

# CONTENTS

Introduction .....	1
Bibliography organization .....	3
<b>BIBLIOGRAPHY OF RESEARCH LITERATURE</b>	
Classification and subject content of sections .....	5
I. History and microbiology .....	5
II. Preparation of native dextrans in growing cultures .....	15
III. Enzymatic synthesis .....	17
IV. Enzymatic degradation of dextrans and of isomaltose and its oligomers .....	29
V. Production of clinical sized dextran .....	38
VI. $\alpha$ -1,6-Glucans: stereospecific chemical synthesis and comparison with bacterial dextrans .....	49
VII. Structural analysis of dextrans .....	49
VIII. The constituent di- and oligosaccharide structural units of dextrans: isomaltose (6-O- $\alpha$ -D-glucopyranosyl-D-glucose) and its oligomers .....	57
IX. The constituent disaccharide structural units of dextrans: nigerose or sakebiose (3-O- $\alpha$ -D-glucopyranosyl-D-glucose) and kojibiose (2-O- $\alpha$ -D-glucopyranosyl-D-glucose) .....	70
X. Properties of native dextrans .....	73
XI. Chemical and physical properties of clinical sized and other dextrans having molecular weight lower than native dextrans .....	85
XII. Analytical methods and measurements .....	94
XIII. Dextran in analysis, separation, and concentration of other substances .....	100
XIV. Derivatives other than sulfates .....	104
XV. Dextran sulfates .....	122
XVI. Dextran, isomaltooligosaccharides, and dextran derivatives covalently bonded (coupled) to enzymes, nucleic acids, proteins, peptides, and the like .....	135
XVII. Action of dextran on other macromolecules in solution, blood components, and thymus and tumor cells .....	138
XVIII. Structurally related interaction of dextrans with concanavalin A and other lectins .....	150
XIX. Immunology and related topics .....	155
XX. Metabolism and distribution in the body .....	180
XXI. Physiological properties .....	193
XXII. Representative clinical uses .....	200
XXIII. Dextrans and associated aspects in dental caries .....	204
XXIV. Industrial uses .....	216
XXV. Books and general reviews .....	224
XXVI. Addenda .....	226
Index of authors of research literature .....	229
<b>BIBLIOGRAPHY OF PATENTS</b>	
Order of arrangement and definitions .....	274
Classification and subject content of sections .....	275
XXVII. Production of native dextrans in growing cultures .....	275
XXVIII. Enzymatic synthesis of native and clinical sized dextrans .....	277
XXIX. Enzymatic degradation .....	279
XXX. Nonenzymatic methods for production of dextrans in the clinical, intermediate, and low-molecular sized ranges .....	286
XXXI. Special procedures for purifying and stabilizing clinical dextrans and their solutions .....	295
XXXII. Industrial uses .....	297
XXXIII. Food uses of dextrans and their derivatives .....	306
XXXIV. Pharmaceutical applications of dextrans and their derivatives .....	309
XXXV. Production and industrial uses of dextran derivatives .....	333
Index of patentees .....	348
Index of assignees .....	362
Acknowledgments .....	368
