About

August 1, 2009

Volume 43, Issue 15

Pages 5551-6114

In this Issue:

- » Comment
- » Environmental News
- » Perspective
- » Features
- » Critical Reviews
- » Policy Analysis
- » Characterization of Natural and Affected Environments
- » Environmental Processes
- » Environmental Modeling
- » Environmental Measurements Methods
- » Remediation and Control Technologies
- » Sustainability Engineering and Green Chemistry
- » Ecotoxicology and Human Environmental Health
- » Energy and the Environment
- » Correspondence
- » Additions and Corrections

About the Cover:

Today's students and graduates are inspired and driven to improve the world. This is evidenced by the growing popularity of "green" or sustainable engineering programs. Not only will such practices aid the transition through changing economic and

Stay Current

climatic environments, but they should improve the livelihoods of people in the present and future. With such growth there is hope for more congenial relations: sustainable development could also bolster global security. This issue's Comment speaks to this relationship and the myriad reports sustainable engineering within. Cover by Rhonda Saunders using images from Shutterstock. [View the article.](#)
