

CONTENTS

1. The Intellectual Basis of specialization: Geochemistry in America	1
2. Synthetic Petroleum from high-pressure Coal Hydrogenation	21
3. From Unit Operations to unit Processes: Ambiguities of success and Failure in Chemical - Engineering	43
4. Will milk Make Them Grow? An Episode in the Discovery of the Vitamins	61
5. Charles Holmes Hearty and the Effort to Establish an Institute for Drug Research in Post world- War I America	85
6. Sulfanilamide and Diethylene Glycol	105
7. The Establishment of synthetic Food color Regulation in the United States	127
8. The Uric acid Fetish: Chemistry and Deviant Dietetics	147
9. Chemical Warfare Research during World War I: A Model of Cooperative Research	165
Appendix	187
Index	195
