

CONTENTS

1. Mathematical Symbols

- | | |
|--|----|
| 1. A five-minute history of mathematical symbols | 14 |
| 2. Subscripts | 16 |
| 3. One symbol with several meanings | 16 |
| 4. What is a theorem? | 18 |
| 5. The notation Q.E.D. | 19 |
| ★6. Function notation | 19 |
| 7. The "three dots" notation | 20 |
| ★8. The absolute value notation | 22 |

2. Mathematical Induction

- | | |
|-------------------------------|----|
| 1. An example | 24 |
| 2. Some counter-examples | 24 |
| 3. The general principle | 27 |
| 4. Further examples | 28 |
| 5. The factorial notation | 32 |
| 6. The Pascal triangle | 33 |
| ★7. The binomial coefficients | 36 |

3. Magic Squares

- | | |
|--|----|
| 1. The simplest magic square | 40 |
| 2. Panmagic squares | 45 |
| 3. A general formula for magic squares | 47 |
| 4. Magic cubes | 50 |
| 5. An old letter | 53 |
| 6. More and deeper | 56 |

6 Contents

4. Inequalities	
1. Introduction	58
2. The elementary theorems	58
★3. Some more complicated inequalities	65
★4. The arithmetic and geometric means	67
5. Mathematical Induction in Geometry	
1. Some simple examples	72
2. Polygons	76
3. Geographical maps and Euler's Theorem	79
4. A closer look at Euler's Theorem	84
5. An application of Euler's Theorem	86
6. The Four-Color Problem	
1. Unsolved problems	90
2. Statement of the problem	91
3. A brief history of the problem	93
★4. A simplification of the problem	94
★5. The five color theorem	96
★6. On the torus	98
7. The Conic Sections	
1. The right circular cone	102
2. The conic sections as sections of a cone	105
3. The conic sections as plane curves	106
4. The ellipse	110
5. The hyperbola	112
6. The parabola	113
8. Extreme Values Without Using Calculus	
1. A taste of analytic geometry	116
2. What Calculus can do	121
3. The maximum value of a function	122
4. The minimum value of a function	124
★5. The relative maximum and relative minimum	126
6. Some simple applications	128
★7. More complicated examples	133
9. Geometric Extremes	
1. Two simple examples	138
2. The spider and the fly	144

3. More about the conic sections	146
★4. The isoperimetric problem	153
★5. A criticism	157
10. The Theory of Numbers	
1. Introduction	160
2. Definitions	161
3. How many primes are there?	164
4. Twin primes	165
5. Some unsolved problems	167
6. The greatest common divisor	168
★7. Pythagorean triple	171
★8. Fermat's last theorem	175
11. Permutations and Combinations	
1. Two examples	177
2. A fundamental principle	179
3. Permutations	181
4. Combinations	183
5. More difficult problems	185
12. Mathematical Intuition	189
Answers to Problems	206
Bibliography	219
Index	221
