<b>1 The industrial drying of foods: an overview</b>	<b>1</b>
R.B. KEYEY	
<b>2 Drying fundamentals</b>	<b>7</b>
A.S. MUJUMDAR	
2.1 Introduction	7
2.2 Basic dryer types	9
2.3 Thermodynamic properties of air–water mixtures and moist solids	11
2.3.1 Psychrometry	11
2.3.2 Equilibrium moisture content	16
2.3.3 Water activity	19
2.4 Drying kinetics	21
2.5 Food quality parameters	26
2.6 Summary	29
Acknowledgements	29
References	29
<b>3 Through-flow dryers for agricultural crops</b>	<b>31</b>
S. SOKHANSANJ	
3.1 Introduction	31
3.2 On-farm dryers	32
3.2.1 Heated-air dryers	32
3.2.2 Unheated-air dryers	38
3.2.3 Combination heated- and unheated-air dryers	42
3.3 Commercial dryers	43
3.3.1 Commercial grain dryers	43
3.3.2 Malt dryers	44
3.4 Dryer control	46
3.5 Design of through-circulation dryers	47
3.5.1 Design calculations	47
3.5.2 Grain properties	53
3.5.3 Verification of design calculation	54
3.6 Crop quality and drying	56
3.6.1 Quality models	57
3.6.2 Stress cracks and broken kernels	59
3.7 Crop drying costs	59
3.7.1 Fixed and variable costs	59
3.7.2 Risk costs	61
3.7.3 Total costs	61
3.8 Summary	62
References	63

<b>4</b>	<b>Fluidized bed dryers</b>	<b>65</b>
	R.E. BAHU	
4.1	Introduction	65
4.2	Basics of fluidization	65
4.3	Features of construction	68
4.3.1	Distributor	68
4.3.2	Plenum chamber	70
4.3.3	Freeboard region and gas cleaning systems	71
4.3.4	Exhaust air recycle	71
4.4	Types of fluidized bed dryer	72
4.4.1	Introduction	72
4.4.2	Batch fluidized bed dryers	72
4.4.3	Well-mixed fluidized bed dryers	73
4.4.4	Plug-flow fluidized bed dryers	74
4.4.5	Multi-stage fluidized bed dryers	74
4.4.6	Vibro-fluidized bed dryers	76
4.4.7	Internally heated fluidized bed dryers	76
4.4.8	Fluidized bed granulators/coaters	78
4.4.9	Mechanically agitated fluidized bed dryers	78
4.4.10	Centrifugal fluidized bed dryers	80
4.4.11	The Jetzone dryer	80
4.5	Operating considerations	80
4.5.1	Control	81
4.5.2	Fire and explosion hazards	81
4.5.3	Energy conservation	81
4.6	Applications	81
4.7	Test procedures	82
4.8	Design methods	84
4.8.1	Scoping design	84
4.8.2	Detailed design calculations	86
	Acknowledgements	88
	References	88
<b>5</b>	<b>Spray dryers</b>	<b>90</b>
	K. MASTERS	
5.1	Introduction	90
5.2	Spray drying principles	92
5.2.1	Atomization	92
5.2.2	Spray-air contact and flow	94
5.2.3	Evaporation, drying and particle formation	96
5.2.4	Powder handling	99
5.3	Spray dryer layouts	101
5.3.1	Cocurrent drying chamber with rotary atomizer	101
5.3.2	Cocurrent drying chamber with nozzle atomization	102
5.3.3	Cocurrent drying chamber with integrated fluid bed	103
5.3.4	Cocurrent drying chamber with integrated belt	104
5.3.5	Mixed flow drying chamber with integrated fluid bed	105
5.4	Meeting powder specifications	106
5.4.1	Particulate structure and size	106
5.4.2	Moisture content	107
5.4.3	Bulk density	109
5.4.4	Hygroscopicity	109
5.5	Special design features for hygiene and safety	110
5.5.1	Drying air filtration	110
5.5.2	Insulation and cladding of drying chambers	110
5.5.3	Prevention of fires and explosions	112

<b>6</b>	<b>Contact dryers</b>	<b>115</b>
	D. OAKLEY	
6.1	Introduction	115
6.2	Industrial equipment and applications	116
6.2.1	Introduction	116
6.2.2	Contact dryer selection	116
6.2.3	Vacuum tray dryers	118
6.2.4	Vacuum band dryers	118
6.2.5	Plate dryers	120
6.2.6	Thin-film dryers	121
6.2.7	Drum dryers	122
6.2.8	Rotating batch vacuum dryers	124
6.2.9	Horizontally agitated dryers	125
6.2.10	Indirectly heated rotary dryers	127
6.2.11	Vertically agitated dryers	128
6.3	Theoretical overview of contact drying	129
6.4	Design of contact dryers	132
	Acknowledgements	133
	References	133
<b>7</b>	<b>Freeze dryers</b>	<b>134</b>
	J.W. SNOWMAN	
7.1	Introduction	134
7.2	Process overview	134
7.3	Description of the freeze drying process	138
7.3.1	Pretreatment of food	138
7.3.2	Freezing	139
7.3.3	Sublimation (primary drying)	141
7.3.4	Desorption (secondary drying)	144
7.3.5	Storage after drying	145
7.3.6	Rehydration and use	145
7.4	Equipment	146
7.5	The cost of freeze drying	149
7.6	Freeze drying procedures	150
7.6.1	Coffee and tea	150
7.6.2	Raw meat products	151
7.6.3	Cooked meat products	152
7.6.4	Beef	152
7.6.5	Cooked pork and lamb	152
7.6.6	Cooked chicken meat	152
7.6.7	Offal	153
7.6.8	Shrimp	153
7.6.9	Egg	153
7.6.10	Fish	153
7.6.11	Mushrooms	153
7.6.12	Strawberries	153
7.6.13	Milled vegetables	154
7.6.14	Difficult materials	154
7.7	The packaging of freeze dried food	154
7.8	Conclusion	155
	References	155

<b>8</b>	<b>Dielectric dryers</b>	<b>156</b>
	<b>P.L. JONES and A.T. ROWLEY</b>	
8.1	Introduction	156
8.2	The fundamentals of dielectric heating	156
	8.2.1 Radio frequency dryers	157
	8.2.2 Microwave heating systems	160
	8.2.3 Safety of dielectric heating equipment	162
8.3	Dielectric drying	162
	8.3.1 The power dissipated with a dielectric	162
	8.3.2 The effect of a dielectric on an electric field	165
	8.3.3 Variation of dielectric properties with moisture content	166
	8.3.4 Moisture levelling	168
	8.3.5 Heat and mass transfer within drying solids	169
8.4	Applications of dielectric heat in drying	173
	8.4.1 Microwave or radio frequency drying?	173
	8.4.2 Microwave applications	174
	8.4.3 Radio frequency applications	175
	8.4.4 Application of combination dryers	176
8.5	Cost of RF and microwave dryers	177
8.6	Conclusions	177
	References	177
<b>9</b>	<b>Specialized drying systems</b>	<b>179</b>
	<b>D.J. BARR and C.G.J. BAKER</b>	
9.1	Introduction	179
9.2	Pneumatic-conveying dryers	179
	9.2.1 Introduction	179
	9.2.2 Equipment	180
	9.2.3 Hygiene	185
	9.2.4 Applications	186
	9.2.5 Design of pneumatic-conveying dryers	187
	9.2.6 Comparison of different drying systems	191
9.3	Spin-flash dryer	192
	9.3.1 Introduction	192
	9.3.2 Equipment	192
	9.3.3 Applications	193
9.4	Rotary dryers	194
	9.4.1 Introduction	194
	9.4.2 Equipment	194
	9.4.3 Applications	198
	9.4.4 Design of rotary dryers	198
9.5	Tray and tunnel dryers	200
	9.5.1 Introduction	200
	9.5.2 Tray dryers	201
	9.5.3 Tunnel dryers	202
	9.5.4 Design of tunnel dryers	205
9.6	Band dryers	206
	9.6.1 Introduction	206
	9.6.2 Equipment	207
	9.6.3 Applications	208
	9.6.4 Design of band dryers	208
	References	209

<b>10</b>	<b>Solar dryers</b>	<b>210</b>
	<b>L. IMRE</b>	
10.1	Introduction	210
10.2	Construction of solar dryers	211
	10.2.1 Functional parts of solar dryers	211
	10.2.2 Main types of solar dryers	211
10.3	Solar natural dryers	212
	10.3.1 Cabinet-type dryers	212
	10.3.2 Cabinet dryers fitted with a chimney	214
	10.3.3 Cabinet dryers fitted with a chimney and heat storage	215
10.4	Semi-artificial solar dryers	216
	10.4.1 Solar-tunnel dryers	216
	10.4.2 Greenhouse-type solar dryers	218
	10.4.3 Solar room dryers	218
10.5	Solar-assisted dryers	219
	10.5.1 solar-assisted dryer for seeds and herbs	219
	10.5.2 Solar-assisted dryers with heat storage	221
	10.5.3 Solar-assisted dryers with rock-bed heat storage	225
	10.5.4 Solar-assisted dryer combined with adsorbent units	225
	10.5.5 Solar-assisted dryers combined with heat pumps	226
10.6	Economic evaluation of solar dryers	227
	10.6.1 Savings	227
	10.6.2 Investment costs	228
10.7	Design of solar dryers	228
	10.7.1 Definition of the drying process	229
	10.7.2 Selection of solar dryer type	230
	10.7.3 Structural design of solar dryers	231
	10.7.4 Modelling and simulation of solar dryers	233
10.8	Dryer operation and process control strategies	234
	10.8.1 Operational aspects	234
	10.8.2 Less sophisticated solar dryers	235
	10.8.3 Solar-assisted dryers	235
	10.8.4 Solar dryers with recirculation	237
	10.8.5 Solar dryers fitted with a water storage tank and auxiliary heater	237
	References	238
<b>11</b>	<b>Dryer selection</b>	<b>242</b>
	<b>C.G.J. BAKER</b>	
11.1	Introduction	242
11.2	Specification of the drying process	244
	11.2.1 Form of feed	244
	11.2.2 Upstream and downstream processing operations	246
	11.2.3 Moisture content of feed and product	246
	11.2.4 Dryer throughput	248
	11.2.5 Physical properties of the feed	249
	11.2.6 Physical properties of the product	250
	11.2.7 Quality changes during drying	251
	11.2.8 Drying kinetics	253
11.3	Preliminary dryer selection	254
	11.3.1 Nature of the feed	254
	11.3.2 Nature of the product	255
	11.3.3 Throughput	256
	11.3.4 Mode of heating	256
11.4	Bench-scale tests	257
	11.4.1 Role of bench-scale tests	257
	11.4.2 Details of testing methods	261

11.5	Economic comparison of alternatives	264
11.5.1	Introduction	264
11.5.2	Vendor-generated capital cost estimates	264
11.5.3	In-house generated capital cost estimates	265
11.5.4	Cost comparison	267
11.6	Pilot-plant trials and final selection	267
11.7	Typical examples of the use of the dryer selection algorithm	268
11.7.1	Example 1	268
11.7.2	Example 2	269
11.8	Summary	270
	References	271
<b>12</b>	<b>Dryer operation and control</b>	<b>272</b>
	S.P. GARDINER	
12.1	Introduction	272
12.2	Dryer operation	272
12.2.1	Introduction	272
12.2.2	Operating conditions	272
12.2.3	Energy savings	274
12.3	Safety, health and the environment	276
12.3.1	Introduction	276
12.3.2	Safety	277
12.3.3	Environmental issues	281
12.4	Dryer control and instrumentation	282
12.4.1	Operating and control strategy	282
12.4.2	Alarms and interlocks	283
12.4.3	Dryer control strategies	284
12.4.4	Types of process control system	287
12.4.5	Process measurements	291
