
	Developing tooling alternatives	94
	Notetaking	94
Unit 8	TOOL DRAWINGS	95
	Tool drawings versus production drawings	95
	Simplified drawings	96
	Making the initial drawing	100
	Dimensioning tool drawings	102
	Metric versus English dimensioning	104
	Geometric dimensioning and tolerancing	108
	Supplementary symbols	113
	Geometrically dimensioned and toleranced tool drawings	118
Unit 9	TEMPLATE JIGS	123
	Template jigs	123
	Variations of template jigs	124
	Design procedures	127
Unit 10	WISE-HELD AND PLATE FIXTURES	134
	Vise-held fixtures	134
	Designing a vise-held fixture	136
	Plate fixtures	140
	Designing a plate fixture	142
	Calculating cam clamps	147
Unit 11	PLATE JIGS	155
	Plate jigs	155
	Designing a plate jig	156
	Designing a table jig	165
	Designing a sandwich jig or a leaf jig	166
Unit 12	ANGLE-PLATE JIGS AND FIXTURES	175
	Variations and applications	176
	Designing an angle-plate jig	177
	Designing an angle-plate fixture	182

Unit 13	CHANNEL AND BOX JIGS	190
	Channel jigs	190
	Designing a channel jig	192
	Box jigs	195
	Designing a box jig	197
Unit 14	WISE-JAW JIGS AND FIXTURES	204
	The machine vise	204
	Locating work in vise-jaw workholders	205
	Designing a vise-jaw jig	207
	Designing a vise-jaw fixture	212
Unit 15	SPECIAL TYPES AND APPLICATIONS OF JIGS AND FIXTURES	219
	Modular tooling	219
	Tooling for welding operations	223
	Inspection fixtures	226
	Power clamping	230
	Low-cost tooling	234
Unit 16	TOOLING FOR NUMERICALLY CONTROLLED MACHINES	240
	Introduction	240
	Basic N/C operation	240
	The Cartesian coordinate system	241
	Incremental and absolute programming	241
	Types of N/C systems	243
	Tooling requirements for numerical control	244
	Types of workholders	245
Unit 17	TOOL MATERIALS	251
	Properties of tool materials	251
	Ferrous tool materials	253
	Nonferrous tool materials	256
	Nonmetallic tool materials	261
	Designing with relation to heat treatment	262

APPENDIX	266
-----------------	------------
