Foreword	iii
METHODOLOGY	
Summary	1
Why is a management system needed?	3
Safety, Health and Environment (SHE) as an integrated system	4
The relationship between SHE and quality	5
Structure of the SHE management system	6
Developing the SHE management system	8
Implementing the SHE management system	10
Keeping the SHE management system running	11
Independent audit and certification/registration	12
How to use the procedures	13
Model company for the procedures	14
PROCEDURES	
0. SHE management system, general	17
1. SHE policy	19
2. Organization and management	20
2.1 Organization	20
2.2 SHE objectives and action plans	23
2.3 Management review	24
3. Legislation and permits	26
3.1 SHE legislation	26
3.2 SHE permits	28
4. General SHE information	30
4.1 SHE effects/impacts	30
4.2 SHE reporting	32
5. Personnel, training and communication	34
5.1 Health care	34
5.2 Training	36

5.3	Internal communication	40
5.4	External communication	41
6.	Purchasing	43
6.1	Purchasing	43
7.	Operations and maintenance	46
7.1	General site rules	46
7.2	Instructions	48
7.3	Plant integrity and maintenance	50
7.4	Work permits	55
7.5	Contractors	64
7.6	Handling of chemical products	66
7.7	Handling of wastes	68
7.8	Soil and groundwater protection	71
7.9	Non-process hazards	73
7.10	Management of change	74
7.11	Process safety (SHE) information	79
8.	Engineering and projects	81
8.1	Engineering standards	81
8.2	Investment projects	82
8.3	Manufacturing methods/R&D work/scale-up	86
8.4	Technology sale	89
9.	Auditing and inspection	90
9.1	SHE audits	90
9.2	Risk analysis	92
9.3	SHE rounds	94
9.4	Occupational health	96
9.5	Environmental control	98
10.	Emergency response	101
10.1	Emergency response	101
10.2	Fire protection	103
11.	Accidents, incidents and disturbances	107
11.1	Actions in the case of accidents, incidents and disturbances	107
11.2	Investigation and reporting of accidents, incidents and disturbances	108
12.	Transport	110
12.1	Transport	110
13.	Product control	112
13.1	Product control	112
