

## CONTENTS

Chapter 1. The Chemical Industry: Its Present and Future Prospects	1
Chapter 2. Principles of Economic Evaluation	35
Chapter 3. Expanded Economic Evaluation Equations	89
Chapter 4. Special Mathematical Techniques	149
Chapter 5. Notes on Cost Estimation	213
Chapter 6. Risk, Return Rate, and Investment Recovery	259
Chapter 7. Overall Considerations in Project Analysis	289
Chapter 8. Process Plant Components	349
Appendix A. Summation of Time Series	435
Appendix B. Inflation	445
Appendix C. Rapid Approximation Methods for the Design of Chemical- Process Equipment	451
Index	489
