

CONTENTS

GENERAL SESSION: Leaking Underground Storage Tank Issue

Options for Managing Underground Storage Tanks	1
Regulation Review for Underground Storage Tanks	18
Underground Industrial Waste Tank (UIWT) Releases: The Magnitude of the Problem-Cleanup and Liability Cost Estimating Model	31

SESSION ONE: Biological Treatment

Development and Performance of a Pilot-Scale, Activated Sludge Facility for the Treatment of a Textile Wastewater	44
Iron and Manganese Removal Using a Rotating Biological Contractor	58
Effects of Extended Idle Periods on Hazardous Waste Biotreatment	74
Effects of Bioaugmentation on Hazardous Waste Treatment	94
Anaerobic Upflow Sludge Bed Filter Reactor Treating Dilute Carbohydrate Wastewaters	116
Design of a Full Scale Anaerobic Facility for Treatment of Food Processing Wastewater	131

SESSION TWO: Toxic and Hazardous Materials

Modifying Ion-Exchange Resin compositions for Selective Removal of Potentially Toxic Hexavalent Chromium Species	142
Biological Treatment of Simulated Landfill Leachate Containing Chlordane	157
Treatment of a landfill Leachate in Powdered Activated Carbon Enhanced Sequencing Batch Bioreactors	170
Considerations in Selecting a Transportable Thermal Destruction Unit (TTDU)	187
Low Temperature Thermal Stripping of Volatile Compounds-A Field Demonstration project	198

SESSION THREE: Solidification/Stabilization

Implementation Strategies and Design Concepts for Application of solidification/Stabilization Technology to Contaminated Dredged Material	215
Prediction of Heavy Metal Leaching Rates from Stabilized/Solidified Hazardous Wastes	236
Solidification/Stabilization of Contaminated Dredged Material	253

SESSION FOUR: Industrial Residues

Treatability Study and Design of a Treatment Plant for Leachate Generated from a Coal Ash Disposal site	274
One Metal Finishing Company's Experience with the Hazardous Waste Delisting Process	291
Waste Management and Regulatory Compliance Techniques for Pilot Scale Chemical Production	304

SESSION FIVE: Pretreatment and Resource Recovery

Sludge Flocculation at an Industrial Waste Facility	322
---	-----

Utilization of an Anaerobic Bioreactor in the Treatment and Recycle of Rotogravure Printing Process Wastewater's	331
Economical Pretreatment for Color Removal from Textile Dye Wastes	340
Reduction of Total Toxic Organics in Metal Finishing Wastewater-Alternative Paint Strippers	348
SESSION SIX: Land Application and Sludge Management	
Potential Food Chain Effects from Land Application of Sludges	357
Analysis of Virus "Die-off" in Land-applied Industrial Wastes and Sludges	365
Activated Sludge Treatment and Salt Marsh Polishing for Seafood Processing Wastewater: An Experimental Investigation	376
The Start-Up Optimization of the Mechanical and Chemical Parameters Influencing the Denaturing Performance of a Gravity Belt Filter Press Operation	391
Two Factory Applications of a Microwave System Percent Solids Analyzer and Oven	396
Polymer Performance in Sludge Conditioning	400
SESSION SEVEN: Groundwater and Contaminant Transport	
The Effects of Liquid Organic Contaminants on Geotechnical Properties of Clay Soils	409
Enhancement of Biodegradation of Alcohol's in Groundwater Systems	421
A Comparison of the Sorption/Desorption Capacity of a Spent Oil Shale and a Western Soil	431
SESSION EIGHT: Public Relations and Analytical Methods	
Siting Power Plant Ash Disposal Areas with Help from the Local Community	443
Public Involvement in Acceptable Risk Decisions	454
Use of field and Laboratory Biological Techniques to Evaluate the Toxic Impact of a Combined Industrial and Municipal Discharge	462
Three Screening Tests for the Evaluation of Groundwater Quality	472
SESSION NINE: Toxic and Hazardous Materials	
The Strategies and Choices in Pennsylvania's Hazardous Waste Facilities Plan	489
Hazardous Waste Minimization Planning at the Army material Command (AMC)	502
Predicted vs Measured Air Emissions of Volatile Organics from a Simulated Hazardous Liquid Waste Lagoon	515
The Polychlorinated Biphenyl (PCB) Decontamination of Transformers	526
Anoxic Transformations of Trace Halogenated Aliphatics	545
SESSION TEN: Physicochemical Treatment	
Photocatalyzed Oxidation of Organic Wastestreams	554
Carbon Adsorption Isotherms for Organic Constituents of Industrial Wastewater's	569
Mechanisms for Phosphorus Removal by a Coal/Aluminum media Filter	583
Phosphorus Removal from Municipal and Industrial Wastewater by Aluminum Chloride and Derivatives	598
Wastewater Characterization and Treatment for the Coal Slurry Pipelining Industry	607
Color Removal by Coagulation and Ultrafiltration	618
Index	635
Biography	639
