

CONTENTS

1.	INTRODUCTION Background; scope; acknowledgements; insurance.	1
2.	THE HEALTH AND SAFETY AT WORK ACT General provisions; codes of practice; factory inspectors.	3
3.	THE SCHOOL LABORATORY The problem areas; role of the head of department; discipline in the laboratory; class size; student teachers, technicians, etc.; supervision of pupils.	5
4.	FIRE PRECAUTIONS Aims; planning; fire-fighting equipment.	9
5.	HEATING THINGS The hazards; heat sources; techniques of heating.	11
6.	SAFETY EQUIPMENT Eye and face protection; protective clothing; safety screens (explosion screens); pipetting; transfer cabinets; transport and storage; fume cupboards; ventilation.	12
7.	GLASS UNDER STRESS Handling glass; removing glass stoppers; apparatus under pressure; eudiometers.	14
8.	COMPRESSED GASES Gas cylinders; autoclaves and pressure cookers; generation of gases.	16
9.	ELECTRICITY Mains electricity; other electrical hazards.	17
10.	RADIATION HAZARDS Stroboscopes and signal generators; microwave ovens; radiant heaters; lasers; sun; ultraviolet light; X-rays; radioactivity.	19
11.	BIOLOGICAL HAZARDS General principles; microbiology; diseases transmissible between animals and humans (zoonoses); allergy; poisonous plants.	21
12.	EXPERIMENTS ON PUPILS General guidelines; blood sampling; tasting chemicals; pulsed stimulation; biological feedback.	23
13.	DANGEROUS CHEMICALS Types of hazard; threshold limit values (TLV); human carcinogens; other poisons; flammable liquids; other hazardous chemicals; mixtures.	24
14.	SPILLAGE, ESCAPE AND DISPOSAL General principles; spillage of solids; spillage of liquids; escape of gases; radioactive materials; disposal of chemicals; spillage of micro-organism cultures; dispersal of infective material; escape of animals; disposal of biological material.	30

15. STORAGE OF CHEMICALS **32**

General considerations; location and design of stores; special cases.
