

CONTENTS

1. Fire Ground Procedures	
1.1 Determining the Origin and Cause	1
1.2 Detection of Hydrocarbon Accelerates	12
1.3 Tools and Equipment	14
1.4 Evidence-Gathering, Marking and Safeguarding	22
1.5 Fire Investigation Photography	27
1.6 Fire Investigation Recordkeeping	42
1.7 Role of the Firefighter	49
2. Post-Fire Interviews	
2.1 Developing Information from Eye-Witnesses	52
2.2 Legal Problems	56
3. The Building and Its Makeup	
3.1 Building Construction	59
3.2 Materials	75
3.3 Utility Systems	81
4. Ignition Sources	
4.1 Flaming Ignition	88
4.2 Smoldering Combustion	91
4.3 Spontaneous Ignitions	94
4.4 Electricity as an Ignition Source	99
4.5 Case Study as an Ignition Source	125
4.6 Explosions	134
5. Chemistry and Physics of Fire	146
5.1 Friendly and Unfriendly Fires	146
5.2 Fuel, Oxygen, Ignition Source	146
5.3 Chemistry of Fire	146
5.4 Heat Transfer in fires	155
5.5 Fire Development	159
6. Sources of Information	
6.1 Federal Organizations	164
6.2 Private Organizations	165
Appendices	
A. Municipal Task Forces	167
B. The Investigator, as an Expert Witness for the Prosecution	175
C. Independent Testing Laboratories	179
D. Books of Interest	180
