

CONTENTS

| | |
|---|------------|
| 1. Hazardous Waste: Questions and Issues from the Field | 1 |
| 2. Uses of Environmental Testing in Human Health Risk Assessment | 7 |
| 3. Assessing Cyanide Contamination from an Aluminum Smelter | 15 |
| 4. 2,3,7,8-Tetrachlorodibenzo-p-dioxin Sampling Methods | 27 |
| 5. Field Measurement of Polychlorinated Biphenyls in Soil and Sediment Using a Portable Gas – Chromatograph | 37 |
| 6. Using Geostatistics in Assessing Lead Contamination Near Smelters | 43 |
| 7. Lead Levels in Blood of Children Around Smelter Sites in Dallas | 53 |
| 8. An Approach to the Interdisciplinary Design of Multifactor Experiments | 67 |
| 9. Statistical Methods in Environmental Sampling | 79 |
| 10. Soil Sampling Quality Assurance and the Importance of an Exploratory Study | 97 |
| 11. Quality Assurance for a Measurement Program | 105 |
| 12. New Ways of Assessing Spatial Distributions of Pollutants | 109 |
| 13. Detecting Elevated Contamination by Comparisons with Background | 119 |
| Author Index | 129 |
| Subject Index | 129 |
