Subject Index

Abamectin
in milk, LC method and fluorescence detection, 1340

Acid values
of oilseeds, pH-metric determination without titration—PVM 1: 1999, 915

Additives, see Color additives; Food additives

Adogen-464
synergistic extraction of gold(III), 1257

Aflatoxins
B1, B2, G1, G2, and M1 in foodstuffs in the Republic of Cyprus: 1992–1996, 883; in copra meal, optimization and validation of a minicolumn method, 877; in corn and peanuts, laboratory proficiency testing: a cooperative project between Thailand and the U.S., 259; in domestic and imported beers in Japan, immunofluorimetric and LC method, 897; in farmers' stock peanut lots, performance of sampling plans by measuring aflatoxin in high-risk-grade components, 264; molar absorbivities of B1, B2, G1, and G2 in acetonitrile, methanol, and toluene-acetonitrile (9 + 1; modification of AOAC Official Method 971.22); collaborative study, 251

Agricultural liming materials, see Fertilizers and agricultural liming materials

Air
aldehydes and ketones in, micellar electrokinetic capillary chromatography method, 1571; copper in airborne dust particulates, field detection and sensitive determination with 1-[pyridyl-(2)-azo]-naphthol-(2), N-phenyl-N'-(4-methylphenyl)benzimidine, and Triton X-100, 738

Alcoholic beverages
Methods Committee report, 517; referee report, 455
see also Distilled liquors; Malt beverages and brewing materials

Aldehydes
in ambient air, micellar electrokinetic capillary chromatography method, 1571; determination by capillary electrophoresis, 1562

Aminoglycoside antibiotics
chromatographic methods for analysis, 1017

2-Aminomethyl-1-ethylpyrrolidine
in pharmaceuticals, HPTLC and scanning densitometry methods, 825

Amoxicillin
in trout, LC method with UV detection after derivatization, 1345

Analytical mycology and microscopy
Methods Committee report, 521

Animal feed, see Antibiotics in feeds; Drugs in feeds; Feeds

Antibiotics
aminoglycoside antibiotics, chromatographic methods for analysis, 1017; macrolide residues in muscle, multiresidue method, HPLC with UV detection, 1046; in milk, confirmatory test results, 1071; oxytetracycline, tetracycline, and chlortetracycline in milk, LC method with postcolumn derivatization and fluorescence detection, 55; penicillin antibiotics in muscle tissue, ion-pair reversed-phase HPLC after precolumn derivatization, 1083; tylosin in mastitic cow’s milk following therapy, LC method, 1303; validation of the LacTek test applied to spiked extracts of tissue samples, 79
see also Antibiotics in feeds; Drugs and feed additives in animal tissues

Antibiotics in feeds
Methods Committee report, 514; referee report, 447; identification and semiquantitative estimation of, 1

Antimycotic compounds
studies of quantitative structure-biological activity relationship, reversed-phase TLC method with different stationary phases, 31

AOAC
Analytical Laboratory Accreditation Criteria Committee report, 547; Annual Meeting Program Committee report, 547; Archives Committee report, 548; bylaws, 532; Editorial Board report, 549; Executive Director’s report, 531; Fellows Committee report, 550; Finance Committee report, 540; General Referee reports, 428, 773; Harvey W. Wiley Award Committee report, 560; Joint Mycotoxin Committee report, 550; Journal information, 10A, 30A, 50A, 69A, 93A 111A; Keynote Address, 419; Laboratory Proficiency Testing Advisory Committee report, 554; Laboratory Proficiency Testing Program report, 544; Laboratory Quality Assurance Committee report, 554; Liaison Committee report, 555; Membership Committee report, 555; Official Methods Board report, 540; Peer-Verified Methods Advisory Committee report, 555; President’s Address, 425; Professional Development Committee report, 556; Recommendations for Official Methods Committee reports, 509; Research Institute report, 546; Safety Committee report, 557; Secretary/Treasurer’s report, 540; Sections Committee report, 558; Statistics Committee report, 558; Technical Division on Laboratory Management report, 546; Technical Division on Reference Materials report, 545, 559

Apple juice
patulin in, solid-phase extraction method, 1109

Apples
benzoylurea insecticides in,
Subject Index

solid-phase extraction cleanup and LC method with UV detection, 213; parathion methyl on field-sprayed apples and stored apples, GC method, 359

Arsenic
in certifiable color additives, dry ashing followed by hydride generation AAS, 327; in marine food samples, hydrochloric acid distillation and flow-injection hydride-generation AAS method, 1217; separation by capillary zone electrophoresis in a coated capillary, 1587; in traditional Chinese medicine, microwave digestion with flow injection-inductively coupled plasma MS (FI-ICP-MS) method, 963

Atomic absorption spectrometry
cadmium levels in feed components and kidneys of growing/finishing pigs, 1288; chromic oxide as a digestibility marker in feed, feces, and ileal content, microwave digestion, 575; flow-injection hydride-generation, inorganic arsenic in marine food samples, hydrochloric acid distillation, 1217; graphite furnace, fast determination of lead and copper in dairy products, 368; hydride generation, indirect determination of dimethoxydithiophosphates, 1436; hydride generation, selenium in meat products, 364; hydride generation and dry ashing, arsenic in certifiable color additives, 327

Atomic emission detection
multiresidue screening of pesticides in foods, retention time locking, GC–AED, database search and GC/MS methods, 313

Automated methods
overpressured-layer chromatography, Personal OPLC Basic System 50, flexible tool in analytical and semipreparative work, 587; pesticides in water, on-line extraction followed by LC-tandem photodiode array/postcolumn derivatization/fluorescence detection, 968

Avilamycin
in poultry feeds, LC method, 579

Azamethiphos
in salmon tissue, LC method with fluorescence detection, 1224

Azaperol
in swine liver, GC/MS method, 815

Azaperone
in swine liver, GC/MS method, 815

Baby food
preparation of Standard Reference Material 2383 and value assignment of its nutrient concentrations: interlaboratory study, 276; value assignment of retinol, retinyl palmitate, tocopherol, and carotenoid concentrations in Standard Reference Material 2383, 288

Bayley
ochratoxin A in, determination and survey: 1997, LC method, 85

Bayesian method
approach to establishing assay limits, 747

Beer, see Malt beverages and brewing materials

Benomyl
in oranges, solid-phase extraction, LC, and GC methods, 1474

Benzimidazole pesticides
dietary intake of: Kuwait’s Total Diet Study, 1458

Benzoylphenylurea insecticides
in pome fruit and fruiting vegetables, LC method with diode array detection and residue data obtained in the Dutch National Monitoring Program, 1198

β-lactam antibiotics
in milk, confirmatory test results, 1071

Beverages, see Alcoholic beverages; Nonalcoholic beverages

Biogenic amines
in plaice (Pleuronectes platessa) and whiting (Merlangus merlangus), relevance of matrix effect in determination of, 1097; use to evaluate spoilage in plaice (Pleuronectes platessa) and whiting (Merlangus merlangus), 1357

Biological samples
bovine kidney, oxytetracycline in, LC method, 1329; catecholamines, 5-hydroxytryptamine, and their metabolites in, TLC method: a review, 17; fosfomycin in plasma, GC method, 620; kidneys of growing/finishing pigs, cadmium levels in, AAS method, 1288; lysine in, rapid determination of, isocratic LC method, 809; maternal body burden of organochlorine pesticides and dioxins, 716; PCBs and chlorinated pesticides in human serum, column fractionation and dual-column capillary GC method with electron capture detection, 177; swine liver, azaperone and its metabolically reduced form, azaperol in, GC/MS method, 815; tinidazole in human serum, comparison of HPTLC with HPLC method, 244; urinary 3,5,6-trichloro-2-pyridinol, reference values in the Italian population: validation of analytical method and preliminary results (multicentric study), 305

Biosensor immunoassay
sulfamethazine in milk, 1316

Botanicals and other supplements
Methods Committee report, 519; referee report, 460; medicinal plants sold in Coimbra, Portugal, organochloride pesticide residues in, 1206

Bulk acoustic wave detection
nitrogen, carbon, or sulfite species in varieties of complex matrixes, 1479
Cacao beans, see Chocolate and cacao products

Cadmium
in feed components and kidneys of growing/finishing pigs, AAS method, 1288; in water samples, improved signal ratio resolution method by optimization of resolution function, 1185

Caffeine
in surface water and groundwater samples, submicrogram-per-liter concentrations, solid-phase extraction and LC method, 161

Calibration methods
univariate and multivariate calibration, simultaneous determination of chlorthalidone and spironolactone, wavelength range selection, 1054

Capillary electrochromatography
resolution of complex mixtures, 1604

Capillary electrophoresis
alternative methodologies for the determination of aldehydes, 1562; analytical monitoring of citrus juices, 95; comparison with LC for determination of sulfonyleurea herbicides in soil, 1534; environmental analysis, 1509; nonaqueous, separation of positional isomers of organic acids and dyestuff food additives, 1577; sulfonylurea herbicides in water, LC method, 1523; zone, mobility distribution of synthetic and natural polyelectrolytes, 1594; zone, separation of arsenic and selenium species, 1587

Capsaicin
from chili peppers (Capsicum spp.), solid-phase extraction and GC with MS method, 1399

Carbamates
dietary intake of: Kuwait’s Total Diet Study, 1458; micellar electrokinetic capillary chromatography with MEGA-borate and SDS surfactants, 1542; pesticides, flow-injection spectrophotometric determination by coupling with diazotized 2,4,6-trimethylaniline, 937

Carbon
in varieties of complex matrixes, gas diffusion flow injection analysis, with bulk acoustic wave detection, 1479

Carotenoids
β-carotene in medical foods, LC method with matrix solid-phase dispersion, 663; in multivitamin tablets, LC method, 68; value assignment in Standard Reference Material 2383 (Baby Food Composite), 288

Catecholamines
and metabolites in biological samples, TLC method: a review, 17

Catfish
flumequine in, LC method with fluorescence detection, 614

Cereals and cereal products
Methods Committee report, 509; referee report, 428; fat contents of, comparison of classical with recently developed extraction techniques, 141

Charge-coupled device camera
validation of TLC quantitation determination, 25

Chemical contaminants monitoring
 aflatoxins B₁, B₂, G₁, G₂, and M₁ in foodstuffs in the Republic of Cyprus: 1992–1996, 883; aflatoxins in copra meal, optimization and validation of a minicolumn method, 877; aflatoxins in corn and peanuts, laboratory proficiency testing—a cooperative project between Thailand and the U.S., 259; aflatoxins in farmers’ stock peanut lots, performance of sampling plans by measuring aflatoxin in high-risk-grade components, 264; biogenic amines in plaice (Pleuronectes platessa) and whiting (Merlangus merlangus), relevance of matrix effect in determination of, 1097; α-zearalenol and zearalenone, preparative method for isolation using extracting disk, 90

Chicken, see Poultry

Chili peppers
capsaicin and some of its analogues from, solid-phase extraction and GC with MS method, 1399

Chloracetanilide pesticides
in crops, comparison of supercritical fluid extraction and the Japanese bulletin method, 1239

Chloramphenicol
in eggs, supercritical fluid extraction with in-line collection, 1334

Chlorinated pesticides
in biota, method and quality assurance, 1175

Chloromequat
in grain: results from the Danish National Pesticide Survey, 331
Subject Index

Chlorpyrifos
in oranges, solid-phase extraction, LC, and GC methods, 1474

Chlortetracycline
in milk, LC method with postcolumn derivatization and fluorescence detection, 55

Chlorthalidone
determination with univariate and multivariate calibration, wavelength range selection, 1054

Chocolate and cacao products
Methods Committee report, 509; peanut protein in chocolate, immunoaffinity column determination, 666

Cholecalciferol
treated baits, improved method for analysis of, 792

Choline
in infant formula, ion chromatography method, 1156

Chromatography
analysis of aminoglycoside antibiotics, 1017; cyclodextrin-modified micellar electrokinetic, enantiomeric and isomeric separation of pesticides, 1550; cyclodextrin-modified micellar electrokinetic, plant protectants in raw and drinking waters, 1510; gel permeation, fungicides in processed fruits and vegetables, capillary GC method, 1229; ion, choline in infant formula, 1156; ion, halaetic acids in water—method development, 689; micellar electrokinetic capillary, carbamate insecticides microseparation methods, 1542; micellar electrokinetic capillary chromatography, aldehydes and ketones in ambient air, 1571; overpressured layer chromatography, Personal OPLC Basic System 50, flexible tool in analytical and semipreparative work, 587; overpressured layer chromatography combined with digital autoradiography and MS method, study of deramiclclane metabolism, 231 see also Gas chromatography; Liquid chromatography; Thin layer chromatography

Chromic oxide
as a digestibility marker in feed, feces, and ileal content, microwave digestion and AAS method, 575

Citric acid
in corn, fluorescence LC and enzyme immunoassay, 1353

Coffee and tea
ochratoxin A in coffee, determination and survey: 1997, LC method, 85

Collaborative studies
dry rehydratable film method for enumerating confirmed E. coli in poultry, meats, and seafood, 73; genetically modified soy beans and maize in dried powder, IUPAC collaborative trial study, 923; microbial ranking of porous packaging materials (exposure chamber method) ASTM Method, 648; molar absorptivities of aflatoxins B1, B2, G1, and G2 in acetonitrile, methanol, and toluene-acetonitrile (9 + 1; modification of AOAC Official Method 971.22), 251; neutral lactase activity in industrial enzyme preparations, colorimetric enzymatic method, 112; Salmonella in foods: new enrichment procedure for use with the TECRA Salmonella Visual Immunoassay, 634; screening nitrate in forages with a test strip, 9; synthetic pyrethroid pesticides in agricultural products, multiresidue GC method, 186

Color additives
Methods Committee report, 517; referee report, 455; arsenic in, dry ashing followed by hydride generation AAS, 327 see also Food additives

Colorimetric methods
neutral lactase activity in industrial enzyme preparations: collaborative study, 112; silver in synthetically prepared ores, preliminary separation from associated metal ions by TLC, 172

Congeners
in spirit drinks, GC method: interlaboratory study, 1375

Cooperative studies
Methods Committee report, 513; referee report, 446

Copper
in dairy products, fast determination, graphite furnace AAS method, 368; in soil and airborne dust particulates, field detection and sensitive determination with 1-[pyridyl-(2)-azo]-naphthol-(2)-N-phenyl-N'-(4-methylphenyl)benzamidine, and Triton X-100, 738; in water samples, improved signal ratio resolution method by optimization of resolution function, 1185

Cosmetics
Methods Committee report, 512

Cosmetic microbiology
Methods Committee report, 521; referee report, 472; Staphylococcus aureus in cosmetics, immunoassay method for rapid detection, 1171

Corn
aflotoxins in, laboratory proficiency testing: a cooperative project between Thailand and the U.S., 259; citrinin in, fluorescence LC and enzyme immunoassay, 1353; Fusarium mycotoxins, in a high-risk area for gastric cancer in Shandong Province, China, 657; α-zearalenol and zearalenone in, preparative method for isolation using extracting disk, 90; zearalenone in, fluorometry and LC method, 1364
Subject Index

**Dairy chemistry**  
Methods Committee report, 510; referee report, 429

**Dairy products**  
Kjeldahl nitrogen analysis as a reference method for protein determination, 1389; lead and copper in, fast determination, graphite furnace AAS method, 368  
*see also* Milk and milk products

**Danish National Pesticide Monitoring Program**  
pesticide residues in selected food commodities, 337

**Danish National Pesticide Survey**  
residues of chlormequat and mepiquat in grain, 331

**Densitometry**  
scanning, sulpiride and impurities of 2-aminomethyl-1-ethylpyrrolidine and methyl-5-sulphamoyl-2-methoxybenzoate in pharmaceuticals, HPTLC method, 825; slit-scanning, validation of TLC quantitation, 25

**Diagnostics and test kits**  
Methods Committee report, 512

**Diamines**  
in tuna, test strip assay, 1102

**2,3-Dichloro-5,6-dicyano-p-benzoquinone**  
determination of some hydrazine derivatives, spectrophotometric method, 239

**Dietary fiber**  
Methods Committee report, 519; referee report, 467; inulin and oligofructose as part of the dietary fiber complex, 223

**Digital autoradiography**  
overpressured layer chromatography and MS method, study of deramciclane metabolism, 231

**Dimethoxydithiophosphate**  
indirect determination by flow injection analysis with liquid–liquid extraction and AAS with hydride generation, 1436

**Diode array detection**  
benzoylphenylurea insecticides in pome fruit and fruiting vegetables, LC method, residue data obtained in the Dutch National Monitoring Program, 1198

**Diode-laser polarimetric detection**  
(−)-quinine and (+)-quinidine determination, LC method, 1308

**Dioxins**  
maternal body burden, 716

**Diophenyl**  
in oranges, solid-phase extraction, LC, and GC method, 1474

**Disinfectants, microbiological efficacy testing**  
principles to guide international standard tests for liquid chemical germicides: a proposal, 669

**Distilled liquors**  
authentication of straight whiskey by determination of the ratio of furfural to 5-hydroxymethyl-2-furaldehyde, 997; volatile congeners in spirit drinks, GC method: interlaboratory study, 1375  
*see also* Alcoholic beverages

**Dithionon**  
in commercial formulations and its residues in foodstuffs, spectrophotometric method, 1298

**Doramectin**  
in milk, LC method and fluorescence detection, 1340

**Dowtherm A**  
contamination in oleochemicals and edible oils, LC method, 893

**Drug- and device-related microbiology**  
referee report, 473; *Staphylococcus aureus* in pharmaceutical products, immunoassay method for rapid detection, 1171

**Drug formulations**  
carotenoids and vitamins A and E in multivitamin tablets, LC method, 68; chlorthalidone and spironolactone, simultaneous determination, univariate and multivariate calibration, wavelength range selection, 1054; determination of some hydrazine derivatives using 2,3-dichloro-5,6-dicyano-p-benzoquinone, spectrophotometric method, 239; electrochemical determination of lacidipine, 1077; omeprazole and octylonium bromide in the presence of their degradation products, stability-indicating methods, 599; propionylpromazine hydrochloride in formulation matrixes, reversed-phase ion-pair small bore LC method, 1321; (−)-quinine and (+)-quinidine determination, LC method with diode-laser polarimetric detection, 1308; sulpiride and impurities of 2-aminomethyl-1-ethylpyrrolidine and methyl-5-sulphamoyl-2-methoxybenzoate in pharmaceuticals, HPTLC and scanning densitometry, 825; teaching pharmaceutical analysis to undergraduate students, TLC and HPTLC methods—laboratory practicals, 38; terbinafine hydrochloride in dosage forms, UV spectrophotometry and nonaqueous determination, 830; validation of a GC method for determining fatty alcohols that compose policosanol in five-milligram film-coated tablets, 834

**Drug metabolism**  
overpressured layer chromatography combined with digital autoradiography and MS method, study of deramciclane metabolites, 231

**Drugs and feed additives in animal tissues**  
Methods Committee report, 512; referee report, 443; abamectin, doramectin, ivermectin, and moxidectin in milk, multiresidue determination, LC method and fluorescence detection, 1340; amoxicillin in trout, LC method with UV detection after derivatization, 1345;
avilamycin in poultry feeds, LC method, 579; azaperone and its metabolically reduced form, azaperol, in swine liver, GC/MS method, 815; β-lactam antibiotics in milk, confirmatory test results, 1071; chloramphenicol in whole eggs, supercritical fluid extraction with in-line collection, 1334; fenbendazole residues in pig tissues after treatment with medicated feed, LC method, 1007; flumequine in channel catfish, LC method with fluorescence detection, 614; fluoroquinolone residues in animal tissues using *E. coli* as indicator organism, 1407; fluoroquinolones in milk, on-line immunoaffinity capture coupled with reversed-phase LC method, 1071; fosfomycin in plasma, GC method, 620; glycarbylamide in chicken tissue, HPLC method, 248; macrolide residues in muscle, multiresidue method, HPLC with UV detection, 1046; neomycin in animal tissues, LC method, 61; oxytetracycline, tetracycline, and chlorotetracycline in milk, LC method with postcolumn derivatization and fluorescence detection, 55; oxytetracycline in bovine kidney and medicated milk replacer, LC method, 1329; oxytetracycline in chicken products, rapid and simple determination, HPLC method, 1007; penicillin antibiotics in muscle tissue, ion-pair reversed-phase HPLC after precolumn derivatization, 1083; spectinomycin in bovine milk, microbial receptor assay and comparison with LC analysis, 1002; sulfamethazine in milk, biosensor immunoassay, 1316; tetracycline residues in animal tissues, validation study, 862; tinidazole in human serum, comparison of HPTLC with HPLC method, 244; para-toluenesulfonamide in edible fillet tissues from three species of fish, LC method, 1064; tylosin in mastitic cow’s milk following therapy, LC method, 1303; validation of the LacTek test applied to spiked extracts of tissue samples, 79

**Drugs in feeds**

Methods Committee report, 514; referee report, 448; emamectin benzoate in medicated fish feed, 1281; fenbendazole residues in pig tissues after treatment with medicated feed, LC method, 1007  

**Drugs I**

Methods Committee report, 512; referee report, 444

**Drugs II**

Methods Committee report, 512; referee report, 445

**Dutch National Monitoring Program**

benzoylphenylurea insecticides in pome fruit and fruiting vegetables, LC method with diode array detection, 1198

**Electrochemical detection**

of lacidipine, 1077

**Electrochromatography**

capillary, environmental analysis, 1509; capillary, resolution of complex mixtures, 1604

**Electron capture detection**

PCBs and chlorinated pesticides in human serum, column fractionation and dual-column capillary GC method, 177

**Electrophoretic methods**

capillary, alternative methodologies for the determination of aldehydes, 1562; capillary, analytical monitoring of citrus juices, 95; capillary, comparison with LC for determination of sulfonylurea herbicides in soil, 1534; capillary, environmental analysis, 1509; capillary, sulfonylurea herbicides in water, multiresidue method, 1523; capillary zone, mobility distribution of synthetic and natural polyelectrolytes, 1594; capillary zone, separation of arsenic and selenium species, 1587; nonaqueous capillary, separation of positional isomers of organic acids and dyestuff food additives, 1577

**Elements**, see Metals and other elements

**Emamectin benzoate**

in medicated fish feed, 1281

**Enediols**

simultaneous determination of water and enediols or thiols in chemical products and drugs not amenable to direct Karl Fischer titration—PVM 1:1998, 840

**Environmental quality**

referee report, 446; aldehydes and ketones in ambient air, micellar electrokinetic capillary chromatography method, 1571; capillary electrophoresis and related techniques, including capillary electrophromatography, 1509; carbamate insecticides, micellar electrokinetic capillary chromatography, 1542; determination of aldehydes by capillary electrophoresis, 1562; PCBs and chlorinated pesticides in biota, method and quality assurance, 1175; pesticides, enantiomeric and isomeric separation by cyclodextrin-modified micellar electrokinetic chromatography, 1550; protectants in raw and drinking waters, multiresidue method with cyclodextrin-modified micellar electrokinetic chromatography, 1510; sulfonylurea herbicides in
soil, comparison of capillary electrophoresis and LC methods, 1534; sulfonylurea herbicides in water, LC method with confirmation by capillary electrophoresis, 1523; trends in, 217

see also Air; Soils and sediments; Water

Environmental sanitation microbiology
Methods Committee report, 521

Enzymatic methods
colorimetric, neutral lactase activity in industrial enzyme preparations: collaborative study, 112; separation of glycocases, analytical and micropreparative HPLC method for generating a glucosinolate library, 1115

Enzyme immunoassays
citinin in corn, 1353

Escherichia coli
as indicator organism for fluoroquinolone residues in animal tissues, 1407; in poultry, meats, and seafood, dry rehydratable film method: collaborative study, 73

Extraction methods
direct extraction methylation of lipids, determination of lipids in infant formula powder, fatty acid methyl esters (FAME) analysis by GC, 1128; fat contents of cereal foods, comparison of classical with recently developed extraction techniques, 141; liquid, improved method for analysis of cholecalciferol-treated baits, 792; liquid–liquid, indirect determination of dimethyldithiophosphate, 1436; on-line extraction, pesticides in water, LC-tandem photodiode array/postcolumn derivatization/fluorescence detection, 968; supercritical fluid extraction, chloracetanilide pesticides and pyriminobac-methyl in crops, comparison with the Japanese bulletin method, 1239; supercritical fluid extraction with in-line collection, chloramphenicol in whole eggs, 1334; synergistic extraction of gold(III) by mixtures of Adogen-464 and neutral donors, 1257

see also Solid-phase extraction

Extraneous materials in foods and drugs
Methods Committee report, 521

see also Filth

Fat-soluble vitamins, see Vitamins and other nutrients

Fats, see Oils and fats

Fatty acid methyl esters
GC analysis, lipids in infant formula powder, 1128

Feeds
Methods Committee report, 515; referee report, 451; aflatoxins in copra meal, optimization and validation of a minicolumn method, 877; cadmium levels in feed components, AAS method, 1288; chromic oxide as a digestibility marker in, microwave digestion and AAS method, 575; crude fat in, Novel Soxflo Technique for rapid extraction, 1369; screening nitrate in forages with a test strip: collaborative study, 9; water in, comparisons of Karl Fischer method with oven methods, 799

see also Antibiotics in feeds; Drugs in feeds

Fenbendazole
in pig tissues after treatment with medicated feed, LC method, 1007

Fenpropatrin
spectrophotometric determination, 785

Fertilizers and agricultural liming materials
Methods Committee report, 515; referee report, 453

Filth
Methods Committee report, 521

see also Extraneous materials in foods and drugs

Fish and other marine products
canned fishing goods, statistical treatment of nutritional parameters in the quality control of, 1247; channel catfish, flumequine in, LC method with fluorescence detection, 614; emamectin benzoate in medicated fish feed, 1281; flatfish species identification, polymerase chain reaction–single strand conformational polymorphism (PCR–SSCP) method, 903; inorganic arsenic in marine food samples, hydrochloric acid distillation and flow-injection hydride-generation AAS method, 1217; oxytetracycline in the edible fillet of rainbow trout, LC method and the official microbial inhibition assay, 866; plaice (Pleuronectes platessa) and whiting (Merlangus merlangus), biogenic amines in, relevance of matrix effect in determination of, 1097; plaice (Pleuronectes platessa) and whiting (Merlangus merlangus), use of biogenic amines to evaluate spoilage, 1357; salmon tissue, azamethiphos in, LC method with fluorescence detection, 1224; shark species, identification by polyacrylamide gel isoelectric focusing of sarcoplasmic proteins, 1163; para-toluene sulfonamide in edible fillet tissues from 3 species of fish, LC method, 1064; trout, amoxicillin in, LC method with UV detection after derivatization, 1345; tuna, diamines in, test strip assay, 1102

see also Seafoods and seafood products

Flatfish
identification of, polymerase chain reaction–single strand conformational polymorphism (PCR–SSCP) method, 903

Flavors
Methods Committee report, 517; referee report, 456
Subject Index

Florida Department of Agriculture and Consumer Services
multi-residue analysis of pesticides in fresh fruits and vegetables, 1419

Flour
folates in, LC method, 119
niacin in wheat flour, anion-exchange LC method, solid-phase extraction cleanup, 128

Flow injection analysis
gas diffusion, with bulk acoustic wave detection for determining nitrogen, carbon, or sulfate species in varieties of complex matrices, 1479; indirect determination of dimethoxydithiophosphate, 1436

Flumequine
in channel catfish, LC method with fluorescence detection, 614

Fluorescence detection
abamectin, doramectin, ivermectin, and moxidectin in milk, LC method, 1340; azamethiphos in salmon tissue, LC method, 1224; flumequine in channel catfish, LC method, 614; oxytetracycline, tetracycline, and chlorotetracycline in milk, LC method, 55; pesticides in water, on-line extraction followed by LC-tandem photodiode array/postcolumn derivatization, 968

Fluorometry
zearalenone in corn, 1364

Fluoroquinolones
in milk, on-line immunoaffinity capture coupled with reversed-phase LC method, 607; residues in animal tissues using E. coli as indicator organism, 1407

Fluvalinate
spectrophotometric determination, 785

Folates
in vegetables, milk powder, liver, and flour, LC method, 119

Food additives
Methods Committee report, 517; referee report, 456; separation of positional isomers, nonaqueous capillary electrophoresis method, 1577; sugar alcohols in beverages and foods after nitrobenzoylation, LC method, 134 see also Color additives

Food composition
acid value of oilseeds, pH-metric determination without titration—PVM 1: 1999, 915; capsaicin and some of its analogues from chili peppers (Capsicum spp.), solid-phase extraction and GC with MS method, 1399; β-carotene in medical foods, LC method with matrix solid-phase dispersion, 663; citrus juices, analytical monitoring, capillary electrophoresis method, 95; fat contents of cereal foods, comparison of classical with recently developed extraction techniques, 141; fat in foods, studies in improvement of Official Method 996.06, 1146; flatfish species identification, polymerase chain reaction-single strand conformational polymorphism (PCR-SSCP) method, 903; folates in vegetables, milk powder, liver, and flour, LC method, 119; genetically modified soy beans and maize in dried powder, IUPAC collaborative trial study, 923; glycoalkaloid concentration in Alberta potatoes, matrix-assisted laser desorption/ionization MS method, 908; identification of shark species by polyacrylamide gel; isoelectric focusing of sarcoplasmic proteins, 1163; lipids in infant formula powder, direct extraction methylation of lipids and fatty acid methyl esters (FAME) analysis by GC, 1128; neutral lactase activity in industrial enzyme preparations, colorimetric enzymatic method: collaborative study, 112; niacin in infant formula and wheat flour, anion-exchange LC method, solid-phase extraction cleanup, 128; peanut protein in chocolate, immunoaffinity column determination, 666; preparation of Standard Reference Material 2383 (Baby Food Composite) and value assignment of its nutrient concentrations: interlaboratory study, 276; protein determination in dairy products, Kjeldahl nitrogen analysis as a reference method, 1389; separation of glycosides, analytical and micropreparative HPLC combined with spectroscopic and enzymatic methods for generating a glucosinolate library, 1115; sterol and triterpene diol contents of vegetable oils, high-resolution capillary GC method, 929; sugars and starches in foods, modification of the AOAC total dietary fiber method, 759; all-rac-α-tocopheryl acetate and retinyl palmitate in medical foods, LC method, matrix solid-phase dispersion in conjunction with a zero reference material as method development tool, 107; all-rac-α-tocopheryl acetate and retinyl palmitate in medical foods, zero control reference material as a method development tool, 271; value assignment of retinol, retinyl palmitate, tocopherol, and carotenoid concentrations in Standard Reference Material 2383 (Baby Food Composite), 288; vitamin K₁ in milk-based infant formula, LC method with matrix solid-phase dispersion, 1140

Food inspection
eliminating European borders, 419

Food microbiology-dairy
Methods Committee report, 521 see also Microbiological methods

Food microbiology-nondairy
Methods Committee report, 521; referee report, 476 see also Microbiological methods

For Your Information, 7A, 21A, 39A, 59A, 79A, 106A
Forensic sciences
Methods Committee report, 512

Fosfomycin
in plasma, GC method, 620

Fruit and fruit products
Methods Committee report, 510; referee report, 431; apple juice and unfiltered apple juice, patulin in, solid-phase extraction method, 1109; benzoyleurea insecticides in apples and pears, solid-phase extraction cleanup and LC method with UV detection, 213; citrus juices, analytical monitoring, capillary electrophoresis method, 95; Egyptian, pesticide residues in, 948; fungicides in, multiresidue determination, capillary GC method after gel permeation chromatography, 1229; oranges, benomyl, diphenyl, o-phenylphenol, thiabendazole, chlorpyrifos, methidathion, and methyl parathion in oranges, 1474; capillary, fungicides in processed fruits and vegetables, multiresidue determination, with gel permeation chromatography, 1229; dual-column capillary GC with electron capture detection, PCBs and chlorinated pesticides in human serum, 177; fatty acid methyl ester (GC-FAME) analysis, interference by methyl levulinate in determination of total fat in low-fat, high-sugar products, 766; fatty acid methyl esters (FAME) analysis, lipids in infant formula powder, 1128; fosfomycin in plasma, 620; high-resolution capillary, sterol and triterpene diol contents of vegetable oils, 929; impact of household preparations on the residues of pesticides in selected agricultural food commodities available in India, 725; multiresidue screening of pesticides in foods, retention time locking, GC–AED, database search and GC/MS methods, 313; parathion methyl on field-sprayed apples and stored apples, 359; pesticide residues in, GC/tandem MS method, 982; pesticides in, multiresidue procedures developed by the Florida Department of Agriculture and Consumer Services, 1419

Fullerenes
separation of C_{60} and C_{70} fullerenes on silica gel impregnated with polymers, TLC method, 227

Fungicides
in processed fruits and vegetables, multiresidue determination, capillary GC after gel permeation chromatography, 1229

Furfural
ratio to 5-hydroxymethyl-2-furaldehyde, authentication of straight whiskey, 997

Fusarium
mycotoxins in corn and corn products in a high-risk area for gastric cancer in Shandong Province, China, 657

Gas chromatography
analysis of aminoglycoside antibiotics, 1017; benomyl, diphenyl, o-phenylphenol, thiabendazole, chlorpyrifos, methidathion, and methyl parathion in oranges, 1474; capillary, fungicides in processed fruits and vegetables, multiresidue determination, with gel permeation chromatography, 1229; dual-column capillary GC with electron capture detection, PCBs and chlorinated pesticides in human serum, 177; fatty acid methyl ester (GC-FAME) analysis, interference by methyl levulinate in determination of total fat in low-fat, high-sugar products, 766; fatty acid methyl esters (FAME) analysis, lipids in infant formula powder, 1128; fosfomycin in plasma, 620; high-resolution capillary, sterol and triterpene diol contents of vegetable oils, 929; impact of household preparations on the residues of pesticides in selected agricultural food commodities available in India, 725; multiresidue screening of pesticides in foods, retention time locking, GC–AED, database search and GC/MS methods, 313; parathion methyl on field-sprayed apples and stored apples, 359; pesticide residues in, GC/tandem MS method, 982; pesticides in, multiresidue procedures developed by the Florida Department of Agriculture and Consumer Services, 1419

Genetically modified organisms
soy beans and maize in dried powder, IUPAC collaborative trial study, 923

Germicide tests
principles to guide international standard tests for liquid chemical germicides: a proposal, 669; repeatability and reproducibility of: a literature review, 384; sporicidal testing of commercial germicides using a chemical standard and a calibrated bioindicator, 151

Glucosinolates
separation of glycosides, analytical and micropreparative HPLC combined with spectroscopic and enzymatic methods, 1115

Glycarbylamide
in chicken tissue, HPLC method, 248

Glycoalkaloids
in Alberta potatoes, matrix-assisted laser desorption/ionization MS method, 908

Glycosides
high-performance liquid-phase separation, analytical and micropreparative HPLC combined with spectroscopic and enzymatic methods for generating a glucosinolate library, 1115

Subject Index: Journal of AOAC International Vol. 82, No. 6, 1999 1631
### Subject Index

**Gold**
- synergistic extraction by mixtures of Adogen-464 and neutral donors, 1257

**Grains**
- chlormequat and mepiquat in—results from the Danish National Pesticide Survey, 331; ochratoxin A in, determination and survey: 1997, LC method, 85

**Groundwater**
- hexazinone in, direct-injection HPLC method, 1505

**Haloacetic acids**
- in water, ion chromatography—method development, 689

**Herbs**, see Botanicals and other supplements

**Hexazinone**
- in groundwater, direct-injection HPLC method, 1505

**Hydrochloric acid distillation**
- inorganic arsenic in marine food samples, flow-injection hydride-generation AAS method, 1217

**5-Hydroxymethyl-2-furaldehyde**
- ratio to furfural, authentication of straight whiskey, 997

**5-Hydroxytryptamine**
- and metabolites in biological samples, TLC method: a review, 17

**Imidazolinone herbicides**
- multiresidue determination and confirmation in soil, HPLC/electrospray ionization MS method, 956

**Imunoaffinity capture**
- on-line, coupled with reversed-phase LC method, fluoroquinolones in milk, 607

**Imunoaffinity column**
- ochratoxin A and aflatoxins in domestic and imported beers in Japan, 897; peanut protein in chocolate, 666; zearalenone in corn, 1364

**Imunoassays**
- biosensor, sulfamethazine in milk, 1316; enzyme, citrinin in corn, 1353; rapid detection of *Staphylococcus aureus* in cosmetics, pharmaceutical products, and raw materials, 1171; TECRA *Salmonella* Visual Immunoassay, *Salmonella* in foods: collaborative study, 634

**Infant formulas**
- Methods Committee report, 520; choline in, ion chromatography method, 1156; milk-based, vitamin K₁ in, LC method with matrix solid-phase dispersion, 1140; niacin in, anion-exchange LC method, solid-phase extraction cleanup, 128; powder, lipids in, direct extraction methylation of lipids and fatty acid methyl esters (FAME) analysis by GC, 1128; see also Baby food

**Inorganic methods**
- Methods Committee report, 513

**Instructions to Authors**, 6A, 20A, 38A, 58A, 78A, 105A

**Interlaboratory studies**
- determination of total selenium in water, 1466; preparation of Standard Reference Material 2383 (Baby Food Composite) and value assignment of its nutrient concentrations, 276; tetracycline residues in animal tissues, validation study, 862; volatile congeners in spirit drinks, GC method, 1375

**Inulin**
- as part of the dietary fiber complex, 223

**Iodate**
- in table salt after azo dye formation, solid-phase extraction and spectrophotometric determination, 167

**Ion chromatography**
- choline in infant formula, 1156; haloacetic acids in water—method development, 689

**Iron**
- in raw materials, during fabric processing, and in wastewaters of the textile industry, 683

**Isoelectric focusing**
- polyacrylamide gel, identification of shark species, 1163

**Ivermectin**
- in milk, LC method and fluorescence detection, 1340

**Japanese bulletin method**
- comparison with supercritical fluid extraction, chloracetanilide pesticides and pyriminobac-methyl in crops, 1239

**Karl Fischer method**
- comparison with oven methods, determination of water in forages and animal feeds, 799

**Ketones**
- in ambient air, micellar electrokinetic capillary chromatography method, 1571

**Kjeldahl method**
- nitrogen analysis as a reference method for protein determination in dairy products, 1389

**Kuwait’s Total Diet Study**
- dietary intake of organochlorine, carbamate, benzimidazole and phenylurea pesticide residues, 1458

**Laboratory proficiency testing**
- aflatoxins in corn and peanuts: a cooperative project between Thailand and the U.S., 259

**Lacidipine**
- electrochemical determination of, 1077

**Lactase**
- activity in industrial enzyme preparations, colorimetric enzymatic method: collaborative study, 112

**LacTek test**
- determination of performance characteristics, 79
Subject Index

**Lead**
in dairy products, fast determination, graphite furnace AAS method, 368

**Lipids, see Oils and fats**

**Liquid adsorption**
of heterogeneous solid surfaces, statistical verification of parameters, 1495

**Liquid chromatography**
amoxicillin in trout, UV detection after derivatization, 1345; analytical and micropreparative HPLC combined with spectroscopic and enzymatic methods for generating a glucosinolate library, high-performance liquid-phase separation of glycosides, 1115; anion-exchange, niacin in infant formula and wheat flour, solid-phase extraction cleanup, 128; avilamycin in poultry feeds, 579; azamethiphos in salmon tissue, fluorescence detection, 1224; benomyl, diphenyl, α-phenylphenol, thiabendazole, chlorpyrifos, methidathion, and methyl parathion in oranges, 1474; benzoylphenylethylurea insecticides in pome fruit and fruiting vegetables, diode array detection and residue data obtained in the Dutch National Monitoring Program, 1198; benzoylurea insecticides in apples and pears, solid-phase extraction cleanup, 213; β-lactam antibiotics in milk, confirmatory test results, 1071; caffeine in surface water and groundwater, submicrogram-per-liter concentrations, solid-phase extraction, 161; β-carotene in medical foods, matrix solid-phase dispersion, 663; carotenoids and vitamins A and E in multivitamin tablets, 68; comparison with capillary electrophoresis for determination of sulfonylurea herbicides in soil, 1534; direct-injection HPLC, hexazinone in groundwater, 1505; Dowtherm A contamination in oleochemicals and edible oils, 893; fenbendazole residues in pig tissues after treatment with medicated feed, 1007; flumequine in channel catfish, fluorescence detection, 614; fluorescence, citrinin in corn, 1353; folates in vegetables, milk powder, liver, and flour, 119; HPLC, (−)-quinine and (±)-quinidine determination, diode-laser polarimetric detection, 1308; HPLC, analysis of aminoglycoside antibiotics, 1017; HPLC, electrochemical determination of lacidipine, 1077; HPLC, glycarblyamide in chicken tissue, 248; HPLC, imidazolinone herbicides in soil, 956; HPLC, macrolide residues in muscle, multiresidue method, UV detection, 1046; HPLC, oxytetracycline in chicken products, rapid and simple determination, 770; ion-pair reversed-phase HPLC after precolumn derivatization, penicillin antibiotics in muscle tissue, 1083; isocratic, lysine in biological samples, rapid determination of, 809; multiresidue determination of abamectin, doramectin, ivermectin, and moxidectin in milk, fluorescence detection, 1340; neomycin in animal tissues, 61; ochratoxin A and aflatoxins in domestic and imported beers in Japan, 897; ochratoxin A in wheat, barley, and coffee, determination and survey: 1997, 85; oxytetracycline in bovine kidney and medicated milk replacer, 1329; oxytetracycline in the edible fillet of rainbow trout, 866; pesticides in water, on-line extraction followed by LC–tandem photodiode array/postcolumn derivatization/fluorescence detection, 968; with postcolumn derivatization and fluorescence detection, oxytetracycline, tetracycline, and chlorotetracycline in milk, 55; Raman spectroscopic characterization of RP-18-type chemically bonded stationary phases, 297; reversed-phase, fluoroquinolones in milk, on-line immunoaffinity capture, 607; reversed-phase ion-pair small bore, propionylpromazine hydrochloride in formulation matrices, 1321; spectinomycin in bovine milk, microbial receptor assay, 1002; sugar alcohols in beverages and foods after nitrobenzoylation, 134; sulfentrazone in soil, 1214; sulfonylurea herbicides in water, capillary electrophoresis, multiresidue method with confirmation by capillary electrophoresis, 1523; tetracycline residues in animal tissues, validation study, 862; all-rac-α-tocopheryl acetate and retinyl palmitate in medical food, matrix solid-phase dispersion in conjunction with a zero reference material as method development tool, 107; all-rac-α-tocopheryl acetate and retinyl palmitate in medical foods, zero control reference material as a method development tool, 271; para-toluensulfonamide in edible fillet tissues from 3 species of fish, 1064; tylosin in mastitic cow’s milk following therapy, 1303; vitamin K1 in milk-based infant formula, matrix solid-phase dispersion, 1140; α-zearalenol and zearalenone, preparative method for isolation using extracting disk, 90; zearalenone in corn, 1364

**Lysine**
in biological samples, rapid determination of, isocratic LC method, 809

**Macrolide residues**
in muscle, multiresidue method, HPLC with UV detection, 1046

**Maize**
Genetically modified, IUPAC collaborative trial study, 923

**Malt beverages and brewing materials**
ochratoxin A and aflatoxins in do-
mestic and imported beers in Japan, immunoaffinity and LC method, 897 see also Alcoholic beverages

Mass peak profiling from selected-ion recording data as a tool for regulatory analyses, 1443

Mass spectrometry electrospray ionization, imidazolinone herbicides in soil, 956; flow injection–inductively coupled plasma MS (FI–ICP–MS), arsenic in traditional Chinese medicine, microwave digestion, 963; matrix-assisted laser desorption/ionization, glycoalkaloid concentration in Alberta potatoes, 908; overpressured layer chromatography combined with digital autoradiography method, study of deramicilane metabolism, 231; tandem, pesticide residues in fruits, vegetables, and milk, 982 see also Gas chromatography/mass spectrometry

Matrix solid-phase dispersion β-carotene in medical foods, LC method, 663; vitamin K in milk-based infant formula, LC method, 1140

Meat and meat products Methods Committee report, 511; referee report, 434; E. coli in, dry rehydratable film method: collaborative study, 73; folates in liver, LC method, 119; selenium in meat products, hydride generation AAS method, 364

Medical diets Methods Committee report, 520

Medical foods β-carotene in, LC method with matrix solid-phase dispersion, 663; all-rac-α-tocopheryl acetate and retinyl palmitate in, LC method, matrix solid-phase dispersion in conjunction with a zero reference material as method development tool, 107; all-rac-α-tocopheryl acetate and retinyl palmitate in, zero control reference material as a method development tool, 271; Mepiquat in grain—results from the Danish National Pesticide Survey, 331

Mercaptoethyltrimethoxysilane chemically modified silica gel as stationary phase in TLC, 399

Metals and other elements Methods Committee report, 528; referee report, 500; arsenic in certifiable color additives, dry ashing followed by hydride generation AAS, 327; arsenic in traditional Chinese medicine, microwave digestion with flow injection–inductively coupled plasma MS (FI–ICP–MS), 963; cadmium levels in feed components and kidneys of growing/finishing pigs, AAS method, 1288; copper in soil and airborne dust particulates, field detection and sensitive determination with 1-[pyridyl-(2)-azo]-naphthol-(2), N-phenyl-N-(4-methylphenyl)benzidine, and Triton X-100, 738; Cu(II) and Cd(II) in water samples, improved signal ratio resolution method by optimization of resolution function, 1185; gold(III), synergistic extraction by mixtures of Adogen-464 and neutral donors, 1257; iodate in table salt after azo dye formation, solid-phase extraction and spectrophotometric determination, 167; iron in raw materials, during fabric processing, and in wastewaters of the textile industry, 683; lead and copper in dairy products, fast determination, graphite furnace AAS method, 368; selenium in meat products, hydride generation AAS method, 364; selenium in water, analysis of interlaboratory performance, 1466; separation of arsenic and selenium species, capillary zone electrophoresis in a coated capillary, 1587; silver in synthetically prepared ores, colorimetric determination with preliminary separation from associated metal ions by TLC, 172; trace metal ions in common salt, stripping voltammetry method, 1413

Methidathion in oranges, solid-phase extraction, LC, and GC methods, 1474

Method performance evaluation of the Novel Soxflo Technique for rapid extraction of crude fat in foods and animal feeds, 1369; fat in foods, studies in improvement of Official Method 996.06, 1146; haloacetic acids in water, ion chromatography—method development, 689; IUPAC collaborative trial study of a method to detect genetically modified soy beans and maize in dried powder, 923; minicolumn method, aflatoxins in copra meal, 877; PCBs and chlorinated pesticides in biota, 1175; Salmonella species in water, comparative evaluation of the ISO and PROBELIA polymerase chain reaction methods, 871

Method validation AOAC INTERNATIONAL qualitative and quantitative microbiology guidelines, 402; LacTek test applied to spiked extracts of tissue samples, 79; urinary 3,5,6-trichloro-2-pyridinol, reference values in the Italian population, 305

Methyl-5-sulphamoyl-2-methoxybenzoate in pharmaceuticals, HPTLC and scanning densitometry methods, 825

Methyl levulinate interference in determination of total fat in low-fat, high-sugar products, GC fatty acid methyl ester (GC–FAME) analysis, 766

Methyl parathion in oranges, solid-phase extraction, LC, and GC methods, 1474

Micellar electrokinetic chromatography aldehydes and ketones in ambient air, 1571; cyclodextrin-modified, enantiomeric and isomeric separation of pesticides, 1550; cyclodextrin-modified, plant
### Microbiological methods

**Methods Committee report, 523**; **referee report, 475**

- **Microbiological efficacy testing**—disinfectants
  - LacTek test applied to spiked bioindicator, 151; validation of the standard and a calibrated cidal germicides using a chemical method, 634; sporicidal testing of commercial standard tests for liquid chemical germicides: a proposal, 669; immunoassay method, rapid detection of antibiotics added to complete feeds, premixes, and concentrates, 1; imidazolinone herbicides in soil, HPLC/electrospray ionization MS method, 956; macrolide residues in muscle, HPLC with UV detection, 1046; oxytetracycline, tetracycline, and chlortetracycline in milk, LC method with postcolumn derivatization and fluorescence detection, 55; penicillin antibiotics in muscle tissue, ion-pair reversed-phase HPLC after precolumn derivatization, 1083; pesticide residues in foods, retention time locking, GC–AED, database search and GC/MS methods, 313; pesticides in fresh fruits and vegetables, procedures developed by the Florida Department of Agriculture and Consumer Services, 1419; pesticides in high-organic-content soils, solid-phase extraction and GC/MS method, 705; plant protectants in raw and drinking waters, cyclohexirin-modified micellar electrokinetic chromatography, 1510; sulfonylurea herbicides in water, LC method with confirmation by capillary electrophoresis, 1523; synthetic pyrethroid pesticides in agricultural products, GC method: collaborative study, 186

#### Microwave digestion

- Arsenic in traditional Chinese medicine, flow injection-inductively coupled plasma MS (FI-ICP-MS) method, 963; chronic oxide as a digestibility marker in feed, feces, and ileal content, AAS method, 575

#### Milk and milk products

- Abamectin, doramectin, ivermectin, and moxidectin in, multiresidue determination, LC method and fluorescence detection, 1340; β-lactum antibiotics in, confirmatory test results, 1071; fat, protein, and total solids in ovine milk, near-IR spectroscopy method, 753; fluoroquinolones in, on-line immunoaffinity capture coupled with reversed-phase LC method, 607; folates in, LC method, 119; medicated milk replacer, oxytetracycline in, LC method, 1329; oxytetracycline, tetracycline, and chlortetracycline in milk, LC method with postcolumn derivatization and fluorescence detection, 55; pesticide residues in, GC/tandem MS method, 982; spectinomycin in bovine milk, microbial receptor assay and comparison with LC analysis, 1002; sulfamethazine in milk, biosensor immunoassay, 1316; tylosin in mastitic cow’s milk following therapy, LC method, 1303

#### Minerals

- Methods Committee report, 520; referee report, 469

#### Minicolumn method

- Aflatoxins in copra meal, optimization and validation of method, 877

#### Moisture, see Water

#### Molecular spectroscopy

- Raman spectroscopic characterization of RP-18-type chemically bonded stationary phases for LC, 297

### Multiresidue methods

- Methods Committee report, 529; referee report, 503; abamectin, doramectin, ivermectin, and moxidectin in milk, LC method and fluorescence detection, 1340; fungicides in processed fruits and vegetables, capillary GC method after gel permeation chromatography, 1229; imidazolinone herbicides in soil, HPLC/electrospray ionization MS method, 956; macrolide residues in muscle, HPLC with UV detection, 1046; oxytetracycline, tetracycline, and chlortetracycline in milk, LC method with postcolumn derivatization and fluorescence detection, 55; penicillin antibiotics in muscle tissue, ion-pair reversed-phase HPLC after precolumn derivatization, 1083; pesticide residues in foods, retention time locking, GC–AED, database search and GC/MS methods, 313; pesticides in fresh fruits and vegetables, procedures developed by the Florida Department of Agriculture and Consumer Services, 1419; pesticides in high-organic-content soils, solid-phase extraction and GC/MS method, 705; plant protectants in raw and drinking waters, cyclohexirin-modified micellar electrokinetic chromatography, 1510; sulfonylurea herbicides in water, LC method with confirmation by capillary electrophoresis, 1523; synthetic pyrethroid pesticides in agricultural products, GC method: collaborative study, 186

### Mycotoxins

- Methods Committee report, 524; referee report, 488; in corn and corn
products in a high-risk area for gastric cancer in Shandong Province, China, 657; ochratoxin A in wheat, barley, and coffee, determination and survey—1997, LC method, 85; α-zearalenol and zearalenone, preparative method for isolation using extracting disk, 90 see also Antimycotic compounds

**Natural toxins**
Methods Committee report, 524 see also Aflatoxins; Mycotoxins; Phycotoxins; Plant toxins

**Near-infrared spectroscopy**
fat, protein, and total solids in ovine milk, 753

**Neomycin**
in animal tissues, LC method, 61

**Niacin**
in infant formula and wheat flour, anion-exchange LC method, solid-phase extraction cleanup, 128

**Nitrate**
in forages, screening with a test strip: collaborative study, 9

**Nitrobenzoylation**
sugar alcohols in beverages and foods, LC method, 134

**Nitrogen**
in varieties of complex matrixes, gas diffusion flow injection analysis, with bulk acoustic wave detection, 1479

**Nonalcoholic beverages**
Methods Committee report, 517; referee report, 457; sugar alcohols in beverages after nitrobenzoylation, LC method, 134

**Nonaqueous volumetric methods**
terbinafine hydrochloride in dosage forms, UV spectrophotometry, 830

**Novel Soxflo Technique**
rapid extraction of crude fat in foods and animal feeds, 1369

**Nutrients, see Vitamins and other nutrients**

**Nutrients in soils**
Methods Committee report, 516 see also Soils and sediments

**Nuts and nut products**
Methods Committee report, 511; aflatoxins in, laboratory proficiency testing: a cooperative project between Thailand and the U.S., 259; aflatoxins in farmers’ stock peanut lots, performance of sampling plans by measuring aflatoxin in high-risk grade components, 264; peanut protein in chocolate, immunoaffinity column determination, 666 see also Antimycotic compounds

**Ochratoxin A**
in domestic and imported beers in Japan, immunoaffinity and LC method, 897; in wheat, barley, and coffee, determination and survey: 1997, LC method, 85

**Octylonium bromide**
stability-indicating methods, 599

**Oils and fats**
Methods Committee report, 520; referee report, 463; acid value of oilseeds, pH-metric determination without titration—PVM 1:1999, 915; crude fat in foods and animal feeds, Novel Soxflo Technique for rapid extraction, 1369; Dowtherm A contamination in edible oils, LC method, 893; fat in foods, studies in improvement of Official Method 996.06, 1146; fat in ovine milk, near-IR spectroscopy method, 753; interference by methyl levulinate in determination of total fat in low-fat, high-sugar products, GC fatty acid methyl ester (GC–FAME) analysis, 766; Istrian olive oils, cross-validation in linear discriminant analysis of triacylglycerol structural data, 1489; lipids in infant formula powder, direct extraction methylation of lipids and fatty acid methyl esters (FAME) analysis by GC, 1128; sterol and triterpene diol contents of vegetable oils, high-resolution capillary GC method, 929

**Oilseeds**
acid value of, pH-metric determination without titration—PVM 1:1999, 915

**Oleochemicals**
Dowtherm A contamination in, LC method, 893

**Oligofructose**
as part of the dietary fiber complex, 223

**Omeprazole**
stability-indicating methods, 599

**Oranges**
benomyl, diphenyl, o-phenylphenol, thiabendazole, chlorpyrifos, methidathion, and methyl parathion in, solid-phase extraction, LC, and GC methods, 1474

**Organic methods**
Methods Committee report, 513; referee report, 446

**Organochlorine pesticides**
dietary intake and residues in foods from Hsinchu, Taiwan, 677; dietary intake of: Kuwait’s Total Diet Study, 1458; maternal body burden, 716; in medicinal plants sold in Coimbra, Portugal, 1206

**Organohalogen residues and fumigants**
Methods Committee report, 529; referee report, 505

**Organonitrogen pesticides**
Methods Committee report, 529; referee report, 507

**Organophosphate pesticides**
on vegetables in Trinidad, West Indies, use patterns and residual levels, 991

**Oven methods**
comparison with Karl Fischer method, determination of water in forages and animal feeds, 799

**Overpressured layer chromatography**
combined with digital
Subject Index

autoradiography and MS method, study of deramiclane metabolism, 231; Personal OPLC Basic System 50, flexible tool in analytical and semipreparative work, 587

**Oxytetracycline** in bovine kidney and medicated milk replacer, LC method, 1329; in chicken products, rapid and simple determination, HPLC method, 770; in the edible fillet of rainbow trout, LC method and the official microbial inhibition assay, 866; in milk, LC method with postcolumn derivatization and fluorescence detection, 55

**Packaging materials** microbial ranking of, (exposure chamber method) ASTM Method: collaborative study, 648

**Parathion methyl** on field-sprayed apples and stored apples, GC method, 359

**Patulin** in apple juice and unfiltered apple juice, solid-phase extraction method, 1109

**Peanuts** see Nuts and nut products

**Pears** benzoylurea insecticides in, solid-phase extraction cleanup and LC method with UV detection, 213

**Peer-verified methods** AOAC INTERNATIONAL qualitative and quantitative microbiology guidelines for methods validation, 402; pH-metric determination of the acid value of oilseeds without titration—PVM 1:1999, 915; simultaneous determination of water and enediols or thiols in chemical products and drugs not amenable to direct Karl Fischer titration—PVM 1:1998, 840

**Penicillin** in muscle tissue, ion-pair reversed-phase HPLC after precolumn derivatization, 1083

**Personal OPLC Basic System 50** overpressured layer chromatography, flexible tool in analytical and semipreparative work, 587

**Pesticide formulations** dithianon in commercial formulations, spectrophotometric method, 1298; fenpropathrin and fluvinate in their formulations, spectrophotometric determination, 785; TLC method, recent advances in, 48

**Pesticide formulations: CIPAC studies** Methods Committee report, 526; referee report, 496

**Pesticide formulations: fungicides and rodenticides** Methods Committee report, 526

**Pesticide formulations: herbicides** Methods Committee report, 526; referee report, 499

**Pesticide formulations: insecticides, synergists, and repellents** Methods Committee report, 526

**Pesticide residues** Methods Committee report, 513; referee report, 505; analysis for 1997–1998, 561; azamethiphos in salmon tissue, LC method with fluorescence detection, 1224; benomyl, diphenyl, o-phenylphenol, thiabendazole, chlorpyrifos, methidathion, and methyl parathion in oranges by solid-phase extraction, LC, and GC methods, 1247; benzoylphenylurea, in pome fruit and fruiting vegetables, LC method with diode array detection and residue data obtained in the Dutch National Monitoring Program, 1198; benzoylurea insecticides in apples and pears, solid-phase extraction cleanup and LC method with UV detection, 213; carbamate, flow-injection spectrophotometric determination by coupling with diazotized 2,4,6-trimethylaniline, 937; carbamate insecticides, micellar electrokinetic capillary chromatography, 1542; chloracetanilide pesticides and pyriminobac-methyl in crops, comparison of supercritical fluid extraction and Japanese bulletin method, 1239; chlorinated pesticides in biota, method and quality assurance, 1175; chlorinated pesticides in human serum, column fractionation and dual-column capillary GC method with electron capture detection, 177; clomethoquat and meququat in grain—results from the Danish National Pesticide Survey, 331; dimethoxydithiophosphate, indirect determination by flow injection analysis with liquid–liquid extraction and AAS with hydride generation, 1436; dithianon in commercial formulations and its residues in foodstuffs, spectrophotometric method, 1298; in Egyptian fruits and vegetables in 1995, 948; enantiomeric and isomeric separation by cyclodextrin-modified micellar electrokinetic chromatography, 1550; in foods, multiresidue screening, retention time locking, GC–AED, database search and GC/MS methods, 313; fresh fruits and vegetables, multiresidue procedures developed by the Florida Department of Agriculture and Consumer Services, 1419; in fruits, vegetables, and milk, GC/tandem MS method, 982; fungicides in processed fruits and vegetables, multiresidue determination, capillary GC after gel permeation chromatography, 1229; hexazinone in groundwater, direct-injection HPLC method, 1505; in high-organic-content soils, multiresidue determination, solid-phase extraction and GC/MS method, 705; imidazolinone herbicides, multiresidue determination and confirmation in soil,
Subject Index

HPLC/electrospray ionization MS method, 956; mass peak profiling from selected-ion recording data as a tool for regulatory analyses, 1443; maternal body burden of organochlorine pesticides and dioxins, 716; multifungamit residues—a critical review, 1261; organochlorine, carbamate, benzimidazole and phenylurea pesticide residues, dietary intake: Kuwait’s Total Diet Study, 1458; organochlorine contaminants in microlayer and subsurface water of Alexandria Coast, Egypt, 391; organochlorine pesticide residues in medicinal plants sold in Coimbra, Portugal, 1206; organochlorine pesticides, dietary intake in foods from Hsinchu, Taiwan, 677; organophosphate pesticides on vegetables in Trinidad, West Indies, use patterns and residual levels, 991; parathion methyl on field-sprayed apples and stored apples, GC method, 359; in selected agricultural food commodities available in India, impact of household preparations, 725; in selected food commodities: results from the Danish National Pesticide Monitoring Program 1995–1996, 337; sulfonylurea herbicides in soil, comparison of capillary electrophoresis and LC methods, 1534; sulfonylurea herbicides in water, LC method with confirmation by capillary electrophoresis, 1523; synthetic pyrethroid pesticides in agricultural products, multiresidue GC method: collaborative study, 186; urinary 3,5,6-trichloro-2-pyridinol, reference values in the Italian population—validation of analytical method and preliminary results (multicentric study), 305; in water, automated system, on-line extraction followed by LC-tandem photodiode array/postcolumn derivatization/fluorescence detection, 968

**pH-metric method**

acid value of oilseeds, determination without titration—PVM 1: 1999, 915

**Phenols**

flow-injection spectrophotometric determination by coupling with diazotized 2,4,6-trimethylaniline, 937

**o-Phenylphenol**
in oranges, solid-phase extraction, LC, and GC methods, 1474

**Phenylurea pesticides**
dietary intake: Kuwait’s Total Diet Study, 1458

**Photodiode array detection**

pesticides in water, on-line extraction followed by LC-tandem photodiode array/postcolumn derivatization/fluorescence detection, 968

**Phytoxins**

Methods Committee report, 525; referee report, 773

**Phytonutrients**

Methods Committee report, 520

**Plaice**

biogenic amines in, relevance of matrix effect in determination of, 1097; use of biogenic amines to evaluate spoilage, 1357

**Plant toxins**

Methods Committee report, 525; referee report, 781

**Plants**

medicinal, sold in Coimbra, Portugal, organochloride pesticide residues in, 1206

**Policosanol**

validation of a GC method for determining fatty alcohols that compose policosanol in five-milligram film-coated tablets, 834

**Polyacrylamide gels**

identification of shark species, isoelectric focusing of sarcoplasmic proteins, 1163

**Polychlorinated biphenyls**
in biota, method and quality assurance, 1175; in human serum, column fractionation and dual-column capillary GC method with electron capture detection, 177; organochlorine contaminants in microlayer and subsurface water of Alexandria Coast, Egypt, 391

**Polyelectrolytes**

mobility distribution with capillary zone electrophoresis, 1594

**Polymerase chain reaction**

Salmonella species in water, comparative evaluation of the ISO and PROBELIA methods, 871; single strand conformational polymorphism (PCR-SSCP), identification of flatfish species, 903

**Pome fruit**

benzoylphenylurea insecticides in, LC method with diode array detection and residue data obtained in the Dutch National Monitoring Program, 1198

**Potatoes**

glycoalkaloid concentration in, matrix-assisted laser desorption/ionization MS method, 908

**Poultry**

E. coli in, dry rehydratable film method: collaborative study, 73; glycercarbamide in chicken tissue, HPLC method, 248; oxytetracycline in chicken products, rapid and simple determination, HPLC method, 770

**Precolumn derivatization**

penicillin antibiotics in muscle tissue, ion-pair reversed-phase HPLC, 1083

**Propionylpromazine hydrochloride**
in formulation matrixes, reversed-phase ion-pair small bore LC method, 1321

**Proteins**

in dairy products, Kjeldahl nitrogen analysis as a reference method,

**Pyriminobac-methyl**

- in crops, comparison of supercritical fluid extraction and the Japanese bulletin method, 1239

**Quality assurance**

- canned fishing goods, statistical treatment of nutritional parameters, 1247; simultaneous determination of water and enediols or thiols in chemical products and drugs not amenable to direct Karl Fischer titration—PVM 1:1998, 840

**(+)-Quinidine**

- determination of, LC method with diode-laser polarimetric detection, 1308

**(-)-Quinine**

- determination of, LC method with diode-laser polarimetric detection, 1308

**Radioactivity**

- Methods Committee report, 529; referee report, 508

**Raman spectroscopy**

- characterization of RP-18-type chemically bonded stationary phases for LC, 297

**Retention time locking**

- multiresidue screening of pesticides in foods, GC–AED, database search and GC/MS methods, 313

**Retinol**

- value assignment in Standard Reference Material 2383 (Baby Food Composite), 288

**Retinyl palmitate**

- in medical food, LC method using matrix solid-phase dispersion in conjunction with a zero reference material, 107; in medical foods, zero-control reference materials as a method development tool, 271; value assignment in Standard Reference Material 2383 (Baby Food Composite), 288

**Rodenticidal baits**

- cholecalciferol-treated, improved method for analysis of, 792

**Salmon**

- azamethiphos in, LC method with fluorescence detection, 1224

**Salmonella**

- in foods—new enrichment procedure for use with the TECRA Salmonella Visual Immunoassay: collaborative study, 634; Reveal for Salmonella test system, 625; in water, comparative evaluation of the ISO and PROBELIA polymerase chain reaction methods, 871

**Salt**

- iodate in table salt after azo dye formation, solid-phase extraction and spectrophotometric determination, 167; trace metal ions in, stripping voltammetry method, 1413

**Sarcoplasmic proteins**

- identification of shark species by polyacrylamide gel isoelectric focusing, 1163

**Seafoods and seafood products**

- Methods Committee report, 511; referee report, 438; E. coli in, dry rehydratable film method: collaborative study, 73

**Selenium**

- in meat products, hydride generation AAS method, 364; separation by capillary zone electrophoresis in a coated capillary, 1587; in water, analysis of interlaboratory performance, 1466

**Shark**

- identification by polyacrylamide gel isoelectric focusing of sarcoplasmic proteins, 1163

**Silica gel**

- chemically modified with mercaptopropyltrimethoxysilane as stationary phase in TLC, 399

**Silver**

- in synthetically prepared ores, colorimetric determination with preliminary separation from associated metal ions by TLC, 172

**Single strand conformational polymorphism**

- polymerase chain reaction (PCR–SSCP), identification of flatfish species, 903

**Soils and sediments**

- copper in, field detection and sensitive determination with 1-[pyridyl-(2)-azo]-naphthol-(2), N-phenyl-N'--(4-methylphenyl)benzimidine, and Triton X-100, 738; imidazolinone herbicides in, multiresidue determination and confirmation, HPLC/electrospray ionization MS method, 956; multiresidue methods of pesticides in high-organic-content soils, solid-phase extraction and GC/MS method, 705; sulfentrazone in, LC method, 1214; sulfonyleurea herbicides, comparison of capillary electrophoresis and LC methods, 1534

**Solids**

- see Nutrients in soils

**Solid-phase extraction**

- benomyl, diphenyl, o-phenylphenol, thiabendazole, chlorpyrifos, methidathion, and methyl parathion in oranges, LC and GC methods, 1474; bentzonurea insecticides in apples and pears, LC method with UV detection, 213; caffeine in surface water and groundwater samples, submicrogram-per-liter concentrations, LC method, 161; capsaicin and some of its analogues from chili peppers (Capsicum spp.), 1399; iodate in table salt after azo dye formation, spectrophotometric determination,
Subject Index

167; multiresidue methods of pesticides in high-organic-content soils, GC/MS method, 705; niacin in infant formula and wheat flour, anion-exchange LC method, 128; patulin in apple juice and unfiltered apple juice, 1109; pesticides in water, on-line extraction followed by LC-tandem photodiode array/postcolumn derivatization/fluorescence detection, 968

Soy beans
genetically modified, IUPAC collaborative trial study, 923

Spectinomycin
residues in bovine milk, microbial receptor assay and comparison with LC analysis, 1002

Spectrometry
atomic absorption, cadmium levels in feed components and kidneys of growing/finishing pigs, 1288; atomic absorption, chronic oxide as a digestibility marker in feed, feces, and ileal content, microwave digestion, 575; flow-injection hydride-generation AAS, inorganic arsenic in marine food samples, hydrochloric acid distillation, 1217; graphite furnace AAS, fast determination of lead and copper in dairy products, 368; hydride generation AAS, indirect determination of dimethoxythiophosphate, 1436; hydride generation AAS, selenium in meat products, 364; hydride generation AAS and dry ashing, arsenic in certifiable color additives, 327

Spectrophotometry
determination of some hydrazine derivatives using 2,3-dichloro-5,6-dicyano-p-benzoquinone, 239; dithianon in commercial formulations and its residues in foodstuffs, 1298; fenpropatrin and fluvalinate in their formulations, 785; flow-injection, determination of phenolic drugs and carbamate pesticides by coupling with diazotized 2,4,6-trimethylaniline, 937; UV, terbinafine hydrochloride in dosage forms, 830

Spectroscopy
near-IR, fat, protein, and total solids in ovine milk, 753; Raman spectroscopic characterization of RP-18-type chemically bonded stationary phases for LC, 297; separation of glycosides, analytical and micropreparative HPLC combined method for generating a glucosinolate library, 1115

Spices and other condiments
Methods Committee report, 518; referee report, 458

Spirit drinks
volatile congeners in, GC method: interlaboratory study, 1375

Spironolactone
determination with univariate and multivariate calibration, wavelength range selection, 1054

Staphylococcus aureus
in cosmetics, pharmaceutical products, and raw materials, immunoassay method for rapid detection, 1171

Starches
in foods, modification of the AOAC total dietary fiber method, 759

Statistical methods
Bayesian approach to establishing assay limits, 747; cross-validation in linear discriminant analysis of triacylglycerol structural data from Istrian olive oils, 1489; evaluation of the Youden Matched-Pairs Procedure, 375; nutritional parameters in the quality control of canned fishing goods, 1247; repeatability and reproducibility of germicide tests: a literature review, 384; verification of parameters describing liquid adsorption of heterogeneous solid surfaces, 1495

Sterols
contents of vegetable oils, high-resolution capillary GC method, 929

Sugar alcohols
in beverages and foods after nitrobenzoylation, LC method, 134

Sugars and sugar products
Methods Committee report, 520; sugars in foods, modification of the AOAC total dietary fiber method, 759

Sulfamethazine
in milk, biosensor immunoassay, 1316

Sulfentrazone
in soil, LC method, 1214

Sulfite
in varieties of complex matrixes, gas diffusion flow injection analysis, with bulk acoustic wave detection, 1479

Sulfonylurea herbicides
in soil, comparison of capillary electrophoresis and LC methods, 1534; in water, multiresidue method, LC method with confirmation by capillary electrophoresis, 1523

Sulpiride
in pharmaceuticals, HPTLC and scanning densitometry methods, 825

Supercritical fluid extraction
chloracetanilide pesticides and pyriminobac-methyl in crops, comparison with the Japanese bulletin method, 1239; chloramphenicol in eggs, in-line collection, 1334

Supplements, see Botanicals and other supplements

Surfactants
MEGA-borate and SDS, micellar electrokinetic capillary chromatography of carbamate insecticides, 1542

Tandem detection
pesticides in water, on-line extraction followed by LC-tandem photodiode array/postcolumn derivatization/fluorescence detection, 968
Subject Index

Tea, see Coffee and tea
Terbinafine hydrochloride
in dosage forms, UV spectrophotometry and nonaqueous determination, 830
Test strips
diamines in tuna, 1102
Tetracycline
in milk, LC method with postcolumn derivatization and fluorescence detection, 55; residues in animal tissues, validation study, 862
Textile industry
iron in raw materials, during fabric processing, and in wastewaters, 683
Thermal heating fluid
Dowtherm A contamination in oleochemicals and edible oils, LC method, 893
Thiabendazole
in oranges, solid-phase extraction, LC, and GC methods, 1474
Thin layer chromatography
catecholamines, 5-hydroxytryptamine, and their metabolites in biological samples: a review, 17; chemically modified silica gel with mercaptopropyltrimethoxysilane as stationary phase, 399; HPTLC method, comparison with HPLC, tinidazole in human serum, 244; HPTLC method, sulpiride and impurities of 2-aminomethyl-1-ethylpyrrolidine and methyl-5-sulphamoyl-2-methoxybenzoate in pharmaceuticals, 825; molar absorptivities of aflatoxins B1, B2, G1, and G2 in acetonitrile, methanol, and toluene-acetonitrile (9 + 1; modification of AOAC Official Method 971.22); collaborative study, 251; pesticides determination, recent advances in, 48; reversed-phase, with different stationary phases, studies of quantitative structure-biological activity relationship of new antimycotic compounds, 31; separation of C60 and C70 fullerenes on silica gel impregnated with polymers, 227; silver in synthetically prepared ores, colorimetric determination with preliminary separation from associated metal ions, 172; teaching pharmaceutical analysis to undergraduate students—laboratory practicals, 38; validation of quantitation determination with CCD camera and slit-scanning densitometer, 25
Thiols
simultaneous determination of water and enediols or thiols in chemical products and drugs not amenable to direct Karl Fischer titration—PVM 1:1998, 840
Tinidazole
in human serum, comparison of HPTLC with HPLC method, 244
Tobacco
Methods Committee report, 516
Tocopherol
value assignment in Standard Reference Material 2383 (Baby Food Composite), 288
All-rac-α-tocopheryl acetate
in medical food, LC method using matrix solid-phase dispersion in conjunction with a zero reference material, 107; in medical foods, zero control reference material as a method development tool, 271
para-Toluenesulfonamide
in edible fillet tissues from three species of fish, LC method, 1064
Total solids
in ovine milk, near-IR spectroscopy method, 753
Trace elements, see Metals and other elements
Traditional Chinese medicine
arsenic in, microwave digestion with flow injection-inductively coupled plasma MS (FI-ICP-MS) method, 963
Triacylglycerols
from Istrian olive oils, cross-validation in linear discriminant analysis, 1489
3,5,6-Trichloro-2-pyridinol
reference values in the Italian population—validation of analytical method and preliminary results (multicentric study), 305
2,4,6-Trimethylaniline
diazotized, flow-injection spectrophotometric determination of phenolic drugs and carbamate pesticides by coupling with, 937
Triterpene diols
contents of vegetable oils, high-resolution capillary GC method, 929
Triton X-100
copper in soil and airborne dust particulates, field detection and sensitive determination, 738
Trout
amoxicillin in, LC method with UV detection after derivatization, 1345; oxytetracycline in, LC method and the official microbial inhibition assay, 866
Tuna
test strip for diamines, 1102
Tylosin
in mastitic cow’s milk following therapy, LC method, 1303
Ultraviolet detection
amoxicillin in trout, LC method, 1345; benzoyleurea insecticides in apples and pears, solid-phase extraction and LC method, 213; macrolide residues in muscle, HPLC method, 1046
Vegetable products: processed
Methods Committee report, 511; fungicides in, multiresidue determination, capillary GC method after gel permeation chromatography, 1229
Vegetables
aflatoxins in corn, laboratory proficiency testing—a cooperative project between Thailand and the U.S., 259; Alberta potatoes, glycoalkaloid con-
Subject Index

Subject Index: Journal of AOAC International Vol. 82, No. 6, 1999

Vitamins and other nutrients
Methods Committee report, 520; referee report, 454

Zearalenone
in corn, fluorometry and LC method, 1364; preparative method for isolation using extracting disk, 90

Zero reference materials
as a method development tool, all-rac-α-tocopheryl acetate and retinyl palmitate in medical foods, 271; all-rac-α-tocopheryl acetate and retinyl palmitate in medical foods, LC method, matrix solid-phase dispersion, 107

Youden Matched-Pairs Procedure
a statistical evaluation of, 375

α-Zearalenol
preparative method for isolation using extracting disk, 90

Wheat
ochratoxin A in, determination and survey—1997, LC method, 85

Whiskey
authentication of straight whiskey by determination of the ratio of furfural to 5-hydroxymethyl-2-furaldehyde, 997

Whiting
biogenic amines in, relevance of matrix effect in determination of, 1097; use of biogenic amines to evaluate spoilage, 1357

Wastewater
of the textile industry, iron in, 683

Water
caffeine in surface water and groundwater samples, submicrogram-per-liter concentrations, solid-phase extraction and LC method, 161; Cu(II) and Cd(II) in, improved signal ratio resolution method by optimization of resolution function, 1185; in forages and animal feeds, comparisons of Karl Fischer method with oven methods, 799; groundwater, hexazinone in, direct-injection HPLC method, 1505; halocarboxylic acids in, ion chromatography—method development, 689; organochlorine contaminants in microlayer and subsurface water of Alexandria Coast, Egypt, 391; pesticides in, on-line extraction followed by LC-tandem photodiode array/postcolumn derivatization/fluorescence detection, 968; plant protectants in raw and drinking waters, multiresidue method with cyclodextrin-modified micellar electrokinetic chromatography, 1510; Salmonella species in, comparative evaluation of the ISO and PROBELIA polymerase chain reaction methods, 871; selenium in, analysis of interlaboratory performance, 1466; simultaneous determination of water and enediols or thiols in chemical products and drugs not amenable to direct Karl Fischer titration—PVM 1: 1998, 840; sulfonyleurea herbicides in, LC method with confirmation by capillary electrophoresis, 1523; wastewater of the textile industry, iron in, 683

Water-soluble vitamins, see Vitamins and other nutrients

Veterinary analytical toxicology
