

## CONTENTS

**Chapter 1 Introduction**

1.1 Multidisciplinary Challenge	1
1.2 The environmental fields	3
1.3 Environmental management	4
1.4 The environmental crisis	4
1.5 Classification of pollution problems and abatement	9

**Chapter 2 Soil Pollution**

2.1 Introduction	13
2.2 Soil constituents and physico-chemical processes	14
2.3 Plant nutrients in soils. Amounts and Eastern and Western Denmark	17
2.4 Nutrient balances, illustrated by the case of Danish agricultural soils	23
2.5 Nitrogen pollution	26
2.6 Natural and anthropogenic soil acidification	29
2.7 Toxic elements (heavy metals) in soils	31

**Chapter 3 Air Pollution**

3.1 Introduction	41
3.2 Units of concentration	42
3.3 Sources and emission	43
3.4 Concentrations in the environment	47
3.5 Transmission	49
3.6 Chemical transformations	53
3.7 Deposition	54
3.8 Uptake	55
3.9 Threshold doses for effects	58
3.10 Effects of carbon monoxide	59
3.11 Effects of sulfur dioxide	60
3.12 Effects of sulfur dioxide	60
3.13 Effects of oxides of nitrogen	67
3.14 Effects of ozone and other photooxidants	69
3.15 Effects of acidification	72
3.16 Effects of particulates	75
3.17 Effects of particulates	75
3.18 Effects of combined pollutants	79
3.19 Indoor air pollution	80

3.20 Forest decline	82
3.21 The greenhouse effect	92
3.22 The stratospheric ozone “layer”	102
3.23 National and international regulations, and abatement	106
3.24 Will and ethics	109
<b>Chapter 4 Water Pollution</b>	
4.1 The management of surface waters	115
4.2 Aquatic ecology	118
4.3 Watercourses	120
4.4 Lakes	138
4.5 Restoration of streams and lakes	158
4.6 Coastal waters	164
<b>Chapter 5 Water management and Water Resources</b>	
5.1 The properties of water	177
5.2 The hydrological cycle	177
5.3 Structure of the hydrosphere	178
5.4 The basic difference between aquatic terrestrial ecosystems	181
5.6 Water resources	183
5.7 Water and waste-water management	184
<b>Chapter 6 Pesticides</b>	
Chapter 6.1 Legislation, Control and Consumption in Denmark	177
Chapter 6.2 Degradation and Transport	197
Chapter 6.3 Ecological Aspects of Insect Pest Control	211
Chapter 6.4 Ecological Aspects of Chemical Weed Control	239
<b>Chapter 7 Gene-Technology</b>	<b>257</b>
<b>Chapter 8 Countryside Planning</b>	<b>275</b>
<b>Chapter 9 Environmental Economics</b>	<b>301</b>
<b>Chapter 10 Danish environmental LAW</b>	<b>319</b>
<b>Chapter 11 Ecological Aspects</b>	<b>343</b>
<b>Chapter 12 Environmental Impact Assessment</b>	<b>367</b>
<b>Chapter 13 Environmental Management Modeling</b>	<b>377</b>
<b>Index</b>	<b>397</b>
