

CONTENTS

Part I. Introduction to Energy Technology

Chapter 1. energy Supplies and Sources	2
Chapter 2. Energy Demand and Consumption	36
Chapter 3. Energy Terminology	70

Part II. Introduction to Nonrenewable Energy Resources

Chapter 4. Coal Resources	106
Chapter 5. Petroleum Resources	132
Chapter 6. Natural Gas Resources	178
Chapter 7. Nuclear Energy Resources	208

Part III. Introduction to Nondepletable and Renewable Energy Resources

Chapter 8. Solar Energy Resources	269
Chapter 9. Indirect Solar Energy Resources	316

Part IV. Introduction to Energy Utilization

Chapter 10. Energy Conversion, Storage, and Conservation	363
Appendix A-English and Metric	422
Appendix B- Major electrical Uses and Demand in Your House	425
Appendix C- Metric Decimal	425
Appendix D- Fuel and Energy Equivalent	426
Appendix E-Specific Heats and Heat Capacity of Materials	426
Appendix F-Maximum Annual Collector Performance	427
Appendix G-Solar Energy Data	427
Appendix H-solar Energy conversions	428
Appendix I-Radiation Exposure in the United States	428
Appendix J-Exponential growth	429
Appendix K-Exponential Growth	429
Appendix L-Energy Content of Fuels	430
Appendix M-Energy Requirements for Passenger Transportaion	431
Appendix N-Energy Units	432
Appendix O-Power Units	433
Appendix P-Annual Yields from a Barrel of Crude Oil	434
Appendix Q-Mathematical Summary	435
Bibliography	437
Glossary	438
Index	452
