

CONTENTS

CHAPTER 1

Ordinary Differential Equations of the First Order

- 1.1 Basic Concepts and Ideas, 1
- 1.2 Geometrical Considerations. Isoclines, 9
- 1.3 Separable Equations, 13
- 1.4 Equations Reducible to Separable Form, 25
- ✓ 1.5 Exact Differential Equations, 28
- ✓ 1.6 Integrating Factors, 31
- ✓ 1.7 Linear First-Order Differential Equations, 33
- 1.8 Variation of Parameters, 39
- 1.9 Electric Circuits, 41
- 1.10 Families of Curves. Orthogonal Trajectories, 48
- 1.11 Picard's Iteration Method, 54
- 1.12 Existence and Uniqueness of Solutions, 57

CHAPTER 2

Ordinary Linear Differential Equations

63

- 2.1 Homogeneous Linear Equations of the Second Order, 63
- 2.2 Homogeneous Second-Order Equations with Constant Coefficients, 67
- 2.3 General Solution. Basis, Initial Value Problem, 70
- 2.4 Real Roots, Complex Roots, Double Root of the Characteristic Equation, 74
- 2.5 Differential Operators, 80
- 2.6 Free Oscillations, 82
- 2.7 Cauchy Equation, 92
- 2.8 Existence and Uniqueness of Solutions, 94
- 2.9 Homogeneous Linear Equations of Arbitrary Order, 101
- 2.10 Homogeneous Linear Equations of Arbitrary Order with Constant Coefficients, 104
- 2.11 Nonhomogeneous Linear Equations, 107
- 2.12 A Method for Solving Nonhomogeneous Linear Equations, 109
- 2.13 Forced Oscillations. Resonance, 113
- 2.14 Electric Circuits, 121

- 2.15 Complex Method for Obtaining Particular Solutions, 125
 2.16 General Method for Solving Nonhomogeneous Equations, 129

CHAPTER 3

Systems of Differential Equations, Phase Plane, Stability 132

- 3.1 Systems of Differential Equations, 132
 3.2 Phase Plane, 138
 3.3 Critical Points. Stability, 141

CHAPTER 4

Power Series Solutions of Differential Equations 149

- 4.1 The Power Series Method, 149
 4.2 Theoretical Basis of the Power Series Method, 153
 4.3 Legendre's Equation. Legendre Polynomials, 159
 4.4 Extended Power Series Method. Indicial Equation, 164
 4.5 Bessel's Equation. Bessel Functions of the First Kind, 176
 4.6 Bessel Functions of the Second Kind, 181
 4.7 Orthogonal Sets of Functions, 186
 4.8 Sturm-Liouville Problem, 190
 4.9 Orthogonality of Legendre Polynomials and Bessel Functions, 194

CHAPTER 5

Laplace Transformation 200

- 5.1 Laplace Transform. Inverse Transform. Linearity, 200
 5.2 Laplace Transforms of Derivatives and Integrals, 206
 5.3 Shifting on the s -Axis, shifting on the t -Axis, Unit Step Function, 211
 5.4 Differentiation and Integration of Transforms, 220
 5.5 Convolution, 223
 5.6 Partial Fractions, 227
 5.7 Periodic Functions. Further Applications, 237
 5.8 Table of Some Laplace Transforms, 246

CHAPTER 6

Linear Algebra Part I: Vectors 249

- 6.1 Scalars and Vectors, 249
 6.2 Components of a Vector, 252
 6.3 Addition of Vectors, Multiplication by Scalars, 254
 6.4 Vector Spaces. Linear Dependence and Independence, 258
 6.5 Inner Product (Dot Product), 262
 6.6 Inner Product Spaces, 268
 6.7 Vector Product (Cross Product), 269
 6.8 Vector Products in Terms of Components, 271
 6.9 Scalar Triple Product. Other Repeated Products, 277

CHAPTER 7

Linear Algebra Part II: Matrices and Determinants **282**

- 7.1 Basic Concepts, 282
- 7.2 Addition of Matrices, Multiplication by Numbers, 285
- 7.3 Transpose of a Matrix. Special Matrices, 287
- 7.4 Matrix Multiplication, 291
- 7.5 Systems of Linear Equations. Gauss Elimination, 301
- 7.6 Rank of a Matrix, 309
- 7.7 Systems of Linear Equations: Existence and General Properties of Solutions, 313
- 7.8 The Inverse of a Matrix, 317
- 7.9 Determinants of Second and Third Order, 321
- 7.10 Determinants of Arbitrary Order, 327
- 7.11 Rank in Terms of Determinants. Cramer's Rule, 338
- 7.12 Bilinear, Quadratic, Hermitian, and Skew-Hermitian Forms, 345
- 7.13 Eigenvalues, Eigenvectors, 349
- 7.14 Eigenvalues of Hermitian, Skew-Hermitian, and Unitary Matrices, 355
- 7.15 Systems of Linear Differential Equations, 359

CHAPTER 8

Vector Differential Calculus. Vector Fields **367**

- 8.1 Scalar Fields and Vector Fields, 367
- 8.2 Vector Calculus, 370
- 8.3 Curves, 373
- 8.4 Arc Length, 376
- 8.5 Tangent. Curvature and Torsion, 379
- 8.6 Velocity and Acceleration, 383
- 8.7 Chain Rule and Mean Value Theorem for Functions of Several Variables, 386
- 8.8 Directional Derivative. Gradient of a Scalar Field, 390
- 8.9 Transformation of Coordinate Systems and Vector Components, 397
- 8.10 Divergence of a Vector Field, 401
- 8.11 Curl of a Vector Field, 406

CHAPTER 9

Line and Surface Integrals. Integral Theorems **408**

- 9.1 Line Integral, 408
- 9.2 Evaluation of Line Integrals, 411
- 9.3 Double Integrals, 416
- 9.4 Transformation of Double Integrals into Line Integrals, 423
- 9.5 Surfaces, 429
- 9.6 Tangent Plane. First Fundamental Form. Area, 432
- 9.7 Surface Integrals, 438
- 9.8 Triple Integrals. Divergence Theorem of Gauss, 444
- 9.9 Consequences and Applications of the Divergence Theorem, 448

- 9.10 Stokes's Theorem, 454
- 9.11 Consequences and Applications of Stokes's Theorem, 457
- 9.12 Line Integrals Independent of Path, 459

CHAPTER 10

Fourier Series and Integrals **468**

- 10.1 Periodic Functions. Trigonometric Series, 468
- 10.2 Fourier Series. Euler Formulas, 471
- 10.3 Functions Having Arbitrary Period, 478
- 10.4 Even and Odd Functions, 481
- 10.5 Half-Range Expansions, 485
- 10.6 Determination of Fourier Coefficients Without Integration, 489
- 10.7 Forced Oscillations, 495
- 10.8 Approximation by Trigonometric Polynomials. Square Error, 498
- 10.9 The Fourier Integral, 500

CHAPTER 11

Partial Differential Equations **509**

- 11.1 Basic Concepts, 509
- 11.2 Modeling: Vibrating String. One-Dimensional Wave Equation, 511
- 11.3 Separation of Variables (Product Method), 513
- 11.4 D'Alembert's Solution of the Wave Equation, 521
- 11.5 One-Dimensional Heat Flow, 525
- 11.6 Heat Flow in an Infinite Bar, 530
- 11.7 Modeling: Vibrating Membrane. Two-Dimensional Wave Equation, 534
- 11.8 Rectangular Membrane, 536
- 11.9 Laplacian in Polar Coordinates, 543
- 11.10 Circular Membrane. Bessel's Equation, 545
- 11.11 Laplace's Equation. Potential, 551
- 11.12 Laplace's Equation in Spherical Coordinates. Legendre's Equation, 554
- 11.13 Laplace Transformation Applied to Partial Differential Equations, 558

CHAPTER 12

Complex Numbers. Complex Analytic Functions **561**

- 12.1 Complex Numbers, 564
- 12.2 Polar Form of Complex Numbers. Triangle Inequality, 569
- 12.3 Curves and Regions in the Complex Plane, 573
- 12.4 Complex Function. Limit. Derivative. Analytic Function, 575
- 12.5 Cauchy-Riemann Equations. Laplace's Equation, 580
- 12.6 Rational Functions. Root, 585
- 12.7 Exponential Function, 589
- 12.8 Trigonometric and Hyperbolic Functions, 591
- 12.9 Logarithm. General Power, 595

CHAPTER 13

Conformal Mapping 599

- 13.1 Mapping, 599
- 13.2 Conformal Mapping, 605
- 13.3 Linear Fractional Transformations, 611
- 13.4 Special Linear Fractional Transformations, 613
- 13.5 Mapping by Other Elementary Functions, 618
- 13.6 Riemann Surfaces, 625

CHAPTER 14

Complex Integrals 629

- 14.1 Line Integral in the Complex Plane, 629
- 14.2 Basic Properties of the Complex Line Integral, 635
- 14.3 Cauchy's Integral Theorem, 637
- 14.4 Evaluation of Line Integrals by Indefinite Integration, 645
- 14.5 Cauchy's Integral Formula, 647
- 14.6 The Derivatives of an Analytic Function, 650

CHAPTER 15

Sequences and Series 654

- 15.1 Sequences, 654
- 15.2 Series, 658
- 15.3 Cauchy Convergence Principle for Sequences and Series, 661
- 15.4 Monotone Real Sequences. Leibniz Test for Real Series, 665
- 15.5 Tests for Convergence and Divergence of Series, 668
- 15.6 Operations on Series, 675

CHAPTER 16

Power Series, Taylor Series, Laurent Series 680

- 16.1 Power Series, 680
- 16.2 Functions Represented by Power Series, 688
- 16.3 Taylor Series, 692
- 16.4 Taylor Series of Elementary Functions, 697
- 16.5 Practical Methods for Obtaining Power Series, 700
- 16.6 Uniform Convergence, 703
- 16.7 Laurent Series, 711
- 16.8 Analyticity at Infinity. Zeros and Singularities, 716

CHAPTER 17

Integration by the Method of Residues 723

- 17.1 Residues, 723
- 17.2 The Residue Theorem, 726

- 17.3 Evaluation of Real Integrals, 729
 17.4 Further Types of Real Integrals, 732

CHAPTER 18

Complex Analytic Functions and Potential Theory 738

- 18.1 Electrostatic Fields, 738
 18.2 Two-Dimensional Fluid Flow, 742
 18.3 General Properties of Harmonic Functions, 749
 18.4 Poisson's Integral Formula, 752

CHAPTER 19

Numerical Analysis 757

- 19.1 Errors and Mistakes. Automatic Computers, 757
 19.2 Solution of Equations by Iteration, 762
 19.3 Finite Differences, 769
 19.4 Interpolation, 774
 19.5 Splines, 779
 19.6 Numerical Integration and Differentiation, 784
 19.7 Numerical Methods for First-Order Differential Equations, 792
 19.8 Numerical Methods for Second-Order Differential Equations, 800
 19.9 Systems of Linear Equations. Gauss Elimination, 805
 19.10 Systems of Linear Equations. Solution by Iteration, 810
 19.11 Systems of Linear Equations. Ill-conditioning, 814
 19.12 Method of Least Squares, 817
 19.13 Inclusion of Matrix Eigenvalues, 821
 19.14 Determination of Eigenvalues by Iteration, 825
 19.15 Asymptotic Expansions, 829

CHAPTER 20

Probability and Statistics 831

- 20.1 Nature and Purpose of Mathematical Statistics, 838
 20.2 Tabular and Graphical Representation of Samples, 840
 20.3 Sample Mean and Sample Variance, 846
 20.4 Random Experiments, Outcomes, Events, 849
 20.5 Probability, 854
 20.6 Permutations and Combinations, 859
 20.7 Random Variables. Discrete and Continuous Distributions, 863
 20.8 Mean and Variance of a Distribution, 869
 20.9 Binomial, Poisson, and Hypergeometric Distributions, 873
 20.10 Normal Distribution, 879
 20.11 Distributions of Several Random Variables, 885
 20.12 Random Sampling. Random Numbers, 893
 20.13 Estimation of Parameters, 895
 20.14 Confidence Intervals, 899
 20.15 Testing of Hypotheses, Decisions, 909

20.16	Quality Control, 918	
20.17	Acceptance Sampling, 923	
20.18	Goodness of Fit. χ^2 -Test, 929	
20.19	Nonparametric Tests, 932	
20.20	Pairs of Measurements. Fitting Straight Lines, 934	
APPENDIX 1		
References		A-1
