Preface / iii

INTRODUCTION

Patterns in the use of laboratory techniques and procedures / xix

Techniques and procedures within a unit	Techniques and procedures in extending the lesson
Techniques and procedures within a total curricular pattern	Patterns in the use of procedures for long-term projects
Techniques and procedures within the lesson	A word in closing

Section One **PHYSICAL SCIENCE**

Chapter 1 **Molecular motion and forces / 1**

1.1 Diffusion	1.3b Introduction to Charles' law
1.1a Diffusion in air	1.4 Intermolecular forces
1.1b Diffusion in a liquid	1.4a Cohesion
1.1c "A chemist's garden"	1.4b Surface tension
1.1d Using indicators to show diffusion	Floating a razor blade or needle . . . Reducing surface tension . . . Surface tension and water drops . . . Surface tension boat . . . Surface tension turbine . . . Surface tension "defying gravity" . . . Water "sticks" to itself . . . Surface tension of soap bubbles . . . Plateau's fluid . . . Comparing specific gravities . . . Aniline drop . . . Additional soap films
1.1e Diffusion through a membrane	
1.1f Diffusion of a gas through a solid	
1.2 Brownian motion	
1.2a In liquids	
1.2b In gases	
1.2c A smoke box	
1.2d A large-scale model	
1.3 Kinetic theory of gases	
1.3a "Chaos" machine	1.4c Adhesion

The number and letter preceding the headings refer to chapters, sections, and subsections: the first number stands for the chapter, the number following the decimal is the section within the chapter, and a letter refers to a subsection within the section.

Material at the end of each chapter is designed to supplement the chapter. This section provides Cap-
sule Lessons, Books and Pamphlets, Films and Filmstrips, and Free and Inexpensive Materials.

A listing of the tables that appear in this book is given on p. 620 in the appendix.

- 1.4d** Capillarity
 - Wetness of water and mercury . . . Capillary tubes . . . Capillarity between glass

plates

- 1.5** Molecular dimensions using Langmuir's technique

Chapter 2 Matter: properties, changes, and conservation / 21

- 2.1** Properties of matter
 - 2.1a** General properties
 - Impenetrability . . . Comparing mass and weight . . . Inertia . . . Volume
 - 2.1b** Specific properties
 - Malleability . . . Ductility . . . Hardness
 - 2.1c** Measurement
 - Units . . . Optical micrometer . . . Parallax measurement of distance with the cross-staff . . . Simple micro balance
 - 2.2** Changes in matter
 - 2.2a** Physical change
 - Dissolving . . . Distillation . . . Change of phase of dry ice
 - 2.2b** Chemical change
 - Mixtures and compounds of iron and

sulfur . . . Physical and chemical properties of antimony and iodine . . . Rusting of iron . . . Making a blueprint . . . Making a photographic print . . . Fermentation

- 2.2c** Compounds into elements
 - Decomposition of water (electrolysis) . . . Decomposition of mercuric oxide (heat) . . . Release of oxygen from hydrogen peroxide . . . Release of oxygen from potassium chlorate
- 2.3** Conservation of matter in chemical changes
 - Chemical reaction in solution . . . Burning matches in a closed pressure flask . . . Ammonium dichromate volcano

Chapter 3 Weather and the atmosphere / 38

- 3.1** Temperature of the air
 - 3.1a** Thermometers
 - Air thermometer . . . Liquid thermometer . . . Thermometer scales . . . Maximum-minimum thermometer . . . Thermograph
 - 3.2** Moisture in the air
 - 3.2a** Relative humidity
 - Moisture in the air . . . Making a chart of relative humidity
 - 3.2b** Hygrometers
 - Wet- and dry-bulb thermometer . . . Psychrometer . . . Two direct-reading hygrometers
 - 3.2c** Dew point
 - 3.2d** Clouds
 - Artificial clouds in flask . . . Cloud in a bottle

- 3.2e** Water cycle
 - Rain gauge . . . Snow into rain
- 3.3** Composition of air
 - 3.3a** Oxygen and nitrogen
 - 3.3b** Carbon dioxide in the air
 - 3.4** Atmospheric pressure
 - 3.4a** Barometers
 - Aneroid barometer . . . Homemade aneroid barometer . . . Barograph
 - 3.5** Winds
 - 3.5a** Wind direction
 - Ferrel's law . . . Simple weather vane . . . Remote-indicating weather vane
 - 3.6** Weather maps
 - 3.6a** Interpreting weather maps
 - Isotherms . . . Three-dimensional model of a weather front
 - 3.6b** Setting up a weather station

Chapter 4 The earth's surface: land and water / 57

- 4.1** The earth's surface
 - 4.1a** Major land forms
 - 4.1b** Contour maps and scale models
 - 4.1c** Changes in the earth's surface
 - Uplifting of land: mountain forma-

tion . . . Faulting . . . Volcanic action . . . Delta formation . . . Meanders and oxbow lakes . . . Ground water and cave formation . . . Wells and springs . . . Weathering . . . Erosion . . . Erosion and

- loess . . . “Old” and “young” landscapes
- 4.1d** Demonstrating a seismic wave
- 4.2** Types of rocks
- 4.2a** Sedimentary rock
 - Fossils in sedimentary rock
- 4.2b** Metamorphic rock
- 4.2c** Igneous rock
- 4.3** Identification of minerals
 - Hardness (see 4.5b)
- 4.3a** Chemical identification
- 4.3b** Ultraviolet identification
- 4.3c** Crystal study
- 4.4** Oil and ore formations
- 4.4a** Oil and oil pockets
- 4.4b** Ores
- 4.5** Study of rocks
- 4.5a** Rock collections
 - Displaying collections . . . Rock classifications . . . Fossil collections . . . Mineral collections . . . Polishing rocks
- 4.5b** Hardness and compressibility of rocks and ores
 - Scratch test . . . Compressibility
- 4.6** Properties of water
 - Chemical properties of water
- 4.6a** Boiling point of water
 - Finding the boiling point of water
- 4.6b** Raising the boiling point
 - Dissolved salts in water . . . Raising the pressure
- 4.6c** Lowering the boiling point
- 4.6d** Freezing point
 - Methods of freezing water . . . Expansion of water on freezing
- 4.6e** Density
 - Surface tension (see 1.4b) . . . Hydrostatic pressure (see 16.5) . . . Heat capacity (see 18.42)
- 4.7** Purifying water
- 4.7a** Physical purification methods
 - Distillation . . . “Cake-tin” still . . . Commercial Liebig condenser . . . Homemade Liebig condenser . . . Filtration . . . Coagulation or flocculation . . . Sedimentation . . . Aeration
- 4.7b** Chemical purification methods
 - Chlorination . . . Ozonation . . . Softening water . . . Temporary hard water . . . Permanent hard water . . . Effect of hard water . . . Ion-exchange resins and chelating agents—Wetting agents
- 4.8** Water of crystallization
- 4.8a** Efflorescence
- 4.8b** Deliquescence

Chapter 5 Planets, stars, and other bodies / 81

- 5.1** Earth and its motions
- 5.1a** Introductory demonstrations of rotation and revolution
 - Charting length of day and night . . . Angles of sunlight on earth’s surface . . . Position of sun from day to day . . . Foucault’s proof of rotation . . . Sundial as evidence of rotation . . . Shape of earth
- 5.1b** Latitude and longitude
 - Time zone meridian . . . Finding latitude at night by North Star . . . Finding latitude during days of the Equinox
- 5.1c** The moon
 - Phases of the moon
- 5.2** Eclipses
- 5.2a** Model eclipse
- 5.2b** Projection eclipse
- 5.2c** Pinhole-camera coronagraph
- 5.3** The sky: observations, maps, and models
- 5.3a** Mapping the sky
 - Horizon silhouette chart . . . Homemade transit . . . Photographic star trails
- 5.3b** Projection planetariums
 - Globe planetarium . . . Paper-roll planetarium . . . Tin-can planetarium
- 5.3c** Astronomical globes and charts
 - Illuminated star chart . . . Florence flask celestial globe . . . Umbrella celestial dome
- 5.3d** Model of the solar system
- 5.3e** Telescopes
 - Refracting telescope . . . Galilean telescope . . . Reflecting telescope . . . Photographing through the telescope
- 5.3f** Spectroscopes
- 5.4** Satellites
- 5.4a** Trajectories
 - Launching a satellite
- 5.4b** Charting a satellite
- 5.4c** The period of a satellite

Chapter 6 Elements and compounds—their nature and reactions / 104

- 6.1** Alphabet of chemistry
6.1a Symbols and names
 Names . . . Self-testing device
6.1b Atomic diagrams
 Schematic atomic models
- 6.2** The presence of electrons in matter
- 6.3** Bonding
6.3a Ionic bonding
 Conductivity of fused NaCl
6.3b Covalent bonds
 Nature of covalent substances . . . Polar . . . Polar-nonpolar . . . Saturated-unsaturated
6.3c Coordinate covalent bonds
 Formation of coordinate covalent bond
6.3d Metallic bonds
 Temperature and metallic conductivity . . . Heat and electrolyte conductivity
6.3e Hydrogen bonding
 Hydrogen bonding in liquids
- 6.4** Models
6.4a Simple models
 Cardboard and thumbtacks . . . Tinkertoy and plywood
6.4b Constructing atomic models
 Two-dimensional models . . . Three-dimensional . . . Giant . . . Dynamic models
- 6.4c** Molecular models
 Polystyrene foam spheres . . . Scale models color coded . . . “Pop-It” beads . . . Sponge rubber . . . Colored rubber balls
- 6.4d** Crystal models
 Cardboard . . . Shadow . . . Bubble
- 6.5** Chemical reactions
6.5a Relative activities of elements
 Groups I, II, VI, VII, V . . . Group IV and electron sharing
6.5b Oxidation-reduction
 Oxidation state rules . . . Redox reactions . . . Nearly instantaneous oxidation-reduction . . . Electrolysis of aqueous Na₂SO₄ . . . Electrolysis of H₂SO₄ solution with Pb electrodes . . . Electrolysis in nonaqueous solution . . . Electricity by chemical reaction
- 6.5c** Types of molecular reactions
 Combination . . . Lighting and explosion of “hydrogen gun” . . . Decomposition . . . Single replacement . . . Double replacement . . . Catalysis . . . Autocatalysis

Chapter 7 Oxygen and hydrogen / 129

- 7.1** Oxygen: its preparation and properties
7.1a Classic experiments on the nature of combustion
 Simulating Priestley’s experiment . . . Simulating Lavoisier’s experiment
7.1b Preparation of oxygen and ozone
 Preparing oxygen by electrolysis of water . . . Sources of current . . . Acid concentrations . . . Gas collection . . . A simplified apparatus . . . Preparing oxygen from oxidizing agent . . . Potassium chlorate . . . Sodium peroxide . . . Sodium perborate . . . Hydrogen peroxide . . . Hypochlorites . . . Ozone
- 7.1c** Factors affecting oxidation
 Concentration of oxygen . . . Effect of particle size on oxidation reactions . . . Kindling temperature . . . Spontaneous combustion
- 7.1d** Flames
 Flame zones . . . Flame and conductivity . . . Luminous flame . . . Oxidizing and reducing flames . . . Davy safety lamp . . . Blast lamp . . . Water from a flame
- 7.2** Hydrogen: its preparation and properties
7.2a Testing for hydrogen
 Safety tube
7.2b Replacement from a dilute acid
7.2c Hydrogen from water
 By electrolysis . . . By active metals . . . By less active metals . . . Using steam . . . By immersion
- 7.2d** Properties and reactions of hydrogen
 Density . . . Reactions with oxygen . . . Making H₂O . . . Explosive mixtures . . . Burning hydrogen in chlorine . . . Re-

ducing metallic oxides

7.3^b Hydrogen peroxide

7.3a Oxidizing action of hydrogen peroxide

7.3b Reducing action of hydrogen peroxide

Chapter 8 Solutions / 154

8.1 Water

8.1a Properties of water

8.1b Water as a solvent

Solubility of sugar and sodium chloride . . . Increasing temperature increases solubility . . . Temperature and volatile solute . . . Pressure and gas solubility . . . Rate of solution

8.1c Purification of water

Distillation . . . Aeration . . . Coagulation

8.2 Properties of solutions

8.2a Suspensions, solutions, colloidal dispersions

Comparative demonstrations of dispersions . . . Supersaturation

8.2b Gas solubility

NH₃ or HCl fountain

8.2c Heat of solution

8.2d Miscible and nonmiscible liquids

8.2e Colloids

Types . . . Tyndall effect . . . Metals in suspension . . . Sulfur in suspension . . . Coagulation . . . Electrodeposition . . . Adsorption . . . Making an emulsion

8.2f Crystals

Copper sulfate . . . Potassium bromate . . . Methods for growing crystals . . . Crystal blossoms . . . Crystal crown . . . Crystal cloud . . . Crystal shrub . . . Crystal shape

8.3 Concentrations of solutions

8.3a Concentrations in physical units

Weight . . . Volume . . . Weight per weight . . . Weight per volume

8.3b Concentrations in chemical units

Molarity . . . Molality . . . Normality . . . Dilution . . . Commercial concentrations

8.3c Standard laboratory reagents

Acids and bases . . . Other solutions

8.4 Acids, bases, and salts

8.4a Acids

Properties . . . General preparation

8.4b Bases

Properties . . . General preparation

8.4c Salts

Properties in solution . . . General preparation . . . Hydrolysis

8.4d Properties of ionic solutions

Conductivity of pure water and solutions

8.4e Neutralization

Chemically equivalent quantities . . . Electrolytic titration

8.4f Indicators

Indicator behavior and common ion effect . . . Preparation . . . Meaning of pH

8.4g Preparation of buffer solutions

Clark and Lubs stock solutions . . . McIlvaine's stock solutions

8.4h Specific gravity determinations

8.4i Colorimetric determinations

8.4j Gravimetric determinations

Chapter 9 The chemistry of sulfur, phosphorus, carbon and silicon / 186

9.1 The chemistry of sulfur

9.1a Forms of sulfur

Rhombic . . . Monoclinic . . . Amorphous

9.2 Chemical properties of sulfur

9.2a Preparing zinc sulfide

9.2b Hydrogen sulfide

Preparation and properties . . . Metallic sulfides

9.2c Sulfur dioxide

Preparing sulfur dioxide by direct combination . . . Laboratory preparation . . . Liquefying sulfur dioxide . . . Properties

9.3 Sulfuric acid

9.3a Preparation from sulfurous acid

9.3b Contact process

9.3c Properties of sulfuric acid

Physical . . . Chemical . . . As dehydrating agent . . . As oxidizing agent

9.3d Test for sulfate ion

9.3e Thiosulfate in volumetric analysis

9.4 The chemistry of phosphorus

Handling phosphorus

9.4a Oxidation of phosphorus

The "glow" of phosphorus

- 9.4b** Phosphates
Distinguishing reactions of phosphoric acids
- 9.5** The chemistry of carbon
- 9.5a** Allotropic forms of carbon
Production of charcoal and coke by destructive distillation
- 9.5b** Properties of carbon
Carbon (charcoal) as reducing agent . . . Carbon as adsorption agent
- 9.5c** Inorganic compounds of carbon
Carbon monoxide . . . Carbon dioxide . . . Preparation of CO_2 . . . CO_2 fire ex-

tinguisher . . . CO_2 supports combustion of magnesium . . . Carbonic acid (CO_2 in water) . . . Carbonates, normal and acid . . . Carbonates into bicarbonate . . . pH of carbonates and bicarbonates

- 9.6** The chemistry of silicon
- 9.6a** Preparation of silicon
- 9.6b** Some compounds of silicon
Glass . . . Silicon glass . . . Making and staining glass . . . Other kinds of glass . . . Silicate gardens . . . Silicate ion exchange . . . Etching glass . . . Water-repellant property of silicones

Chapter 10 Metals and the alkali metals / 207

- 10.1** Structure and properties of metals
- 10.1a** Atomic structure
- 10.1b** Crystal structure
- 10.1c** Physical properties of metals
Metallic luster and opacity . . . Malleability and ductility . . . Thermal and electrical conductivity . . . Metalloids
- 10.1d** Chemical properties of metals
Activity series . . . Activity of metals as reducing agents . . . Replacement of metals from their salt solutions . . . Amphoterism
- 10.1e** Alloys
Making solder . . . Amalgams
- 10.2** Preparation of metals from their ores
- 10.2a** Gold
- 10.2b** Metals readily obtained from their common ores
Mercury . . . Copper . . . Silver . . . Lead . . . Zinc
- 10.2c** Metals less readily obtained from ores
Iron oxide . . . Tin . . . Separation of

ores by flotation . . . Reducing ores by electrolysis

- 10.3** Tests for various metals
- 10.3a** Sulfide tests
- 10.3b** Flame tests
- 10.3c** Borax bead tests
- 10.3d** Cobalt nitrate test
- 10.3e** Specific tests
Testing for iron . . . Spark test for iron alloys . . . Colored ions of iron . . . Amphoterism of aluminum ions
- 10.4** The alkali metals
- 10.4a** Chemistry of sodium
Preparation of sodium . . . Reactions of sodium . . . Sodium hydroxide . . . Sodium chloride . . . Solvay process—making sodium bicarbonate . . . Sodium peroxide . . . Migration of sodium ions through glass
- 10.4b** Chemistry of potassium
Preparation . . . Compounds and reactions

Chapter 11 The halogens / 230

- 11.1** The chemistry of fluorine
- 11.1a** Laboratory preparation of hydrogen fluoride
Hydrofluoric acid and silicon fluoride . . . Etching glass
- 11.1b** Freon
- 11.2** The chemistry of chlorine
- 11.2a** Preparation of chlorine
Electrolytic preparation . . . Laboratory preparation . . . Alternate methods

. . . Quick preparation of chlorine water

- 11.2b** Chemical properties of chlorine
Combustion of antimony . . . Combustion of steel wool . . . Combustion of copper . . . Combustion of sodium to produce NaCl . . . Burning H_2 in Cl_2 . . . Decoloring litmus paper . . . Producing soot and HCl . . . Bleaching; the need for water . . . Action of chlorine on

- Preparation of acetylene . . . Metal acetylides
- 14.2d** Aromatic hydrocarbons: benzene series
- 14.3** Fuels
- 14.3a** Destructive distillation of bituminous coal
- 14.3b** Composition of petroleum
- 14.3c** Catalytic cracking of hydrocarbons
- 14.3d** Common fuels
 - Destructive distillation of wood (see 9.5a) . . . Ethyl alcohol as sootless fuel . . . Fuel gel . . . Methane as fuel . . . Propane and butane as fuels . . . Acetylene
- 14.4** Hydrocarbon derivatives
- 14.4a** Halogen substitution products: organic halides
 - Beilstein test . . . Iodoform preparation . . . Preparation of chloroform
- 14.4b** Alcohols
 - Solubility test . . . Iodoform test for ethyl alcohol . . . Formaldehyde test for methyl alcohol . . . Preparation of an alcohol
- 14.4c** Ethers
 - Inflammability of ether
- 14.4d** Aldehydes and ketones
 - Simple test for formaldehyde and acet-
- aldehyde . . . Reactions which distinguish aldehydes from ketones
- 14.4e** Organic acids
 - Properties . . . Preparation of acetic acid . . . Preparation of oxalic acid
- 14.4f** Esters
 - Ethyl acetate . . . Methyl salicylate . . . Amyl acetate . . . Ethyl butyrate
- 14.4g** Oils and fats
 - Unsaturation . . . Soap
- 14.5** Plastics
- 14.5a** Structural models to demonstrate polymerization
- 14.5b** Preparation of plastics
 - Bakelite . . . Phenol-formaldehyde resin . . . Thiokol (a polysulfide elastomer) . . . Urea-formaldehyde plastic . . . Acrylic plastics . . . Cellulose acetate
- 14.5c** Flame and odor tests for plastics
- 14.5d** Working with plastics
 - Pressed plastics . . . Sheet plastic . . . Plexiglas and Lucite
- 14.6** Analytical techniques in organic chemistry
 - Paper chromatography techniques . . . Adsorption chromatography

Chapter 15 Consumer chemistry / 301

- 15.1** Clothing fibers
- 15.1a** Microscopic inspection
- 15.1b** Burning tests
- 15.1c** Chemical tests
 - Distinguishing plant and animal fibers . . . Fiber test kit . . . Color tests . . . Distinguishing silk from wool . . . Establishing the percentage of wool
- 15.1d** Preparing textile fibers
 - Mercerizing cotton . . . Preparing nylon . . . Preparing a viscose fiber . . . Cuprammonium process . . . Preparing cellulose
- 15.2** Dyeing fabrics
- 15.2a** Dye classification
 - Direct dyes . . . Mordant (adjective) dyes . . . Chrome colors . . . Vat dyes . . . Sulfur dyes . . . Ingrain dyes . . . Dispersion dyes
- 15.2b** Dyeing in the laboratory or at home
- 15.2c** Tie dyeing
- 15.2d** Preparing a mordanted dye
- 15.3** Nutrients in food
- 15.3a** Testing for fats
- 15.3b** Test for proteins
 - Biuret test . . . Xanthoproteic test . . . Millon test
- 15.3c** Testing for starch
 - Converting starch into simple sugar . . . Benedict's solution . . . Testing for simple sugar
- 15.3d** Testing for sucrose
 - Inverting complex sugar into simple sugar
- 15.3e** Testing for minerals
 - Chlorides in food . . . Iron in liver . . . Sodium in foods
- 15.3f** Testing for water
- 15.3g** Testing for vitamins
 - Test for vitamin C . . . For vitamin A
- 15.4** Cosmetics
- 15.4a** Perfumes

- 15.4b Toothpastes and powders
- 15.4c Miscellaneous products
- 15.4d Analyzing cosmetics
- 15.5 Maintenance of materials
- 15.5a Building materials
 - Cement . . . Waterproofing concrete . . .
 - Plaster . . . Mortar
- 15.5b Adhesives
 - Plastic cement . . . Plastic varnish
- 15.5c Paints and lacquers
 - Outside paint . . . Stucco or brick paint . . . Enamels . . . Rust-proofing paint . . . Aluminum paint
- 15.5d Fireproofing and waterproofing
 - Fireproofing fabrics . . . Fire-extinguishing liquid . . . Fireproofing canvas . . . Waterproofing fabrics
- 15.6 Household chemistry
- 15.6a Stain removal
 - Ink eradicator . . . Stain removers . . . Oil stains . . . Rust and ink remover . . . Dry-cleaning fluid
- 15.6b Rust control
- 15.6c Soap
 - Making soap . . . Cleaning action of soap . . . Cleaning action of detergents
- 15.6d Bleaches
 - Javelle water

Section Three **PHYSICS**

Chapter 16 **Pressure / 324**

- 16.1 Air pressure
- 16.1a Weight of air
- 16.1b Pressure of air
- 16.1c Measuring air pressure
 - Handling mercury . . . Torricelli barometer . . . J-tube barometer . . . Direct-reading mercury barometer . . . Vacuum in space above mercury in a barometer . . . Buoyancy of air
- 16.1d Changes in atmospheric pressure
 - Aneroid barometer
- 16.2 Air pressure and its effects
- 16.2a Siphon
 - Fountain in a bottle
- 16.2b Pumps
 - Lift . . . Force . . . Centrifugal and gear
- 16.2c Magdeburg hemispheres
 - Vacuum pumps
- 16.3 Boyle's law
 - Expansion and compression of air
- 16.4 Pressure gauges
 - Open manometer
 - Closed manometer
 - Bernoulli effect
 - Venturi tube . . . Ping-pong ball and funnel . . . Ping-pong ball and compressed-air stream . . . Effect of air stream between two suspended objects . . . Cardboard disk and spool . . . Applications of Bernoulli's principle
- 16.5 Liquid pressure
 - Hydraulic balance
- 16.5a Pressure: depth and direction
 - Marriot's bottle . . . Pressure bottle . . . U-tube gauge
- 16.5b Measuring liquid pressure
 - Pascal's vases . . . Pascal's syringe . . . Hydraulic press
- 16.6 Upward pressure in water
 - Measuring upward pressure
- 16.6a Archimedes' principle
 - Archimedes' balance . . . Hydrometers . . . Components of force on a sailboat . . . The crane problem

Chapter 17 **Force and motion / 352**

- 17.1 Force
 - 17.1a Composition and resolution of forces
 - Using spring balances . . . Using marked ropes . . . Single and multiple forces . . . Using commercial component devices . . . Curtain-rod parallelogram of forces
 - 17.1b Torque: moment of force
 - Pivoted meterstick . . . Moment wheel
 - 17.1c Center of gravity and stability
- 17.2 Motion

- 17.2a** Newton's first law
 - Bodies at rest . . . Measuring inertial mass . . . Towing a "frictionless" cart . . . Swinging a suspended weight
- 17.2b** Bodies in motion: momentum and inertia
 - "Frictionless" objects . . . Duration of force (impulse)
- 17.2c** Newton's third law
 - Reaction balloon . . . Reaction car . . . Hero engine . . . Blowtorch engine . . . Model electric trains . . . Cannon and two cars . . . Swing on rollers . . . Other devices
- 17.2d** Newton's second law
 - Demonstrating acceleration with toy trains . . . Timing devices . . . Device for releasing steel balls simultaneously . . . Independence of gravitational acceleration and weight . . . Shape and rate of fall . . . Acceleration of falling bodies . . . Inclined plane as special case of free fall . . . Measuring gravitational acceleration
- 17.2e** Projectile motion
 - Tracing the path of a bullet . . . Two balls: one shot, one dropped . . . Other devices
- 17.2f** Rotation and vibration
 - Simple harmonic motion . . . Periodic motion as a "shadow" (linear) of uniform circular motion . . . Pendulum . . . Hooke's law . . . Centripetal force . . . Gyroscopes
- 17.3** Energy
 - 17.3a** Forms of energy
 - Light . . . Heat . . . Mechanical . . . Chemical . . . Electrical . . . Nuclear
 - 17.3b** Conversion of energy
 - From chemical to thermal to mechanical . . . Starting with chemical energy . . . Starting with nuclear energy
- 17.4** Work
 - 17.4a** Efficiency and friction
 - Friction . . . Coefficient of friction . . . Friction and heat
 - 17.4b** Efficiency of machines
 - Efficiency of movable pulleys . . . Efficiency of toy electric locomotive . . . Efficiency of small machine
- 17.5** Power
 - 17.5a** Horsepower
 - Watt's experiment . . . Measuring horsepower with simple Prony brake . . . Measuring horsepower with electrical dynamometer . . . Measuring boy power
- 17.6** Machines
 - 17.6a** Levers
 - First-class . . . Second-class . . . Third-class
 - 17.6b** Pulleys
 - Combinations of pulleys
 - 17.6c** Wheel and axle
 - 17.6d** Inclined plane
 - 17.6e** Gears

Chapter 18 Heat and heat engines / 392

- 18.1** Heat
 - 18.1a** Measuring temperature
 - Air thermometer . . . Calibration
 - 18.2** Thermal expansion
 - 18.2a** Solids
 - Comparing linear and surface expansion
 - 18.2b** Expansion of liquids
 - Making a liquid thermometer . . . Making a mercury thermometer
 - 18.2c** Thermal expansion of gases
 - Air thermometers . . . Gay-Lussac's law . . . Charles' law
 - 18.3** Heat transfer
 - 18.3a** Conduction
 - Standard demonstration conductometer . . . Electric conductometer . . . Davy safety lamp . . . Conduction in liquids
 - 18.3b** Convection
 - In liquids . . . Other devices for showing convection . . . In gases
 - 18.3c** Radiation
 - Heat transfer through a vacuum . . . Radiometer . . . Reflecting and focusing radiation . . . Absorption of radiant heat . . . Pressure of expanding air
 - 18.4** Law of heat exchange

- 18.4a** Specific heat
 - Comparing specific heat of metals . . .
 - Specific heat of water . . . Specific heat of a metal . . .
 - Homemade calorimeter . . . Heat equivalent of electrical energy
- 18.4b** Heat of fusion
 - Method of mixtures
- 18.4c** Heat of vaporization (or condensation)
 - Method of mixtures
- 18.4d** Effect of pressure on the boiling point of water
 - Pressure of a saturated vapor
- 18.5** Energy used in effecting a change of state
- 18.5a** Cooling by evaporation
- 18.5b** Cooling and change of state
 - Change of state of acetamide . . . Rapid evaporation: dry ice . . .
 - Formation of fog: condensation of water vapor
- 18.6** Mechanical equivalent of heat

- Joule's law
- 18.7** Heating systems
- 18.7a** Hot-air convection heating system
- 18.7b** Steam heating systems
 - One-pipe system . . . Two-pipe system
- 18.7c** Hot-water heating system
- 18.8** Heat engines
- 18.8a** External-combustion engines
 - Steam engines . . . Model steam engines . . . Valve gear . . . Steam turbines
- 18.8b** Internal-combustion engines
 - Combustion chamber . . . Internal-combustion cannon . . . Internal combustion can
- 18.8c** Air-fuel mixtures
 - Explosive mixture can . . . Combustion mixture tubes . . . Model gasoline engines . . . Operating cutaway engines . . . Diesel engines

Chapter 19 Sound and music / 426

- 19.1** Properties of sound
- 19.1a** Propagation of sound
 - Sound in a vacuum . . . Sound through air . . . Sound through a liquid . . . Sound through a solid
- 19.1b** Speed of sound
- 19.2** Models of sound waves
- 19.2a** Mechanical models
 - Compression and rarefaction . . .
- 19.2b** Making sound waves "visible"
 - Tracing of a vibrating tuning fork . . . Manometric flame apparatus . . . Rotating mirror . . . Sensitive flame . . . Showing standing waves . . . Waves and pulses with a slinky . . . Graphing sound waves with a neon lamp oscillograph . . . Using a cathode-ray oscilloscope . . . Ultrasonics . . . Focusing sound waves on a powdered surface
- 19.2c** Generating waves
 - The ripple tank (see Chapter 20)
- 19.3** Characteristics of sound waves

- 19.3a** Resonance
- 19.3b** Beats with a sonometer
- 19.3c** Doppler effect
- 19.3d** Finding the wave length of a tuning fork
- 19.3e** Making sounds visible in a vibrating column of air
- 19.3f** Magnetic audio-generator
- 19.4** Absorption of sound
- 19.4a** Acoustics
- 19.4b** Sound-absorbing materials
- 19.4c** Decibels
- 19.5** Music
- 19.5a** Overtones
 - Sonometer . . . Harmonics of a vibrating string
- 19.5b** Musical instruments
 - Basic wind instrument . . . Organ pipes . . . String instruments . . . Percussion instruments . . . Human voice
- 19.5c** Simple harmonics
 - Siren disk . . . Making and using a siren disk . . . Savart's wheels

Chapter 20 Light and color / 447

- 20.1** Properties of light
- 20.1a** Light travels in straight lines
 - Casting of shadows . . . Pinhole camera

- 20.1b** Reflection and refraction
- 20.1c** General devices for work with light
 - Optical bench . . . Optical disk . . . Large

- smoke box . . . Making touchpaper . . .
- Sources of parallel-beam light . . . Demonstrating a reflected beam . . . Parabolic mirrors . . . Periscope . . . Reflecting-image range finders
- 20.1d** Refraction
 - Demonstrating a refracted beam of light . . . Snell's law
- 20.1e** Prisms
 - Inexpensive student-made prisms
- 20.1f** Lenses
 - Convex lense . . . Concave lens . . . Refraction in lenses . . . Finding the focal length of a lens . . . Lens aberrations . . . Model of the lens of the eye . . . Near-sightedness and farsightedness
- 20.2** Ripple tank techniques
- 20.2a** Construction of ripple tank apparatus
 - The tank . . . Wave generation . . . Motor-driven vibrators
- 20.2b** The study of waves
 - Propagation of waves . . . Reflection: plane-parallel incident waves . . . Reflection from concave and convex surfaces . . . Reflection of circular waves by a parabola . . . Reflection of straight waves by a parabola . . . Circular waves in an ellipse . . . Measuring wave length . . . Standing waves . . . Huygens' principle and diffraction . . . Interference . . . Refraction . . . Focusing by a lens . . . Total internal reflection
- 20.3** Combinations of lenses and mirrors
- 20.3a** Telescopes
 - Reflecting . . . Astronomical . . . Terrestrial
- 20.3b** Other optical instruments
 - Compound microscope . . . Prism spectroscope . . . Projector
- 20.3c** Building microscopes
 - Simple microscope . . . Tongue depressor microscope . . . Compound microscope
- 20.4** Illumination
- 20.4a** Measuring luminous intensity
 - Joly photometer . . . Bunsen photometer
- 20.4b** Measuring illuminance
 - Photoelectric photometer . . . Deriving the inverse-square law experimentally
- 20.5** Color
- 20.5a** Analysis of white light: the spectrum
 - Color dispersion by a prism . . . "Rainbow" . . . Grating spectroscope . . . Prism spectroscope . . . Sodium absorption lines
- 20.5b** Measuring the wave length of any part of the visible spectrum
 - Thin film diffraction
- 20.5c** Additive mixing of spectrum colors
 - With a prism . . . With a transparent color wheel . . . With a color box . . . With projected colors
- 20.5d** Subtractive colors
 - Colored objects . . . Opaque (painted) color wheel . . . Subtractive and additive colors compared . . . Making a color wheel . . . Absorption of light by pigments
- 20.6** Monochromatic light
- 20.6a** Yellow light
- 20.6b** "Invisible" light
 - Infrared . . . Ultraviolet . . . Focusing infrared light . . . Polarized light
- 20.7** Photographic equipment
- 20.7a** Print box
- 20.7b** Portable darkrooms
 - Loading box . . . Loading bag . . . Daylight printing and enlarging
- 20.7c** Simple enlarger
- 20.8** Motion pictures
 - Persistence of vision . . . Sound track and photocell
- 20.9** Stroboscope
 - From an erector set . . . Taking stroboscopic pictures

Chapter 21 **Currents and fields / 496**

- 21.1** Electrostatics
- 21.1a** Presence of electrostatic charges: electro-scope
 - Student-made electroscopes . . . Projec-

tion electroscope . . . Sensitive and stable electrocope and electrometer . . . Effect of charge on electrocope . . . Simple electrostatic attraction and re-

- pulsion . . . Dancing dolls . . . Electrostatic plastics
- 21.1b** Quantitative measurement of electrostatic repulsion
 - Induced electrostatic charges . . . Contact and induction charging of electroscope . . . Using the electroscope to determine sign of charge . . . Site of electrostatic charge . . . Standard pear-shaped electrostatic charging form
- 21.1c** Kelvin waterdrop electrostatic generator
- 21.1d** Van de Graaff generator
- 21.1e** Coulomb's law
- 21.2** Storing electric charges
- 21.2a** Leyden jar
- 21.2b** Electrophorus
- 21.2c** Capacitors
 - Principle of the capacitor . . . Demonstrating high-voltage capacitors . . . Measuring potential
- 21.3** Current electricity
- 21.3a** Conductors
 - Fall of potential
- 21.3b** Conductors and nonconductors
- 21.3c** Simple circuits
- 21.3d** Resistance in series and in parallel
- 21.3e** Ohm's law
 - Effect of temperature on a resistance
- 21.3f** Fuses
- 21.3g** Measuring resistance
 - Slide-wire bridge . . . Standard Wheatstone bridge
- 21.4** Magnetic fields
- 21.4a** Properties of magnets
 - Magnetic materials . . . "Natural" magnet . . . Attraction and repulsion of poles . . . Test tube magnet . . . Needle magnet model . . . Measuring magnetic force: the inverse-square law
- 21.4b** The earth's magnetic field
 - Principle of magnetic compass . . . Making a navigational compass . . . Dipping needle
- 21.4c** Demonstrating magnetic field patterns
- Temporary patterns . . . Permanent magnetic patterns . . . Pattern in wax . . . Photographing lines of force
- 21.4d** Making "permanent" magnets
 - Magnetizing with the earth's field . . . Magnetizing with a coil . . . Barkhausen effect
- 21.5** Electromagnetism
- 21.5a** Magnetic field around a conductor
 - Making a galvanometer . . . Oersted's experiment . . . Using iron filings or midget compasses . . . Using oils and seeds
- 21.5b** Properties of electromagnets
- 21.5c** Magnetic field resulting from electric field
- 21.5d** Applications of electromagnetism
 - Lifting magnets . . . Electric bell . . . Making electromagnets
- 21.5e** Electric motors
 - Principle of the electric motor: the commutator . . . Demonstration motor . . . Alternating-current motors . . . Electric motor efficiency
- 21.5f** Electric meters
 - D'Arsonval movement . . . Measuring voltage . . . Care in using electrical meters . . . Meter for measuring resistance . . . Voltmeter-ammeter . . . A.c. meters
- 21.6** Electromagnetic induction
- 21.6a** Using a galvanometer to show small currents
- 21.6d** Faraday's experiment
- 21.6c** Induction in a coil
- 21.6d** Henry's experiment
 - Commercial induction coils . . . Current induced by earth's magnetic field
- 21.6e** Self-induction
- 21.6f** Generators
 - Building generators . . . Motors and generators
- 21.6g** Lenz's law
- 21.6h** Transformers
 - Step-up transformer . . . Building a transformer

Chapter 22 Electronics / 534

- 22.1** Communication by wire
 - Principle of telephone transmitter . . . Model telephone
- 22.1a** Telegraph
- 22.1b** Telephone
- 22.1c** Microphone

- 22.2** Electrical communication
- 22.2a** Electromagnetic waves
 - Transmitting and receiving electro-
magnetic waves . . . Changing electro-
magnetic waves into sound waves . . .
 - Demonstrating resonance with loop
oscillator and receiver . . . Diode as rec-
tifier
- 22.2b** The triode
 - Principle . . . Triode filament tempera-
ture and plate current . . . Plate voltage
and plate current . . . Grid voltage and
plate current . . . Triode amplification
- 22.2c** Radio reception
 - Radio detection . . . Radio receiver de-
tection and amplification

- 22.2d** Oscillation
 - Demonstrating oscillation . . . Trans-
mission of speech and music
- 22.2e** Transistors
 - Solar battery-powered receiver . . .
 - Transistor amplifier . . . Regenerative
receiver . . . Short-range voice trans-
mitter . . . “Complementary” transistor
receiver . . . Photocell relay
- 22.2f** Television
 - FM sound signal . . . Antennas . . . AM
video signal . . . Crystal TV pickup . . .
 - Rectilinear propagation of video sig-
nal . . . Picture tube . . . Scanning . . .
 - Screen phosphors . . . High-voltage sup-
ply . . . Color television

Chapter 23 Nuclear and solar energy / 557

- 23.1** Particles and radiation
- 23.1a** Path of electrons
- 23.1b** Modification of Thomson e/m experi-
ment
- 23.1c** Detecting radioactive substances
 - With electroscope . . . Discharge of elec-
troscope by x-rays . . . Discharge of elec-
troscope by gamma rays . . . With Gei-
ger counter . . . Penetration by beta
and x-rays . . . Tracks in nuclear emul-
sions
- 23.1d** Scattering
 - Rutherford scattering
- 23.1e** Cloud chambers
- Commercial alpha-track chamber . . .
Diffusion cloud chamber
- 23.1f** Observing scintillations
 - With microscope . . . With spinhari-
scope . . . Using photographic film
- 23.1g** Mass spectrograph analogy
- 23.1h** Measuring radiation
 - Geiger counter principles . . . 110-volt
a.c. Geiger counter . . . Battery Geiger
counter . . . Absorption of gamma rays
. . . Inverse-square law . . . X-ray absorp-
tion . . . Plotting half-life of isotopes
- 23.1i** Radioautographs
- 23.2** Solar energy

Chapter 24 Engines: automobiles, airplanes, and rockets / 576

- 24.1** Automobile
 - Measuring lift, drag, air speed
- 24.1a** Complete automobile engine
- 24.1b** Transmission
 - Standard . . . Automatic
- 24.1c** Differential
- 24.1d** Cooling system
- 24.1e** Electrical system
- 24.1f** Ignition system
- 24.2** Airplane
- 24.2a** Lift
 - Simple airfoils . . . Airflow over wing
. . . Streamlining . . . Shock waves
- 24.2b** Classroom wind tunnel
- 24.2c** Stress on flying planes
 - Gravitational . . . Torsional forces . . .
 - “Stressed” construction
- 24.2d** Controlling airplanes
 - Demonstrating control of surface reac-
tions
- 24.3** Rockets
- 24.3a** Measuring thrust
- 24.3b** Jet-propelled models
 - CO₂ jet plane . . . CO₂ jet racing car . . .
 - CO₂ jet rocket ship . . . Powder-propel-
lant rocket . . . Liquid-propellant jet

Section Four **TECHNIQUES AND TOOLS FOR THE TEACHER**

Chapter 25 Skills and tools in the laboratory / 590

- | | |
|---|--|
| 25.1 Laboratory techniques | 25.2 Working with metal and glass |
| 25.1a Transferring materials | 25.2a Working with metal |
| 25.1b Preventing “suck-back” | 25.2b Working with glass |
| 25.1c Preventing “bumping” and splashing | 25.3 Making simple laboratory equipment |
| 25.1d Washing glassware | 25.3a Basic laboratory equipment |

Chapter 26 Science facilities for a science program / 606

- | | |
|---|--|
| 26.1 Space for storage | 26.3 Student squads |
| 26.1a Closed storage | 26.3a Suggested squad activities |
| 26.1b Open storage | 26.4 Safety in laboratory and classroom |
| 26.2 Work facilities | 26.4a Disposal of laboratory wastes |
| 26.2a Space for work | 26.4b Handling gases |
| 26.2b Water supply | 26.4c General safety rules |
| 26.2c Electricity | 26.4d Safety suggestions in chemistry |
| 26.2d Darkroom and photographic supplies | 26.4e Safety suggestions for physics teachers |
| 26.2e Heating equipment | 26.5 Getting information on facilities and supplies |
| 26.2f Refrigeration | |

Section Five **APPENDIX**

Reference tables / 620

Suggested readings and supplementary techniques / 624

Bibliography: books for a science library / 628

Films and filmstrips / 641

Directory of manufacturers, distributors, and supply houses / 657

Index / 660
