

CONTENTS

Part I Workshop Summary

Workshop Summary	2
Introduction and Background	2
Key Concerns and Recommendations	6
Environmental Effects	9
Health Effects	11
Monitoring and Quality Assurance	13
Control Technologies	14

Part II papers**Research Plan for Test Methods Development For Risk Assessment of Novel Microbes Released Into Terrestrial and Aquatic Ecosystems 18**

I. Introduction	18
II. Novel Organisms	24
III. Development of Test Methods for the Detection Identification, and Enumeration of Novel-Organisms	26
IV. Development of Test Methods for Assessing Fate of Novel Organisms	33
V. Development of Test Methods for Assessing Genetic Stability of Novel Organisms	42
VI. Development of Test Methods for Assessing Hazards of Released Novel Organisms	52
VII. Summary	58
VIII. Acknowledgments	60
IX. Literature Cited	61

Biotechnology Health Risk Assessment Research Plan 68

I. Introduction	68
II. Health Effects Work Group Panel Recommendations	70
III. Discussion	79

Environmental Engineering Research Support Proposal 86

I. Legislation	86
II. Regulatory Needs	86
III. Overall Program Approach	89

Monitoring Techniques for Genetically Engineered Microorganisms 114

I. Introduction	114
II. Monitoring Techniques	117
III. Monitoring Techniques	123
IV. Microcosm Tests for Monitoring Techniques	138

V. Quality Assurance	144
VI. Conclusion	147
VII. Literature Cited	160
Appendix: List of Participants	165
