

## CONTENTS

	Page
Part I: PERFUMERY AS AN ART	
Chapter 1:    The Art of Perfumery	3
Part II: PERFUMERY AS A TOPIC IN LIFE SCIENCES	
Chapter 2:    Odours and Perfumes as a System of Signs	51
Chapter 3:    Semiochemicals: Mevalogenins in Systems of Chemical Communication	61
Chapter 4:    Origin of Natural Odorants	101
Chapter 5:    A Consideration of Some Psychological and physiological Mechanisms of Odor Perception	127
Part III: TRAPPING AND MEASURING OF ODOURS	
Chapter 6:    The Measuring of Odors	153
Chapter 7:    Trapping, Investigation and Reconstitution of Flower Scents	213
Part IV: CLASSIFICATION OF ODOURS	
Chapter 8:    Empirical Classification of Odours	253
Chapter 9:    Chemical Classification and Structure – Odour Relationships	287
Part V: COMPOSITORY TECHNIQUES AND APPLICATION SEGMENTS	
Chapter 10:   Creative Perfumery: Composition Techniques	333
Chapter 11:   Support Materials for Odorant Mixtures	347
Chapter 12:   Perfumery Applications: Functional Products	363
Chapter 13:   The Impact of Market Research	383
Part VI: PRODUCTION OF PERFUMES	
Chapter 14:   The Chemistry of Synthetic Raw Materials Production	399
Chapter 15:   Compounding	421
Chapter 16:   The Toxicology and Safety of Fragrances	441
Chapter 17:   The Fragrance Industry in a Changing World	465
Part VII: TOPICS IN PERFUMERY RESEARCH	
Chapter 18:   Receptors: Current Status and Future Directions	481
Chapter 19:   Natural Products	499
Chapter 20:   Synthetic Products	533
Outlook	629
