

## CONTENTS

<b>CHAPTER 1 : SUSPENSION POLYMERISATION OF VINYL CHLORIDE</b>	<b>1</b>
1.1 Market for PVC and Principal Manufacturing Processes	1
1.2 Kinetics of Vinyl Chloride Polymerisation	2
1.3 Outline of Suspension Polymerisation Process	8
1.4 The Polymerisation Process	10
1.5 Cost of Manufacturing Suspension PVC	24
1.6 Use of Large Autoclaves	26
Acknowledgements	37
References	37
<b>CHAPTER 2 : BULK PROCESSES FOR THE MANUFACTURE OF PVC</b>	<b>39</b>
2.1 Introduction	39
2.2 Development of St Polymerisation of Vinyl Chloride	41
2.3 Evolution of St Gobain to Rhone-Poulenc	42
2.4 History of the Rhone-Poulenc Bulk Process for PVC	43
2.5 Rhone-Poulenc Two-stage Bulk Polymerisation Process	44
2.6 Control of Properties	50
2.7 Process Control	51
2.8 Degassing and Powder Handling	52
2.9 Morphology	53
2.10 Copolymers	55
2.11 Cost Comparison of Suspension and Bulk Processes	55
2.12 Latest Development in the Two-stage Process: Vertical Autoclaves	56
2.13 Polymer Quality Status–Bulk Versus Suspension	58
2.14 Gas Phase Polymerisation	59
Acknowledgements	60
References	61
<b>CHAPTER 3 : THE MANUFACTURE OF PVC PASTE AND EMULSION POLYMERS</b>	<b>63</b>
3.1 Introduction	63
3.2 Types of Polymer Produced Using the Emulsion Process	64
3.3 Applications of Paste/Emulsion Polymers	65
3.4 Production of Paste/Emulsion Polymers	66
References	80

<b>CHAPTER 4 : VINYL CHLORIDE COPOLYMERS AND BLENDS</b>	<b>83</b>
4.1 Introduction	83
4.2 Theory of Copolymerisation	84
4.3 Vinyl Acetate Copolymers	86
4.4 Olefin Copolymers	90
4.5 Other Copolymers	93
4.6 PVC Blends—General	94
4.7 Rubber Blends	95
4.8 Polymer Blends	98
4.9 Filler Blends	99
Acknowledgements	99
References	99
<b>CHAPTER 5 : THE TOXICITY OF VINYL CHLORIDE AND ITSREMOVAL FROM PVC</b>	<b>101</b>
5.1 Vinyl Chloride Toxicity	101
5.2 Protection of PVC Plant Operators	103
5.3 Vinyl Chloride Analysis	105
5.4 Removal of Residual VCM	108
Acknowledgements	120
References	120
<b>CHAPTER 6 : ISOLATION PROCESSES FOR PVC</b>	<b>123</b>
6.1 Introduction	123
6.2 Suspension Polymerisation	123
6.3 Emulsion / Microsuspension Polymerisation	136
6.4 Bulk Polymerisation	148
6.5 PVC Dust—Possible Hazards	149
References	150
<b>CHAPTER 7 : MORPHOLOGY OF PVC</b>	<b>151</b>
7.1 Introduction	151
7.2 Nomenclature	153
7.3 Classification of PVC Morphology	155
7.4 Mechanism of Suspension Polymerisation	161
7.5 Overall Morphology of Suspension PVC and Polymer Properties	171
7.6 Morphology of Rhone-Poulenc Bulk Polymer	174
7.7 Morphology of Gas Phase Polymer	177
7.8 Summary	180
Acknowledgements	182
References	182

<b>CHAPTER 8 : MECHANISM OF GELATION OF RIGID PVC</b>	<b>183</b>
8.1 Introduction	183
8.2 Pre-mixing with Additive	183
8.3 Effect of Processing Parameters	186
8.4 Extruder Sampling Techniques	190
8.5 Twin-Screw Extruder Sampling	193
8.6 Single-Screw Extruder Sampling	201
8.7 Other Extruder	204
8.8 Banbury High Shear Internal Mixer	204
8.9 Brabender Plasticorder	210
8.10 Two-roll mill	211
8.11 Summary	212
Acknowledgements	213
References	213
<b>CHAPTER 9 : THE PROCESSING OF RIGID PVC</b>	<b>215</b>
9.1 Introduction	215
9.2 Feedstock Preparation	217
9.3 Extrusion	219
9.4 The Influence of Processing on Properties	221
9.5 The Influence of Formulation Ingredients on Processing Behaviour	226
9.6 Orientation	242
References	244
<b>CHAPTER 10 : THE PROCESSING OF PLASTICISED PVC</b>	<b>245</b>
10.1 Introduction	245
10.2 Feedstock Preparation	246
10.3 Polymer / Plasticiser Interaction	247
10.4 Particle Morphology and Melt Flow	248
10.5 The Effect of Formulation Ingredients	252
10.6 The Processing of PVC Pastes	258
References	268
Index	271
