# Table of Contents

---

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Nuclear Materials.....	2
1.2	Nuclear Power and Pu Production.....	4
1.3	Nuclear Weapons and the Cold War.....	5
1.4	Nuclear Treaties and Nonproliferation Programs.....	6
1.5	SNM Disposition.....	8
1.6	Nuclear Proliferation and Terrorism.....	9
1.7	Nuclear Smuggling.....	11
1.8	Forensic Goals.....	13
	References.....	14
<b>2</b>	<b>Physical Basis of Nuclear Forensic Science</b>	<b>17</b>
2.1	Background.....	17
2.2	Types of Radioactive Decay.....	23
2.3	Rate Laws in Radioactive Decay.....	27
2.4	Atoms, Binding Energy, and Chart of the Nuclides.....	31
2.5	Nuclear Structure, Isomerism, and Selection Rules.....	42
2.6	Nuclear Reactions.....	56
2.7	Natural Radioactivity.....	67
2.8	Fission, Barrier Penetration, and Energy Production.....	72
	References.....	84
<b>3</b>	<b>Engineering Issues</b>	<b>89</b>
3.1	Natural versus Synthetic Materials.....	89
3.2	Recovery of Actinides from the Earth.....	90
3.3	Separation and Enrichment of U Isotopes.....	95
3.3.1	Electromagnetic Isotope Separation.....	98
3.3.2	Gaseous Diffusion.....	100
3.3.3	Thermal Diffusion.....	108
3.3.4	Gas Centrifugation.....	109

- 3.3.5 Aerodynamic Enrichment .....114
- 3.3.6 Laser Isotope Separation ..... 116
- 3.3.7 Isotope Enrichment Through Chemical Exchange ..... 118
- 3.4 Nuclear Reactors, Power, and the Production of Pu and <sup>233</sup>U ..... 119
- 3.5 Recovery and Purification of Heavy Elements from Reactor Products..... 153
- 3.6 Heavy-Element Metals and Alloys.....162
- 3.7 Summary .....169
- References.....170

**4 Chemistry and Nuclear Forensic Science 175**

- 4.1 Tracers in Inorganic Analysis.....175
- 4.2 Relevant Chemical Properties ..... 181
- References.....191

**5 Principles of Nuclear Explosive Devices 193**

- 5.1 One-Stage Fission Explosive (Atomic Bomb) ..... 193
- 5.2 Boosting..... 199
- 5.3 Two-Stage Nuclear Explosive (Hydrogen Bomb)..... 202
- 5.4 Forensic Analysis of Nuclear-Explosive Debris ..... 203
- References .....206

**6 Chronometry 207**

- 6.1 Heavy Elements and Fission-Product Chronometers .....207
- 6.2 Granddaughters and Spoof Detection ..... 236
- 6.3 Detection of Incomplete Fuel Reprocessing.....237
- References ..... 240

**7 Techniques for Small Signatures 241**

- 7.1 Chemical Separations and Reduction of Background..... 241
- 7.2 Radiochemical Milking ..... 245
- 7.3 Mass Spectrometry and Microanalysis..... 249
- 7.4 Radiation Detection..... 250
  - 7.4.1 Interaction of Radiation with Matter..... 250
  - 7.4.2 Decay Characteristics .....251
  - 7.4.3 Gas-Phase Detectors ..... 256
  - 7.4.4 Solid-state Detectors.....263
  - 7.4.5 Scintillation Detectors..... 269
  - 7.4.6 Empirical Application and Spectra..... 273
- References..... 279

<b>8</b>	<b>Collateral Forensic Indicators</b>	<b>281</b>
8.1	Stable Isotopes.....	281
8.1.1	Lead.....	281
8.1.2	Oxygen.....	282
8.2	Inorganic Elements.....	282
8.3	Organic Analyses.....	285
8.3.1	High Explosives.....	285
8.3.2	Hairs and Fibers.....	286
8.3.3	Inks and Papers.....	287
8.3.4	Fingerprints.....	288
8.3.5	Other.....	288
	References.....	289
<b>9</b>	<b>Sample Matrices and Collection</b>	<b>291</b>
9.1	Soil/Sediment Matrices.....	291
9.2	Vegetation Matrices.....	292
9.3	Water Matrix.....	293
9.4	Fauna Matrices.....	294
9.5	Other Matrices.....	294
9.6	Collection Tactics.....	295
	References.....	297
<b>10</b>	<b>Radiochemical Procedures</b>	<b>299</b>
10.1	Dissolution.....	299
10.2	Redox.....	301
10.3	Separations.....	302
10.4	MS Analysis and Reagent Purity.....	308
	References.....	309
<b>11</b>	<b>Inorganic/Isotopic Sample Preparation</b>	<b>311</b>
11.1	Alpha Counting.....	311
11.2	Beta Counting.....	312
11.3	Gamma Counting.....	313
11.4	Inorganic Techniques.....	313
<b>12</b>	<b>Organic Sample Preparation</b>	<b>317</b>
12.1	Extraction.....	317
12.2	Solid-Phase Microextraction.....	318

17.4 Analysis.....	372
References.....	375

## **18 Materials Fingerprinting 377**

18.1 Criminalistics Comparisons.....	377
18.2 Material Compositions .....	378
18.3 Calculations.....	379
References.....	381

## **19 Source and Route Attribution 383**

19.1 Introduction .....	383
19.1.1 Source Attribution Questions .....	384
19.1.2 Route Attribution Questions.....	385
19.2 Forensic Analysis of Interdicted Nuclear Materials.....	385
19.3 Laboratory Characterization of Nuclear Materials for Source Data.....	386
19.4 Laboratory Characterization of Nuclear Materials for Route Data .....	389
19.5 Prioritization of Forensic Tools for Route Attribution.....	391
19.6 Analytic Techniques for Nuclear Forensic Interrogation.....	393
19.6.1 Isotopes.....	393
19.6.2 Elemental Composition/Major and Trace Elements .....	394
19.6.3 Organic Species .....	394
19.6.4 DNA .....	394
19.6.5 Physical and Structural Characteristics.....	394
19.7 Geolocation and Route Attribution: Real-World Examples.....	395
19.7.1 Pb-Isotope Fingerprinting .....	395
19.7.2 O-Isotope Fingerprinting .....	395
19.7.3 Other Isotopic Ratios.....	397
19.8 Reference Data for Enhanced Interpretation.....	397
References.....	399

## **20 Forensic Investigation of a Highly Enriched Uranium Sample Interdicted In Bulgaria 401**

20.1 Analyses of Uranium Oxide.....	403
20.2 Analyses of Collateral Evidence.....	411
20.2.1 Lead Container.....	411
20.2.2 Yellow Wax.....	412
20.2.3 Paper Liner and Label.....	416
20.2.4 Glass Ampoule.....	416

20.3 Attribution .....	417
References.....	419

## **21 Counterforensic Investigation of U.S. Enrichment Plants 421**

21.1 Background .....	421
21.2 Sampling.....	421
21.3 Radiochemistry.....	423
21.4 Results.....	430
21.5 Interpretation.....	430
21.6 Summary .....	444
References.....	445

## **22 Nuclear Smuggling Hoax — D-38 Counterweight 447**

22.1 Background and Analyses.....	447
22.2 Results and Discussion.....	448
Reference.....	449

## **23 Nuclear Smuggling Hoax — Sc Metal 451**

23.1 Background and Analyses.....	451
23.2 Results and Discussion.....	452
References.....	452

## **24 Fatal "Cold Fusion" Explosion 453**

24.1 Background and Analyses.....	453
24.2 Results and Discussion.....	454
24.3 Commentary .....	456
References.....	459

## **25 Questioned Sample from the U.S. Drug Enforcement Agency 461**

25.1 Background and Nondestructive Analysis.....	461
25.2 Radiochemistry and Results.....	463
25.3 Discussion .....	465
25.4 Summary .....	472
References.....	473

## **Index 475**
