<b>Introduction</b> .....	IX
<b>Acknowledgements</b> .....	XI
<b>List of Authors</b> .....	XIII

## Chapitre 1

### WHY CAPTURE AND STORE CO<sub>2</sub>?

*P. Broutin, P. Coussy*

<b>1.1 GLOBAL WARMING</b> .....	1
1.1.1 The Earth is warming up .....	1
1.1.2 Need to limit CO <sub>2</sub> emissions .....	4
1.1.3 International mobilisation .....	6
1.1.3.1 Kyoto Protocol and post-Kyoto negotiations .....	6
1.1.3.2 European commitments .....	6
1.1.4 The US position and the Asia-Pacific Partnership (APP) on clean development and climate. ....	7
<b>1.2 HOW TO REDUCE CO<sub>2</sub> EMISSIONS</b> .....	8
1.2.1 Control of energy consumption .....	8
1.2.2 Renewable energies. ....	9
1.2.3 Enhancement of natural CO <sub>2</sub> sequestration .....	11
1.2.4 Nuclear power .....	11
1.2.5 Change in the fossil energy mix .....	11
1.2.6 CO <sub>2</sub> capture and storage CO <sub>2</sub> . ....	11
<b>1.3 MAIN LINKS OF THE CCS CHAIN</b> .....	13
1.3.1 Storage .....	13
1.3.2 Transport .....	16
1.3.3 Capture .....	16
<i>References</i> .....	17

**Chapitre 2****WHERE TO CAPTURE CO<sub>2</sub>?***P. Coussy*

<b>2.1</b>	<b>CO<sub>2</sub> FIXED EMISSION SOURCES WORLDWIDE</b> .....	19
2.1.1	IPCC special report (2005) .....	19
2.1.2	Petroleum Economist – BP report 2007 .....	22
2.1.3	IEA report: trend in CO <sub>2</sub> emissions from the main fixed sources in the world ..	22
<b>2.2</b>	<b>FIXED SOURCES IN FRANCE</b> .....	24
2.2.1	CO <sub>2</sub> emissions in France .....	25
2.2.2	Fixed sources emitting more than 0.1 MtCO <sub>2</sub> per year in France .....	26
<b>2.3</b>	<b>CO<sub>2</sub> CAPTURE POTENTIAL IN FRANCE</b> .....	29
2.3.1	Situation in 2005 .....	29
2.3.2	Trend in emissions over 2005-2020-2050 .....	31
2.3.3	Capture potential in 2020 and 2050 .....	32
2.3.3.1	Capture assumptions .....	32
2.3.3.2	Capture potential and emissions avoided by industry .....	33
2.3.4	Conclusion .....	34
	<i>References</i> .....	35

**Chapitre 3****POST-COMBUSTION CO<sub>2</sub> CAPTURE***F. Lecomte*

<b>3.1</b>	<b>PRINCIPLES AND STAKES</b> .....	37
<b>3.2</b>	<b>CHARACTERISTICS OF POST-COMBUSTION FLUE GASES</b> .....	38
<b>3.3</b>	<b>SEPARATION TECHNIQUES POTENTIALLY SUITABLE FOR POST-COMBUSTION CO<sub>2</sub> CAPTURE</b> .....	41
3.3.1	Absorption processes .....	41
3.3.1.1	Chemical solvent processes .....	42
3.3.1.2	Physical solvent processes .....	45
3.3.1.3	Mixed solvent processes .....	46
3.3.2	Adsorption processes .....	47
3.3.3	Membrane processes .....	50
3.3.4	Cryogenic processes .....	51
<b>3.4</b>	<b>TECHNOLOGIES UNDER DEVELOPMENT FOR POST-COMBUSTION CO<sub>2</sub> CAPTURE</b> .....	52
3.4.1	Absorption processes .....	52
3.4.1.1	MEA process .....	52
3.4.1.2	Ammonia-based processes .....	61
3.4.1.3	Sterically hindered amine-based process .....	63
3.4.1.4	Cansolv process .....	65
3.4.1.5	Demixing solvents .....	65

3.4.1.6	Amino acid salt-based solvents . . . . .	67
3.4.1.7	Ionic liquids . . . . .	68
3.4.2	Adsorption processes . . . . .	70
3.4.2.1	Immobilisation of reactive products on solids . . . . .	70
3.4.2.2	Metal Organic Frameworks (MOFs) . . . . .	72
3.4.3	Membranes . . . . .	74
3.4.3.1	New membrane materials . . . . .	74
3.4.3.2	Membrane contactors . . . . .	75
3.4.4	Cryogenics . . . . .	77
3.4.4.1	CO <sub>2</sub> capture by antisublimation . . . . .	77
3.4.4.2	CO <sub>2</sub> capture by hydrate formation . . . . .	78
<b>3.5</b>	<b>CO<sub>2</sub> CONDITIONING</b> . . . . .	<b>81</b>
<b>3.6</b>	<b>CONCLUSION</b> . . . . .	<b>84</b>
	<i>References</i> . . . . .	<b>85</b>

## Chapitre 4

### OXY-COMBUSTION CO<sub>2</sub> CAPTURE

*E. Lebas*

<b>4.1</b>	<b>PRINCIPLES AND STAKES</b> . . . . .	<b>89</b>
<b>4.2</b>	<b>OXY-COMBUSTION</b> . . . . .	<b>90</b>
4.2.1	Principle of the process . . . . .	90
4.2.2	Oxygen production . . . . .	91
4.2.2.1	Cryogenics . . . . .	91
4.2.2.2	Alternative oxygen production processes . . . . .	92
4.2.3	Boiler types . . . . .	94
4.2.3.1	Pulverised Coal (PC) fired boiler . . . . .	94
4.2.3.2	Circulating Fluidised Bed (CFB) . . . . .	94
4.2.3.3	Flameless oxy-combustion firebox . . . . .	97
4.2.4	Technological barriers . . . . .	97
<b>4.3</b>	<b>CHEMICAL LOOPING COMBUSTION</b> . . . . .	<b>98</b>
4.3.1	Principle of the process . . . . .	98
4.3.2	Materials implemented . . . . .	100
4.3.3	Reactors . . . . .	101
4.3.3.1	Circulating Fluidised Bed (CFB) . . . . .	101
4.3.3.2	Fixed beds . . . . .	102
4.3.3.3	Rotary reactor . . . . .	103
4.3.4	Technological barriers . . . . .	103
<b>4.4</b>	<b>CO<sub>2</sub> CONDITIONING</b> . . . . .	<b>104</b>
4.4.1	CO <sub>2</sub> conditioning by cryogenic flash . . . . .	104
4.4.2	CO <sub>2</sub> conditioning by multiphase pumping . . . . .	105
<b>4.5</b>	<b>DEMONSTRATIONS</b> . . . . .	<b>108</b>
	<i>References</i> . . . . .	<b>108</b>

**Chapitre 5****PRE-COMBUSTION CO<sub>2</sub> CAPTURE***P. Broutin*

<b>5.1</b>	<b>PRINCIPLES AND STAKES</b> .....	111
<b>5.2</b>	<b>SYNGAS PRODUCTION</b> .....	112
5.2.1	Steam reforming. ....	112
5.2.1.1	Conventional steam reforming .....	113
5.2.1.2	A novel steam reforming technology: membrane reactors .....	115
5.2.2	Partial oxidation. ....	115
5.2.3	Autothermal Reforming (ATR) .....	119
5.2.4	Chemical-Looping Reforming .....	121
<b>5.3</b>	<b>WATER-GAS SHIFT REACTION</b> .....	122
<b>5.4</b>	<b>CO<sub>2</sub> EXTRACTION</b> .....	123
<b>5.5</b>	<b>CO<sub>2</sub> CONDITIONING</b> .....	124
<b>5.6</b>	<b>HYDROGEN COMBUSTION</b> .....	125
5.6.1	General .....	125
5.6.2	Technology proposed by Alstom .....	127
5.6.3	Technology proposed by Siemens .....	129
5.6.4	Conclusion .....	131
<b>5.7</b>	<b>INTEGRATED POWER PRODUCTION PROCESSES WITH PRE-COMBUSTION CO<sub>2</sub> CAPTURE</b> .....	132
5.7.1	Overview. ....	132
5.7.2	IGCC .....	132
5.7.3	HyGenSys .....	135
	<i>References</i> .....	138

**Chapitre 6****CAPTURE AND STORE CO<sub>2</sub>:  
AT WHAT COST?***D. Favreau*

<b>6.1</b>	<b>CALCULATION BASES</b> .....	141
6.1.1	The economic evaluation criterion: CO <sub>2</sub> captured or CO <sub>2</sub> avoided?. ....	141
6.1.2	Current limitations of the economic evaluation .....	143
6.1.3	Calculating the cost per tonne of CO <sub>2</sub> avoided or captured. ....	143
<b>6.2</b>	<b>CO<sub>2</sub> CAPTURE COSTS</b> .....	144
6.2.1	General aspects .....	144
6.2.2	Capture in the power and heat production sector .....	145
6.2.3	Capture in the industrial sector .....	149
<b>6.3</b>	<b>CO<sub>2</sub> TRANSPORT COSTS</b> .....	151
6.3.1	CO <sub>2</sub> land transport .....	151
6.3.2	CO <sub>2</sub> maritime transport. ....	153

<b>6.4</b>	<b>CO<sub>2</sub> STORAGE COSTS</b> .....	153
<b>6.5</b>	<b>TREND IN THE COST OF THE CCS CHAIN – POWER PRODUCTION</b> .....	157
<b>6.6</b>	<b>VARIABILITY OF CCS CHAIN COSTS</b> .....	158
<b>6.7</b>	<b>APPLICATION TO EXISTING INSTALLATIONS</b> .....	159
<b>6.8</b>	<b>CONCLUSION</b> .....	159
	<i>References</i> .....	160

**APPENDIX**

<b>Worldwide CO<sub>2</sub> capture projects</b> .....	161
<b>Glossary</b> .....	171
<b>List of abbreviations</b> .....	173
