

# CONTENTS

## SECTION 1 BASIC THEORY

Unit 1	Introduction . . . . .	1
Unit 2	Body Comfort . . . . .	8
Unit 3	Matter . . . . .	13
Unit 4	Heat . . . . .	16
Unit 5	Pressure . . . . .	28
Unit 6	Principles of Refrigeration . . . . .	33
Unit 7	Refrigerants . . . . .	36
Unit 8	Special Safety Precautions . . . . .	40
Unit 9	The Refrigeration Circuit . . . . .	42
Unit 10	The Electrical Circuit . . . . .	51
Unit 11	Refrigeration Oil . . . . .	53
Unit 12	Moisture . . . . .	56
Unit 13	Moisture Removal . . . . .	58
Unit 14	Service Valves . . . . .	62
Unit 15	Manifold and Gauge Set . . . . .	65
Unit 16	Leak Detectors . . . . .	72
Unit 17	The Receiver/Dehydrator . . . . .	76
Unit 18	The Thermostatic Expansion Valve . . . . .	83
Unit 19	The Thermostat . . . . .	91
Unit 20	The Magnetic Clutch . . . . .	95
Unit 21	Pressure Controls . . . . .	99
Unit 22	Automatic Temperature Controls . . . . .	114
Unit 23	Electric and Vacuum Control Devices . . . . .	124

## SECTION 2 SYSTEM DIAGNOSIS

Introduction . . . . .	133
Temperature-Pressure Relationship 1 . . . . .	135
Temperature-Pressure Relationship 2 . . . . .	136
Temperature-Pressure Relationship 3 . . . . .	137
Temperature-Pressure Relationship 4 . . . . .	138
System Diagnosis 1: The Compressor . . . . .	139
System Diagnosis 2: The Condenser . . . . .	140
System Diagnosis 3: The Dehydrator . . . . .	141
System Diagnosis 4: Thermostatic Expansion Valve . . . . .	142
System Diagnosis 5: Thermostatic Expansion Valve . . . . .	143
System Diagnosis 6: The Thermostat . . . . .	144
System Diagnosis 7: The Thermostat . . . . .	145
System Diagnosis 8: Suction Control Devices – The Suction Throttling Valve . . . . .	146
System Diagnosis 9: Suction Control Devices – The Suction Throttling Valve . . . . .	147
System Diagnosis 10: Suction Control Devices – The Suction Throttling Valve . . . . .	148
System Diagnosis 11: Suction Control Devices – The Suction Throttling Valve . . . . .	149
System Diagnosis 12: Suction Control Devices – The Evaporator Pressure Regulator . . . . .	150

System Diagnosis 13: Suction Control Devices — The Evaporator Pressure Regulator. . . . .	151
System Diagnosis 14: Suction Control Devices — The Evaporator Pressure Regulator. . . . .	152
System Diagnosis 15: Suction Control Devices — The Pilot-operated Absolute Valve. . . . .	153
System Diagnosis 16: Suction Control Devices — The Pilot-operated Absolute Valve. . . . .	154
System Diagnosis 17: The System . . . . .	155
System Diagnosis 18: The System . . . . .	156
System Diagnosis 19: The System . . . . .	157
System Diagnosis 20: The System . . . . .	158
System Diagnosis 21: The System . . . . .	159
System Diagnosis 22: The System . . . . .	160

### SECTION 3 SERVICE PROCEDURES

Introduction. . . . .	161
Service Procedure 1: Connecting the Manifold and Gauge Set Into the System (Hand Shutoff Service Valves). . . . .	162
Service Procedure 2: Connecting the Manifold and Gauge Set Into the System (Schrader Valve Fittings) . . . . .	164
Service Procedure 3: Purging the Air-conditioning System . . . . .	166
Service Procedure 4: Leak Testing the System Using a Halide Leak Detector . . . . .	168
Service Procedure 5: Leak Testing the System Using an Electronic Leak Detector. . . . .	171
Service Procedure 6: Evacuating the System Using a Vacuum Pump or Charging Station . . . . .	173
Service Procedure 7: Charging the System Using Pound Cans of Refrigerant (System Off) . . . . .	176
Service Procedure 8: Charging the System Using Pound Cans (System Running) . . . . .	179
Service Procedure 9: Charging the System from a Bulk Source . . . . .	182
Service Procedure 10: Adding Dye or Trace Solution to the Air-conditioning System . . . . .	185
Service Procedure 11: Isolating the Compressor from the System. . . . .	187
Service Procedure 12: Performing a Volumetric Test of the Air-conditioning Compressor. . . . .	189
Service Procedure 13: Performance Testing the Air Conditioner . . . . .	192
Service Procedure 14: Replacing the Compressor Shaft Oil Seal (York and Tecumseh Compressors) . . . . .	195
Service Procedure 15: Replacing the Compressor Shaft Oil Seal (Sankyo SD-5 Compressor) . . . . .	198
Service Procedure 16: Servicing the Clutch Rotor and the Clutch Coil (Sankyo SD-5 Compressor). . . . .	203
Service Procedure 17: Replacing the Compressor Shaft Oil Seal (Chrysler Air-Temp). . . . .	206
Service Procedure 18: Replacing the Seal on General Motors' (Frigidaire) Compressors (Six- and Four-cylinder) . . . . .	209
Service Procedure 19: Checking the Compressor Oil Level (Air-Temp, Tecumseh, York Compressors) . . . . .	216
Service Procedure 20: Checking the Compressor Oil Level (Sankyo SD-5 Compressor). . . . .	218
Service Procedure 21: Checking and Adding Oil, General Motors' (Frigidaire) Six- and Four-cylinder Compressors . . . . .	221
Service Procedure 22: Adjusting the Thermostat (Cycling Clutch Units) . . . . .	224
Service Procedure 23: Servicing the Magnetic Clutch . . . . .	227

Service Procedure 24: Testing the Operation of the Evaporator Pressure Regulator Valve (Chrysler) . . . . .	230
Service Procedure 25: Testing the Operation of the Evaporator Temperature Regulator (Chrysler) . . . . .	232
Service Procedure 26: Checking and Adjusting the Suction Throttling Valve . . . . .	234
Service Procedure 27: Testing the Performance of the Pilot-operated Absolute Valve. . . . .	238
Service Procedure 28: Testing the Performance of the Valves-in-receiver (VIR). . . . .	241
Service Procedure 29: Testing the General Motors' Automatic Temperature Control . . . . .	243
Service Procedure 30: Performing the Temperature Dial Test of the General Motors' Automatic Temperature Control . . . . .	246
Service Procedure 31: Adjusting the Temperature Dial, General Motors' Automatic Temperature Control . . . . .	248
Service Procedure 32: Bench Testing the Thermostatic Expansion Valve for Efficiency . . . . .	250
Service Procedure 33: Testing the Manifold Gauge and Thermometer . . . . .	256
Service Procedure 34: Performing a Functional Test of the Automatic Temperature Control (General Motors' Electropneumatic System). . . . .	258
Service Procedure 35: Performing a Functional Test of the Automatic Temperature Control (Chrysler Motors' Electropneumatic System) . . . . .	266
Service Procedure 36: Performing a Functional Test of the Automatic Temperature Control (Ford Motors' Automatic Climate Control System) . . . . .	271
Service Procedure 37: Installing Mount and Drive Assemblies . . . . .	285
Service Procedure 38: Installing the Evaporator Assembly, Condenser, Hoses, and Hardware. . .	289
Service Procedure 39: Rebuilding the York Compressor, All Models. . . . .	294
Service Procedure 40: Rebuilding Tecumseh Compressors, Models HA-850 and HA-1000. . . . .	302
Service Procedure 41: Rebuilding Tecumseh Compressors, Models HG-500, HG-850, and HG-1000 . . . . .	311
Service Procedure 42: Repairing the Compressor Rear Head and the Valve Plate (Sankyo SD-5 Compressor) . . . . .	318
Service Procedure 43: Troubleshooting Compressor and Related Noise . . . . .	321
Service Procedure 44: Rebuilding the Chrysler Air-Temp V-2 Compressor. . . . .	324
Service Procedure 45: Rebuilding the General Motors' (Frigidaire) Six- and Four-cylinder Compressors. . . . .	331
Service Procedure 46: Rebuilding the Internal Assembly of the General Motors' (Frigidaire) Six- and Four-cylinder Compressors . . . . .	345
Service Procedure 47: Rebuilding the Suction Throttling Valve . . . . .	356
Service Procedure 48: Rebuilding the Valves-in-receiver (VIR) . . . . .	360
Service Procedure 49: Splicing the Refrigerant Hose and Inserting Fittings . . . . .	366
Service Procedure 50: Replacing Components . . . . .	368
Glossary . . . . .	371
Acknowledgments . . . . .	385
Index . . . . .	388
Color Plates . . . . .	393
