

CONTENTS

Section I Overview

- | | |
|---|----|
| 1. Health Risk in Relation to Drinking Water Treatment | 3 |
| 2. Understanding the Response to Environmental Risk Information | 21 |

Section II Volatile Organic Compounds in Treated Drinking Water

- | | |
|--|----|
| 3. Abiotic Transformation of Halogenated Organic Compounds | 37 |
| 4. Transformation Kinetics of 1,1,1-Trichloroethane to the Stable Product 1, 1-Dichlorethene | 47 |

Section III Pathogens in Treated Drinking Water

- | | |
|---|----|
| 5. Elimination of Viruses and Bacteria During Drinking Water Treatment | 59 |
| 6. Factors Affecting the Occurrence of the Legionnaires' Disease Bacterium in Public Drinking –
Water Supplies | 67 |
| 7. Presence of Fungi in Drinking Water | 85 |

Section IV Chlorination Pathways and By-Products

- | | |
|--|-----|
| 8. Pathways for the Production of Organochlorine Compounds in the Chlorinating of Humic-
Materials | 97 |
| 9. GC/MS Identification of Mutagens in Aqueous Chlorinated Humic Acid and Drinking Waters-
Following HPLC | 107 |
| 10. Dome Lipophilic Compounds Formed in the Chlorinating of Pulp Lignin and Humid Acids | 123 |
| 11. Amino Acids as Model Compounds for Halogenated By-Products Formed on –
of Natural Waters | 133 |
| 12. Toxicological Significance of the Chemical Reactions of Aqueous Chlorine an-
Chloramines | 141 |

Section V Ozonation By-Products

- | | |
|--|-----|
| 13. Ozone Oxidation Products: Implications for Drinking Water Treatment | 153 |
| 14. Formation of Aromatic Polymers during the Ozonation of Enzymatic Oxidation of Waters-
Containing Phenolic Compounds | 171 |
| 15. By-Products from Ozonation and Photolytic Ozonation of Organic Pollutants in Water: -
Preliminary Observations | 185 |
| 16. Application of Closed Loop Stripping and XAD Resin Adsorption for the Determination of –
Ozone By-Products from natural Water | 201 |

Section VI Granular Activated Carbon

- | | |
|--|-----|
| 17. The Role of Granular Activated Carbon in the Reduction of Biohazards in Drinking Water | 213 |
| 18. Oxidation of Phenol on Granular Activated Carbon | 235 |
| 19. Microbiology of Granular Activated Carbon used in the Treatment of Drinking Water | 243 |

Section VII Recent Developments

- | | |
|---|-----|
| 20. Biodegradation Processes to Make Drinking Water Biologically Stable | 257 |
| 21. Application of Gene Probes to the Detection of Enteroviruses in Groundwater | 265 |
