

**CONTENT**

**Page**

**THE ACCIDENT**

1. Description of the Accident	2
2. Thermal Hydraulic Features of the Accident	26
3. Fission Product Behavior	45
4. Assessment of Thermal Damage to Polymeric Materials by Hydrogen Deflagration in the Reactor Building	60
5. Core Damage	87

**THE CHEMISTRY**

6. Water Chemistry	108
7. Adherent Activity on Internal Surfaces	124
8. Core Debris Chemistry and Fission Product Behavior	146
9. Reactor Building Source Term Measurements	168
10. Iodine Chemistry	193

**THE CLEANUP**

11. Development of the Flowsheet Used for Decontaminating High-Activity-Level Water	212
12. Water Cleanup Systems	228
13. Defueling Filter Test	239
14. Cleanup of Demineralizer Resins	250
15. The Recovery: A Status Report	267
16. Impact on Future Licensing	275
Author Index	288
