

CONTENTS

1. Introduction	1
2. Some Basic Concepts	10
3. Simple Random Sampling and Unbiased Estimates	44
4. Ratio and Regression Estimates and Estimates of Ratios	69
5. Stratified Sampling	99
6. Selection with Probability Proportional to Size	128
7. Multistage Sampling: Concept	171
8. Multistage Sampling: Application	202
9. Further Sampling Techniques	240
10. Control of Nonsample Errors	286
11. Sample Design	346
12. Sample Frames, Selection Systems, and Master Samples	386
13. Household Survey Master Samples	403
14. Survey Design	427
15. Design of Series of Surveys	446
Index	467
