

CONTENTS

Chapter 1 Chemical Pollution of the Aquatic Environment	1
Chapter 2 The Chemistry of Metal Pollutants in Water	19
Chapter 3 Sewage and Sewage Sludge Treatment	33
Chapter 4 The Treatment of Toxic Wastes	63
Chapter 5 Water Quality and Health	83
Chapter 6 Biological Aspects of Freshwater Pollution	99
Chapter 7 Important Air Pollutants and Their Chemical Analysis	127
Chapter 8 Chemistry of the Troposphere	157
Chapter 9 Chemistry and Pollution of the Stratosphere	181
Chapter 10 Atmospheric Dispersal Pollutants and the Modeling of Air Pollution	201
Chapter 11 Catalyst Systems for Emission Control from Motor Vehicles	221
Chapter 12 Effects of Gaseous Pollutants on Crops and Trees	237
Chapter 13 The Health Effects of Environmental Chemicals	261
Chapter 14 The Legal Control of Pollution	277
Chapter 15 The Control of Industrial Pollution	297
Chapter 16 Organometallic Compounds in the Environment	309
Chapter 17 Radioactivity in the Environment	343
Chapter 18 Quantitative Systems Methods in Evaluation of Environmental Pollution Problems	367
Subject Index	389
