Contents

Managing the threats – approaches, examples and solutions from German water supply 1
W. Merkel

Consequences of the Japanese earthquake 2011 and the Fukushima power plant accident on the Japanese water environment including drinking water 8
A.Miyazaki, N.Yamashita, A.Kimura, and H.Tao

A web-based early warning system for water treatment plants safety 22
F. S. Foping and I. M. Dokas

Making risk management stick: reflections on risk governance in water utilities 33
R. Allan, C. Mauelshagan, A. M. Luís, P. Jeffrey and Simon Pollard

Preventing drinking water outbreaks – operators converting hindsight into foresight 47
S. *E. Hrudey and E. J. Hrudey*

Water quality crisis at PWIK – case study 56
M. Przytulski and A. Konderak

The use of jug filtration to remove radioactive and chemical contamination from drinking water 64
D.J. Hammond

Tri- and tetra-chloroethylene in groundwater exploited by a municipal waterworks: numerical modelling and mitigative measures 72
E. Kret, S.J. G Mesa, A. Kiecak and G. Malina

The integration of online flow cytometry to the flexible risk assessment system at Zurich water supply 88
J. Helbing and U. Bosshart

A novel, low cost, spectrophotometer probe for multi-parameter in-pipe on-line water quality measurements 94
F. Edthofer, G. Fercher, C. Walter and A. Weingartner

Early warning systems for rapid detection of deliberate intrusion in drinking water systems 102
S. Galandrin-Castagnet, V. Raymond, M. Maurel, A. Monsorez and C. Lemoine

Monitoring of pipe wall deposits in drinking water distribution systems 118
M. Strathmann, O. Piller and H-C Flemming

Best practice protocols for response and recovery operations in contaminated water systems 134
J.L. Gutenson, J.R. Fattic and A.N.S. Ernest

HPA recovery guidance and advice for the remediation of the environment following a chemical incident 141
S.M. Wyke-Sanders, N. Brooke, R. Duarte-Davidson and V. Murray.

Public health risk of microbial intrusion events in distribution systems 147
M.C. Besner, G. Ebacher and M. Prévost

What are the real implications on public health of water contamination events? 158
M. Mcguinness

Protecting the drinking water supply against CBRN threats – the STATUS project 163
M. Riegel and D. Bethmann

Establishing a WHO corporate approach to emergencies 169
U. Enderlein

Preparing for the emergency – how to develop contingency plans with simulation models 173
B. Ruschhaupt, D. König and A. Rieder

Risk assessment for chemical spills in the river Rhine 183
P. Eckert, S. Kamphausen, H-P. Rohns and C. Wagner

Cyber security triage for small water utilities SAND2012-10831C 190
L. Dawson, J. Stinebaugh, A. Larez, D. Dailey, W. Atkins, P. Edgett, K. Schwalm, R. Finley and R. Pollock

The smart grid as a public health protection tool 198
G.S. Symmonds and T.T. Hill

Development and use of a decision support system for the response to drinking water contamination events 208
B.H. Tangena, J.F. Schijven, J.M. Foret and M. Bakker

POSTERS

Introduction of a method for genotyping *Cryptosporidium* to a water utility laboratory 225
S. Gillespie, J. Green and B. Martin

Elimination of low-concentration pyrethroid pesticides in drinking water with a household water purifier and by boiling treatment 230
M. Gotoh, Y. Manaka, S. Osaka, T. Furuhata, M. Tosaka and T. Kaneko

Performance of various water treatment processes for removal of hazardous levels of chemicals 233
O. Happell, B. Körner, S. Mertineit, and F. R. Storck

Comparison of methods for the detection of culturable and vbnc *Escherichia coli* 0157:H7 in complex drinking water biofilms 242
S. A. Wilks, M. S. Gião and C. W. Keevil

Lead in drinking water: a public health perspective incident management of lead contamination in drinking water 248
G. Lau

Proactive crisis management 258
M. N. Perc

Statistical model for estimating pathogenic bacteria in streams 264
P. K. Pandey , M. L. Soupir, M. Majumder and M. S. Kaiser

A GIS tool for the fast identification of drinking water abstraction points possibly reached by a contamination event 269
E. Preziosi, A. B. Petrangeli, P. R. Di Palma, A. Corazza3 and A. Duro

The molecular detection for the viability of *Yersinia* cells during shock chlorination – a pilot scale study 275
P.S. Räsänen, J. Ikonen, A.-M. Hokajärvi and I.T. Miettinen

Restoration of drinking water distribution systems by removing contaminated biofilms with different pipe cleaning methods 279
G. Schaule, D. Christen, D. Nottarp-Heim, C. Sorgel and H-G. Hammann

Rapid tests and laboratory methods for determination of chemical agents in drinking water 286
M. Weber and H. Schulz

Development of online sensors for the detection and quantification of the microbial regrowth potential of drinking water 293
P. Van Der Maas and G. Wübbels

Online monitoring of drinking water with optical spectroscopy 297
C. Jaehn, M. Wagner, W. Schmidtl and C. Moldaenke

Results of hydrodynamic water network cleaning on maintaining regulatory water quality 306
M. Przytulski and A. Konderak

Analysis of fifteen trace elements in six spring water samples by ICP-MS and evaluation of their effects on human health 310
Y. Manaka, M. Gotoh and S. Osaka

High chlorination effects on drinking water biofilms and deposits formed on plastic plumbing materials 313
E. Le Guen and J.-C. Block

Heterogeneous Fenton's reaction: a promising way for drinking water biofilm disinfection 324
F. Gosselin, L.M. Madeira, T. Juhna, and J.-C. Block

Chemical and biological risks in the water sector - a thematic area in the European commission's ERNCIP 329
P. Hohenblum,

HPA recovery guidance and advice for the remediation of the environment following a chemical incident 333
S.M. Wyke-Sanders, N. Brooke, R. Duarte-Davidson and V. Murray.

Particle counting for early detection of contaminants in drinking water 339
F. Gosselin, P. Pollmann, E. Colon, and J.-C. Block

Carbon-zeolite composite materials in advanced drinking water treatment 345
C. Orhal, A. Pop, C. Lazau, A. Jakab, R. Pode and F. Manea

Implementation of online monitoring stations to secure the IASI (Romania) drinking water supply 355
J. Van Den Broeke, C. Carpentier, E. Riteco and E. Penders

A compendium of sensors and monitors and their use in the global water industry 360
J. Van Den Broeke, L. Carswell, L. Cade, J. Rosen and C. Swartz

Development of an ESI-FAIMS/DMS system for rapid water analysis 364
K. Kerpen, A. Kuklya, R. Marks, F. Uteschil and U. Telgheder
