

## CONTENTS

|  |       |
|--|-------|
| Introduction . . .   | 19    |
| <b>GENERAL PART</b>  |       |
| History of Paper Chromatography . . . . .  | 25    |
| Capillary Analysis (1—44) . . . . .  | 25—27 |
| Other Historically Important Papers (45—65) . . . . .  | 27—28 |
| General Reviews and Books . . . . .  | 29    |
| Books on Chromatography (Including Paper Chromatography)<br>(66—83) . . . . .                                      | 29    |
| Books on Paper Chromatography (84—94) . . . . .  | 30    |
| General Reviews on Paper Chromatography (95—196) . . . . .   | 30—34 |
| Reviews on the Application in Various Fields of Science and Techno-<br>logy (197—252) . . . . .                    | 34—36 |
| Principles. Theory and Generals . . . . .  |       |
| Definition and Classification of Chromatographic Methods. Mechanism<br>of Paper Chromatography (253—296) . . . . . | 37—39 |
| Theoretical Treatment of the Chromatographic Process (297—305) . . . . .   | 39    |
| Development . . . . .  | 39    |
| Flow of Liquid Through Paper (306—324) . . . . .   | 30—40 |
| Effect of Temperature on $R_f$ values (325—328) . . . . .  | 40    |
| Irregularities of the Shape of Spots. Multiple Spots Corresponding to<br>one Substance (329—336) . . . . .         |       |
| Relations Between Chemical Structure and Chromatographic Behaviour<br>of Organic Substances (337—356) . . . . .    | 41—42 |
| Effect of Association and Dissociation (357—359) . . . . .   | 42—43 |
| Resolution of Optical Antipodes (360—371) . . . . .  | 43    |
| Techniques of Paper Chromatography . . . . .   | 44    |
| Preparation of Sample (372—376) . . . . .  | 44    |
| Desalting (377—388) . . . . .  | 44—45 |
| Application of Samples (389—410) . . . . .   | 45—46 |
| Chromatographic Paper . . . . .  | 46    |
| Manufacture. Properties. Purification and Applicability (411—428) . . . . .  | 46—47 |
| Chemically Modified Paper (429—447) . . . . .  | 47—48 |
| Sheets of Materials Containing No Cellulose (448—452) . . . . .  | 48—49 |
| Development . . . . .  | 49    |
| Special Shapes of Chromatographic Paper (453—469) . . . . .  | 49—50 |

# VI

|  |       |
|--|-------|
| Solvent Systems .....  | 50    |
| Choice and Preparation of Solvent Systems. Effect of the Composition, on $R_f$ values (470—480).....   | 50    |
| Gradient Elution (481—482) .....   | 51    |
| Impregnation of Paper (483—509) .....  | 51—52 |
| Chromatographic Tanks (510—534) .....  | 52—53 |
| Troughs and Stands (535—543) .....   | 54    |
| Ascending Development (544—558) .....  | 54—55 |
| Circular and Sector Methods (Radial Development) (559—604) .....   | 55—57 |
| Other Techniques of Development .....  | 57    |
| Horizontal Development (Excepting Radial Chromatography) (605—607) .....   | 57    |
| Spiral Development (608—611) .....   | 57—58 |
| Countercurrent Development (612—613) .....   | 58    |
| Combinations with Electrophoresis (614—618).....   | 58    |
| Flowing Chromatography ("Liquid Chromatogram") Including Continuous Chromatography (619—621) .....   | 58    |
| Multiple Chromatography .....  | 58    |
| Multiple Development (622—630).....  | 58—59 |
| Two-Dimensional Chromatography (631—635).....  | 59    |
| Automation of Development .....  | 59    |
| Devices for Starting and Interrupting the Development at Certain Time (636—638).....   | 59—60 |
| Observation of Substance Location During the Development ("Automatic Chromatography") (639—641).....   | 60    |
| Measurements and Calculation of $R_f$ values (642—650) .....   | 60    |
| Detection and Determination of Substances Resolved.....  | 60    |
| Drying of Chromatograms (651—652) .....  | 61    |
| Chemical Detection Methods (653—666) .....   | 61—62 |
| General Techniques for the Application of Reagents and Preservation of Paper Chromatograms (667—678) .....   | 62    |
| Direct Determination on Chromatograms by Means of Visual Estimation, on the Basis of the Area of the Spot, by Retention Analysis and Titration .....       | 62    |
| Visual Estimation (679) .....  | 62    |
| Estimation on the Basis of the Area of the Spot (680—688).....   | 63    |
| Retention Analysis (689—695) .....   | 63    |
| Titration without Preliminary Elution from Paper (696) .....   | 64    |
| Optical Detection and Estimation Methods .....   | 64    |
| Detection by Means of Absorption (or Reflection) of Visible or Ultraviolet Light or by Means of Fluorescence. Photography of Chromatograms (697—710) ..... | 64—65 |
| Photometry of Transmitted Light (711—741) .....  | 65—66 |
| Investigation of Spectra Directly on Paper (742—744).....  | 66    |
| Photometry of Reflected Light (745—748) .....  | 67    |
| Photometry of Photographs (Negatives) (749—752) .....  | 67    |
| Photometry (and Refractometry) after Elution (753—754) .....   | 67    |
| Direct Fluorimetry on Paper (755—761).....   | 67—68 |
| Methods Using Infrared Light for Detection and Estimation (762—765)  | 68    |

|   |         |
|---|---------|
| Electrochemical Methods of Detection and Determination.....                             | 68      |
| Electrochemical Methods in situ (Directly on Paper) (766—785).....                      | 68—69   |
| Electrochemical Methods after Elution (786—789).....                                    | 69      |
| Biological Methods of Detection and Determination.....                                  | 69      |
| Enzymatic Methods (790—793).....  | 69—70   |
| Microbiological Methods (794—810).....  | 70—71   |
| Methods Using Higher Plants (811—816).....  | 71      |
| Methods Using Animals (817—826).....  | 71—72   |
| Preparative Chromatography on Paper or Column of Cellulose.....                         | 73      |
| Elution from Paper (827—837).....   | 73      |
| Preparative Techniques on Single Sheets of Paper (838—847).....                         | 74      |
| Chromatopile and Related Techniques (848—864).....                                      | 74—75   |
| Chromatopack and Filter Paper Rolls (865—875).....                                      | 75—76   |
| Columns of Cellulose (876—942).....   | 76—79   |
| Columns of Chemically Modified Cellulose (943—970).....                                 | 79—81   |
| <b>SPECIAL PART</b>   |         |
| Aromatic Hydrocarbons (971—977).....  | 85      |
| Alcohols.....   | 86      |
| Aliphatic Alcohols (978—988).....   | 86      |
| Glycols (989—996).....  | 87      |
| Cyclic Alcohols (997—1015).....   | 87—88   |
| Phenols and Related Compounds.....  | 89      |
| Techniques of Chromatography of Phenols (1016—1040).....                                | 89—90   |
| Separation of Phenol Derivatives (1041—1048).....                                       | 90—91   |
| Applications.....   | 91      |
| Phenols in Plants (1049—1059).....  | 91      |
| Phenols in Animals (1060—1074).....   | 92      |
| Other Applications (1075—1081).....   | 92—93   |
| Pyrane Derivatives.....   | 93      |
| Coumarins (1082—1128).....  | 93—95   |
| Derivatives of $\gamma$ -Pyrone (Chromones, Flavones, Aurones etc.) (1129 to 1260)..... | 96—102  |
| Anthocyanins and Anthocyanidins (1261—1302).....  | 102—104 |
| Catechins (1303—1325).....  | 104—105 |
| Other Oxygen-Containing Heterocyclic Compounds (1326—1340).....                         | 105—106 |
| Oxo Compounds.....  | 107     |
| Aliphatic Aldehydes and Ketones (1341—1374).....  | 107—108 |
| Cyclic Aldehydes and Ketones.....   | 109     |
| Techniques (1375—1389).....   | 109     |
| Application in the Chemistry of Lignin (1390—1414).....                                 | 109—111 |
| Application in the Food Industry (1415—1423).....                                       | 111     |
| Quinones.....   | 111—112 |
| Naphthoquinones and Benzoquinones (1424—1431).....                                      | 111—112 |
| Anthraquinones (1432—1443).....   | 112     |
| Carbohydrates.....  | 113     |
| Reviews (1444—1457).....  | 113     |

|  |         |
|--|---------|
| Techniques .....   | 114     |
| Relations between Structure and $R_p$ Values (1458—1464) .....   | 114     |
| Preparation of Samples (1465—1483) .....   | 114—115 |
| Detection (1484—1531) .....  | 115—117 |
| Solvent Systems (1532—1578) .....  | 117—120 |
| Determination (1579—1621) .....  | 120—122 |
| Application .....  | 122     |
| Bound Carbohydrates in Microorganisms (1622—1676) .....  | 122—125 |
| Application to Plant Material .....  | 125     |
| Free Mono- and Disaccharides (1677—1748) .....   | 125—128 |
| “Free” Oligosaccharides (1749—1786) .....  | 128—130 |
| Analysis of Carbohydrates Formed by Hydrolysis of Plant Material<br>Containing Mostly Polysaccharides (1787—1847) .....    | 130—133 |
| Carbohydrate Components of Plant Heteroglycosides (1848—1862) .....  | 133—134 |
| Application to Animal Material .....   | 134     |
| Free Carbohydrates in Urine and Blood (1863—1895) .....  | 134—136 |
| Free Carbohydrates in Various Animal Material (1896—1906) .....  | 136     |
| Free and Bound Carbohydrates in Milk and Mammary Glands (1907<br>to 1931) .....  | 136—138 |
| Analysis of Carbohydrates Obtained by the Hydrolysis of Animal<br>Material (1932—1992) .....                               | 138—141 |
| Carbohydrates in Products and Intermediates of the Food Industry<br>(1993—2031) .....                                      | 141—143 |
| Enzymatic Reactions and Carbohydrate Metabolism .....  | 143     |
| Hydrolysis and Synthesis of Oligo- and Polysaccharides; Trans-<br>glycosidation (2032—2180) .....                          | 143—149 |
| Enzymatic Conversions of Monosaccharides Connected with Oxyda-<br>tion, Reduction, Isomerization etc. (2181—2238) .....    | 149—152 |
| Reactions of Carbohydrates with Nitrogen Compounds (2239—2264) .....   | 152—153 |
| Investigation of Non-biological Reactions of Carbohydrates (Hydroly-<br>sis, Isomerization, Degradation) (2265—2297) ..... | 154—155 |
| Control of Purity of Sugars and Application to Synthesis (2298—2327) .....   | 155—156 |
| Sugar Alcohols (2328—2346) .....   | 157     |
| Acid and Lactones of the Carbohydrate Series (2347—2360) .....   | 158     |
| Uronic Acids (2361—2380) .....   | 158—159 |
| Keto Acids (2381—2394) .....   | 159—160 |
| Sugar Anhydrides, Deoxy Sugars, Glycols (2395—2409) .....  | 160—161 |
| Methylated Sugars (Ethers and Methyl Glycosides) (2410—2432) .....   | 161—162 |
| Amino Sugars .....   | 162     |
| Techniques (2433—2442) .....   | 162—163 |
| Application (2443—2474) .....  | 163—164 |
| Other Sugar Derivatives (2475—2482) .....  | 164—165 |
| Chromatography of Polysaccharides (2483—2490) .....  | 165     |
| Structure Investigations of Oligo- and Polysaccharides .....   | 166     |
| Structure of Polysaccharides from Microorganisms (2491—2506) .....   | 166     |
| Structure of Plant Polysaccharides (2507—2600) .....   | 167—171 |
| Structure of Polysaccharides from Animals (2601—2619) .....  | 171—172 |
| Structure of Oligosaccharides (2620—2626) .....  | 172     |

|  |         |
|--|---------|
| Organic Acids .....  | 173     |
| Reviews (2627—2636) .....  | 173     |
| Lower Fatty Acids .....  | 174     |
| Techniques (2637—2661) .....   | 174     |
| Analysis in the Form of Hydroxamic Acids (2662—2669) .....   | 175     |
| Analysis in the Form of Other Derivatives (2670—2675) .....  | 175     |
| Application .....  | 176     |
| Metabolism of Lower Fatty Acids (2676—2693) .....  | 176     |
| Lower Fatty Acids in Foodstuffs and Products (2694—2705) .....                                       | 177     |
| Other Applications (2706—2717) .....   | 177—178 |
| Higher Fatty Acids .....   | 178     |
| Techniques (2720—2752) .....   | 178—180 |
| Analysis in the Form of Derivatives (2753—2761) .....  | 180     |
| Applications (2762—2776) .....   | 181     |
| Aliphatic Hydroxy Acids, Di- and Tricarboxylic Acids .....   | 181     |
| Techniques .....   | 181     |
| Preparation of Sample, Solvent Systems, General Papers on Techni-<br>ques (2777—2831) .....          | 181—184 |
| Detection (2832—2840) .....  | 184—185 |
| Estimation (2841—2848) .....   | 185     |
| Application .....  | 185     |
| Plant Material and Products (2849—2896) .....  | 185—188 |
| Animal Material (2897—2905) .....  | 188     |
| Investigation of Metabolism of Non-Volatile Acids (2906—2951) .....                                  | 189—191 |
| Other Applications (2952—2967) .....   | 191—192 |
| Keto Acids .....   | 192     |
| Techniques .....   | 192     |
| Chromatography of Free Keto Acids (2968—2970) .....  | 192     |
| Chromatography of Dinitrophenylhydrazones and Other Deriva-<br>tives of Keto Acids (2971—2995) ..... | 192—193 |
| Conversion of Dinitrophenylhydrazones to Amino Acids (2996 to<br>3003) .....                         | 193—194 |
| Application .....  | 194     |
| Plant Material and Products (3004—3015) .....  | 194—195 |
| Animal Material (3016—3041) .....  | 195—196 |
| Microbiological Material. Metabolism of Keto Acids (3042—3073) ..                                    | 196—197 |
| Phenolic and Other Cyclic Acids .....  | 198     |
| Techniques (3074—3107) .....   | 198—199 |
| Applications .....   | 199     |
| Plant Material (3108—3145) .....   | 199—201 |
| Animal Material (3146—3172) .....  | 201—202 |
| Microbiological Material and Metabolism of Cyclic Acids (3173 to<br>3186) .....                      | 203     |
| Various Non-biological Applications (3187—3196) .....  | 203—204 |
| Lichen Acids (3197—3203) .....   | 204     |
| Tannins. Depsides (3204—3233) .....  | 204—206 |
| Glycerides and Other Esters of Organic Aids (3234—3245) .....  | 206     |
| Steroids .....   | 207     |
| Reviews and Books (3246—3254) .....  | 207     |

|  |         |
|--|---------|
| General Methods of Chromatography of Steroids (3255—3287a) . . . . .   | 207—209 |
| Oestrogens (3288—3328) . . . . .   | 209—211 |
| Bile Acids and Other Steroid Acids (3329—3364) . . . . .   | 211—213 |

| Determination Directly on Paper (4568—4626) .....  | 279—282 |
| The Dye Formed on Paper is Eluted and Estimated by Photometry<br>(4627—4652) .....                                 | 282—283 |
| Estimation after Elution from Paper (4653—4699) .....  | 284—286 |
| Determination of Amino Acids in the Form of Dinitrophenyl Amino<br>Acids and Related Derivatives (4700—4708) ..... | 286—287 |
| Various Amino Acid Derivatives .....   | 287     |
| Metal Complex with Amino Acids (4709—4714) .....   | 287     |
| Carboxyl Group Derivatives of Amino Acids (4715—4721a) .....   | 287—288 |
| Amino Group Derivatives of Amino Acids (4722—4743) .....   | 288—289 |
| Other Amino Acid Derivatives (4744—4753) .....   | 289—290 |
| Applications .....   | 290     |
| Amino Acids in Microbiological Material .....  | 290     |
| Free Amino Acids (4754—4801) .....   | 290—292 |
| Bound Amino Acids (Except for Antibiotics) (4802—4883) .....   | 292—297 |
| Amino Acids Liberated by Hydrolysis of Antibiotics (4884—4913)   | 297—298 |
| Amino Acids in Plant Material .....  | 298     |
| Free Amino Acids (4914—5072) .....   | 298—305 |
| Bound Amino Acids (5073—5138) .....  | 306—309 |
| Amino Acids in Products of Plant Origin (5139—5184) .....  | 309—311 |
| Free Amino Acids in Animal Material (5186—5191) .....  | 312     |
| Blood, Plasma, Serum, Blood Cells (5192—5236) .....  | 312—315 |
| Urine .....  | 315     |
| Techniques and Content in Normal Individuals (5237—5291) ...   | 315—318 |
| Content in Pathological Individuals (5292—5359) .....  | 318—321 |
| Amino Aciduria under Experimental Conditions (5360—5393) ...   | 321—323 |
| Other Body Fluids of Vertebrates .....   | 323     |
| Lymph and Exudates (5394—5396) .....   | 323     |
| Cerebrospinal and Eye Fluids (5397—5413) .....   | 323—324 |
| Saliva and Teeth (5414—5422) .....   | 324     |
| Gastric Juice (5423—5429) .....  | 324—325 |
| Bile, Pancreatic Juice, Faeces (5430—5437) .....   | 325     |
| Sweat, Skin, Hair, Feather (5438—5452) .....   | 325—326 |
| Semen (5453—5455) .....  | 326     |
| Milk and Cheese (5456—5476) .....  | 326—327 |
| Free Amino Acids in Organs of Vertebrates (5477—5520) .....  | 327—330 |
| Liver (5521—5528) .....  | 330     |
| Skeletal and Heart Muscle (5529—5547) .....  | 330—331 |
| Nervous Tissue (5548—5557) .....   | 331—332 |
| Tumours (5558—5562) .....  | 332     |
| Free Amino Acids of Insects and Spiders (5563—5591) .....  | 332—334 |
| Free Amino Acids of Animals Except for Vertebrates and Insects<br>(5592—5603) .....                                | 334     |
| Bound Amino Acids from Animal Material (5604—5640) .....   | 334—336 |
| Nuclei, Chromosomes, Nucleoproteins, Histones and Protamines<br>(5641—5661) .....                                  | 336—337 |
| Keratin (Especially Wool Keratin) (5662—5676) .....  | 337—338 |
| Connective Tissue, Eye Tissue and Teeth (5677—5694) .....  | 338—339 |
| Amino Acids Bound in Blood Plasma Proteins (5695—5705) .....   | 339—340 |

|   |     |     |
|---|-----|-----|
| Amino Acids Bound in Blood Group Specific Substances and Some Other Mucins (5706—5714) .....                    |     |     |
| Amino Acids Bound in Respiratory Pigments and Ferritin (5715 to 5722) .....                                     | 341 | 341 |
| Amino Acids Bound in Enzymes, Proenzymes, Activators and Snake Venom (5723—5739) .....                          |     | 341 |
| Amino Acids Bound in Hormones, Endocrine Glands and Vasoactive Peptides (5740—5757) .....                       | 342 | 343 |
| Liver (5758—5765) .....   |     | 343 |
| Nervous Tissue (5766—5770) .....  |     | 344 |
| Milk Proteins (5771—5779) .....   |     | 344 |
| Urine (5780—5784) .....   | 344 | 345 |
| Tumours (Including Plasmocytome Proteins) (5785—5795) .....   |     | 345 |
| Insects (Including Silk and Honey) (5797—5808) .....  |     | 346 |
| Enzymatic Reactions and Metabolism of Amino Acids .....   |     | 346 |
| Metabolism of Some Groups of Amino Acids .....  |     | 346 |
| Metabolism of Sulphur Containing Amino Acids and Reactions in the Presence of Glutathione (5809—5844) .....     | 346 | 348 |
| Special Metabolism of Aromatic Amino Acids (5845—5852) .....  | 348 | 349 |
| Metabolism of Proline, Hydroxyproline and Pípecolic Acid (5853 to 5856) .....                                   |     |     |
| Special Metabolism of Histidine (5857—5869) .....   | 349 | 350 |
| Metabolism of Tryptophan (5870—5877) .....  |     |     |
| Metabolism of the Amino Acids of the Ureogenetic Cycle and Related Compounds (5878—5891) .....                  |     | 350 |
| Some Types of Amino Acid Reactions .....  |     | 351 |
| Desamination, Oxidation and Reduction of Amino Acids (5892 to 5908) .....                                       | 351 | 352 |
| Transamination (5910—5941) .....  | 352 | 352 |
| Decarboxylation (5942—5962) .....   |     | 353 |
| Reaction of Amides (5963—5975) .....  |     | 354 |
| Effect of Proteolytic Enzymes, Formation and Degradation of Peptides, Transfer of Amino Acids (5976—5995) ..... |     |     |

| Components of Phospholipids (Also Phosphor-free Compounds) (8463 to 8498) .....                        | 495—497   |
| Vitamins .....   | 498       |
| Vitamins A (8499—8502) .....   | 498       |
| Vitamins D (8503—8511) .....   | 498—499   |
| Vitamins E (8512—8531) .....   | 499—500   |
| Vitamins K (1424—1431) .....   | (111—112) |
| Vitamin B Group (8532—8540) .....  | 500—501   |
| Thiamine (8541—8565) .....   | 501—502   |
| Thiamine Phosphoric Acids (8566—8587) .....  | 502—503   |
| Thioctic Acid (8588—8599) .....  | 503—504   |
| Riboflavin and Other Flavins (8600—8638) .....   | 504—506   |
| Flavin Nucleotides (8639—8670) .....   | 506—507   |
| Nicotinic Acid and Nicotinamide. Pyridine Nucleotides (8101—8162) .....                                | (473—476) |
| Pyridoxin Group (8671—8682) .....  | 508       |
| Biotin and Its Derivatives (8683—8696) .....   | 508—509   |
| Pantothenic Acid and Coenzyme A (8697—8750) .....  | 509—511   |
| Pteridine Derivatives .....  | 512       |
| Folic Acid and Its Derivatives (8751—8790) .....   | 512—513   |
| Pterins and Other Pteridine Derivatives (8791—8845) .....  | 514—516   |
| Cobalamine Group (Vitamins B <sub>12</sub> and Related Compounds) (8846—8922) .....                    | 516—520   |
| Studies in the Structure of Vitamin B <sub>12</sub> (8923—8938) .....                                  | 520—521   |
| Ascorbic Acid .....  | 521       |
| Free Ascorbic Acid, Related Substances and Reductones (8939—8974) .....                                | 521—523   |
| Bound Form of Ascorbic Acid, Especially Ascorbigen (8975—8988) .....                                   | 523       |
| Reviews and Analysis of Various Growth Factors (8989—8992) .....                                       | 524       |
| Antibiotics .....  | 525       |
| Reviews, Discussion, General Techniques, Analysis of Antibiotics of Different Groups (8993—9006) ..... | 525       |
| Penicillins (9007—9040) .....  | 525—527   |

|   |         |
