

CONTENTS

1. The Importance of Statistics	3
2. Data-The Raw Material of Statistics	11
3. Collection and Sources of Data	21
4. Statistical Presentation: Tables	34
5. Statistical Presentation: Line Graphs	43
6. Statistical Presentation: Geometric Forms, Pictures, and Maps	68
7. Ratios	93
8. The Frequency Distribution	99
9. Graphic Presentation of Frequency Distributions	121
10. Measurement of Masses: Averages: The Arithmetic Mean	133
11. Measurement of Masses: Averages: The Median: The Mode; The Geometric Mean	150
12. Measurement of Masses: Comparison of the Principal Averages	172
13. Measurement of Masses: Variation, Skews, Kurtosis	183
14. Introduction to Sampling	222
15. Introduction to Time-Series Analysis	244
16. Trend	259
17. Seasonal Variations	291
18. Cyclical and Irregular Variations; Forecasting	308
19. Index Numbers	322
20. Current Indexes	349
21. Introduction to Correlation	370
22. Misuses of Statistics	401
Appendixes	421
Index	503
