<b>1</b>	<b>Basic Clandestine Drug Manufacture</b>	<b>1</b>
1.1	Lab Operators	2
1.2	Manufacturing Processes	4
1.2.1	Extraction Process	5
1.2.2	Conversion Process	6
1.2.3	Synthesis Process	7
1.2.4	Tableting	8
1.2.5	Combination Labs	9
1.3	The Needs Triangle	9
1.3.1	Equipment Needs	10
1.3.1.1	Reflux	10
1.3.1.2	Distillation	13
1.3.1.3	Hydrogenation	14
1.3.1.4	Bucket Chemistry	14
1.3.1.5	Extractions	15
1.3.2	Chemical Needs	18
1.3.3	Knowledge Needs	20
1.4	Summary	22
<b>2</b>	<b>Clandestine Lab Hazards</b>	<b>23</b>
2.1	General Hazards	23
2.1.1	Little Training	23
2.1.2	Makeshift Operations	26
2.1.3	No Two Labs Are Alike	27
2.2	Hazard Priority	27
2.2.1	Explosion	27
2.2.2	Fire	30
2.2.3	Firearms	32
2.2.4	Exposure	32
2.2.4.1	Chemical Hazards	35
2.2.4.2	Physical Hazards	40

2.3	Hazard Abatement	45
2.4	Summary	49
<b>3</b>	<b>Basic Toxicology</b>	<b>51</b>
3.1	Entry Routes	51
3.1.1	Inhalation	52
3.1.2	Dermal Absorption	54
3.1.3	Ingestion	56
3.2	Modes of Action	57
3.3	Influences on Toxicity	58
3.3.1	Length of Exposure	58
3.3.2	Degree of Exposure	59
3.3.2.1	Compound Factors	59
3.3.2.2	Exposure Factors	60
3.3.2.3	Personal Factors	61
3.3.2.4	Distribution and Elimination	62
3.4	Toxicity Measurements	62
3.4.1	Exposure Guidelines	64
3.5	Toxin Properties	66
3.5.1	Physical States	66
3.5.2	Toxic Properties	67
3.6	Summary	69
<b>4</b>	<b>Scene Processing</b>	<b>71</b>
4.1	Training	72
4.2	Seizure Stages	73
4.2.1	Preraid Planning	73
4.2.2	Briefing	74
4.2.3	Entry and Arrest	75
4.2.4	Hazard Evaluation and Abatement	76
4.2.4.1	Site Control	77
4.2.4.2	Personal Protective Equipment	78
4.2.5	Scene Processing	79
4.2.5.1	Planning	80
4.2.5.2	Documentation	81
4.2.5.3	The Search	84
4.2.5.4	Disposal	91
4.3	Summary	94

<b>5</b>	<b>Laboratory Analysis</b>	<b>95</b>
5.1	The Chemist	96
5.1.1	Single Chemist	97
5.1.2	Independent Analytic Chemist	98
5.2	Types of Analysis	98
5.2.1	Inorganic Analysis	100
5.2.1.1	Chemical Color Tests	100
5.2.1.2	Microscopic Techniques	102
5.2.1.3	Infrared Spectroscopy	104
5.2.1.4	Ion Chromatography	106
5.2.1.5	X-Ray Analysis	106
5.2.2	Organic Analysis	107
5.2.2.1	Test Specificity	107
5.2.3	Wet Chemical Procedures	109
5.2.3.1	Chemical Color Tests	109
5.2.3.2	Microscopic Techniques	110
5.2.3.3	Thin-Layer Chromatography	111
5.2.3.4	Extractions	112
5.2.3.5	Wet Chemical Documentation	112
5.2.4	Instrumental Examinations	113
5.2.4.1	Ultraviolet Spectroscopy	114
5.2.4.2	Gas Chromatography	115
5.2.4.3	Mass Spectroscopy	116
5.2.4.4	Infrared Spectroscopy	117
5.2.4.5	Documentation	120
5.2.5	Analytical Schemes	123
5.2.5.1	Solid Samples	124
5.2.5.2	Liquid Mixtures	124
5.2.5.3	Chromatographic Screening	127
5.2.6	Extractions	128
5.2.6.1	Physical Extraction	129
5.2.6.2	Dry Wash/Extraction	129
5.2.6.3	Liquid/Liquid Extractions	129
5.2.7	Isomer Determination	130
5.2.7.1	Microcrystal Examination	131
5.2.7.2	Derivatization	131
5.3	Quantitation	132
5.3.1	Microscopic Examination	134
5.3.2	Gravimetric Techniques	134

5.3.3	UV Techniques	135
5.3.4	GC Technique	135
5.4	Summary	137

## **6**      **opinions**      **139**

6.1	The Questions	140
6.1.1	Who?	142
6.1.2	What?	142
6.1.3	When?	142
6.1.4	Where?	143
6.1.5	Why?	144
6.1.6	How?	144
6.2	Information	144
6.2.1	Scene Information	145
6.2.2	Laboratory Analysis Information	147
6.3	Experience and Training	148
6.3.1	What? How? How Much?	148
6.3.2	What Is He Making?	149
6.3.3	How Is He Making It?	150
6.3.4	How Much ... ?	152
6.3.5	How Much Product?	153
6.3.6	How Much per Batch?	154
	6.3.6.1    Equipment Limitations	154
	6.3.6.2    Chemical Limitations	155
	6.3.6.3    Reaction Limitations	155
6.3.7	How Much per Week?	157
	6.3.7.1    Production with Available Chemicals	158
6.4	Summary	159

## **7**      **Testimony**      **161**

7.1	Case Preparation	162
7.2	Pretrial Conference	164
7.2.1	Educate the Attorney about Clandestine Drug Labs in General	164
7.2.2	Educate the Attorney about the Generalities of this Clandestine Drug Lab	165
7.2.3	Tell the Attorney what Indicates that a Clandestine Drug Lab Exists in this Instance	165
7.2.4	Tell the Attorney what Items Are Missing	165

7.2.5	Explain the Sampling Procedures that Were Used	166
7.2.6	Explain Chemical Disposal (if Used)	166
7.2.7	Outline Testimony	166
7.2.8	Discuss Visual Aids	168
7.3	Testimony	168
7.3.1	Direct Testimony	168
7.3.2	Cross-Examination	171
7.3.3	Independent Expert	172
7.4	Visual Aids	173
7.4.1	Simple	173
7.4.2	Easy to Read	174
7.4.3	Easy to Understand	174
7.4.4	Colorful	175
7.4.5	Types of Visual Aids	176
7.4.5.1	Photographs	176
7.4.5.2	Slides	177
7.4.5.3	Flip Charts and Overheads	177
7.4.5.4	Power Point Presentation	177
7.4.5.5	Evidence Exhibits	178
7.4.5.6	Combination of Visual Aids	178
7.4.5.7	Court Exhibits	178
7.5	Summary	179
<b>8</b>	<b>Explosives Labs</b>	<b>181</b>
8.1	Explosives Labs Operators and Manufacturers	181
8.2	Regulation	182
8.3	Scene Processing Procedures	184
8.4	Summary	186
<b>9</b>	<b>Practical Applications and Examples</b>	<b>187</b>
	Practical Example 1: Extraction Labs	187
	Practical Example 2: Extraction Labs	188
	Practical Example 3: Conversion Labs	189
	Practical Example 4: Conversion Labs	190
	Practical Example 5: Conversion Labs	190
	Practical Example 6: Synthesis and Extraction	191
	Practical Example 7: Distillation	193
	Practical Example 8: Distillation	194

Practical Example 9: Distillation	194
Practical Example 10: Extraction and Separation	194
Practical Example 11: Filtration	196
Practical Example 12: Mechanical Explosions	197
Practical Example 13: Mechanical Explosions	199
Practical Example 14: Vapor Explosions	199
Practical Example 15: Compressed Gas Hazards	200
Practical Example 16: Compressed Gas Hazards	202
Practical Example 17: Compressed Gas Hazards	202
Practical Example 18: Initial Crime Scene Evaluation	202
Practical Example 19: Training and Experience	203
Practical Example 20: Training and Experience	203
Practical Example 21: Sampling	204
Practical Application 1: Bottle Volume Estimates	205
Practical Application 2: Flask Volume Estimates	206
Practical Application 3: Separatory Funnel Volume Estimates	207
Practical Application 4: Reaction Flask Volume Estimates	208
Practical Example 22: Data Interpretation	209
Practical Example 23: Data Interpretation	209
Practical Example 24: Data Interpretation	210
Practical Application 5: Dry Extractions	210
Practical Application 6: Methamphetamine Extraction	211
Practical Application 7: Methamphetamine Extraction	212
Practical Application 8: Ephedrine/Pseudoephedrine Separation	212
Practical Application 9: Methamphetamine By-Product Profile Extraction	213
Practical Application 10: Quantitation	213
Practical Application 11: Gravimetric Quantitation	214
Practical Application 12: Serial Dilution Quantitation	214
Practical Application 13: Mathematic Application of Serial Dilution Quantitation	215
Practical Application 14: Single Standard Solution	216
Practical Example 25: Opinions (Knowledge and Experience)	217
Practical Example 26: Opinions (Knowledge and Experience)	217
Practical Application 15: Opinions (Data Interpretation)	218
Practical Application 16: Opinions (Data Interpretation)	219
Practical Application 17: Opinions (Production Estimates)	220
Practical Application 18: Opinions (Production Estimates, Multistep)	221
Practical Application 19: Opinions (Per Batch Production Estimates)	222

Contents	xvii
Practical Example 27: Testimony	223
Practical Example 28: Testimony	224
<b>Appendix A</b>	<b>225</b>
Scientific Equipment Encountered at Clandestine Labs	225
Reflux Variations	227
Distillation Variations	228
Hydrogenator Variations	228
Vacuum Filtration Variations	229
Extraction Equipment Variations	230
Makeshift Ventilation	231
<b>Appendix B: Legitimate Use Table</b>	<b>233</b>
<b>Appendix C: Drug Precursor/Reagent Table A</b>	<b>237</b>
<b>Drug Precursor/Reagent Table B</b>	<b>241</b>
<b>Appendix D: Reaction Mechanisms</b>	<b>245</b>
<b>Appendix E: Chemical Hazards</b>	<b>253</b>
<b>Appendix F: Toxicology Table</b>	<b>263</b>
<b>Appendix G: Optical Properties of Inorganic Compounds</b>	<b>285</b>
<b>Appendix H: Crystal Test Reagents</b>	<b>287</b>
<b>Appendix I: Anion IR Absorbance Table</b>	<b>289</b>
<b>Appendix J: Color Test Reagents</b>	<b>291</b>
<b>Appendix K: Mass Spec Data of Reaction Mixture Components</b>	<b>295</b>
<b>Appendix L: Extraction Procedures</b>	<b>301</b>
Extraction Solubility Guidelines	301
Particle Picking	301
Dry Extraction	302
Dry Wash	302

General Liquid/Liquid Extraction Procedure	302
General Ion-Pairing Extraction Technique	303
<b>Appendix M: General Calculation Equations</b>	<b>305</b>
Geometric Shape Volumes	305
Gravimetric Quantitation	305
Solid Samples	305
Liquid Samples	305
Serial Dilution Quantitation	306
Single Standard Solution Quantitation	306
Production Estimates	306
<b>Appendix N: Conversion Factor Table</b>	<b>307</b>
<b>Appendix O: List of Explosive Materials</b>	<b>309</b>
List of Explosive Materials	310
<b>Appendix P: Sphere Volume Estimates</b>	<b>319</b>
<b>Appendix Q: Glossary</b>	<b>321</b>
<b>Appendix R: Clandestine Drug Lab Reference Material</b>	<b>327</b>
General Information	327
Amphetamine/Methamphetamine	329
Phenylacetone	330
MDA/MDMA	331
Cathinone/Methcathinone	332
Phencyclidine	332
General Analysis	332
Reagent Preparation	333
Analysis and Detection of Explosives	334
<b>Index</b>	<b>367</b>
