

CONTENTS

I. Representation of Data by Tables	1
II. Representation of Data by Graphs	29
III. Representation of Data by Equations	56
IV. Tabular and Graphical Differentiation and Integration	85
V. Fourier Series	107
VI. The Normal Frequency Distribution	146
VII. The Normal Frequency distribution	166
VIII. Means and Precision Indexes of Unequally Weighted Measurements	189
IX. The Propagation of Precision Indexes	205
X. The Adjustment of conditioned Measurements	216
XI. Least-Squares Equations Representing Observed Data	238
XII. Correlation	270
XIII. The Analysis of Non-Harmonic Periodic Functions	294
Appendix	309
Index	339
