

CONTENTS

Lead Poisoning	
I. Introduction	1
II. Factors Associated with the Causation of Plumbism	2
III. The Determination of Lead in Biological Materials	8
IV. Lead in Human Excreta	21
V. The Distribution of lead in Human Tissues	22
VI. Normal Lead Values in Human Blood	24
VII. Lead in Tissues and Excreta in Plumbism	24
VIII. The Mobilization of lead	26
IX. Factors that Influence the Absorption of lead from the Alimentary Tract	27
X. The Treatment of Lead Poisoning	29
XI. Porphyrin Metabolism in lead Poisoning	31
XII. Laboratory Examinations in Lead Poisoning	34
XIII. The Control of the Lead Hazard	35
Non-biological Applications on Neutron Activation Analysis in Forensic Studies	
I. Introduction	47
II. Theory	48
III. The Purely Instrumental Method	50
IV. The Radiochemical Separation Method	55
V. Neutron Sources	56
VI. Sensitivities of Detection Attainable	59
VII. Areas of Application of Neutron Activation Analysis Non-biological Samples of Forensic Importance	63
VIII. Summary	67
Biological Applications of Activation Analysis	
I. General	70
II. Methods and General Applications	78
III. The Typical Use of Activation Analysis	93
IV. Elements	102
V. Activation Analysis of Tissue	107
Forensic Chemical analysis of Urine for Drugs	
I. Introduction	113
II. Collection and Preservation of samples	116
III. Analytical Techniques	118
IV. What to Look for	133
The Administration of a Forensic Science Laboratory	

I. Introduction	151
II. Administration of the Forensic Science Laboratory	152
III. Influence of Position in Government on Laboratory Administration	153
IV. The New Administrator	154
V. Centralization-Good or Bad	155
VI. The Laboratory Director	157
VII. What is Management	158
VIII. The Establishment of Standards	163
IX. The Examiner	165
X. Technicians	166
XI. Level of support	167
Examination of Fiduciary counterfeits and Forgeries	
I. Introduction	171
II. Methods used by Counterfeiters	172
III. Counterfeiting Equipment	174
IV. Examination of counterfeit Coins	180
V. Photography	188
VI. Analysis	189
VII. Using the Experts's Reports	190
VIII. Conclusions	193
