

CONTENTS

1. Introduction	1
<b>Part I Analytical methods</b>	<b>13</b>
2. Risk analysis	15
3. Analytical methods: quality control and selection	37
4. Molecular imprint-based sensors in contaminant analysis	71
5. Bioassays in contaminant analysis	91
<b>Part II Particular contaminants</b>	<b>107</b>
6. Veterinary drug residues	109
7. Inorganic contaminants in food	148
8. Environmental organic contaminants in food	169
9. Chemical migration from food packaging	193
10. Pesticides	218
11. Mycotoxins	238
<b>Part III Regulation</b>	<b>261</b>
12. The international regulation of chemical contaminants in food	263
13. The regulation of chemical contaminants in foodstuffs in the European Union	279
14. Contaminant regulation and management in the United States: the case of Pesticides	295
