<i>About the author</i>	<i>xi</i>
<i>List of figures and tables</i>	<i>xiii</i>
<b>1 Introduction</b>	<b>1</b>
<b>2 Basic categories of scientometrics</b>	<b>7</b>
Concluding remarks	9
<b>3 Classification of the indicators of evaluative scientometrics</b>	<b>11</b>
Introduction	11
Classification scheme of evaluative indicators	13
Concluding remarks	21
<b>4 Publication growth in science</b>	<b>23</b>
Introduction	23
Relative publication growth index	27
Concluding remarks	34
<b>5 Scientific eminence of journals: the Garfield Factor and the Current Contribution Index</b>	<b>35</b>
Introduction	35
Standardised description of the Garfield Factor	37
Chances for citation and chances for citedness	38
The Garfield Factor and relative publication growth	40
Some empirical findings	42
An empirical model	45
Towards understanding the Garfield Factor	46
The GF and the SIC index	48

Relationship between quantity and quality: growth and specific indices	51
The Current Contribution Index (CCI)	54
The $\pi_v$ -index	59
Concluding remarks	61
<b>6 The ageing of scientific information</b>	<b>63</b>
Introduction	63
Annual citedness and annual citedness rates	65
Conversion of Journal Paper Citedness indices or Garfield Factors calculated for different time periods	71
Calculating the Estimated Number of Citations (ENC) by the Subsequent Impact Method (SIM)	74
Concluding remarks	77
<b>7 Scientometric indicators for the assessment of publications</b>	<b>79</b>
Introduction	79
Definition and function of comparative indicators of evaluative scientometrics	82
Relationships between three relative impact indicators (RW, RCR, RPS)	97
The Invitation Paradox	99
Model for the selection of relative publication impact indicators	103
Composite scientometric indicators	109
The $h$ -index and the $\pi$ -index	112
Concluding remarks	123
<b>8 Reference strategy: model of manifested communication through publications</b>	<b>125</b>
Introduction	125
Reference strategy	125
Laws of reference strategy	127
The model of manifested communication through publications	131
Concluding remarks	135

<b>9</b>	<b>Frequency of and strength of motives in referencing: the Reference Threshold Model</b>	<b>137</b>
	Introduction	137
	The frequency and strength of motives in referencing	140
	Concluding remarks	151
<b>10</b>	<b>Research contribution and share of credit of individual authors</b>	<b>153</b>
	Introduction	153
	Distributing credit of publications among co-authors	154
	Concluding remarks	159
<b>11</b>	<b>Standards in scientometric assessments</b>	<b>161</b>
	Introduction	161
	Bibliometric factors	163
	Selecting sets of papers and journals as reference standards	170
	Standardisation of citedness indicators using standardised publication and citation time windows	174
	Dependence of JPC on the type of publication	176
	Methods for obtaining absolute reference standards for relative impact indicators	179
	Delineating journals by subject field	182
	Methods for standardising GFs	186
	Methods for determining ordinal rank scores in sets of different size	189
	Standardising part-indicators	192
	Concluding remarks	193
<b>12</b>	<b>Scientometric assessments: application of scientometrics for the purposes of science policy</b>	<b>195</b>
	Introduction	195
	Scientometric methods for the evaluation of research organisations	201
	Evaluating publications of research institutes by a composite scientometric indicator	209
	Structure and eminence of the scientific activity on a national scale	223

Scientometric indicators and GDP	232
Concluding remarks	240
<b>13 Institutionalisation of Scientific Information: a scientometric model (ISI-S model)</b>	<b>243</b>
Introduction	243
The ISI-S model	246
Concluding remarks	255
<b>14 Conclusions</b>	<b>257</b>
<b>References</b>	<b>271</b>
<b>Author index</b>	<b>295</b>
<b>Subject index</b>	<b>301</b>
