

Contents

Heat Treating of Steel	1	Furnace Atmosphere Control.....	568
Principles of Heat Treating of Steels.....	3	Control of Surface Carbon Content in Heat Treating of Steel.....	573
Quantitative Prediction of Transformation Hardening in Steels.....	20	Evaluation of Carbon Control in Processed Parts.....	587
Stress-Relief Heat Treating of Steel.....	33	Defects and Distortion in Heat-Treated Parts.....	601
Normalizing of Steel.....	35	Statistical Process Control of Heat-Treating Operations.....	620
Annealing of Steel.....	42	Computerized Properties Prediction and Technology Planning in Heat Treatment of Steels.....	638
Continuous Annealing of Steel.....	56	Furnace Safety.....	657
Quenching of Steel.....	67	Heat Treating of Cast Irons	665
Tempering of Steel.....	121	Introduction to Heat Treating of Cast Irons.....	667
Martempering of Steel.....	137	Heat Treating of Gray Irons.....	670
Austempering of Steel.....	152	Heat Treating of Ductile Irons.....	682
Induction Heat Treating of Steel.....	164	Heat Treating of Malleable Irons.....	693
Cold Treating and Cryogenic Treatment of Steel.....	203	Heat Treating of High-Alloy Irons.....	697
Heat Treating of Ultrahigh-Strength Steels.....	207	Heat Treating of Tool Steels	709
Heat Treating of Maraging Steels.....	219	Introduction to Heat Treating of Tool Steels.....	711
Heat Treating of Powder Metallurgy Steels.....	229	Processes and Furnace Equipment for Heat Treating of Tool Steels.....	726
Thermomechanical Processing of Steels.....	237	Heat Treating of Specific Classes of Tool Steels.....	734
Surface Hardening of Steel	257	Control of Distortion in Tool Steels.....	761
Introduction to Surface Hardening of Steels.....	259	Heat Treating of Stainless Steels and Heat-Resistant Alloys	767
Flame Hardening.....	268	Heat Treating of Stainless Steels.....	769
Laser Surface Hardening.....	286	Heat Treating of Superalloys.....	793
Electron Beam Surface Hardening.....	297	Heat Treating of Refractory Metals and Alloys.....	815
Gas Carburizing.....	312	Heat Treating of Nonferrous Alloys	821
Pack Carburizing.....	325	Principles of Heat Treating of Nonferrous Alloys.....	823
Liquid Carburizing and Cyaniding.....	329	Heat Treating of Aluminum Alloys.....	841
Vacuum Carburizing.....	348	Heat Treating of Copper Alloys.....	880
Plasma (Ion) Carburizing.....	352	Heat Treating of Magnesium Alloys.....	899
Microstructures and Properties of Carburized Steels.....	363	Heat Treating of Nickel and Nickel Alloys.....	907
Carbonitriding.....	376	Heat Treating of Titanium and Titanium Alloys.....	913
Gas Nitriding.....	387	Heat Treating of Tin-Rich Alloys.....	924
Liquid Nitriding.....	410	Heat Treating of Lead and Lead Alloys.....	925
Plasma (Ion) Nitriding.....	420	Heat Treating of Uranium and Uranium Alloys.....	928
Gaseous and Plasma Nitrocarburizing.....	425	Annealing of Precious Metals.....	939
Boriding (Boronizing).....	437	Glossary of Terms	948
Thermoreactive Deposition/Diffusion Process.....	448	Temper Colors for Steels	960
Methods of Measuring Case Depth.....	454	Austenitizing Temperatures for Steels	961
Heat-Treating Equipment	463	Metric-Conversion Guide	963
Types of Heat-Treating Furnaces.....	465	Temperature Conversion Table	966
Salt Bath Equipment.....	475	Abbreviations, Symbols, and Tradenames	969
Fluidized-Bed Equipment.....	484	Index	973
Heat Treating in Vacuum Furnaces and Auxiliary Equipment.....	492		
Heat-Resistant Materials for Furnace Parts, Trays, and Fixtures.....	510		
Energy-Efficient Furnace Design and Operation.....	519		
Process and Quality Control Considerations	527		
Temperature Control.....	529		
Furnace Atmospheres.....	542
