

Introduction	1
GENERAL PART	
General reviews and books	11
Books on column chromatography (1-47)	11
Reviews on column chromatography (48-129)	13
Reviews on the application to various fields of applied science and technology (130-148)	17
Teaching of column chromatography (149-152)	19
Principles, theory and information of general interest in column chromatography	20
History (153-158)	20
Nomenclature (159-161)	20
Theory of column separation (162-208)	20
Mechanisms of separation and development phenomena	23
Extent of separations, peak capacity, conditions for optimum resolution (209- 226)	23
Liquid-solid and liquid-liquid partition chromatography (227-261)	25
Ion-exchange chromatography (262-275)	27
Molecular sieving and gel permeation chromatography (276-316)	28
Relation between molecular properties and chromatographic behaviour	31
Subjects of general interest, low-molecular-weight compounds (317-327)	31
Molecular-weight determination of macromolecular compounds, calibration proce- dures (328-340)	32
Molecular-weight determination of macromolecular compounds, applications (341- 379)	32
Techniques of column chromatography	36
Laboratory devices for column chromatography	36
General topics (380-390)	36
Columns and column accessories (fittings, tubings, devices for column filling, pumps, devices for flow measurement) (391-428)	37
Gradient forming devices and devices for stepwise elution (429-435)	39
Sampling devices and sample applications (436-452)	39
Fraction collectors (453-460)	41
Devices for recording and detection (461-503)	41
Unusual and new arrangements in column chromatography (504-533)	44
Devices and procedures for large scale and preparative operations (534-540)	45
Supporting materials and ion exchangers	46
Silica gel, alumina and other inorganic supporting materials (541-557)	46
Inorganic ion exchangers (558-600)	47
Controlled porosity supports, glass beads (601-611)	50
Organic gels and organic supporting materials (612-657)	51
Ion exchangers of organic nature (658-676)	54

Affinity chromatography, steric chromatography, on column reactions (677–710)	56
Other supporting materials, resin fractionation (711–715)	58
Elution	58
Gradients and solvent systems. Choice and calculation (716–726)	58
Tandem arrangement and recycling (727–734)	59
Detection procedures (735–750)	60
Automated separations and automated analyzers (751–759)	61
Continuous column chromatography (760–762)	62
Comparison of column chromatography with other separation techniques (763–773)	62
Influence of physical parameters on separation (column dimensions, pH, temperature, degree of bead compression) (774–782)	63
Quantitative analysis and data treatment in column chromatography (783–800)	64
SPECIAL PART	
Hydrocarbons	69
Aliphatic hydrocarbons (801–811)	69
Cyclic hydrocarbons (812–930)	70
Applications. Hydrocarbons in crude oils, coal tar, cigarette smoke and other complex mixtures (931–967)	78
Halogen derivatives of hydrocarbons (968–1003)	81
Boranes (1004–1009)	84
Silanes (1010–1017)	85
Alcohols	86
Aliphatic alcohols (1018–1027)	86
Glycols (including polyglycols) (1028–1040)	87
Cyclic alcohols (1041–1063)	88
Phenols	90
Synthetic applications (1064–1092)	90
Biological applications (1093–1114)	92
Ethers (1115–1127)	94
Organic peroxides and ozonides (1128–1137)	96
Oxo compounds	97
Aliphatic aldehydes and ketones (1138–1147)	97
Cyclic aldehydes and ketones (1148–1210)	98
Lignin chemistry (1211–1226)	102
Quinones (1227–1251)	103
Ubiquinones, coenzyme Q, plastoquinones (1252–1261)	104
Anthraquinones and anthrones (1262–1280)	105
Carbohydrates	107
Techniques and automated analysis	107
General techniques of carbohydrate chromatography (1281–1302)	107
Automated analysis of sugar mixtures (1303–1321)	108
Applications	110
Synthetic applications (1322–1347)	110
Carbohydrates and polysaccharides in microorganisms and tissue cultures (1348–1377)	112
Carbohydrates and polysaccharides in plants, food and vegetable products (1378–1429)	114
Carbohydrates in animal material (1430–1441)	117
Carbohydrate derivatives	119
Sugar alcohols (1442–1455)	119
Acids and lactones of the carbohydrate series	120

Automated analysis (1456–1462)	120
Applications (1463–1487)	120
Deoxysugars (1488–1520)	122
Methylated sugars, alkyl and acyl sugar derivatives, sugar esters and methyl glycosides (1521–1591)	125
Amino sugars	130
Techniques and automated procedures (1592–1601)	130
Synthetic applications (1602–1645)	130
Amino sugars in biological material (1646–1655)	134
Sulphur-containing carbohydrates excluding glycosaminoglycans (1656–1675)	134
Sugar phosphates (1676–1705)	136
Glycosaminoglycans (1706–1761)	138
Glycoproteins and glycopeptides	142
General techniques (1762–1764)	142
Glycoproteins and glycopeptides in microorganisms and plants (1765–1790)	142
Glycoproteins and glycopeptides in blood, plasma, serum and blood cells (1791–1817)	144
Glycoproteins and glycopeptides of saliva and the gastrointestinal tract (1818–1823)	146
Glycoproteins and glycopeptides from aorta, glomerular basement membrane and connective tissue (1824–1835)	146
Glycoproteins and glycopeptides in other biological material (1836–1860)	147
Protein-polysaccharides (1861–1867)	149
Structure investigation of oligo- and polysaccharides	150
Structure of polysaccharides and lipopolysaccharides from microorganisms (1868–1882)	150
Structure of vegetable and invertebrate polysaccharides (including cellulose) (1883–1908)	151
Structure of glycosaminoglycans (1909–1930)	153
Hemagglutinins and blood group determining substances (1931–1953)	154
Other derivatives of carbohydrate nature (1954–1977)	156
Carboxylic acids	159
Techniques and automated analysis	159
General techniques of carboxylic acid chromatography (1978–1990)	159
Automated analysis of carboxylic acids (1991–1994)	160
Lower carboxylic acids	160
Review (1995)	160
Applications (1996–2008)	160
Derivatives of lower carboxylic acids (2009–2015)	161
Higher carboxylic acids (2016–2037)	162
Derivatives of higher carboxylic acids (2038–2050)	163
Aliphatic hydroxy acids, di- and tricarboxylic acids	165
Reviews (2051–2052)	165
Techniques and automated analysis	165
General techniques (2053–2062)	165
Automated analysis (2063)	166
Applications	166
Synthetic applications (2064–2071)	166
Aliphatic hydroxy, di- and tricarboxylic acids in biological material (2072–2088)	166
Derivatives of aliphatic hydroxy acids, di- and tricarboxylic acids (2089–2090)	168
Ketoacids (2091–2101)	168
Cyclic acids	169

Contents

Techniques (2102–2110)	169
Applications	170
Synthetic applications (2111–2127)	170
Cyclic acids in biological material (2128–2149)	171
Derivatives of cyclic acids (2150–2180)	172
Prostaglandins (2181–2188)	175
Gibberelins (2189–2197)	175
Lipids	177
Reviews (2198–2208)	177
Techniques and automated analysis	178
General techniques (2209–2228)	178
Automated analysis of lipids (2229–2230)	179
Applications	179
Synthetic applications including oxidation products of lipids (2231–2239)	179
Lipids in biological material (2240–2269)	180
Glycolipids (2270–2280)	182
Lipopolysaccharides (2281–2294)	183
Cerebrosides and gangliosides (2295–2300)	184
Phospholipids (2301–2329)	184
Lipoproteins and proteolipids (2330–2357)	186
Waxes	188
Reviews (2358–2359)	188
Applications (2360–2370)	188
Compounds containing heterocyclic oxygen	190
Epoxides (2371–2374)	190
Furans (2375–2399)	190
Coumarins and isocoumarins (2400–2426)	192
Derivatives of γ -pyrone	194
Chromones (2427–2435)	194
Flavonoids	194
Review (2435a)	194
Techniques and automated analysis (2436–2439)	194
Synthetic applications (2440–2455)	195
Flavonoids in plants (2456–2500)	196
Xanthenes (2501–2509)	199
Anthocyanes (2510–2514)	199
Iridoides (2515–2520)	200
Aflatoxins and mycotoxins (2521–2534)	200
Cannabis constituents (2535–2541)	201
Various oxygen-containing heterocycles (2542–2570)	202
Steroids	205
Reviews and general techniques (2571–2573)	205
Estrogens	205
General techniques (2574–2578)	205
Applications	206
Synthetic applications (2579–2596)	206
Estrogens in biological material (including enzymic transformations) (2597–2623)	207
Androstanes	209
General techniques (2624–2626)	209
Applications	209
Synthetic applications (2627–2681)	209
Enzymic transformations of androstanes (2682–2684)	213
Androstanes in biological material (2685–2706)	213
Pregnanes	215

General techniques and automated analysis (2707–2718)	215
Applications	215
Synthetic applications (2719–2767)	215
Enzymic transformations of pregnanes (2768–2771)	219
Pregnanes in biological material (2772–2797)	219
Bile acids and other acids of steroid nature	221
General techniques (2798–2800)	221
Applications	221
Synthetic applications (2801–2802)	221
Bile acids and other acids of steroid nature in biological material (2803–2816)	221
Sterols	223
General techniques (2817–2821)	223
Applications	223
Synthetic applications (2822–2892)	223
Enzymic transformations of sterols (2893–2907)	228
Sterols in biological material (2908–2924)	229
Ecdysones and other insect steroid hormones (2925–2934)	230
Steroid glycosides and related compounds	232
Cardiac and other plant glycosides and their genins	232
Applications	232
Synthetic applications (2935–2951)	232
Cardiac and other plant glycosides in biological material (2952–2967)	233
Saponins and sapogenins	234
Applications	234
Synthetic applications (2968–2976)	234
Saponins and sapogenins in biological material (2977–2993)	235
Animal venoms of steroid nature (2994–3002)	236
Other steroid glycosides (3003–3005)	237
Terpenes	238
Monoterpenes	238
Applications	238
Synthetic applications (3006–3022)	238
Monoterpenes in biological material (3023–3031)	239
Sesquiterpenes	240
Applications	240
Synthetic applications (3032–3084)	240
Sesquiterpenes in biological material (3085–3143)	243
Lac acids and sesquiterpenic constituents of lac resins (3144–3150)	247
Diterpenes	247
General techniques (3151)	247
Applications	248
Synthetic applications (3152–3199)	248
Diterpenes in biological material (3200–3218)	251
Triterpenes	252
Review (3219)	252
Applications	252
Synthetic applications (3220–3250)	252
Triterpenes in biological material (3251–3297)	254
Natural acetylenic compounds (3298–3322)	258
Amines	260
Techniques and automated analysis	260
Automated analysis (3323–3325)	260
Other techniques (3326–3331)	260
Applications	261

Synthetic applications (3332–3353)	261
Amines in biological material (3354–3362)	262
Aliphatic polyamines and their derivatives (3363–3367)	263
Aliphatic amino alcohols, choline, sphingosine, sphingolipids and related compounds	263
General techniques (3368–3374)	263
Applications	264
Synthetic applications (3375–3381)	264
Aliphatic amino alcohols, choline and sphingosine in biological material (3382–3396)	264
Sphingolipids in biological material (3397–3406)	265
Tryptophan metabolites (3407–3416)	266
Sympathomimetic amines and related compounds	267
Techniques and automated analysis	267
Automated analysis (3417–3418)	267
Other techniques (3419–3422)	267
Applications (3423–3430)	268
Other non-heterocyclic nitrogen compounds	269
Urea and guanidine derivatives (3431–3439)	269
Hydrazones, oximes and related compounds (3440–3449)	269
Nitrosamines and N-halogenamines (3450–3452)	270
Azides and diazo compounds (3453–3461)	271
Aromatic hydrazo, azo and azoxy compounds (excluding dyes) (3462–3473)	271
Nitro compounds	272
Aliphatic and alicyclic nitro compounds (3474–3479)	272
Aromatic nitro compounds (3480–3503)	273
Amino acids	275
Reviews and books (3504–3505)	275
General techniques of amino acid chromatography (3506–3528)	275
Automated analysis of amino acid mixtures (3529–3583)	277
Identification of unusual amino acids in automated chromatography (3584–3617)	280
Applications (3618–3649)	283
Amino acid derivatives	286
Amino group derivatives of amino acids (3650–3674)	286
O-Substituted hydroxy amino acids (3675–3680)	288
Amino acid derivatives with a modified sulphur function (3681–3693)	288
Iodinated amino acids (3694–3702)	289
Metal complexes of amino acids (including EDTA) (3703–3729)	290
Other amino acid derivatives and unusual amino acids	292
Synthetic applications (3730–3780)	292
Other amino acid derivatives and unusual amino acids in biological material (3781–3834)	296
Peptides	300
General techniques (3835–3855)	300
Automated analysis (3856–3862)	301
Applications	302
Synthetic applications (3863–3924)	302
Peptides in microorganisms, plants and food products (3925–3934)	306
Peptides in animal material (3935–3956)	307
Elucidation of the primary structure of peptides and proteins	310
Review (3957)	310
Structural studies on bacterial and plant proteins (including cytochromes and ferredoxin) (3958–3992)	310
Structural studies on invertebrate proteins (3993–3998)	313
Structural studies on vertebrate proteins	313

Structural studies on proteins of blood, plasma, serum and blood cells (except hemoglobins)	313
Structure of immunoglobulins (3999–4084)	313
Fibrinopeptides and structure of clotting related proteins (4085–4099)	319
Structure of other proteins of blood (4100–4113)	320
Structural studies on structural proteins except contractile elements (4114–4165)	321
Structural studies on protamines, histones and other nuclear proteins (4166–4188)	325
Structural studies on chromoproteins and metalloproteins (4189–4239)	327
Structural studies on proteins of brain, cerebrospinal fluid and eyes (4240–4246)	330
Structural studies on proteins of muscle and meat products (for myoglobin see the chapter Chromoproteins and metalloproteins (5049–5138)) (4247–4265)	331
Structural studies on proteins in gland secrets (including proteinous hormones) (4266–4305)	332
Structural studies on milk proteins (4306–4318)	335
Structural studies on other proteins of animal origin (4319–4331)	336
Structural studies on enzymes	337
Structural studies on oxidoreductases (4332–4346)	337
Structural studies on transferases (4347–4367)	338
Structural studies on ribonucleases (4368–4378)	340
Structural studies on hydrolases (4379–4459)	340
Structural studies on lyases (4460–4476)	346
Structural studies on isomerases (4477–4480)	347
Structural studies on ligases (4481–4486)	347
Proteins	349
Reviews (4487–4493)	349
Techniques and automated analysis (4494–4506)	349
Applications	350
Proteins of cells and subcellular particles (except blood cells and platelets) (4507–4539)	350
Bacterial and plant proteins	353
Wheat proteins (4540–4562)	353
Enzymic inhibitors and related proteins of bacterial and plant origin (4563–4583)	354
Bacterial and plant toxins (4584–4614)	356
Metalloproteins and cytochromes of bacterial and plant origin (4615–4650)	358
Other proteins of bacterial and plant origin (including tissue cultures) (4651–4708)	360
Invertebrate proteins	365
Invertebrate hemoglobins (4709–4717)	365
Other proteins of invertebrates (4718–4735)	365
Vertebrate proteins	367
Proteins of blood, plasma, serum and blood cells (except hemoglobins)	367
Immunoglobulins (4736–4841)	367
Fibrinogen, fibrin, thrombin and clotting related proteins (4842–4873)	374
Specific binding proteins (4874–4902)	376
Proteins of erythrocytes and blood platelets (4903–4913)	378
Other proteins of blood (4914–4981)	379
Structural proteins (except contractile elements) (4982–4991)	383
Protamines, histones and other nuclear proteins (4992–5048)	384
Chromoproteins and metalloproteins	388
Hemoglobin (5049–5091)	388
Transferrin (5092–5104)	390
Myoglobin (5105–5114)	391
Cytochromes in vertebrates (5115–5132)	392

Ceruloplasmin (5133–5138)	394
Proteins of brain, cerebrospinal fluid and eyes (5139–5160)	394
Proteins of muscle and meat products (5161–5183)	396
Proteins of glands and gland products (except mammary gland)	397
Pepsinogen, trypsinogen, chymotrypsinogen, other zymogens and related inhibitors (5184–5213)	397
Snake venoms (5214–5226)	399
Other proteins of gland origin (5227–5242)	400
Milk proteins (5243–5276)	402
Peptidic and proteinous hormones	404
Pituitary hormones (5277–5319)	404
Calcitonins (5320–5334)	407
Thyroglobulins (5335–5346)	408
Other proteinous and peptidic hormones (5347–5379)	409
Other proteins of animal origin (5380–5433)	411
Enzymes	416
Techniques and automated analysis (5434–5437)	416
Oxidoreductases	416
Acting on the C–OH group of donors (E.C.1.1.-.-) from microbial and plant material (5438–5489)	416
Acting on the C–OH group of donors (E.C.1.1.-.-) from animal material (5490–5552)	420
Acting on the aldehyde or keto group of donors (E.C.1.2.-.-) (5553–5592)	425
Acting on CH–OH group of donors (E.C.1.3.-.-) (5593–5597)	427
Acting on the CH–NH ₂ group of donors (E.C.1.4.-.-) (5598–5619)	428
Acting on C–NH group of donors (E.C.1.5.-.-) (5620–5629)	429
Acting on reduced NAD or NADP as donor (E.C.1.6.-.-) (5630–5658)	430
Acting on other nitrogenous compounds as donors (E.C.1.7.-.-) (5659–5662)	432
Acting on sulphur groups of donors (E.C.1.8.-.-) (5663–5667)	433
Acting on haem groups of donors (E.C.1.9.-.-) (5668–5670)	433
Acting on diphenols and related substances as donors (E.C.1.10.-.-) (5671–5679)	433
Acting on H ₂ O ₂ as acceptor (E.C.1.11.-.-) (5680–5703)	434
Acting on hydrogen as donor (E.C.1.12.-.-) (5704)	436
Acting on single donors with incorporation of oxygen (oxygenases) (E.C.1.13.-.-) (5705–5718)	436
Acting on paired donors with incorporation of oxygen into one donor (hydroxylases) (E.C.1.14.-.-) (5719–5735)	437
Other and incompletely specified oxidoreductases (5736–5756)	438
Transferases	440
Transferring one carbon group (methyl-, hydroxymethyl-, formyl-, carbonyl-, carbamoyl-, amidino- and related transferases) (E.C.2.1.-.-) (5757–5785)	440
Transferring aldehydic or ketonic groups (E.C.2.2.-.-) (5786–5789)	442
Acyltransferases (acyl- and aminoacyltransferases) (E.C.2.3.-.-) (5790–5814)	442
Glycosyltransferases (hexosyl- and pentosyltransferases) (E.C.2.4.-.-) (5815–5863)	444
Transferring alkyl or related groups (E.C.2.5.-.-) (5864)	447
Transferring nitrogenous groups (aminotransferases, oximinotransferases) (E.C.2.6.-.-) (5865–5892)	443
Transferring phosphorus-containing groups (E.C.2.7.-.-) from microbial and plant material (5893–5966)	450
Transferring phosphorus-containing groups (E.C.2.7.-.-) from animal material (5967–6049)	455
Ribonucleases (6050–6115)	461
Transferring sulphur-containing groups (E.C.2.8.-.-) (6116–6130)	465
Other and incompletely specified transferases (6131–6133)	466

Hydrolases	466
Acting on ester bonds (E.C.3.1.-.-) from microbial and plant material (6134–6170)	466
Acting on ester bonds (E.C.3.1.-.-) from animal material (6171–6260)	469
Acting on glycosyl compounds (E.C.3.2.-.-) from microbial and plant material (6261–6354)	474
Acting on glycosyl compounds (E.C.3.2.-.-) from animal material (6355–6433)	480
Acting on peptide bonds (E.C.3.4.-.-) from microbial and plant sources (6434–6496)	485
Acting on peptide bonds (E.C.3.4.-.-) from gastrointestinal tract (6497–6529)	489
Acting on peptide bonds (E.C.3.4.-.-) from various animal tissues (6530–6593)	491
Acting on peptide bonds (E.C.3.4.-.-) from other sources (6594–6605)	496
Acting on C–N bonds other than peptide bonds (E.C.3.5.-.-) (6606–6660)	496
Acting on acid anhydride bonds (E.C.3.6.-.-) (6661–6687)	500
Acting on C–C bonds (E.C.3.7.-.-) and halide bonds (E.C.3.8.-.-) and other hydrolyses (6688–6706)	502
Nucleotidases, nucleosidases and deoxyribonucleases (6707–6752)	504
Lyases	507
Carbon–carbon lyases (E.C.4.1.-.-) (6753–6803)	507
Carbon–oxygen lyases (E.C.4.2.-.-) (6804–6853)	511
Carbon–nitrogen lyases (E.C.4.3.-.-) (6854–6871)	514
Other lyases (E.C.4.4.-.-, E.C.4.5.-.-, and E.C.4.99.-.-) (6872–6875)	515
Isomerases (E.C.5.-.-) (6876–6899)	516
Ligases	517
Forming C–O bonds (E.C.6.1.-.-) (6900–6950)	517
Forming C–S bonds (E.C.6.2.-.-) (6951–6963)	521
Forming C–N bonds (E.C.6.3.-.-) (6964–6971)	522
Forming C–C bonds (E.C.6.4.-.-) (6972–6981)	523
Uncompletely identified ligases (including E.C.6.5.-.-) (6982–6994)	524
Enzyme mixtures, materials with complex enzymic activity and enzyme complexes (6995–7040)	525
Uncompletely specified enzymes (7041–7099)	528
Chemically modified proteins and enzymes (7100–7120)	532
Nucleotides, nucleosides and nitrogenous constituents of nucleic acids	535
Reviews (7121–7122)	535
General techniques (7123–7165)	535
Automated analysis of nucleotide mixtures (7166–7171)	538
Applications	539
Synthetic applications (7172–7181)	539
Pyrimidine nucleotides and nucleosides (7182–7243)	539
Purine nucleotides and nucleosides (7244–7298)	544
Nucleotides and nucleosides containing other than pyrimidine and purine bases (7299–7305)	547
Products of chemical modification of naturally occurring nucleotides and nucleosides (7306–7329)	548
Amino acid nucleotide conjugates (7330–7333)	549
Nucleotides, nucleosides and nitrogenous constituents of nucleic acids in enzymic reactions (7334–7345)	550
Nucleotides and nucleosides in microorganisms and plants (7346–7367)	551
Nucleotides and nucleosides in animal material (7368–7398)	552
Nucleotides and nucleosides in food products (7399–7402)	554
Nucleotide polyphosphates	555
Techniques (7403–7409)	555
Applications	555

Synthetic applications (7410–7420)	555
Nucleotide polyphosphates in microorganisms and plants (7421–7430)	556
Nucleotide polyphosphates in animal material (7431–7449)	557
Oligonucleotides and their derivatives (7450–7488)	559
Polynucleotides (7489–7499)	561
Nucleic acids	563
Reviews and general techniques (7500–7506)	563
Isolation of nucleic acids from natural sources (7507–7536)	563
RNA	566
Techniques (7537–7560)	566
RNA in microorganisms (7561–7703)	567
RNA in plants (7704–7726)	578
RNA in animal material (7727–7794)	580
Structural studies on RNA (including total hydrolysates) (7795–7902)	584
DNA	592
Techniques (7903–7910)	592
DNA in microorganisms and tissue cultures (7911–7931)	592
DNA in plants and animal material (7932–7960)	594
Structural studies on DNA (including total hydrolysates) (7961–7993)	596
Chemically modified nucleic acids (7994–8005)	599
Nucleoproteins, viruses and bacteriophages (8006–8040)	601
Alkaloids	604
Alkaloids without heterocyclic nitrogen (aliphatic alkaloids, colchicine group) (8041–8049)	604
Pyridine alkaloids (8050–8054)	605
Quinoline and acridine alkaloids (8055–8060)	605
Isoquinoline alkaloids	606
Applications	606
Synthetic applications (8061–8085)	606
Isoquinoline alkaloids in biological material (8086–8100)	607
Alkaloids of papaveraceae	608
General techniques (8101–8108)	608
Applications	609
Synthetic applications (8109–8118)	609
Papaveraceae alkaloids in biological material (8119–8129)	610
Indole alkaloids (including harmaline alkaloids)	610
Applications	610
Synthetic applications (8130–8158)	610
Indole alkaloids in biological material (8159–8173)	612
Strychnine alkaloids (8174–8177)	613
Ergot alkaloids (8178–8185)	614
Pyrrolizidine alkaloids (8186–8197)	614
Indolizidine alkaloids (8198–8202)	615
Quinolizidine alkaloids (8203–8208)	616
Terpene alkaloids (8209–8211)	616
Steroidal alkaloids (8212–8225)	616
Peptide alkaloids (8226–8230)	617
Other alkaloid groups (8231–8249)	618
Compounds with heterocyclic nitrogen	620
Pyrroles	620
Porphyrines and metalloporphyrines	620
Review (8250)	620
General techniques (8251–8255)	620
Applications	620

Synthetic applications (8256–8278)	620
Biological applications (8279–8285)	622
Other pyrrole derivatives (8286–8300)	623
Pyrazoles (8301–8309)	624
Imidazoles (8310–8324)	624
Indoles	625
General techniques (8325–8328)	626
Applications	626
Synthetic applications (8329–8367)	626
Indoles in biological material (8368–8371)	629
Pyridines	629
General techniques (8372–8374)	629
Applications	629
Synthetic applications (8375–8399)	629
Other applications (8400–8403)	631
Quinolines and isoquinolines	631
General techniques (8404)	631
Applications	632
Synthetic applications (8405–8437)	632
Other applications (8438–8439)	634
Pyrrolizidines, indolizidines and quinolizidines (8440–8456)	634
Triazoles and tetrazoles (8457–8471)	635
Acridines and phenanthridines (8472–8476)	636
Other nitrogen-containing heterocyclic compounds (8477–8590)	637
Organic sulphur compounds (including selenium compounds, sulphides, sulphoxides)	645
Sulphones, sulphonium salts (8591–8629)	645
Sulphonic and sulphinic acids (8630–8640)	647
Sulphur-containing heterocyclic compounds (8641–8676)	648
Various sulphur compounds and complex mixtures (including elementary sulphur) (8677–8696)	651
Selenium compounds (8697–8698)	652
Heterocyclic compounds containing various heteroatoms	653
Heterocyclic compounds containing nitrogen and oxygen as heteroatoms (8699–8722)	653
Heterocyclic compounds containing nitrogen and sulphur as heteroatoms (8723–8760)	654
Heterocyclic compounds containing other combinations of heteroatoms (8761–8766)	657
Organic phosphorus compounds	658
General techniques (8767–8769)	658
Applications	658
Synthetic applications (8770–8793)	658
Organic phosphorus compounds in biological material (8794–8801)	660
Organometallic and coordination compounds	661
Organometallic compounds (8802–8814)	661
Metallocenes (excluding ferrocenes) (8815–8836)	662
Ferrocenes (8837–8865)	663
Metal carbonyls (8866–8884)	665
Coordination compounds	667
Review (8885)	667
Synthetic applications (8886–8950)	667
Vitamins	672
Fat soluble vitamins	672
Vitamin A group	672
General techniques (8951–8957)	672
Applications (8958–8985)	672
Calciferols	674

General techniques (8986–8990)	674
Applications (8991–8996)	675
Tocopherol group (8997–9001)	675
Water-soluble vitamins	676
Thiamine (9002–9013)	676
Riboflavin and other flavins (9014–9024)	677
Nicotinic acid and its derivatives (9025–9041)	677
Pyridoxine group (9042–9048)	679
Biotin group (9049–9055)	679
Pantothenic acid and coenzyme A (9056–9070)	680
Folic acid and other pteridine derivatives (9071–9086)	681
Cobalamin group (9087–9096)	682
Various growth factors and complex mixtures of vitamins (9097–9107)	683
Antibiotics	685
General techniques (9108)	685
Penicillins and cephalosporins (9109–9116)	685
Carbohydrate antibiotics (9117–9158)	685
Macrocyclic antibiotics (including erythromycine and macrolide antibiotics) (9159–9166)	688
Tetracyclins (9167–9185)	689
Terpene antibiotics (9186–9187)	690
Nucleotide and nucleoside antibiotics (including polyoxins) (9188–9202)	690
Peptide and amino acid antibiotics (including actinomycins) (9203–9229)	692
Other antibiotics (9230–9271)	694
Pesticides	697
Review (9272)	697
General techniques (9273–9274)	697
Natural insecticides (9275–9284)	697
Chlorinated pesticides (9285–9308)	698
Phosphorus pesticides (9309–9328)	700
Carbamate pesticides (9329–9340)	701
Herbicides (9341–9346)	702
Dyes and pigments	703
Reviews (9347–9349)	703
General techniques (9350–9358)	703
Applications	704
Synthetic applications (9359–9365)	704
Food dyes (9366–9379)	704
Plant pigments (chloroplast pigments etc.) (9380–9388)	705
Dyes and pigments in other biological material (9289–9404)	706
Fluorescent and coloured materials from various sources (9405–9411)	707
Plastics	709
Reviews (9412–9415)	709
General techniques (9416–9441)	709
Plasticizers (9442–9445)	711
Polyethylene and related plastics (9446–9454)	711
Polystyrene, polyisoprene, polybutadiene and related compounds (9455–9468)	712
Polyoxymethylenes, polyoxyethylenes and related compounds (9469–9474)	713
Polyesters and polyamides (9475–9484)	714
Various plastic materials (9485–9493)	715
Applications in pharmacology and toxicology	716
Reviews (9494–9497)	716
Synthetic applications in drug chemistry (9498–9521)	716
Drug analysis and drug mixtures (9522–9567)	718
Metabolism of drugs (9568–9591)	721

Plant extracts and their application in pharmacology (9592–9612)	723
Inorganic compounds	725
Reviews (9613–9623)	725
Cations	725
Sorption and ion-exchange behaviour of cations (9624–9661)	725
General techniques (9662–9678)	728
Analytical groups I and IIa (Ag, Bi, Cd, Cu, Hg, Pb, Pd, Te) (9679–9691)	729
Analytical group IIb (As, Mo, Sb, Se, Sn, Tc, Te, V, W) (9692–9709)	730
Platinum metals and gold (9710–9721)	732
Analytical group III (Al, Be, Co, Cr, Fe, Ga, Mn, Nb, Ni, Ta, Th, Ti, Zn, Zr)	733
General techniques (9722–9766)	733
Various applications of chromatography of the third analytical group elements (9767–9777)	736
Uranium, transuranium elements, protactinium and actinides (9778–9819)	737
Rare earths (9820–9874)	740
Analytical group IV (alkaline earths) (9875–9894)	744
Analytical group V (alkali metals) (9895–9923)	745
Mixtures of cations of different groups (9924–9955)	747
Application to silicate analysis (9956–9961)	750
Systematic analysis of cations (9962)	750
Anions	750
Inorganic sulphur-containing anions (9963–9966)	750
Halides (9967–9973)	751
Inorganic phosphorus compounds (9974–9988)	751
Other anions and mixtures of anions of various groups (9989–10005)	752
Radioactive substances	755
Review (10006)	755
General techniques and automated analysis (10007–10012)	755
Applications	756
Activation analysis (10013–10032)	756
Biological applications (10033–10041)	757
Applications to inorganic chemistry (10042–10066)	758
Miscellaneous compounds and complex mixtures	761
Surfactants and detergents (10067–10079)	761
Antioxidants and preservatives (10080–10083)	762
Cells and subcellular particles (10084–10134)	762
Complex mixtures and unidentified compounds (10135–10182)	766
AUTHOR INDEX	771
LIST OF COMPOUNDS CHROMATOGRAPHED	931
