Preface	xv
About the Authors	xvii
1 Definition of Hazardous Waste	1
1.1 The Environmental Protection Agency's Regulatory Definition	1
1.1.1 Characteristic Hazardous Waste	2
1.1.2 Listed Hazardous Waste	3
1.1.3 Excluded Hazardous Waste	3
1.2 Regulatory History of Hazardous Waste in the US	4
1.2.1 The Resource Conservation and Recovery Act and Amendments	4
1.2.2 Superfund Legislation	5
1.2.3 Other Hazardous Waste Regulations	7
1.3 Categories and Sources of Hazardous Waste	7
1.3.1 Nuclear Waste	7
1.3.2 Industrial Waste	8
1.3.3 'Universal' Waste	8
1.3.4 Medical Waste	8
1.3.5 Construction Waste	9
1.3.6 Electronic Waste	9
References	9
2 The Biggest Generators of Hazardous Waste in the US	11
2.1 Federal Criteria for Regulation of Waste Generators	11
2.2 National Biennial RCRA Hazardous Waste Reports	13
2.3 The Chemical Industry	15
2.4 Local Effects of Hazardous Waste Production: Case Studies of the Top 3 Hazardous Waste Generators and the Communities that House Them	16
2.4.1 The Dow Chemical Company, Plaquemine Facility, Plaquemine, Louisiana	16
2.4.2 Solutia Inc. and Alvin, Texas	17
2.4.3 Occidental Chemical Corporation and Hahnville, Louisiana	18
2.5 The United States Military and Other Federal Facilities	18
2.5.1 The Department of Defense as a Major Contributor	18
2.5.2 The Department of the Interior	19
2.5.3 The Department of Energy	19

2.6	Unregulated Household Hazardous Waste	20
	References	20
3	The Chemical Industry	23
3.1	The Dow Chemical Company	23
3.1.1	Superfund Sites	24
3.1.2	Disaster in Bhopal, India	25
3.1.3	Agent Orange Liabilities	25
3.1.4	Chlorpyrifos	26
3.2	E.I. DuPont de Nemours and Company	27
3.2.1	Tetraethyl Lead	28
3.2.2	Pompton Lakes, New Jersey	31
3.2.3	Other Recent DuPont Transgressions: Teflon, Dioxins, and Safety Violations	31
3.3	Monsanto Company	32
3.3.1	Monsanto's Toxic PCB Legacy at Sauget, Illinois	33
3.3.2	Monsanto's (Solutia Inc.) Plant at Anniston, Alabama	34
3.4	Chemical Industry Hazardous Wastes	42
	Acknowledgment	43
	References	43
4	The United States Military	49
4.1	Range and Scope of Military Hazardous Waste	49
4.2	Hazardous Waste from Domestic Manufacturing and Bases	50
4.3	Dumping of Munitions in the Ocean	51
4.3.1	History and Scope of Marine Munitions Disposal by the US Military	51
4.3.2	The Effects of Dumping: Past Harms and Future Threats	52
4.4	Improper Disposal of Hazardous Waste in US Military Operations Abroad	54
	References	55
5	The Petroleum Industry	57
5.1	Overview, Emissions and Waste	57
5.1.1	Overview	57
5.1.2	Emissions	58
5.1.3	Waste	59
5.2	Refinery Workers Studies	60
5.3	The Baton Rouge Refinery: Cancer Alley	61
5.4	Methyl Tertiary Butyl Ether (MTBE)	62
5.5	Oil Fields Across America and Damage Done	62
5.5.1	The Santa Maria Oil Sumps	63
5.5.2	The Santa Barbara Oil Spill of 1969	63
5.5.3	<i>Exxon Valdez</i> Oil Spill	64
5.6	Citgo's Spill in Lake Charles and Criminal Charges	65
5.6.1	The Event	65

5.6.2	The Damage	66
5.6.3	The Consequences	67
5.7	BP Oil Spill	67
5.7.1	The Incident	67
5.7.2	Oil Dispersants	68
	Acknowledgment	69
	References	69
6	Coal-Fired Power Plants	73
6.1	Overview	73
6.2	Power Production, Emissions, and Waste	74
6.2.1	Production	74
6.2.2	Emissions	74
6.2.3	Waste	75
6.3	Environmental Health Impacts	75
6.3.1	Acid Deposition	75
6.3.2	Mercury	76
6.3.3	Climate Change	77
6.4	Lawsuits and Regulations	77
6.4.1	Violation of the Clean Air Act (CAA)	77
6.4.2	Current Efforts	78
6.5	Control Technologies and Alternatives	79
	References	79
7	Iron, Steel, and Coke	83
7.1	Introduction	83
7.2	Steel Production	84
7.2.1	Cokemaking	84
7.2.2	Ironmaking	85
7.2.3	Steelmaking	86
7.3	Human Health Impacts	87
7.3.1	Air Emissions	87
7.3.2	Wastewater	87
7.3.3	Solid Wastes	88
7.4	Standards and Regulations	88
7.4.1	EPA NESHAP Standard	88
7.4.2	OSHA Coke Oven Standard	89
7.4.3	EPA Clean Water Act	89
7.4.4	Resource Conservation and Recovery Act (RCRA)	89
7.5	Alabama By-Products Corp. (ABC) Coke Case Study	91
7.5.1	Background and Overview	91
7.5.2	Pollution and Emissions	91
7.5.3	Reported Data	92
7.5.4	Health Cases	92
7.6	Alternatives to Conventional Technology	92
	References	93

8	The Wood Treatment Industry	95
8.1	Overview	95
8.2	Chemicals Involved in the Wood Preserving Industry	96
8.2.1	Chemical Emission Sources in the Wood Preserving Industry	96
8.2.2	Chemicals Emitted in the Wood Preserving Industry	96
8.2.3	Overview of Select Chemicals	96
8.3	Associated Hazardous Waste Laws and Regulations	99
8.4	Case Study – Koppers Tie Treating Facility, Somerville, TX	99
8.5	Hazardous Waste Mitigation – Best Management Practices and Technologies in the Wood Preservation Industry	100
	References	101
9	The Paper and Pulp Industry	103
9.1	Overview	103
9.2	Chemicals Involved in the Pulp and Paper Industry	104
9.2.1	Chemical Emission Sources in the Pulp and Paper Industry	104
9.2.2	Chemicals Emitted in the Pulp and Paper Industry	104
9.2.3	Overview of Select Chemicals	105
9.3	Associated Hazardous Waste Laws and Regulations	107
9.4	Case Study – International Paper Facility, Prattville, AL	108
9.5	Hazardous Waste Mitigation – General Guidance on Pollution Prevention (P2) and Cleaner Production in the Pulp and Paper Industry	109
	References	113
10	Nuclear Waste and Tritium Releases	115
10.1	Introduction	115
10.2	Types and Sources of Nuclear Waste	116
10.2.1	Radioactive Elements	116
10.2.2	Low-Level Waste	117
10.2.3	High-Level Waste	117
10.2.4	Mill Tailings	118
10.3	Management and Storage	118
10.3.1	Our Nuclear Burden	118
10.3.2	How Nuclear Waste is Stored Today	119
10.3.3	The Yucca Mountain Question	120
10.4	The Hazards of Nuclear Waste	120
10.4.1	Human Health Hazard	120
10.4.2	Case Studies	121
10.4.3	Rocky Flats Plant	121
10.4.4	Vermont Yankee Nuclear Power Plant	122
10.4.5	The Hanford Site	123
	References	124

11 Pesticides	127
11.1 Current Regulatory Framework	128
11.2 Case Studies of Select Pesticides	129
11.2.1 DDT	129
11.2.2 Agent Orange	130
11.2.3 Chloropicrin	131
11.2.4 Endosulfan	131
11.2.5 Propargite	132
11.2.6 Malathion	132
11.3 Worker Exposure to Pesticides	132
11.3.1 DBCP Worker Case Studies	132
11.3.2 California Cyfluthrin Case Study	133
11.3.3 Farm Worker Children	133
11.3.4 Protecting Worker Safety	134
11.4 Pesticides in Groundwater, Surface Water, and Drinking Water	135
11.4.1 Atrazine	135
11.4.2 Alachlor	139
11.4.3 Metolachlor	140
11.4.4 1,2,3-Trichloropropane (TCP)	142
11.4.5 1,2-Dibromo-3-chloropropane (DBCP)	143
11.4.6 Removal Technologies	144
11.5 Conclusion	145
Acknowledgments	145
References	145
12 Current Practices in Hazardous Waste Treatment and Disposal	155
12.1 Introduction	155
12.2 Underground Injection	156
12.2.1 Problems with Underground Injection	157
12.3 Aqueous Organic Treatment	158
12.4 Incineration	158
12.5 Land Disposal	159
12.5.1 Love Canal	160
12.5.2 Methods of Land Disposal	161
12.5.3 Human Health Effects of Land Disposal	164
Acknowledgment	166
References	166
13 The Export of Hazardous Waste	169
13.1 Overview, Main Drivers, and Types of Exported Waste	169
13.1.1 Overview	169
13.1.2 Main Drivers Toward Awareness	170
13.1.3 Types of Waste and Toxic Trade	171
13.2 International Law and the Loophole	173

13.2.1	International Law, Regional Agreements, and Compliance	173
13.2.2	The Loophole: Recycling, Repair, and Reassembly	175
13.3	E-Waste – The New Export Challenge	177
13.3.1	Background of E-Waste Exports	177
13.3.2	Hazards of E-Waste Exports	178
13.4	Recommendations and Conclusion	180
	Acknowledgment	182
	References	182
14	Introduction to Human Exposure, Toxicology, and Risk Assessment	185
14.1	Exposure Pathways	185
14.1.1	Soil, Water, Air, and Biota – Media	186
14.1.2	Inhalation, Ingestion, and Dermal Absorption	187
14.2	Quantifying Exposure	189
14.2.1	Point-of-Contact and Biological Monitoring	189
14.2.2	Exposure Scenarios	190
14.3	Toxicity Assessment	192
14.4	Estimating Risks	193
14.4.1	Non-Carcinogenic Effects	193
14.4.2	Carcinogenic Effects	194
14.5	Risk-Based Regulatory Levels	195
14.6	Resources for Toxicity Information	195
14.7	Uncertainties in Risk Assessment	195
	References	199
15	Bioaccumulation of Dioxins, PCBs, and PAHs	201
15.1	Overview of Persistent, Bioaccumulative, and Toxic Chemicals	202
15.1.1	Bioaccumulation, Bioconcentration, and Biomagnification	202
15.1.2	Persistent, Bioaccumulative, and Toxic Chemicals	203
15.1.3	Persistent Organic Pollutants (POPs)	203
15.2	Dioxins	203
15.2.1	Overview	203
15.2.2	Sources and Exposure	204
15.2.3	Health Effects	204
15.3	Polychlorinated Biphenyls (PCBs)	205
15.3.1	Overview	205
15.3.2	Sources and Exposure	206
15.3.3	Health Effects	206
15.3.4	Regulation of PCBs	207
15.4	Polycyclic Aromatic Hydrocarbons (PAHs)	207
15.4.1	Overview	207
15.4.2	Sources and Exposure	208

15.4.3	Health Effects	208
15.5	Case Studies	209
15.5.1	Bioaccumulation of PCBs	209
15.5.2	Bioaccumulation of POPs	209
	Acknowledgments	210
	References	210

16	Emerging Contaminants	215
16.1	Overview of Chemicals of Emerging Concern	215
16.2	Pharmaceuticals and Personal Care Products	217
16.3	Surfactants	218
16.4	Plasticizers	218
16.5	Fire Retardants	218
16.6	Biological Emerging Contaminants	219
16.7	Odor as a Potential Health Issue	219
16.8	Future Research	220
	References	221

17	Mercury, BPA, and Pesticides in Food	223
17.1	Mercury	224
17.1.1	Mercury in the Environment	224
17.1.2	Occurrence in Food	224
17.1.3	Toxicity and Health Effects	225
17.1.4	Regulating Mercury Exposure	226
17.1.5	Limiting Mercury Exposure in the Diet	227
17.2	Bisphenol A	228
17.2.1	Overview	228
17.2.2	Toxicity and Health Effects	228
17.3	Pesticide Residues	229
17.3.1	Overview	229
17.3.2	Monitoring and Surveillance	229
17.3.3	The Dirty Dozen	231
17.3.4	Exposure and Health Risks	231
17.4	Dioxins, PCBs, and PAHs	232
	Acknowledgment	232
	References	232

18	Childhood Exposure to Environmental Toxins	237
18.1	What Makes Children Vulnerable	237
18.2	Breastfeeding and Transfer of Organochlorine Compounds	238
18.3	Children in Agricultural Areas	239
18.4	The Effects of Air Pollution on Children's Respiratory Health	239
18.5	Childhood Cancers and the Link to Environmental Toxins	240
	Acknowledgment	241
	References	241

19	Health Care Costs and Corporate Accountability	245
19.1	Corporate Accountability to Medicare and Medicaid for Health Care Costs	245
19.1.1	Medicare Secondary Payer Act	245
19.1.2	Recovery Audit Contractor Program	246
19.2	Case Study – US Government Civil Suit Against Monsanto	246
19.2.1	Introduction to the Lawsuit	246
19.2.2	The Complaint	247
19.2.3	Current Status of the Case	247
	Acknowledgment	248
	References	248
20	Health and Safety Standards	249
20.1	Occupational Safety and Health Administration	249
20.2	National Institute for Occupational Safety and Health	251
20.3	American Conference for Government Industrial Hygienists	253
20.4	Agency for Toxic Substances and Disease Registry	253
20.5	World Health Organization	254
20.6	Environmental Protection Agency	254
20.7	EPA Sector Notebooks	255
	References	256
21	The Failures of Regulatory Agencies and Their Inefficiency in Introducing New Chemicals into Regulation	257
21.1	Outdated OSHA Values are not Safe	257
21.2	Problems with the EPA's IRIS	258
21.2.1	Overview of the EPA's Integrated Risk Information System	258
21.2.2	The Government Accountability Office's Issues with the EPA's IRIS	259
21.3	Superfund Liability and Determination of Probable Responsible Parties	261
21.4	Inadequacies within Hazardous Waste Legislation	262
21.4.1	Problems with the Toxic Substances Control Act	262
21.4.2	'Sham Recycling' and Problems with the RCRA's Definition of Solid Waste	264

22	Strategies for the Future – Waste Reduction and Recycling, Treatment Technologies, and Green Chemistry	269
22.1	Reduction and Recycling	269
22.1.1	Source Reduction	270
22.1.2	Recycling	272
22.2	New Treatment Technologies	273

22.3	Green Chemistry	275
22.3.1	Overview	275
22.3.2	Purpose and Principles	275
22.3.3	Problems with the Toxic Substances Control Act of 1976	276
22.3.4	Creating More Effective Legislation: Learning from the European Union and Canada	278
22.3.5	Change is Brewing in the United States: EPA Transparency and Proposed Legislation	278
22.3.6	Fortifying the Validity of Green Chemistry – Market Drivers and the Economic Impacts	279
22.3.7	The Effect on Consumers	280
22.3.8	Conclusion: Green Chemistry is Necessary	281
	Acknowledgments	282
	References	282
Appendices		
	Appendix A: OSHA Permissible Exposure Limits (PEL)	285
	Appendix B: OSHA Permissible Exposure Limits (PEL) Time-Weighted Averages	297
	Appendix C: OSHA Immediately Dangerous to Life and Health (IDLH) Values	299
	Appendix D: NIOSH Recommended Exposure Limits (REL)	307
	Appendix E: NIOSH Immediately Dangerous to Life and Health (IDLH) Values	331
	Appendix F: ACGIH Threshold Limit Value (TLV)	341
	Appendix G: ACGIH Immediately Dangerous to Life and Health (IDLH) Values	355
	Appendix H: ATSDR Minimal Risk Levels (MRLs) December 2006	365
	Appendix I: WHO Air Quality Guidelines	379
	Appendix J: EPA Regional Screening Levels (RSLs)	381
	Appendix K: Toxicity and Chemical-Specific Information	407
	Appendix L: Industry Chemical Matrix	433
	Index	441
