

Table of Contents

Patent Practices (Teaching Material)

1.	General Principles of Patent and Necessity for Protection	3
1.1	General Principles of Patent	9
1.2	Necessity for Protection	11
2.	Outline of Patent Procedure	15
2.1	Subject matters to be protected by Patent	23
	A) Invention	23
	B) Industrial Design	23
2.2	Kind of Patent	27
	A) Patent	27
	B) Petty patent	27
2.3	Overlook of the Patent Procedure (see Fig. 2)	31
3.	Preparation of Patent Application	41
3.1	Check points for the better specification:	47
	3.1.1 In General	47
	3.1.2 Applicant	49
	3.1.3 Necessary documents for patent application	53
3.2	Request	55
3.3	Specification	61
	3.3.1 The Title of the Invention	63
	3.3.2 The Statement of the Invention's Nature and Purposes	65
	3.3.3 The Technical Field to which the Invention Relates	65
	3.3.4 The Related Background Art	65
	3.3.5 The Summary of the Invention	69
	3.3.6 The Brief Explanation of the Drawings, if any	69
	3.3.7 The Best Mode of the Invention	69
	3.3.8 The Industrial Applicability	73

3.4	One or more clear and concise claims	73
3.5	Drawings	83
3.6	Abstract	83
4.	Examination of Application	85
5.	Basic Requirement of Patent Application and Response to Office Action	93
5.1	General View of the Examination of the Basic Requirement	99
5.1.1	R22-Clause 2 (1)	101
5.1.2	R22-Clause 2 (2)	101
5.1.3	R22-Clause 2 (3)	103
5.1.4	R22-Clause 2 (4)	103
5.1.5	R22-Clause 2 (5)	105
5.2	Response to the Official Action	107
5.2.1	Amendment of the application	107
5.2.2	Appeal against the decision made by the Director-General	109
5.2.3	Bringing the case to the Intellectual Property and International Trade Court	111
5.2.4	Answering/Amendment to the Director-General's request	111
5.2.5	Answering wherein agreement has reached	111
6.	Opposition procedure and Response thereto	113
6.1	General View of the Examination of Opposition	119
6.2	An opposition document including a statement explaining the reason of opposition	123
6.3	Response by the applicant in the opposition procedure	125
6.3.1	Response to the competent officer's opinion that the opposing party is entitled to a patent	125
6.3.2	Response to the competent officer's opinion that the claimed invention does not comply with the requirement stipulated in Sections 5, 9 and 14	125
7.	Request for examination and Substantive Examination of the Patent Application	139
8.	Grant of Patent	151

9. Necessity of Foreign Patent Filing/Application/Filing and Timing/Procedure for Application (Paris Convention and Patent Corporation Treaty)	159
9.1 Paris Convention Route	165
9.2 Patent Cooperation Treaty/ Route	167
10. General Principles of Industrial Design	171
10.1 Overlook of the Industrial Design procedure	179
10.2 Design Patent Application	183
10.2.1 A request	185
10.2.2 Claim	185
10.2.3 An explanation sheet	187
10.2.4 Photographs or drawings	187
10.3 Examination of application for a design patent	191
10.3.1 Basic Requirement of an Application for a Design Patent	191
10.3.2 Opposition Procedure	191
10.3.3 Substantive Examination of the design application	193
11. General Principles of Petty Patent	195
11.1 Overlook of the Petty Patent Procedure	203
11.2 An application for a petty patent	203
11.3 Examinatton of Application	205
11.3.1 Basic Requirement of Petty Patent Application add. Response to Official Action	205
11.3.2 Post Grant Examination on Substance of Petty Patent and Response to Official Action	207
12. Classification of applications for a patent. petty patent. or design	209
12.1 Patent Classification	215
12.1.1 International Patent Classification	215
12.1.2 Introduction of the IPC	217
12.2 Design Classification	221
13. Classification of Patent Information	223
13.1 Types of Information	227
13.2 Kinds of Information	227

14. Access to Original Copy	229
14.1 Obtaining the reference documents	233
14.2 File Wrapper	235
15. Communication with Competent Officer	237
16. Help in Examination on the Substance of the Application for a Patent.	
a Petty Patent. and Industrial Design	245
16.1 Application based on the Corresponding Foreign Application	251
16.2 Examination by the external entities entrusted (not the DIP)	
of the applications	253
