| INTRODUCTION AND PRODUCT DEFINITION                         | 1           |
| SUMMARY   | 2           |
| I. PRODUCTION, UTILIZATION AND TRADE                        | 4           |
| A. Production   | 4           |
| B. Utilization  | 4           |
| 1. The domestic market                                      | 4           |
| 2. The animal feed market                                   | 6           |
| 3. The starch market  | 6           |
| C. Trade  | 6           |
| II. THE EEC ANIMAL FEED MARKET                              | 8           |
| A. Cassava supply   | 8           |
| 1. Imports  | 8           |
| 2. Shipping   | 10          |
| 3. Pellet types   | 11          |
| 4. Freight rates  | 11          |
| 5. Trading methods  | 11          |
| 6. Ports of entry   | 12          |
| 7. Prices   | 13          |
| 8. Distribution channels in Europe                          | 16          |
| 9. Institutional structure of the import trade              | 16          |
| 10. Quality   | 17          |
| 11. EEC agricultural policy                                 | 19          |
| B. Compound animal feedingstuff production in EEC countries | 20          |
| 1. Background   | 20          |
| 2. Structure of the compound animal feedingstuff industry   | 24          |
| (a) Netherlands   | 25          |
| (b) Federal Republic of Germany                             | 26          |
| (c) Belgium   | 27          |
| (d) France  | 28          |

| C. Use of cassava in compound animal feedingstuffs | 29          |
| 1. Background                                      | 29          |
| 2. Netherlands                                     | 32          |
| (a) Present utilization                            | 32          |
| (b) Future demand                                  | 33          |
| 3. Federal Republic of Germany                     | 33          |
| (a) Present utilization                            | 33          |
| (b) Future demand                                  | 34          |
| 4. Belgium   | 36          |
| (a) Present utilization                            | 36          |
| (b) Future demand                                  | 37          |
| 5. France  | 37          |
| (a) Present utilization                            | 37          |
| (b) Future demand                                  | 38          |
| 6. Other EEC countries                             | 39          |
| 7. Conclusions                                     | 40          |
| III. THE STARCH MARKET                             | 42          |
| A. Introduction                                    | 42          |
| B. World trade                                     | 42          |
| C. The Japanese market                             | 44          |
| D. The United States market                        | 45          |
| E. Future prospects                                | 46          |
| IV. THE CASSAVA EXPORT INDUSTRY                    | 47          |
| A. Indonesia                                       | 47          |
| 1. Production                                      | 47          |
| 2. End-uses  | 47          |
| (a) Human consumption                              | 47          |
| (b) The starch industry                            | 49          |
| 3. Exports   | 49          |
| 4. Development of the pelletizing industry         | 50          |
