

CONTENTS

1. Food Safety Assessment: Introduction	2
2. History of Food Safety Assessment: From Ancient Egypt to Ancient Washington	8
3. What Is Safe Food	26
4. Risk-Benefit Perception	36
5. Toxicological Evaluation of Genetically Engineered Plant Pesticides	41
6. Evaluating Pesticide Residues and Food Safety	48
7. Liver Cell Short-Term Tests for Food-Borne Carcinogens	60
8. Bacterial Test Systems for Mutagenesis Testing	73
9. Current Trends in Animal Safety Testing	88
10. Acute and Chronic Toxicity Testing in the Assessment	99
11. Usefulness of Clinical Studies in Establishing Safety of Food Products	105
12. Good Laboratory Practice Regulations: The Need for Compliance	114
13. Importance of the Hazard Analysis and Critical Control Point System in Food Safety Evaluation and Planning	120
14. Threshold of Regulation: Options for Handling Minimal Risk Situations	132
15. Food Ingredient Safety Evaluation: Guidelines from the U.S. Food and Drug Administration	149
16. A Flavor Priority Ranking System: Acceptance and Internationalization	149
17. Expert Systems and Neural Networks in Food Processing	166
18. Predicting Chemical Mutagenicity by Using Quantitative Structure-Activity Relationships	181
19. Hazard Expert: An Expert System for Predicting Chemical Toxicity	191
20. Using the Menu Census Survey to Estimate Dietary Intake	201
21. Dietary Exposure Assessment in the Analysis of Risk from Pesticides in Foods	214
22. Current Concerns in Food Safety	232
23. High-Technology Approaches to Microbial Safety in Foods with Extended Shelf Life	243
24. Predictive Microbiology	250
25. Mycotoxins in Foods and Their Safety Ramifications	261
26. Diet-Health Relationship	278
27. Diet and Carcinogenesis	297
28. Food Allergies	316
29. Chemical Safety of Irradiated Foods	332
30. Safety Issues with Antioxidants in Foods	346
31. Safety and Regulatory Status of Food, Drug, and Cosmetic Color Additives	377
32. Safety Evaluation of Olestra	391
33. Nitrate, Nitrite, and N-Nitroso Compounds	400

34. Ethyl Carbonate in Alcoholic Beverages and Fermented Foods	419
35. Composition and Safety Evaluation of Potato Berries, Potato and Tomato Seeds, Potatoes, and Potato Alkaloids	429
