

CONTENTS

	Page No.
1. INTRODUCTION	1
1.1 Why challenge test	1
1.2 Information that can be derived from challenge testing	2
1.3 Safety measures to be observed during challenge testing	3
2. CHALLENGE TESTING PROCEDURE	4
2.1 Scope of the challenge test	5
2.2 Product characteristics	5
2.2.1 Product pH	6
2.2.2 Water activity (A_w)	6
2.2.3 Heat treatment	6
2.2.4 Packaging	7
2.3 Choice of organisms	10
2.4 Choice of strain	10
2.4.1 Pathogens	11
2.4.2 Spoilage organisms	11
2.5 Experimental matrix	12
2.5.1 Number of batches of product	12
2.5.2 Sampling frequency during the challenge test and number of replicate samples	13
2.6 Culture maintenance and preparation	13
2.6.1 Maintenance of cultures	13
2.6.2 Adaptation of cultures	14
2.6.3 Preparation of inoculum	14
2.6.4 Concentration of the inoculum	15
2.7 Inoculation of product and maintenance of sample integrity	16
2.8 Storage conditions	17
2.8.1 Chilled storage	17
2.8.2 Ambient storage	18

2.9	Product analysis	18
2.10	Calculation and interpretation of results	19
2.11	Controls to be included in challenge tests	22
3.	USE OF PREDICTIVE MICROBIOLOGY AS A CHALLENGE TEST TOOL	23
APPENDICES		
I.	CHALLENGE TESTING ACID PRESERVED FOODS ACCORDING TO THE CIMSCEE CODE	25
II.	CHALLENGE TESTING WITH PSYCHROTROPHIC <i>C. BOTULINUM</i>	29
III.	SHELF LIFE STUDIES IN ACCORDANCE WITH EU REGULATION 073/2005 ON MICROBIOLOGICAL CRITERIA FOR FOODSTUFFS	32
	REFERENCES AND FURTHER READING	42
	GLOSSARY OF TERMS	43
