<i>Contributor contact details</i>	xiii
<i>Introduction</i>	xvii
1 Bacterial infection of eggs	1
<i>R. K. Gast, United States Department of Agriculture, Agricultural Research Service, USA</i>	
1.1 Introduction	1
1.2 Routes of transmission of <i>Salmonella</i> into poultry flocks and eggs	2
1.3 Characteristics of <i>Salmonella</i> contamination of eggs	6
1.4 Future trends	10
1.5 Sources of further information and advice	12
1.6 References	13
2 Bacterial contamination of poultry as a risk to human health .	21
<i>N. A. Cox, L. J. Richardson, J. S. Bailey, D. E. Cosby, J. A. Cason and M. T. Musgrove, Russell Research Center, USA and G. C. Mead, Consultant, UK</i>	
2.1 Introduction	21
2.2 Foodborne human pathogens associated with poultry	21
2.3 Colonization of the live bird	30
2.4 <i>Salmonella</i> and <i>Campylobacter</i> in poultry production	31
2.5 Other pathogens	33
2.6 Possible control strategies	33
2.7 Future trends	34
2.8 References	35

3	Detecting and controlling veterinary drug residues in poultry	44
	<i>V. Hagren, P. Peippo and T. Lövgren, University of Turku, Finland</i>	
3.1	Introduction	44
3.2	Sample preparation techniques	45
3.3	Analytical methods for drug residues	48
3.4	Improving control of veterinary drug residues	66
3.5	Future trends	68
3.6	References	69
4	Modelling risks from antibiotic and other residues in poultry and eggs	83
	<i>D. J. Donoghue, University of Arkansas, USA</i>	
4.1	Introduction	83
4.2	Mechanism of transfer	84
4.3	Establishment of safety tolerances for residues	86
4.4	Modelling and predicting levels of residue transfer	87
4.5	Implications for effective control	95
4.6	Future trends	95
4.7	Sources of further information and advice	96
4.8	References	96
5	Pathogen populations on poultry farms	101
	<i>R. H. Davies, Veterinary Laboratories Agency, UK</i>	
5.1	Introduction	101
5.2	Foodborne pathogens in poultry and their significance	102
5.3	The prevalence of pathogens on poultry farms	103
5.4	Sources of infection	110
5.5	Sampling techniques	118
5.6	Control of <i>Salmonella</i>	120
5.7	Control of <i>Campylobacter</i>	129
5.8	Future trends	132
5.9	Sources of further information and advice	134
5.10	References	135
6	Catching, transporting and lairage of live poultry	153
	<i>D. B. Tinker and C. H. Burton, Silsoe Research Institute, UK, and V. M. Allen, University of Bristol, UK</i>	
6.1	Introduction	153
6.2	Improving catching and transport systems	154
6.3	Improving sanitation of transport systems	158
6.4	Pre-slaughter lairage systems	166
6.5	Future trends	167
6.6	Sources of further information and advice	170
6.7	References	171
6.8	Acknowledgements	173

7 Ensuring the safety of poultry feed	174
<i>S. C. Ricke, Texas A&M University, USA</i>	
7.1 Introduction	174
7.2 Incidence of toxigenic fungi and foodborne bacterial pathogens	175
7.3 Decontamination treatments for feed	179
7.4 Safe management of feed production	184
7.5 Future trends	186
7.6 Sources of further information and advice	187
7.7 References	187
7.8 Acknowledgements	194
8 The effective control of <i>Salmonella</i> in Swedish poultry	195
<i>S. Sternberg Lewerin, S. Boqvist, B. Engström and P. Häggblom, National Veterinary Institute, Sweden</i>	
8.1 Introduction	195
8.2 Poultry production in Sweden	195
8.3 The comprehensive control programme	196
8.4 Legal basis for the control of <i>Salmonella</i>	197
8.5 Critical points in the supply chain	198
8.6 Control of <i>Salmonella</i> in poultry feed	200
8.7 Animal husbandry	203
8.8 Breeder birds	206
8.9 Hatchery	206
8.10 Dealing with infections in poultry houses	207
8.11 Dealing with <i>Salmonella</i> -infected flocks	207
8.12 Control of <i>Salmonella</i> at slaughter	209
8.13 Conclusions	210
8.14 Future trends	211
8.15 References	212
9 The use of probiotics to control foodborne pathogens in poultry	216
<i>G. C. Mead, Consultant, UK</i>	
9.1 Introduction	216
9.2 Native microflora of the alimentary tract	217
9.3 Use of probiotic organisms	224
9.4 Use of probiotics to control foodborne pathogens	227
9.5 Future trends	231
9.6 Sources of further information	231
9.7 References	231

- 10 The HACCP concept and its application in primary production** 237
 - D. J. MacDonald, Consultant, Germany*
 - 10.1 Introduction 237
 - 10.2 Risk 238
 - 10.3 Difficulties in implementing HACCP principles 238
 - 10.4 Why should HACCP be applied to primary production? 242
 - 10.5 Key food hazards and risks on the farm 243
 - 10.6 Genetically modified organisms (GMOs) 247
 - 10.7 Allergens 248
 - 10.8 HACCP in a farm setting 248
 - 10.9 HACCP in a poultry unit 252
 - 10.10 Future trends 253
 - 10.11 References and further reading 254

- 11 Microbial risk assessment in poultry production and processing** 255
 - L. Kelly, University of Strathclyde, UK*
 - 11.1 Introduction 255
 - 11.2 The methodology of MRA 256
 - 11.3 MRAs for *Salmonella* and *Campylobacter* 266
 - 11.4 Future trends 269
 - 11.5 Sources of further information and advice 269

 - 12.4 Egg safety from production to consumption: an action plan to eliminate salmonellosis due to SE contamination of eggs 280
 - 12.5 Rapid cooling 282
 - 12.6 Pasteurization technologies 284
 - 12.7 Future trends 302
 - 12.8 References 303

- 13 Improving slaughter and processing technologies** 310
 - J. A. Byrd, United States Department of Agriculture, ARS – Southern Plains Research Center, and USA and S. R. McKee, Auburn University, USA*
 - 13.1 Introduction 310
 - 13.2 Contamination risks during slaughter and evisceration of poultry 310

13.3	Improved technologies to prevent contamination	316
13.4	Acid treatment of ready-to-eat products	325
13.5	Future trends	326
13.6	References	327
14	Refrigeration and the safety of poultry meat	333
	<i>S. J. James, University of Bristol, UK</i>	
14.1	Introduction	333
14.2	Effects of low temperature on microbial survival and growth	333
14.3	Refrigeration mechanisms and technologies	335
14.4	The cold chain	338
14.5	Improving control in the cold chain	355
14.6	Future trends	355
14.7	Sources of further information and advice	356
14.8	References	356
15	Sanitation in poultry processing	360
	<i>J. W. Arnold, Russell Research Center, USA</i>	
15.1	Introduction	360
15.2	Sanitation programs	361
15.3	Sanitation technologies	362
15.4	Sanitation operations	371
15.5	Assessment of effectiveness	373
15.6	Future trends	374
15.7	Sources of further information and advice	375
15.8	References	376
16	HACCP in poultry processing	380
	<i>P. A. Curtis, Auburn University, USA</i>	
16.1	Introduction	380
16.2	Preliminary tasks	381
16.3	Assembling the HACCP team	381
16.4	Describing the food and its distribution	382
16.5	The intended use and consumption of the food	382
16.6	Developing a flow diagram that describes the process	382
16.7	HACCP principles	383
16.8	Enforcement	388
16.9	Imports and exports	390
16.10	Future trends	390
16.11	Sources of further information and advice	391
16.12	References	392
17	On-line physical methods for decontaminating poultry meat ..	393
	<i>C. James, University of Bristol, UK</i>	
17.1	Introduction	393

17.2	Steam	394
17.3	Hot water	397
17.4	Dry heat	399
17.5	UV light	400
17.6	Microwaves	401
17.7	Ultrasound	403
